The total loss by fire inside the city limits of Vancouver, during July, was $2,743, with insurance paid of $2,025, leaving the property loss above insurance $718. The total value of property involved was $568,000. There were 36 alarms in all which the department responded to, divided as follows: False alarms 3, exhibition runs 2, smoke scares 1, fires where a loss occurred 16, fires where no property loss resulted 13, fires outside of the city limits 1. A complete list of fires where damage resulted follows:—

July 3rd.—Telephone alarm at 4.46 p.m. Small fire in bedroom at 2300 Birch Street, caused by an electric light being left on the bed. Building owned and occupied by James England. Damage $40, covered by insurance.

July 8th.—Telephone alarm at 6.12 p.m. to 1032 Hastings Street, E., a two-story frame tenement building owned by David and Lam. Small fire in tenement No. 8, caused by sparks from chimney falling on bed through an open stove pipe hole. Damage $40, partly covered by insurance.

July 11th.—Telephone alarm at 12.12 a.m. Fire in wall near bake oven at 1665 Fourth Avenue, E., caused by a defective bake oven. Building owned by Dr. Wilson and occupied by H. Brewer and used as a store and bake shop with apartments above. Damage $15, covered by insurance.

July 12th.—Alarm from Box 135 at 12.47 a.m. Fire in rear of three-story frame building at 209 Hawks Avenue. Cause unknown. Building owned by H. A. Urquhart and occupied by E. Brown and used as a barber shop, pool room and furnished rooms above. Three men had to be assisted from the building with ladders, but no one was hurt. Damage $400, covered by insurance.

Telephone alarm at 7.50 p.m. to 232 Hastings Street, E. Fire in mattress in kitchen on the second floor presumably caused by defective drop light wire. Building owned by Mrs. Mary Rounbotam and occupied by A. H. McLean and used as a rooming house with stores below. Damage $50, covered by insurance.

July 14th.—Alarm from Box 125 at 8.48 a.m. Mattress on fire in bedroom at 1516 Powell Street, caused by spontaneous combustion when filling mattress. Building owned and occupied by Mr. Flack and used as a rooming house. Damage $5.

July 16th.—Alarm from Box 318 at 12.30 a.m. Small fire in blacksmith shop in basement at the Horse Show Building, Chilco and Georgia Street, caused by spark from forge. Building owned and occupied by the Vancouver Horse Show Association. Damage $150, covered by insurance.

July 17th.—Alarm from Box 26 at 5.03 p.m. Fire in bedroom at the Alexander Hotel, Water and Carrall Streets, caused by a man smoking in bed. Building owned by I. H. Hammersley and occupied by G. Graff and used as a hotel. Damage $335, covered by insurance.

Verbal alarm at 9.55 p.m. Automobile 2057 on fire in front of the Terminal City Garage, 2242 Fourth Avenue, W., caused by gasoline exploding when filling gas tank with rear light burning. Car owned by Fraser Valley Gravel and Cement Company. Damage $150.

July 18th.—Verbal alarm at 11.50 a.m. Fire in two-story frame building at 569 Georgia Street. Cause unknown. Building owned by Mr. Stewart and occupied by C. Schwer and used as a clothes cleaning and dyeing establishment. Damage $200, covered by insurance.

July 19th.—Telephone alarm at 4.43 p.m. Fire in electric motor in rear of 544 Howe Street, caused by an overload of current. Building owned by the Electrical Construction Company and used as a store with rooms above. Fire confined to motor. Damage $55.

July 21st.—Verbal alarm at 7.55 p.m. Small fire in basement of the Shaughnessy Lodge apartment house, S.E. corner of Birch and Tenth Avenue, caused by an oil pipe leaking and the oil ran under the furnace and ignited. A door and casement were burned. Building owned by the Guaranty Trust Company and occupied by apartments. Damage $50, covered by insurance.

July 26th.—Alarm from Box 46 at 11.54 a.m. Small fire in automobile 1342 at Smythe and Cambie Streets. Caused by back fire in carburettor. Car owned by F. Million. Damage about $50.

Telephone alarm at 9.50 p.m. Fire in motor in interurban car 1008 in the 2200 block Commercial Drive. Fire was confined to motor. Car owned by the B. C. Electric Railway Company. Damage $250.

July 31st.—Alarm from Box 136 at 5.13 a.m. Fire at 431 and 441 Pender Street East. 431 was owned by S. Petre and occupied by S. Goranson and used as a rooming and boarding house. The blaze started in the basement of this building from some cause unknown and spread to 441, setting the wall and roof on fire. 441 owned and occupied by C. D. Weatherbie and used as a dwelling. Damage $925, partly covered by insurance.

Telephone alarm at 2.40 p.m., to the Canadian Pacific Lumber Company's plant, foot of Salsbury Drive. Pile of lumber on fire caused by sparks from smoke stack.

Total number alarms, 36; false alarms, 3; property involved, $568,000; property loss, $2,743; insurance paid, $2,025; loss above insurance, $718; hose laid at fires, 7,950 feet; chemical used, 802 gallons.

◆

ABOUT THE OFFICE BOY.

Newspaper men usually have little time for books, but Mr. William Banks, junr., of Toronto, has managed to find a few hours here and there in an already busy life to write about William Adolphus Turnpike, an office boy with ambition, who grows up. Mr. Banks, who is a well-known newspaper man seems to have tickled the public fancy with his volume, because, perhaps, it tells of the boy we all know, often kick, but cannot help liking. The office boy hero is first ushered in by the author as an applicant for a position as the office boy for Whimple, a struggling Toronto barrister. He "assumed" the position by dismissing all the other applicants. "Good morning, Mr. Whimple," said Turnpike when the barrister arrived at his office. "Good morning. What are you doing here?" "I'm your office boy," said Turnpike.

Turnpike proceeds to explain that he sent the rest of the "bunch" of applicants away because they were no good, "and I needed the job most anyway." "How do you know?" asks Whimple. "Because," says Turnpike, "I looked 'em over good, and I heard 'em saying how many hours' work they'd do a day and how much they wanted for it, and most of 'em was saying about how they'd showed their other bosses what's what. So I knew they didn't want a job; they just wanted a place to bum in. You should'er heard me shooing 'em away. I told 'em you had made your selection and I was it."

The book is published in Canada and England by J. M. Dent and Sons.

◆

SOME LARGE INCREASES IN CAPITAL STOCK.

The capital stock of West Canada Publishing Company, Limited, has been increased from $40,000 to $200,000, by the issue of 16,000 shares of $10 each, the original capital of $40,000 being subdivided into 4,000 shares of $10 each.

The capital stock of Babson Brothers of Canada, Limited, has been increased from $10,000 to $50,000, by the issue of 400 shares of new stock of $100 each.

The capital stock of the Anglo-Canadian Leather Company, Limited, has been increased from $2,000,000 to $5,000,000, such increase to consist of 30,000 shares of $100 each.

The capital stock of the Finger Lumber Company, Limited, has been increased from $300,000 to $1,000,000, such increase to consist of 7,000 shares of $100 each.

The capital stock of the Metcalfe Rural Telephone Company, Limited, has been increased from $10,000 to $20,000, by the creation of 2,000 shares of new stock of $5 each.

The capital stock of the Imperial News Company, Limited, has been increased from $40,000 to $100,000, by the creation of 60,000 shares of new stock of $1 each.

The capital stock of the North American Smelting Company, Limited, has been increased from $500,000 to $1,000,000 by the creation of 5,000 shares of new stock at $100 each.

The capital stock of the Consolidated Realty Company has been increased from $80,000 to $500,000, such increase to consist of 4,200 shares of $100 each.

Twenty thousand dollars of the capital stock of J. Mickleborough, Limited, held by John Mickleborough, has been converted into $20,000 preference stock bearing cumulative dividends at the rate of 6 per cent., subject to be redeemed by the company at any time at par on payment of dividend to date of such redemption.

The capital stock of the Brockville Lumber Company, Limited, has been increased from $75,000 to $200,000 by the creation of 1,250 shares of new stock of $100 each, of which 1,000 shares shall be preference shares.

The capital stock of Walsh Mines, Limited, has been increased from $100,000 to $1,500,000 by the creation of $1,400,000 shares of new stock of $1 each.

The capital stock of M. Rawlinson, Limited, has been increased from $150,000 to $190,000 by the creation of 400 shares of new stock of $100 each.

The Eaton Cigar Company, Limited, has re-divided the capital stock of the company into 400 shares of $100 each.

DIVIDENDS FOR GRAND TRUNK.

The Grand Trunk Railway has announced a full dividend for the last fiscal half-year on the guaranteed stock, and the first and second preference shares.

After providing for this disbursement, the sum of £16,100 has been carried forward, as compared with £8,500 a year ago.

◆

Plans are, it is understood, being prepared for the proposed electrification of the Canadian Pacific Railway branch between Castlegar and Rossland, B.C. Direct current from the power plant at Bonnington Falls will be used, and the trains will be operated by large locomotives, securing the current from overhead wires. The section of the line to be electrified is thirty miles in length, and has heavy grades and numerous curves.

FOR FIRE INSURANCE MEN

The Hudson Bay Clan is the name of an interesting monthly devoted to the interests of the representatives and policyholders of the Hudson Bay Insurance Company. It is an excellent house organ and deals with many matters of interest to the agents and policyholders. There are several attractive articles on fire insurance subjects.

◆

Forty-three life insurance companies have registered under the foreign companies act in Saskatchewan to transact life insurance. Of this number, 34 are Dominion licensees.

A by-law has been carried at Bradford, Ont., to grant a loan of $20,000 to the Watsons, Limited, manufacturers of wire screens, now doing business at Toronto, but who are removing to Bradford.

COLONIAL STOCKS AND BONDS

Analysis of Their Position—Where Canadian Securities Stand

London and New York financial journals are taking an increased share in Canadian affairs and during the past few months, several analytical articles of unusual interest have appeared. The London Economist, in a recent issue, discusses colonial stocks and bonds, and Canadian securities naturally figure prominently in the article. The writer notes that the public taste for high yields and "sketchy" security is on the wane, but admits that there is another side to the question. He says:—

Canadian and Trustee Stocks.

"The quiet change that is taking place in the public's choice of investments makes it opportune to indicate the range of securities which colonial trust stocks now present. The new South Australian loan, as the latest comer, is, of course, obliged to offer attraction slightly superior to most others in the list in order to obtain public support; but it will be seen from the following comprehensive examples that an average of 4 per cent. is readily obtainable from Canadian and colonial trustee stocks:—

"Where the securities are definitely redeemable at a comparatively early date two yields are given, the second making allowance for redemption at par. The first represents the return on interest alone. By a careful selection it is possible to secure a return of about 3¾ per cent., with a certain capital appreciation of about 20 points, but the period is generally rather long.

Colonial Bond Issues.

"Most of the colonies have bond issues as well as those of inscribed and registered stocks. Speaking roughly, it may be said that the public sell bonds and buy inscribed or registered securities. For the bonds there is usually a good demand on behalf of insurance companies, discount houses and the like. The average investor does not care for a short-dated security, and many of the bonds now run out fairly quickly. Besides, an element of risk always attaches to a holding of bonds, which is absent from stock inscribed or registered into the holder's own name. It is not everybody who can deposit bonds with a bank for safe custody; and where this is not done the risk of loss is supplemented by the trouble of cashing coupons. These are trivial things to the City man accustomed to deal with them, but the average investor prefers to have the stock in his own name, and either to receive his dividends direct or else to have them paid into his bankers upon his instructions. Inscribed stock when sold has to be transferred, as is well known, by the seller signing a form of transfer made out in the books of the bank fathering the issue, and if his personal attendance is not convenient the seller can sign a power of attorney enabling him to dispense with putting in an appearance himself at the bank. For a power of attorney the Bank of England charges 11s. 6d.; other agents as a rule charge 10s., that is, the stamp duty impressed upon the deed conferring the power of attorney. Registered stock is transferable on a deed of transfer, which can be signed in the ordinary way, and which involves no coming to town to sign bank books.

Average Yield of Canadians.

Canadian and colonial city stocks pay on an average about 4½ per cent. on the money, and the following short selection gives an idea of what is available in the way of registered and inscribed stocks in this section:—

Description.	Dividends Due.	Date of Redemption.	Price.	Pay per Cent., allowing for Accrued Interest & Redemption when over Par.		
				£	s	d
Bloemfontein City 4 % Inscribed	1 Jan. & July	1954	93	4	6	0

Winnipeg City 4½ % Registered	,, ,,	1943-63	97	4	12	6

"Colonial bonds are much less easy to obtain than colonial inscribed stocks, for which the principal reason is that bond issues are small as compared with those which come out as inscribed or registered. Care has been taken in the above tables to quote only such stocks as can be bought at the present time. All the above are on offer in the market as this article is being written.

Bonds Not Easy to Get.

"Of bonds there are very few available, but it may not be out of place to conclude with a brief catalogue of the colonial city bonds that can be obtained. In this list it will be noticed that the returns range from 4¼ per cent. up to 5⅛ per cent., while in the last five examples are included two Government 4 per cent. bonds, which give an average yield of £4 6s. per cent., allowing for redemption:—

TRUST COMPANIES' LEGISLATION BEING SHAPED

The Finance Department at Ottawa is commencing the preparation for the next session of parliament of a bill for the general regulation of trust companies, says a dispatch. Heretofore, each trust company incorporated has secured its powers by a special act. They are not all similar, and in some respects there is conflict with the Bank Act. The intention is to have a general act to which all companies must conform as banks do to the Bank Act.

◆

Insurance is, perhaps, the greatest sign that a young man or a young woman can give of forethought and thrift, and thrift in early life, which abundantly repays them. They begin to receive bonuses before they know where they are, and insurance, practically speaking, and apart from virtues to which I have alluded, has this further advantage, that at a time where a young man or young woman wished possibly to put a sum into business on which they may depend for their livelihood, they can borrow against their insurance, when otherwise they would have no security to offer. That is a detail, but in my own experience of life it is not an unimportant detail. And I think those who have it at heart to promote the success of insurance should not omit that argument in pressing the advantages of insurance on those who are unwilling to make the very small sacrifice necessary in order to secure an abundant provision for old age.—Earl of Rosebery at Edinburgh.

MUNICIPAL GOVERNMENT

The Royal Commission on Municipal Government in British Columbia, which recently published its report, made a thorough investigation of various forms of municipal government. In some quarters it was suggested to the commission that every large city municipality should be given power to abolish the present form of government by mayor and council, and to entrust all its affairs, legislative as well as executive, to a small body of commissioners elected by the city at large, and paid an adequate remuneration for devoting their whole time to the city's business. This is what is usually called the commission form of civic government. It has been adopted in a number of cities we visited in the United States, the largest of them being Oakland and Omaha. During the short time it has been in force (in no case exceeding twelve years) the results obtained appear to be satisfactory. In Boston, however, two years ago, when the city was obtaining a new charter, they investigated the commission form of government and decided against it, but did away with the two branches of the council and reduced the membership to the nine aldermen of the present council, leaving the executive power in the hands of the mayor. In Portland, Oregon, and Los Angeles, California, proposals to adopt commission government have been defeated, whilst in New Orleans (a city of about 400,000) commission government came into force on December 2nd, 1912.

It is interesting to know that while several Canadian cities are considering the adoption of the commission form of government, the British Columbia commission think it would be a mistake to adopt such a system in that province. For one thing, they consider that it places too much uncontrolled power in the hands of a few men. The commissioners, as a rule, do not exceed five in number. The result is that three may control a city, and among the three would often be found one man who would dominate the other two. The tendency, therefore, is strongly towards one-man government. If the city autocrat happens to be a wise and reasonable man, the results would, from one point of view, be good. From another point of view, Messrs. Keary, Maclean and Bull, our Pacific Coast commissioners, think that, even in the case of a good autocrat, the results would be bad. Where there is a fairly numerous council, a number of men are always being trained in the conduct of public business by the discussion of affairs in the council and its committee. The training thus received fits them for the discharge of higher representative duties. It will frequently be found that men who have distinguished themselves in the legislature or in parliament have received their first training in a municipal council. Under commission government the supply of such men would largely, if not wholly, fail. "We observed," says the British Columbia report, "that public discussion of civic affairs practically ceased where commission government obtained. The commissioners go through the form of holding public meetings; but it is an empty form, as there is no discussion in the proper sense of the term, everything being arranged beforehand in private meeting. It is obvious that if the affairs of the city fall into the hands of two or three bad men under the commission form, they might do the city an irreparable injury, as they are usually elected for a term of from two to four years."

To guard against this danger the clumsy device of "recall" has been adopted. The "recall" means that if a certain percentage of the electors become dissatisfied with the commissioners or their measures, they may demand a new election. In practice this device has been found awkward and unworkable. "If, on the other hand, it could be worked more quickly and smoothly than at present, it would probably have the effect of keeping the political pot boiling nearly all the time. In Galveston, the first city to be governed by an elected commission, the recall is not in force, and it was there contended that it is more of an injury to the commission plan than a benefit, as business-men will not take office where they may be compelled to go through one or more campaigns during a single term."

In some cities in the United States, the number of citizens willing to govern the city at from $3,000 to $6,000 a year has been found to be very embarrassing. At the first election in the city of Spokane five commissioners were to be elected, and ninety-two candidates presented themselves. This *embarras des richesses* has led to a weeding-out of candidates by primary elections. In short, the adoption of commission government would probably, necessarily lead to the introduction of the cumbersome political machinery in force in the United States.

It was earnestly contended at the British Columbia inquiry, by some of the advocates of commission, that when a city reached the size, say, of Vancouver, it became impossible under the aldermanic form of government properly to carry on public business. It was asserted that the executive duties of an alderman, if properly discharged, would consume all his time. If this be so, how is it that municipal government is so successfully conducted in Great Britain? It may possibly be that there councils appoint competent officials, and give them greater latitude in the discharge of executive duties than is accorded to them amongst us; or it may be that in Great Britain municipal government is able to enlist the services of a leisure class with which there is nothing corresponding here.

If for any reason it should become necessary in any municipality to relieve the council to a greater extent than at present of their executive duties, there is a possible solution in the formation of a board of control. Such boards are in existence in several of the large cities of Canada, such as Montreal, Ottawa, Toronto, Winnipeg, Calgary and Edmonton. In Winnipeg the council is composed of a mayor, four controllers, and fourteen aldermen. The mayor and controllers, who form the board of control, are elected annually by a vote of the entire city. One alderman is elected annually from each of the seven wards into which the city is divided, and holds office for a term of two years. Persons eligible for election as controllers must be holders of property rated on the assessment roll of the city at the value of $2,000 over and above all encumbrances against the same. The council as a whole is the legislative body, and carries on its legislative work through standing committees in the usual way. The board of control is the executive body, and as such deals with all financial matters; regulates and supervises expenditures, revenues, and investments; directs and controls departments and nominates heads of departments; prepares specifications, advertises for tenders for work, material, and supplies required by the city; inspects and reports to the council upon all municipal work being carried on or in progress in the city; and generally administers the affairs of the city, except the public schools, public parks, and the police and license departments. The Winnipeg scheme appears to have worked satisfactorily.

Finally, the British Columbia commissioners recommend that municipalities having a population of 15,000 or over shall have power to pass a by-law (which must be submitted to the electors in the same way as any referendum) providing: (a) That the council shall consist of the mayor or reeve, the usual number of aldermen or councillors, and from two to four controllers; (b) that the mayor or reeve shall be elected annually, and that the aldermen or councillors and controllers shall be elected for a term of two years, half retiring each year; (c) that the controllers shall give all their time to the business of the municipality, and shall receive remuneration for their services; (d) that the board of control (which shall consist of the mayor or reeve and the controllers) shall have power to employ or dismiss all employees of the municipality, including heads of departments; (e) that the board of control shall have full authority over all the executive work of the municipality, subject to the right of the council to reject, vary, or refer back its actions by a two-thirds vote.

TORONTO'S HARBOR BONDS

The Toronto Harbor Commissioners have sold $1,500,000 of bonds in New York at 89½. They could have sold them in London to net 90, but as the city have $6,000,000 worth of bonds under option till September 1st at a satisfactory price, the civic authorities did not wish the harbor bonds sold overseas. These facts have gone broadcast, and in their travels have obtained decorative additions. It was said, for instance, that the city "held a club" over the heads of the harbor commissioners and threatened to withdraw the city's guarantee of the harbor bonds, were they sold in London. A member of the harbor commission tells *The Monetary Times* that there is not and has not been the slightest friction between the two authorities. That is as it should be. Both bodies are working for the good of Toronto, and can, therefore, afford to consider each the other's case in the money markets.

MONTREAL'S GRAIN BLOCKADE

Grain exporters and shipping men are complaining of a situation which has developed in connection with the grain trade through the harbor of Montreal. There were recently waiting to unload about twenty lake grain boats and others were on the way, making a serious blockade in the harbor. Over 800,000 bushels were awaiting an opportunity to be unloaded the other day.

Several causes are said to be responsible. The elevator space in the harbor is insufficient to take care of all the grain offering. The total storage capacity of the harbor is about 5,000,000. To this is being added as rapidly as possible a total of 2,500,000, making altogether 7,500,000 capacity in the harbor. But it is claimed that this is altogether inadequate, and that a total of 10,000,000 bushels will be required. A new elevator, therefore, especially for export trade, with a capacity of nearly three million bushels, will be built by the harbor commissioners. This will bring the total capacity of the elevators of the port to 10,732,000 bushels.

Another trouble is apparently the lack of ocean grain boats. The regular liners are insufficient to take care of all the freight offering, and apparently there are not sufficient inducements to tempt the tramp steamers to visit port. The insurance conditions are said to make trips to the harbor unattractive. As a result, there are not enough bottoms to take the grain away as rapidly as it arrives. Ten years ago there were practically no elevators in the port, yet large quantities of grain were shipped through there by unloading vessels direct into steamships. The means employed were the floating elevators, these being capable of transferring about 40,000 bushels per hour from the lake into the ocean vessels. If the ocean vessels were now available, a large quantity of grain could be handled in this manner irrespective of the elevators.

A third cause of the congestion is the alleged fact that rights over a number of bins have been secured by some of the local grain men, and that these are making use of the bins to store their grain, awaiting higher prices. In particular, it would appear some of these bins are being used to store oats. This is causing indignation, and there has been discussion as to how to force the owners of the grain to ship it out.

A grain man tells *The Monetary Times* that the trouble is that the commissioners allowed the elevators to be used to store grain, and now, when it is too late, they are trying to rush matters when there are no tramp vessels in port to receive cargoes. The charge is ¼ cent per bushel for every ten days that the grain is stored.

Harbor Commissioner Robertson states that the elevators are under public license, and the commissioners cannot force anyone to take his grain away so long as he pays the charges. The only way out of the trouble, so far as he can see, is to charge those holding grain for speculative purposes such a high rate that they would not be able to afford to block the elevators. This is the course which appeals to the commissioners, and there is likelihood of it being put into effect.

LOANS ON LIFE INSURANCE

Since the financial stringency became pronounced, still more has been heard of loans on life insurance policies. In past years, it was not uncommon to hear those in the life insurance business talk considerably of the loan as a great feature of the policy. Times have changed. Efforts are being made by the officials to reduce what has become almost an evil of policyholders borrowing money upon the reserve value of their policies.

Mr. F. F. Dryden, president of the Prudential Insurance Company, of Newark, has issued a statement on the matter, and makes the somewhat astonishing statement that about one ordinary policy in four held by its policyholders has a loan lien against it. He believes that experience has fully demonstrated that very frequently loans are obtained without any real necessity, and that "loading down a policy with loans is not only the frequent cause of its ultimate lapse, but that under such circumstances the policyholder becomes the ready prey to that pirate of the business known as the 'twister.' "

Borrowing on a policy has been well described as "borrowing from the beneficiary," and the disappointment of beneficiaries on finding that the amount payable under a claim has been diminished on account of such loans is well known.

Mr. Dryden has, therefore, asked the co-operation of his agents along definite lines of action.

"First," he says, "strive for a reduction in the number and amount of new loans. When soliciting insurance do not make a special feature of the loan privilege, as the casual mention of it should be sufficient in most cases.

"Again, when a policyholder applies for a loan, while you should remember that he is within his rights in so doing, you should, nevertheless, call his attention in a tactful and friendly way to the danger of mortgaging the policy, and of thus reducing the protection and increasing the probability of eventual lapse. If he finally decides to secure a loan, then show him the wisdom of applying for only such an amount as is absolutely necessary to meet his emergency.

"Second, strive for repayment or reduction of outstanding loans and collection of interest. As opportunity offers, policyholders should be urged to repay their loans in full, if possible, or at least by regular instalments of $5 or upwards. In any event, the interest when due should be collected whenever possible, thus avoiding any increase in the original loan."

The life insurance loan is not as popular with the insurance companies as it once was. It should be far less popular with policyholders. *The Monetary Times* would like to see it go altogether.

SMALL CHANGE

And the saddest of all are I.O.U.

* * * *

And the sweetest of all is "over-subscribed."

* * * *

Is bumper the wisest word to use to describe a prospective large crop?

* * * *

The Alberta and Great Waterways is the most rumor-riddled railroad on record,

* * * *

The proposed Toronto Street Railway deal may be entirely at the Hon. Adam's Beck and call.

* * * *

Now that Thomas W. Lawson, of Boston, is scattering his oratory over the Western crop, it will surely be good.

* * * *

North Vancouver's is the only Canadian August issue in London to date. It takes our Pacific Coast to set the pace.

* * * *

Sir Thomas Lipton will exhibit at the Panama Exhibition despite the British Government's intention not to do so—more of Sir Thomas' tease.

* * * *

The following statement of policy is taken from one of the many journals of the Industrial Workers of the World: "The small cockroach capitalists are robbed as much by the big thieves as are the farmers. Our only problem is to organize the real wage workers into one big union, whether they are farm wage workers, or those working in mills, mines or forests. To —— with all the rest. The farmer robs the men who work for him, no matter if all the proceeds do not stay in his hands. He runs his farm for profit. This profit he gets from his wage slaves. We are at war with him as well as with all other capitalists, large and small." This is the stuff that fills empty heads and organizers' pockets.

QUEBEC FIRE PREVENTION LEAGUE

To try and reduce the fire waste in Montreal and the Province of Quebec, generally, a joint fire committee has been formed by the Manufacturers' Association, the Board of Trade, the Montreal Electric Association, the Montreal Architects' Association, the Builders' Exchange, and the Fire Underwriters' Association. Representatives of these organizations have met, and formed a committee, composed of Messrs. Howard Murray, W. E. Findley, Wardleworth, Perrault and R. L. Werry, to draft a form of constitution for the organization, for which incorporation will be sought.

◆

"Wishing you continued success with your excellent publication, which is extremely well thought of throughout the Canadian West." Extract from a letter from a Saskatchewan reader of *The Monetary Times.*

RAILWAY EARNINGS

The gross earnings of the Canadian Northern Railway for the week ended August 7th, were $418,700,, and for the corresponding period last year, $407,300, an increase of $11,400. From July 1st to date they were $2,347,500, as compared with $2,237,000, an increase of $110,500.

The Canadian Pacific Railway's earnings for week ended August 7th were $2,581,000, being a decrease of $125,000.

Traffic earnings from August 1st to 7th, 1913, of the Grand Trunk Railway system were as follows:—1913, $1,149,584; 1912, $1,109,682; increase, $39,902.

◆

Over $1,000,000 has been spent by the Saskatchewan Highways Commission, with headquarters at Regina, on improving the roads throughout the province since the opening of the season.

PERSONAL ACCIDENT INSURANCE TRANSACTED IN CANADA

Twenty-three companies, under the supervision of the Dominion insurance department, are doing personal accident insurance in Canada. This business is rapidly assuming large proportions, the premiums last year amounting to $2,023,057. The craze on this continent for so-called "hustle" is responsible for thousands of accidents annually, and the need of accident insurance is demonstrated daily.

The losses incurred by these Canadian companies during 1912, totalled $999,582, and the claims paid were $984,168. There were unsettled claims of $162,352, not resisted, and $5,353 resisted, a very small amount in view of the numerous cases of fraud encountered by accident insurance companies. The accompanying table gives details of the business in Canada for 1912.

The following accident insurance committees were elected at the recent Quebec convention of the International Casualty and Surety Underwriters:—Personal health and accident section (stock companies), vice-president, Wilfrid C. Potter, Preferred Accident; Bertrand A. Page, Travelers; Walter C. Faxon, Aetna Life; Hedley R. Woodward, Fidelity and Casualty; C. Clark Howard, Massachusetts Bonding and Indemnity.

Personal health and accident section (mutual and assessment companies), vice-president, M. W. Van Auken, Commercial Travelers' Mutual Accident Association of America; H. L. Doud, United Commercial Travelers; S. W. Munsell, Masonic Mutual of Springfield; J. W. Hill, Iowa State Traveling Men's Association; R. M. Sweitzer, Illinois Traveling Men's Association.

The First International Exposition of Safety and Sanitation ever held in America will take place in New York City on December 11th to 20th, under the auspices of the American Museum of Safety. Safety and health in every branch of American industrial life, manufacturing, trade, transportation on land and sea, business, engineering, in all of their subdivisions will be represented at this exposition. It will be the first step toward making a representative exhibition of the progress of safety and preventive methods in America.

By a special act of Congress, exhibits from Europe and other foreign countries are to be admitted free of duty. European employers have cut their accident and death rate in half by a persistent campaign for safety. There are 21 museums of safety in Europe. All of these museums will contribute to the American exposition.

In the United States every year 40,000 workers are killed, and 2,000,000 are injured, while 3,000,000 are ill from preventible causes, and the record in Canada is comparatively none the less appalling. A conservative estimate of the wasted wage-earning capacity of those ill from preventible causes, for one year is four hundred million dollars.

Just how little it takes to injure or destroy the eye and just how many ways there are of doing either would be very difficult to enumerate (a writer in the National Agents' Record says). The last month has presented an epidemic of such injuries. A policyholder in Maine was leading a cow. The cow slipped and threw up her head. Her horn penetrated the man's eye, destroying the sight. A policyholder in Wisconsin while fishing was stung in the eye by a sand fly. His eye was completely closed and out of commission for some days. A policyholder in Alabama went into his back yard after dark, ran into the clothes line, which badly damaged his eye. A policyholder in Ohio brushed the sleeve of his coat across his eye. It was seven weeks before he could use the eye. A policyholder in New York walking across the street was struck in the eye by a lighted cigar stub thrown by some man riding in the elevated train.

The annual meeting of the Detroit Conference of accident underwriters will be held at the Clifton Hotel, Niagara Falls, Ontario, September 3rd to 5th inclusive.

SASKATCHEWAN CROP PROSPECTS

Monetary Times Office,
Winnipeg, August 20th.

Commissioner J. Maclure Sclanders, of Saskatoon, in writing to *The Monetary Times* has this to say about the crop and the harvest: "Having carefully investigated the crop situation: I can only say that as an agricultural people whose sole source of income is derived from our crop, we have every reason to be encouraged. Some pessimists are apt to overlook the fact that the influence of the present financial constipation does not and cannot extend to our harvest—the sole source of our revenue. I have avoided the word "stringency," the continual repetition of which in our press becomes a little trying, more especially as the term is extreme and does not properly apply to the situation.

"It seems to me that crop conditions this year are more favorable than for some years past. Wheat will average for this province probably a couple of bushels per acre more than last year, and perhaps it may turn out even a little better. With the continuance of the present weather, the quality will average satisfactorily, and damaged grain feed will not be anything like so abundant as during the past two years.

"When the broken and unsatisfactory falls of the past couple of years are considered, I am satisfied that our harvest work should be through earlier this year. Cutting ought to commence in some parts about 17th August, but my impression is that it will not be general throughout this district until between the 21st and 25th. This is just about normal.

"The increase in acreage under wheat for the present season is not so great as in previous years. Oats will show a marked increase, so will barley; flax, however, will likely indicate a fall of from 15 to 25 per cent.

"It is very encouraging for those who have the best interests of our country at heart to contemplate the increases in the growing of oats and barley. The increased production of these and other crops confirms the fact that our people have at last awakened to the wisdom of mixed farming, and to the necessity of working twelve months of the year on the farm, just as business men must do in their offices.

REPORTS FROM THE WORLD'S CORNFIELDS

Percentages of Dominion's Crops—United States Outlook—World-wide Returns

Representing a standard or full crop by 100, the average condition throughout Canada of fall wheat is expressed as 77.75, of spring wheat as 87.62, of oats as 87.45, of barley as 87.58, of rye as 85.00, of mixed grains as 89.33, and of flaxseed as 83.85.

The percentages of the standard condition of spring wheat, barley, and rye represent the promise of yields per acre for spring wheat of six, for barley of five, for rye of two, and for flax seed of one per cent. above the average yields per acre of the last five years. The condition of the oat crop promises a yield equal to the average, is the summing up of crop conditions contained in a bulletin issued by the Census and Statistics office.

All the field crops of Canada on July 31st, excepting only fall wheat (77.75), hay and clover (74.57), and alfalfa (76.35) are reported as having a condition above 80, the range being from 82 beans and corn for husking to 89 for potatoes and mixed grains.

In the three northwest provinces spring wheat is reported as 84.60 in Manitoba, 89 in Saskatchewan, and 88 in Alberta, the other grain crops being correspondingly high, barley, especially in Saskatchewan and Alberta being 90 per cent. or over. Root crops in the northwest provinces are also particularly good.

Yields per Acre.

The condition of buckwheat in the Maritime Provinces and in Quebec is 90 and over; but in Ontario it is down to 73.43. Flax seed is above 80 in the northwest provinces, and in Saskatchewan, where the great bulk of this crop is grown, the percentage condition is 84.17. Sugar beet, grown for beet root sugar in Ontario and Alberta, is 80.44 for the former and 92.31 for the latter province.

The preliminary estimate of the yield per acre of fall wheat is 22.38 bushels, which for the harvested area in Ontario, Manitoba, Saskatchewan, Alberta and British Columbia of 825,800 acres indicates a total yield of 18,482,000 bushels as compared with 16,396,000 bushels from 781,000 acres in 1912. This yield is 13 per cent. above that of last year.

The average yield per acre of hay and clover is estimated at 1.23 ton, indicating a total yield of 9,396,500 tons from 7,621,600 acres, as compared with 11,189,000 tons from 7,633,600 acres or 1.47 ton per acre in 1912. Alfalfa, with an average yield per acre of 1.38 ton, shows an estimated total production of 143,000 tons from 103,250 acres as compared with 310,100 tons from 111,300 acres, or 2.79 tons per acre in 1912.

Crop reports from points in the southern section of Vancouver Island are suggestive of satisfactory results. Farmers have begun cutting this week and excellent crops are assured unless conditions radically change.

There is an average yield of hay of excellent quality in New Brunswick. Grain and root crops promise a good yield. The acreage in potatoes is estimated to be a little larger than that of last year, and the new potatoes which are on the market are of excellent quality. It is believed this crop will turn out well and be profitable this year. The crops of small fruits has been light, and prices high, and the apple crop also will be light.

A Winnipeg correspondent writes *The Monetary Times*: "Harvesting has been commenced in Manitoba, but cutting will not be general in Saskatchewan for ten days or two weeks yet. I am still of the opinion that the crop in Manitoba will average about 17 or 18 bushels; the yield of wheat in Saskatchewan will probably average 20 bushels. The oat crop in both provinces is poor because of the fact that this crop is sown on spring plowing, which is always more or less effected by the drought. The flax crop in Saskatchewan is poor for the same reason."

From Personal Investigators.

Mr. C. W. Rowley, manager of the Canadian Bank of Commerce at Winnipeg, tells *The Monetary Times* that from the latest reports received from the branches throughout the Western provinces they understand that the crop is maturing in a satisfactory manner under ideal conditions, and in many sections harvesting has already commenced. The reports show that we may expect a good average crop, many think better than the average, of an exceptionally good quality. There will be districts which will not come up to expectations, but in a large country like this, this is sure to happen, and in many cases is caused by inexperience or careless agricultural methods. The railways are making preparation for handling a large crop. General merchants are confident and look for a good fall business, and all banks are meeting legitimate demands and feel confident that the coming crop will be financed without undue stringency.

Sir Donald Mann, who has returned east from a trip to the coast, says the crop this year will be the best on the average ever known in the western provinces.

"In a few districts," says Mr. W. A. Black, vice-president of the Ogilvie Milling Company, "the crop is reported to be light, but the general average will set that right, and the total yield of the country will be good if the conditions under which the harvesting has to be done are favorable. With the weather good and a fair supply of labor, the crop will be a record for Western Canada."

"We are on the eve of reaping the largest crop ever produced by Western Canada," says Mr. A. Kelly, president of the Western Canada Flour Mills, "and I think the banks are to be commended in holding their money to take care of the crop. I believe the fact of the banks refusing to loan except for legitimate commercial purposes will prove to be the best thing that has happened this country in a long time. I think the grain available for sale in the three western provinces this year will net the farmers on their wagons at their nearest station $140,000,000, not to say anything about cattle, hogs, sheep, poultry, dairy produce and vegetables. The returns of the grain alone will be about 20 per cent. more than the entire paid-up capital of all the banks in the Dominion."

The area under wheat is placed at 9,816,300 acres, or 57,900 acres more than in 1912. The area in spring wheat is 8,990,500 acres, or 13,100 acres more than in 1912, and the area to be harvested of fall wheat remains at 825,800 acres.

Elevators and Estimates.

The Canadian crop which will add $230,000,000 cash wealth to western provinces is safely made and harvesting is under way, says Col. Davidson, of the land, industrial and immigration departments of Canadian Northern Railway. Reports and personal observation were the basis for estimates as follows: Wheat, 225,000,000 bushels; oats, 250,000,000 bushels; barley, 40,000,000 bushels; flax, 8,000,000 bushels.

The Winnipeg office of James Carruthers & Company, Limited, says: "Practically all the elevator men in the building say crops of all grains are very good. This rain will help to ripen grains. Our weather has been perfect for six weeks, resulting in all grains looking at their best. The crop is going to move early unless we have a wet harvest, which is unusual."

The Alberta grain crop will be fully as large as the crop of a year ago, according to a statement issued by the secretary of the United Farmers of Alberta. The grain will be of much superior quality to that of last year, much of that crop having been unfit for the milling market because of frost. Transportation and elevator facilities will be much better than last year, and the harvest will be over two weeks in advance.

The elevators owned by the Saskatchewan Co-operative Elevator Company have a total storage capacity of 5,750,000 bushels, according to a statement given out by the company officials at Regina. During the present year 50 new elevators have been erected by the company at various points throughout the province, making the total number of storage elevators owned by the company 210.

The provincial government officials at Regina have prepared their estimates of the grain yield for 1913. In every instance, with the exception of flax, it is estimated that there will be an increase of production over that of last year. It is expected that there will be a reduction in the yield of flax of 631,296 bushels. Taken on the whole it is expected that there will be an increase in the grain production over that of last year of 33,392,013 bushels.

According to the figures compiled by the department the grain yield for the present year, for Saskatchewan, will be 270,670,446 bushels. The figures are made up as follows:—

Wheat	125,557,014
Oats	121,435,630
Barley	10,137,897
Flax	13,539,819

It is expected that the yield of wheat will be almost 20,000,000 bushels greater than that of last year, when the production was 107,167,700 bushels.

United States Crop Report.

The August crop report of the United States department of agriculture gives promise of a corn crop of 2,672,000,000 bushels compared with 3,124,746,000 bushels last year. The production of wheat is estimated at 744,000,000 bushels compared with 701,000,000 bushels estimated last month, and 730,267,000 bushels, the final figures for 1912. The oat crop is estimated at 1,028,000,000 bushels against 1,418,337,000 last year, and barley 168,000,000 against 223,824,000 bushels.

The following table contains the figures of the 1913 wheat crop of the 41 wheat producing countries of the world compared with the figures for 1912, as estimated for Dornbusch's floating cargoes list. Dornbusch has used the official figures as published by the International Agricultural Institute for Bulgaria, Denmark, Spain, Hungary, Italy, United

Kingdom, Luxemburg, Russia-in-Europe, India and Japan. According to Dornbusch's estimate, this year's crop will be about 100,000,000 bushels larger than last year's, and the official figures published so far seem to support this view.

	1913, bushels.	1912, bushels.
France	320,000,000	333,968,000

World's total	4,089,600,000	3,987,805,000

(a) 63 governments. (b) 26 governments.

BRITISH TAX ON CANADIAN INVESTMENTS.

An important income-tax decision was given by the House of Lords recently, the question being whether the Liverpool and London and Globe Insurance Company, which has a head office in England and carries on business in various parts of the world, can be charged income-tax in respect of the interest and dividend on investments in the United States, in Canada and in Australia, which are spent in those countries, none of the profits in question being remitted to England.

The company contended that it was not liable, but Mr. Justice Hamilton and the Court of Appeal held differently.

Lord Shaw, in delivering judgment, said that in his opinion the lengthy argument presented for the company was without any foundation in fact or in law, and that the appeal should be dismissed with costs. Lord Parker, Lord Loreburn and Lord Mersey concurred, and the appeal was accordingly dismissed with costs.

NOTHING IS WRONG WITH CANADA.

"There is nothing the matter with Canada, but there is a good deal wrong with the world's supply of money. Had it been more plentiful, there would not have been any criticisms over our borrowings. Canada was singled out for criticism because she was the most prominent borrower, but the trouble lies not with Canada, but with the world. The British investor has become a little more discriminating, but his interest in Canada and Canadian offerings has not flagged at all. Canada's credit has not been hurt in any serious way, but we must be careful not to do anything which will injure our standing."
—Sir Edmund Walker in an interview.

OPTIMISTIC VIEW OF THE FUTURE

Sir Felix Schuster, a Leading Authority, is Hopeful—Interdependence of Money Markets

An optimistic view of the future was taken by Sir Felix Schuster, Bart., in his address at the half-yearly meeting of the Union of London and Smith's Bank. Sir Felix was a visitor to Canada a few years ago and is principal of the London banking house, Schuster and Company. He joined the directorate of the Grand Trunk Railway not long since. Sir Felix has long occupied a prominent position in the banking and commercial world in London, and takes considerable interest in Canadian developments.

The conditions of the last half-year have been favorable for banking, he said, and not for a long time has there been such a high bank rate during the first six months of the year. There has been only one change, on April 17, from 5 per cent. to 4½ per cent. This high rate has been due to many complex causes, one of the most important and satisfactory being the continued activity and prosperity of the country's trade. The official returns again show record figures; our trade has grown and developed in many directions, and it appears to rest on a thoroughly sound foundation. It is most satisfactory to reflect that, in spite of many adverse circumstances, which are well known, this trade could be maintained at such a high level without disturbance of any kind of credit in the commercial world.

SIR FELIX SCHUSTER, Bart.

When we last met there was every hope that peace would soon be restored on the Continent. That hope has been sadly disappointed; but our one consolation must be that co-operation and harmony among the Great Powers have, so far, been maintained and probably strengthened. On financial affairs the continuance of the disastrous wars in the Balkans and preparations for war elsewhere could not but be of the greatest importance, and I think it reflects credit on the money markets of Europe that the strain has stood so well, for the economic loss has been enormous.

Cost of the War.

A return has been published which estimates the loss in killed and wounded at 348,000 and the cost in money at £246,000,000. These figures have been truly described as prodigious and appalling, and even if we may hope that they may to some extent be exaggerated, yet the effect of such expenditure is incalculable. Thus it is not surprising that it should make itself felt in the investment markets, especially as, owing to the continuous growth and development of trade and of new countries, the demands for capital from various directions have been on an enormous scale. Until the end of the half-year these fresh issues of capital were comparatively well taken up by the public; but then it became manifest that the supply exceeded the demand, and the stock exchanges were no longer able to absorb the multitude of new issues that were being offered.

Fall in Price of Securities.

The interdependence of the various money markets of the world has been very clearly shown. Paris, usually a most powerful factor among the money markets of Europe, has apparently been the source on which the Balkan States have hitherto relied for financial assistance, and with new and large Government issues of her own, her power of absorbing new issues became lessened. In Germany, again, where the monetary strain had been great at the end of 1912, the pressure, although somewhat diminished, continued, and new and large issues of her own Government made continuous demands on her money market. In the United States trade was active and absorbed floating capital, while the fear of legislation and the uncertainty of the effect which the new tariff and the proposed currency measures might produce made investors apprehensive.

It was thus on our market that the international demands came with greater force than usual. With trade so active and with increasing demands for gold from various quarters, it was therefore only natural that a general readjustment in the value of investments and the earning power of capital should take place. This is the process which we appear to be going through now, and it is a process which is not confined to this country, but is universal.

Stock Exchange Values.

Special reasons have contributed to it, and when these special reasons have disappeared, as they may before long, there can be little doubt that a reaction in the opposite direction will set in. It was only during the month of June that the greatest fall in the price of securities occurred. From tables published by the London Bankers' Magazine, giving the prices of 387 representative securities, it appears that there was during the half-year a fall in the value of these securities amounting to £130,000,000, £88,000,000 of which fall took place in the month of June. In the six and a half years during which these tables have been prepared the fall in the value of these securities has amounted to £447,000,000, and if the tables dated back to ten years before that period the depreciation would be more enormous still. But against these figures must be set the great prosperity and activity of trade, on which, after all, the prosperity of nations depends, and to which we, as bankers, must attach the greatest importance; for, as I have observed before at these meetings, even if we have to write down our investments, we obtain from them at the lower valuation a higher return, and we have better opportunities of using our funds profitably.

Though the process is disagreeable, and one which we hope must soon come to an end, yet when it has taken place it means for us increased strength and earning power. I have already observed that I feel the reaction must soon set in, and when the recovery takes place I believe it will be as rapid as the fall, and I think that it is highly probable that the investors' attention will turn itself once more to home securities, which now yield such a tempting return.

Return of Confidence.

A few years ago it might hardly have seemed possible to obtain from our trustee investments a yield such as present quotations indicate, and as the public recognizes more and more that the higher return from foreign investments, even of the better class, involves a certain amount of risk, I think it is in the markets of our home securities that the effect of returning confidence will first make itself felt. You will hardly expect me to attempt any accurate forecast as to the course of the money market during the coming half-year.

Where so many factors are obscure it would be idle to prophesy, but certain considerations must be borne in mind. First of all, I think it is a matter for congratulation that considerable liquidation has taken place in the stock markets, that engagements are being restricted, that a halt has been called in the number of new issues, and although such liquidation has, as usual, been accompanied by certain rumors, these rumors have proved to be absolutely unfounded, and no occasion appears to exist for any alarm whatever in this direction. In fact, it is a cause for considerable satisfaction that credit has been so little disturbed by the events of the last few months, and, as preparations have no doubt been made not only on this side, but at all the monetary centres, for the usual increased demands that take place in the autumn, I think it may be taken for granted that these demands will be felt with less severity now that the situation has been recognized. Again, it appears that, in consequence of the war and the preparations for war on the Continent, considerable hoarding has taken place in various countries, and when peace is restored these hoards, the amount of which it is difficult to estimate, will gradually return to the monetary centres and bring considerable relief.

Faith in the Future.

On the harvests a great deal will depend. In the United States and in Canada, they appear to be promising. In Europe, or in Western Europe, at all events, the outlook does not seem quite so favorable. In India the rainfall appears at present to be progressing favorably, and if the promises of another large and abundant harvest be fulfilled, her power of importing our manufactured goods will again be increased. There are indications in her trade returns which show clearly that her purchasing power has largely increased, and I think that it is in commodities rather than in increased imports of gold that India's balance of trade will be paid for. In the United States trade seems active, in spite of the many problems which are awaiting solution there, and when her tariff is reduced manufacturers on this side may reasonably expect an increase of their trade.

On the other hand, we have the adverse factors of the war on the Continent, the condition of Mexico, where so much British capital is invested, the disquieting reports from China, and also the serious labor trouble in the Transvaal, which later may not only disturb trade in that colony, but even affect the gold supply of Europe. While, possibly, from the United States, whose balance of trade during the past year has been highly favorable to her, and possibly from the Continent demands for gold may arise, and while the possible demands from the East have always to be borne in mind, shipments of gold from various quarters, especially South America, are already on their way here. The late Lord Avebury used to say that, given a five per cent. bank rate for a fairly prolonged period, gold would be sure to flow into London, and although the demands from many quarters have grown of late years, I think the saying remains true, even though a little more time than formerly may be required to bring about the result.

Thus there seems to be no reason whatever for taking an alarmist view of the monetary situation; if only we hold our hand for a little while, and do not lend too freely to foreign nations, the economic position of the country is so strong that gold will flow in naturally, and we shall well be able to deal with the usual autumnal demands as they arise.

A certain amount of self-restraint, however, is necessary in the matter of new issues of capital, and the general development which has been so rapid during the past few years may possibly be somewhat retarded; but with the exercise of a fair amount of caution it is probable that we need not apprehend any excessively high rates for money during the autumn, so that the large and prosperous trade of the country may progress without disturbance or hindrance. That there will be a considerable employment for money is beyond doubt; it is needed for the development of the newer countries which in recent years have added so greatly to the volume of our own exports, and it is desirable that such developments should not be suddenly restricted.

Bankers to be Cautious.

But peace must be restored, and a reduction should take place in the vast scale of unproductive expenditure among all European nations, an expenditure which must have the most serious consequences on the economic developments of the world at large. For us bankers, it will, in all these circumstances, be advisable to pursue a cautious policy; not to encourage speculation, but at the same time to assist legititmate trade and enterprise; and while rates can hardly be expected to be much lower during the autumn than they are now, although, possibly, a period of comparative cheapness may intervene, I think we may look forward to the coming six months with every confidence, and hope that the great trade of this country may continue to develop in the future as it has in the past.

CALGARY WILL VOTE ON MANY BY-LAWS.

The following by-laws are to be submitted to the ratepayers of Calgary during the month of September. They aggregate $2,333,340:—Fire department, $52,000; parks and cemeteries, $45,000; erecting, constructing and equipping Industrial Building, $250,000; to purchase Hillhurst Athletic Grounds, $60,000; execution of agreement re hospital; to purchase 55 acres of land for Union Stock yard purposes, etc., $350,000; paving, curb and gutter, Boulevard, N.E., $19,250; high level concrete bridge across Bow River at Centre Street, $468,900; concrete bridge across the Bow River at Ninth Street West, $173,000; concrete bridge across the Bow River at Fourth Street West, $319,350; steel bridge across the Bow River at Fifteenth Street East, $82,100; concrete bridge across the Elbow River at Fourth Street West, $82,500; concrete bridge across the Bow River at Fourteenth Street West, $173,000; straightening Elgin Avenue and Second Avenue N.W., $10,000; Lowry gardens, $155,000; trunk sewer, Ogden, $63,140; hospitals. tubercular, $30,000; agreement with the Western Canada Milling Company; total, $2,333,340.

The Whalen Building is one of the latest structures in Port Arthur. A plan of the offices to rent is being issued by the General Realty Corporation, Limited, of that city. The building is located at the corner of Cumberland and Van Norman Streets. It faces three streets, and is at the centre of Port Arthur's business district. The construction is fireproof. It is a modern office building, attractive in design, and has eight stories.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions Dividends and Future Plans

Twin City Rapid Transit Company.—The earnings for the last week in July were $245,059.69, an increase of $14,997.78, or 6.52 per cent. over the corresponding period of last year.

Canada Bread Company.—A decrease in business in the early part of the year and a recovery in the last few months was shown in the annual report of the company presented this week. The statement to the directors is not an improvement upon that of last year, except in the promise it contains of increased profits for the current twelve months. The directors decided to call a shareholders meeting on August 27th.

Kingston and Pembroke Railway.—At the annual meeting of the directors and shareholders, it was decided to transfer the head office of the company from Kingston to Montreal. The following new directors were elected:—Messrs. W. D. Matthews, Toronto; D. McNicoll, I. G. Ogden, G. M. Bosworth, W. R. Baker, E. W. Beattie, A. R. Creelman, K.C., and E. Suckley, of Montreal, and W. F. Nickel, K.C., of Kingston.

Mexico Tramways Company.—Mexico Tramways Company earnings and expenses from traffic for July, 1913, in Mexican currency were:—Total gross, $610,602; increase, $39,983 operating expenses, $270,259; increase, $6,205; net earnings, $340,343; increase, $33,778. Gross from January 1, $3,876,142; increase, $34,102; operating expenses from January 1, $1,813,245; decrease, $28,173; net from January 1, $2,062,897; increase, $62,275.

Porto Rico Railways Company, Limited.—The following is a comparative statement of earnings for July, 1913:—

For July—	1912.	1913.	Increase.	%
Gross	$56,516.08	$70,168.53	$13,652.45	24.15
Net	7,995.21	31,257.88	23,262.67	290.96
For Six Months—				
Gross	$490,096.52	$504,945.77	$14,849.25	3.30
Net	178,821.66	224,970.99	46,149.33	25.81

Northwestern Railway of Mexico.—A cable states that the Northwestern Railway of Mexico may not pay the September coupons on its first mortgage gold bonds. The company in which the Canadian interest is or was considerable, has suffered along with other companies, railroad and industrial from the disorganization of business resulting from political disturbances during the last two years or so. In the case of the Northwestern the frequent interruptions of the railway service were adversely affecting its profitable lumber business as far back as the closing months of 1911.

National Steel Car Company.—The National Steel Car Company's fiscal year does not end until November 30th, but the management intimates that since February 1st last the company has turned out $1,500,000 worth of product, and it is expected that earnings will cover the preferred dividend, and barring unforeseen contingencies will leave a surplus on the common stock.

The company is negotiating at the present time for orders for street railway cars and passenger coaches to offset the possibility of slack trade in freight cars. The plant is, however, booked up on ordinary business until January 1st next.

Canada Cement Company.—The company have arranged with the Royal Securities Corporation, Limited, to place an additional $1,750,000 of their 6 per cent. first mortgage bonds, proceeds of which are to be used for capital expenditure. This brings the total bond issue up to $8,000,000. This issue will increase the fixed charges of the company, and will delay a dividend on the common stock.

At the last annual meeting of the company, Senator Edwards, president, stated that the management had endeavored to obtain a satisfactory property in New Brunswick, and that its engineers had examined all the prospects in the vicinity of St. John, but none had proved satisfactory. Engineers are continuing the search.

Laurentide Pulp and Paper Company.—"The tremendous strides made by the pulp industry in Canada are strikingly reflected by the growth and development of the Laurentide Company, Limited," is the statement made by McCuaig Brothers and Company, members of the Montreal Stock Exchange, in a special review of the company. Reviewing its progress they say:—"Special attention has recently been attracted to the company by the announcement of a new stock issue of $2,400,000 at par to shareholders, in the ratio of one new share to every three old shares, has, during the past few years, experienced a somewhat spectacular career.

"To begin with, the company has been a consistent dividend earner, its record extending back to the year 1900, when it paid 6 per cent. on its common stock and earned at the rate of 11 per cent. At that time the capital of the company amounted to $1,600,000, there being also a bond issue of $1,200,000. The following year the dividend was raised to 8 per cent. and continued at that rate until 1904, when the dividend for the year was reduced to the rate of 6 per cent. by the payment of 3 per cent. for the last half of the year. This made a total of 7 per cent. for the year 1904. Thereafter the dividend continued at the reduced rate of 6 per cent. until 1908, when the rate became 7 per cent. This rate was also paid in 1909, but became 8 per cent. in 1910."

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore receipts at Trail smelter for the week ended July 27th, and from July 1st, 1912, to date, in tons:—

Company's Mines.		
Centre Star	3,480	166,762
Le Roi	1,595	53,458
Sullivan	911	35,112
No. 1	141	2,078
Richmond-Eureka	....	1,128
St. Eugene	....	1,588
Molly Gibson	....	1,279
No. 7	....	4,476
Other mines	742	87,153
Total	6,869	353,034

Spanish River Pulp and Paper Mills, Limited.—At the first meeting of the re-organized board of the Spanish River Pulp and Paper Mills, Limited, the following officers were elected: Messrs. T. H. Watson, president and managing director; J. Frater Taylor, vice-president; W. E. Stavert, vice-president; R. J. Ward, secretary, with the following board: G. P. Grant, R. A. Lyon, R. L. Innes, H. E. Talbot, and W. K. Whigham, and F. S. Szervasy, of London, England.

The company having assumed such proportions and the duties of the president become so onerous, Mr. Grant asked to be relieved from that office. It was decided that the office of president and that of managing director should be consolidated, and Mr. Watson, who has been vice-president and managing director, was elected to the new position, and will in the future devote his entire time to the interests of the company.

◆

SMALL FRUITS

Mr. J. A. Ruddick, commissioner of the fruit division of the Dominion department of agriculture, reports that the cultivated small fruits have practically all been harvested. The crop has been a most disappointing one, satisfactory neither to the producer nor to the consumer. The dry weather in the small fruit districts is responsible for the shortage both in strawberries and raspberries, but apart from that the stand in strawberries was not good. The quantity of fruit harvested even at the high prices that prevailed was not remunerative; and many housewives in the cities have gone without their usual stock of canned small fruit. Currants and gooseberries were a fair crop, but not large. These, however, as the prices would indicate, did not take the place of other small fruits. A surplus has been reported in a few localities.

Blueberries are doing well and a fair crop is being harvested.

◆

"So far as tax collections are concerned, this is the best year Regina has had," said City Assessor Lennox, when asked for a statement concerning the matter. He produced figures to show that at the present time only six per cent. of last year's taxes remained unpaid, whereas at a later date (September 1st), 1912, there were 11 per cent. of the previous year's taxes unpaid.

FORTY-SEVEN NEW CORPORATIONS

One Million Dollar Company—Many Varied Interests—Natural Resources

With a capitalization totalling $5,819,000 forty-seven new companies have been incorporated in Canada this week. The largest being:—

Flexible Railway Supply Company, Ottawa	$1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
New Brunswick	3	$ 380,000
Quebec	12	1,384,000
Ontario	16	1,945,000
Manitoba	3	545,000
British Columbia	13	1,565,000
Total	47	5,819,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Kelowna, B.C.—British Columbia Growers, $25,000.

Mission City, B.C.—Mission Laundry and Supply Company, $25,000.

Fort William, Ont.—Home Sites, $35,000. E. H. Begin, T. Whitehead, Mrs. C. L. Begin.

Cobourg, Ont.—Cobourg Dyeing Company, $190,000. W. K. Fraser, J. R. L. Starr, C. A. Masten.

Weedon, Que.—La Compagnie Lavergne, $10,000 (contractors). L. Fontaine, L. Lavergne, C. Fontaine.

Brantford, Ont.—Brantford Industrial Realty Company, $100,000. J. Ruddy, J. H. Ham, J. A. Sanderson.

Walkerville, Ont.—Fisher Motor Company, $150,000. C. F. Garaghty, Detroit, F. E. Fisher, F. W. Vollans.

Hull, Que.—La Compagnie du Parc de la Montagne, $99,000. J. B. Larose, J. U. Archambault, J. Gratton.

Waldhof, Ont.—Waldhof Farmer's Co-operative Club (no share capital). E. G. Spreng, R. Gebhardt, W. Jaenhard.

Saint-Georges de Beauce, Que.—Le Club des Courses de Saint-Georges, $15,000. R. Bolduc, G. Gagne, R. Marcotte.

Guelph, Ont.—The Young Men's Christian Association of Guelph (no share capital). T. G. McMaster, R. L. Torrance, J. M. Duff.

Victoria, B.C.—Burdick Brothers, $300,000 (brokers). Mavis Estate, $100,000 (farmers). Olympic Stone Construction Company, $75,000.

Loggieville, N.B.—O'Leary and Montgomery, $150,000 (fish merchants). R. O'Leary, Mrs. E. O'Leary, both of Richibucto, W. S. Montgomery, Dalhousie.

Quebec, Que.—Geo. Tanguay, $200,000 (seed merchants). G. G. Tanguay, E. G. Tanguay, H. Forgues. Le Syndicat Immobilier Saint Roch, $250,000. T. Leclerc, H. Moisan, R. P. Bergvin.

St. John, N.B.—King Square Realty Company, $180,000. R. M. Rive, C. H. McLean, G. D. Wanamaker. Gatlin Institute, $50,000 (for inebriates). S. M. Dunlop, Woodstock, Ont., F. A. Stevens, Robinson, Ill., A. W. Powell, Montreal, Que.

Winnipeg, Man.—Pioneer Grain Company, $500,000. A. C. Ruttan, H. Gauer, F. G. Davies. Robinson's Upstairs Clothes Shop, $5,000. M. Lurie, A. M. S. Ross, J. M. Isaacs. German Investment Company of Canada, $40,000. E. R. Krippner, L. L. Krippner, J. R. Linder.

Vancouver, B.C.—C. H. Jones and Son, $75,000 (sail makers, etc.). Clubb and Stewart, $200,000 (clothiers). P. R. Free Golds, $500,000 (mining). White Lunch, $75,000. Anvil Island Clay Company, $100,000. A. Magnano Company, $25,000 (grocers). Ryan-Smith Trading and Contracting Company, $15,000. Standard Transfer and Storage Company, $50,000.

Ottawa, Ont.—Public Service Cup Company of Canada, $100,000. J. W. Hennessy, Fort Coulonge, W. H. Dwyer, A. W. Fraser. Flexible Railway Supply Company, $1,000,000. C. Forth, D. Blair, G. H. Ferguson, Kemptville. Labrador Medical Mission (no share capital). D. M. Finnie, Hon. Wm. M. L. King, W. L. Currier. The Grand Central Hotel of Ottawa, $40,000. E. J. Daly, J. P. Ebbs, W. N. Graham.

Toronto, Ont.—R. L. McCormack and Son, $40,000 (real estate). R. L. McCormack, C. A. McCormack, Mrs. A. McCormack. Shore Gardens, $150,000 (real estate). G. D. Waters, C. W. O. Goshorn, J. H. T. Nesbitt. Empire Agencies, $50,000 (real estate). G. Keogh, T. L. Monahan, A. E. Knox. Brown's, Limited, $40,000 (confectioners). F. M. McDowell, K. W. Wright, C. W. Ray. Crystal Lake Mines, $40,000. E. L. Dolson, A. M. Lynch, C. D. Stephen. Canada Seed Company, $10,000. C. A. Wilson, A. G. Wilson, I. W. Steele.

Montreal, Que.—Holmes and Lennon, $10,000 (general merchants). E. E. Howard, E. DeWitt, O. Sievwright. Autographic Register Company of Canada, $150,000. C. J. Swaim, J. S. Swaim, R. Fleet. Theodoro Valiadis and Company, $30,000 (tobacco dealers). W. J. Shaughnessy, C. G. Heward, A. E. Woodworth. Dutch Tea Rooms, $20,000. J. Spear, L. deK. Stephens, J. W. Weldon. Maheu Realty, $200,000. T. W. Maheu, J. E. Lebeau, Bedford, A. Forget, Saint Sebastien. La Nationale Co-operative, $250,000. G. Mayrand, J. Desbois, J. O. Bosquet. Harbor Terminals Realties, $150,000. H. Lubin, M. Lubin, C. M. Cotton.

◆

PERSONAL NOTES

Mr. W. W. Butler, of the Canada Car Company, is in New York.

Mr. J. E. Dalrymple, of the Grand Trunk, has been appointed vice-president of the Northern Navigation Company.

Mr. Reginald Beal, of the York, England, office of the Alberta Land Company, Limited, is on a business trip in Canada.

Mr. A. E. Kirkpatrick, manager for Canada of the United States Fidelity and Guaranty Company, is on a business trip in Western Canada.

Mr. George Hadrill, secretary of the Montreal board of trade, has returned to Montreal after an extended tour of Great Britain made in company with his son.

Mr. F. P. Jones, accompanied by Mr. V. Drury, of the Royal Securities Corporation, have sailed from New York, on a trip of inspection of the Canadian Venezuelan Ore Company's plant properties.

Mr. A. W. Pool, city clerk of Regina, has been appointed finance commissioner for the city to fill the vacancy created by the resignation of Mr. John A. Reid, who has accepted a position with the Alberta provincial government.

Mr. J. Lorne Campbell, for years a member and an ex-president of the Toronto Stock Exchange, has formed a partnership with Mr. Henry Nightingale, senior member of the late firm of Messrs. Nightingale, Jackes & Company.

Hon. John Edward Gordon, one of the leading Unionist members in the British House of Commons, has arrived in Canada. He is making a brief tour of Canada, and will visit many of the large cities and towns, including Toronto, Montreal and Ottawa.

Hon. Arthur Brodeyck, accompanied by a party of laborers, to develop his large farm in Western Canada, arrived in Canada last week from England. Hon. Mr. Brodeyck is one of the latest members of the British nobility to secure large holdings in the Dominion, and intends to go into farming on a large scale.

Sir John Wesley Courtis, Sir Thomas Marchant Williams and Mr. William Davies, accompanied by Mr. S. W. Pugh, Dominion Government agent to Wales, arrived in Canada last week. With a view of increasing the investment of British capital in Canada, and of securing a larger number of immigrants, the Dominion of Canada have invited these gentlemen as guests of the nation.

Messrs. W. K. Whigham, of Messrs. Robert Fleming and Comany, London, England; J. Frater Taylor, vice-president Lake Superior Corporation, Sault Ste. Marie; W. E. Stavert, Canadian Agency, Limited, Montreal; F. S. Szarvasy, managing director British, Foreign and Colonial Corporation, London, England, have been added to the directorate of the Spanish River Pulp and Paper Mills, Limited.

Mr. J. A. MacKenzie has been appointed agency manager of the London and Lancashire Life and General, which has made considerable good progress during the past few years, particularly in its Canadian branch, which is operated by the Canadian Directors, and the manager for Canada, Mr. Alex Bissett. In order to deal more effectively with the growth of the business both at the head office and in connection with the agency organization, the management have made this appointment. Mr. Mackenzie has represented the association during the past three years as branch manager for the province of Saskatchewan, where he has given every satisfaction.

MONEY FOR THE FARMERS

United States Congress Will Consider Legislation on Rural Credits

Considerable attention is being devoted both in Canada and in the United States to the question of agricultural credits. The Saskatchewan government is considering the matter and will present a report shortly.

President Wilson has just issued a statement urging action by congress in respect to rural credits. He says:—"Again and again during the discussion of the currency bill, it has been urged that special provision should be made in it for the facilitating of such credits of the farmers of the country who stand in need of agricultural credit as distinguished from ordinary, commercial and industrial credits. Such proposals were not adopted because such credits could be only imperfectly provided for in such a measure. The scope and character of the bill, its immediate and chief purpose, could not be made to reach as far as the special interests of the farmer require.

Special Machinery for Rural Credits.

"Special machinery of a distinct system of banking must be provided for if rural credits are to be successfully and adequately supplied. A government commission is now in Europe studying the interesting and highly successful methods which have been completed in several countries of the Old World, and its report will be made to Congress at its regular session next winter. It is confidently to be expected that the Congress will at that session act upon the recommendations of that report and establish a complete and adequate system of rural credits.

"There is no subject more important to the welfare and industrial development of the United States; there is no reform in which I would myself feel a greater honor or privilege to take part because I should feel that it was a service to the whole country of the first magnitude and significance. It should have accompanied and gone hand in hand with reform of our banking and currency system, if we had been ready to act wisely and with full knowledge of what we were about.

Adjustment of Farmers' Needs.

"There has been too little Federal legislation framed to serve the farmer directly and with a deliberate adjustment to his real needs. We long ago fell into the habit of assuming that the farmer of America enjoyed such an immense natural advantage over the farmers of the rest of the world, were so intelligent and enterprising and so at ease upon the incomparable soil of our great continent that they could feel the world and prosper no matter what handicap they carried, no matter what disadvantage, whether of the law or of natural circumstances they labored under. We have not exaggerated their capacity or opportunity, but we have neglected to analyse the burdensome disadvantages from which they were suffering, and have too often failed to remove them when we did see what they were. One of the chief and most serious of these disadvantages has been that he has not been able to secure the extended bank accommodations he every year stands in need of, without paying the most burdensome rates of interest and saddling himself with mortgages and obligations of every kind which he fairly staggered under, if he could carry them at all. In other countries, systems of rural credit have been put into operation which have not only relieved the farmer but have put his enterprises upon a footing of easy accomplishment.

"The countries in which agriculture was steadily languishing because wholly unprofitable have seen their farming lands blossom again and their people turn once more hopefully to the soil for a living. Our farmers must have similar means afforded them of handling their financial needs easily and inexpensively. They should be furnished these facilities before their enterprises languish, not afterwards.

Problem of Credits.

"And they will be. This is our next task and duty. Not only is a government commission about to report which is charged with advising the Congress of the best methods yet employed in this matter, but the Department of Agriculture has undertaken a series of systematic studies of the whole problem of rural credits. The Congress and the executive working together will certainly afford the needed machinery of relief and prosperity to the people of the countryside and that very soon."

◆

The first shipment of 1913 wheat has been received at Winnipeg, and was consigned to the Ogilvie Flour Mills Company.

MARKETING CANADA'S GRAIN

IV.

WHAT TRANSPORTATION PROBLEMS SUGGEST

Present System of Handling Needs Enlarging and Modifying

The Board of Grain Commissioners realized the strong demand for interior terminal elevators, and in endeavoring to formulate their policy for terminal elevators, it devoted much attention to this demand. The grounds for the demand arise from the general conditions of the present grain situation.

The grain fields are rapidly increasing in area, and are rapidly extending farther west and north. The western development is most marked up to date in Alberta, but the construction of the Grand Trunk Pacific will bring about a similar development in British Columbia. The increase in acreage, the western and northern extensions of the grain fields, and the increase in the total volume of grain produced, have put a severe strain upon the existing grain moving system; upon the supply of rolling stock cars and locomotives; upon the railway yards at Winnipeg and Fort William; upon the amount of storage at both interior, terminal and eastern points; upon the inspection department; and upon the available tonnage at Canadian ports both on the great lakes and on the Atlantic ocean. The strain is felt by every part of the system, and no part at the present can be said to be adequate to the work ahead of it, if the production of the grain continues to increase.

Great Efforts Are Being Made.

It is often said that too little is being done in the way of increasing transportation and storage facilities; the fact is that great efforts are being made to keep up with the increase in production. The railway companies have been making serious efforts to keep up with the situation. At Fort William and Port Arthur over 11,000,000 bushels of extra storage capacity are being built. Montreal has been increasing its storage and developing its harbor. The inspection department is being strengthened, and all engaged in moving Canadian grain are doing their best along the lines of the present system. Notwithstanding these efforts the situation is not satisfactory.

Further, apart from such emergencies as congestion due to export conditions, or to unfavorable climatic conditions, a large increase in the production of grain may cause a congestion far beyond the existing transportation and storage capacity. The construction of the Canadian Northern Railway and Grand Trunk Pacific Railway east will undoubtedly do much to improve matters. But even then production might easily pass the handling capacity. Lastly, apart from all such emergencies the ever occurring car shortage, the heart burnings among growers of grain caused thereby, the delay in getting inspection returns from Winnipeg, the delay in getting outturns from the terminal elevators, the difficulties in borrowing money due to such delay, and the widening spread between street and track prices as the close of navigation approaches, indicate that the time to consider whether there should not be a special effort made, not merely to enlarge, but to modify the present system of handling grain, has come.

Distance Between Fields Terminal Points.

The distance from Fort William to Winnipeg, 426 miles; Regina, 783 miles; Moose Jaw, 819 miles; Lethbridge, 1,188 miles; Calgary, 1,267 miles; Saskatoon, 932 miles; Prince Albert, 986 miles; Edmonton, 1,253 miles.

At present there is not much storage capacity provided on the farm. Terminal elevator storage capacity is all at Fort William and Port Arthur. Inspection is done at Winnipeg and the terminal elevators alone. Under these conditions shippers of grain, say at Lethbridge, are subject not only to car shortage and high freights, but also to delayed inspection returns and delayed terminal outturns. They cannot finance on their grain on as good terms as if they knew sooner the grade, weight and dockage of their grain, and the greater the distance from the shipping point to the terminal the sooner does the spread between street and track prices tend to appear. It is not unnatural that grain growers in the more western sections of the grain area ask that inspection be brought nearer them.

Okanagan Valley growers will ship 1,000 cars of British Columbia fruit this season.

INSURE YOUR LIFE INSURANCE

By Paying Small Premium for Insertion of New Total Disability Clause—Several Exceptions Noted

What would you do if you could not pay the premiums on your life insurance because you were totally disabled from earning a living? asks the Annalist. A policy with most companies would permit of three alternatives: either a cash payment would be made by the company, or upon option a paid-up life policy for a much less amount than the original policy could be obtained, or the original policy could be extended for a limited time after payment of the last premium, unimpaired, and during that time good for full value to beneficiaries, to lapse entirely at the end of the period.

Some companies do it in a little different way, contracting that, for a certain period, the policy shall remain in force, but with premiums plus interest steadily deducted from the final value of the payment in case of death. There is still another way out. A man may borrow, year after year, on his policy and thus keep it alive. But in all these cases it is probably at a great cost in the way of deduction from the insurance as finally paid to his survivors.

A new thing in life insurance that has just been announced by the Equitable Life Assurance Society is the "waiver of premium in the event of permanent total disability" which it will write into any of its policies, new or old, on payment of a trifling additional sum, so that a man may know that if by accident or sickness (including insanity) he should be so permanently disabled as to be unable to keep up his premium payments, without dying immediately, his family will still be provided for to the full amount he first insured for.

Almost all insurance companies now furnish this waiver at a very slight additional expense.

Few Specific Points.

Total disability, in general, is not defined in these waivers except as to a few specific points. Most of the policies contain a clause like the following, which appears in the contract of one of the largest companies:—"Without prejudice to any other cause of disability, the entire and irrecoverable loss of the sight of both eyes, or the severance of both hands at or above the wrists, or of both feet at or above the ankles, or of one entire hand and one entire foot, will be considered as total and permanent disability within the meaning of this provision, and the company upon satisfactory proof of such loss or severance will waive the premiums thereafter becoming due under the policy." A case of insanity in which the policyholder becomes, on that account, incompetent is also considered to fall within the meaning of the clause.

Statistics compiled from the experience of the Order of Maccabees show that out of 92,637 insurable lives at the age of 20 about three and one-third per cent. will have become totally disabled by the age of 60. At the age of 60 the total disability clause now being written becomes void, just as the average danger of disability becomes imminent.

Is Worth Buying.

The added cost of "insuring your insurance" is so small, however, that it appeals to the holder of a life policy whose first thought is to make as certain as he can the payment of the insurance benefits to his family. On an ordinary life policy the additional charge upon $1,000 of insurance is only 35 cents. On a ten-payment life policy it is 18 cents. On a twenty-payment policy it is 24 cents. On a ten-year endowment policy the cost is 26 cents. On the twenty-year policy it is 29 cents. The smallness of these amounts is obviously the measure of the likelihood, in the actuaries' estimates, of the "average man's" becoming totally disabled. But the possibility of accidents alone would seem to make the new insurance worth buying at the price.

Payable in Full.

Under ordinary policy contracts now insurance is automatically extended when the insured person fails to pay his premiums, as follows:—

If he has paid for	His policy will be payable in full, according to his age when insured, for		
	(at 25 yrs.)	(at 35 yrs.)	(at 45 yrs.)
Three years	2 yrs. 9 mos.	3 yrs. 7 mos.	4 yrs. 0 mos.
Five years	4 yrs. 9 mos.	6 yrs. 4 mos.	6 yrs. 7 mos.
Ten years	12 yrs. 8 mos.	13 yrs. 0 mos.	10 yrs. 7 mos.

At the end of the extended time the policy is, of course, worthless. Death within the period brings full payment to beneficiaries.

There are several conditions under which the new total disability clause will not be written. Where the insurance is in excess of $100,000, or in some companies $50,000, where the risk is on the life of a woman, where the insurance is on the term plan, or when the age of the insured is rated up for any reason, the clause may not be included in the contract.

VALUE OF LIFE INSURANCE

XXVI.

DIFFERENCE BETWEEN "COST" and "SAVINGS."

BY C. A. HASTINGS

Paying a premium on a life policy is no more a "cost" than opening a bank account or buying bonds. Many a man looks upon a premium as an annual expense and counts it in with his rent, etc., and, if he is asked how much he is carrying, will remark that $5,000 is all that he can "afford" to pay for. In my previous articles, I think I have made it quite clear that this is entirely an erroneous view to take, but, as it is the most common excuse that is made use of, I propose to deal with the question more thoroughly.

We are all of us aware of the fact that we cannot all save an equal amount, but I do most emphatically say we can, all of us, save ten to fifteen cents on the dollar, and that that money paid for a life premium is money saved and money invested. This is a fact and you cannot get away from facts. There are very many splendid features in Life Assurance, but there is one that must appeal to all of us, and that is the benefit to a man's family against the eternal risk that no one can foretell, coupled with the knowledge, that in the event of him surviving a certain period, all his premiums are returned (I am referring to first-class offices) with substantial bonuses.

Sums to Invest.

In case I may be told by some critic that this looks like "getting something for nothing," I propose to forestall this possibility by referring any critic to my previous articles, wherein I have shown that life companies have enormous sums to invest annually; that these sums are made up from a very large number of smaller contributions in the way of premiums, and, owing to the information they do obtain and the fact that they can buy in large quantities, life companies are in an extremely advantageous position, and are able to obtain the closest price in any market. Thus it is that life assurance is such a good investment, though, of course, it is protection that most of us want first. At all events, no solitary individual, or, as a matter of fact, no syndicate, can possibly hope to make any investment that is surer or better than that made by a life company. A first-class life company is a sort of an investment trust company. The funds they handle on behalf of you and I are trust funds: you and I deposit so much per annum, and thousands of others—whom we do not know—are doing the same thing, and we confidently expect those deposits to be invested safely for the benefit of those dependent upon us; we look to the life company to protect them by opening a bank account with them either for a term of years or for life. The less the company spends, the more you and I get back in the shape of additions to policy—such additions having a cash value, which value varies according to the age of the policyholder and age and nature of the policy. Comparing life assurance companies with investment companies, my readers will readily see that the policyholders take the place of share or stockholders, that the different kinds of policies compare with the different classes of shares, such as Ordinary, Preference, and Cumulative Preference, and so on, but there is one difference, and that is, the man who buys stocks has no absolute guarantee that he will get anything back, whereas a life office does guarantee in black and white that no more than one premium is payable—should he die the next day—so that from a finance point of view he has made an enormous profit.

To Assist Financial Problems.

His premium is so calculated that others, who are also depositing on the same basis, are not only paying sufficient to earn bonuses, but also to assist the financial problems of a family whose breadwinner has been called to his long home unexpectedly.

Take any terrible calamity, causing terrible loss of life, and what do we see? Through the beneficent channels of the press a fund is immediately started and world-wide sympathy brings in numerous contributions from the poor and rich alike, so that the rescued and the bereaved families may not want. Is the same sympathy aroused for the person who is killed by an automobile, or for any individual who passes away suddenly? No—but, nevertheless the cause is equally deserving, and the only means of softening the loss of those dependent is through assurance—"that most wise and beneficent invention, which mitigate the anxiety of the breadwinner and promotes the security, the blessed security, of the home."—(John Morley).

◆

Trinidad's permanent exhibition committee has decided to accept the offer of space allotted by the exhibition authorities of Toronto, and has despatched by the Pickford and Black steamer Briardene a selection of products.

LUMBER, LATHS, SHINGLES AND SQUARE TIMBER

Position of Provinces in Production—Mill Prices—United Kingdom Purchases

The most noteworthy fact brought to light by the new bulletin on the lumber production of Canada was the 10.7 per cent. decrease in cut in 1912 as compared with that of 1911. All provinces except Saskatchewan showed a substantial falling off in production and, although only 2,558 firms operating saw mills reported in 1912 as against 2,871 in 1911, yet, as the bulletin points out, it was mostly small mills which failed to report, and the fact that most of the larger mills reported a decrease in their output, indicates that the decrease in production actually took place and was not a result of incomplete returns.

The total value of the lumber, laths, shingles and square timber produced in Canada in 1911 was $76,540,897, the amount of each being as follows:—

Lumber, 4,389,723 feet board measure..	$69,475,784
Shingles, 1,578,343,000 pieces	3,175,319
Laths, 899,016,000 pieces	2,064,622
Square timber, 65,906 tons	1,825,154

Ontario Leads Provinces.

Ontario still leads the provinces in lumber production, cutting 31.6 per cent. of the total. British Columbia makes a close second, cutting 29.9 per cent. of the total, and as the percentage of production in this latter province is increasing while that of Ontario is falling off, it is likely that the position of these two provinces will be seen to be reversed when the 1913 figures are available.

For the last five years the four principal species in order of importance have been spruce, white pine, Douglas fir, and hemlock, but the production of white pine has remained about stationary during this period, and is now on the decrease, whereas the production of the other three species has enormously increased, especially spruce, which now makes up a third of the total cut of lumber, in spite of the fact that it also is the principal wood used in the manufacture of pulp, making up 78.2 per cent. of the total amount of pulpwood. The huge amount of spruce now being cut for pulpwood may account for the 11.9 per cent. decrease in the amount of spruce lumber cut in 1912.

Coniferous woods made up 92.9 per cent. of the lumber sawn in Canada in 1912, the hardwoods forming 7.1 per cent. of the cut, a somewhat greater percentage of the total than the amount cut in 1911. While it is true that the supplies of more valuable hardwoods of southern Ontario and Quebec are nearing exhaustion, yet the increase in cut of the more widely-spread birch, beech, maple and basswood should be noted because these species are common to the farmer's woodlot. Birch is Canada's most important hardwood.

The average mill prices of lumber in Canada in 1913 rose 41 cents above that of the previous year, becoming $15.83 per thousand feet board measure. The local variations in these prices show in some cases a much greater increase as in Ontario where there was an average increase of $1.52 over the price of 1911 directly due to the decrease of 19.3 per cent. in the production of lumber for 1912.

Prairie Province Production.

In the prairie provinces the greatest extremes of increased and decreased production are to be observed. Saskatchewan was the only province in Canada to report an increase in cut, this being 16.7 per cent. greater than the cut of 1911. The average capacity of the Saskatchewan mills is second only to those of British Columbia, being nearly seven million feet of lumber a year, 99.2 per cent. of lumber cut in these mills being spruce. Manitoba showed a decrease in production of 26.4 per cent., but this decline can only be temporary, for the exhibit of Manitoba woods at the recent Canadian Forestry Association Convention in Winnipeg showed great latent possibilities in this province as a lumber producer.

The production of shingles in Canada in 1912 was 14.1 per cent. less than that of 1911. Spruce, white pine, hemlock and jack pine are being increasingly used for the manufacture of shingles. The production of lath also showed a decrease of 1.9 per cent. from 1911, spruce making up over one-third this product.

One of the most remarkable facts brought out by the bulletin is the extraordinary increase of 89.9 per cent. in the production of square timber in 1912 over that of 1911, this being the first increase since 1877. This increase was largely due to the largely increased amounts of white pine and birch exported in this form, white pine making up 5.3 per cent., and birch 28.5 per cent. of the amount exported. 97.5 per cent. of the square timber cut was exported to the United Kingdom.

SASKATCHEWAN GOVERNMENT ERECTS COAL-TESTING PLANT

Products of Lignite—Heating Values—Value of Power Plant

A plant is about to be erected by the Saskatchewan government at Estevan for the purpose of developing and testing the lignite coal of that district. The plant will be in charge of Mr. S. M. Darling. The following short account of what he has accomplished with North Dakota lignite is especially interesting to us in view of the fact that the lignites of Southern Saskatchewan and of North Dakota are of the same cretaceous character.

The chemical composition of these lignites precludes their being successfully briquetted in their natural condition. To market the lignite commercially in a large way it must be destructively distilled, carbonized or partially carbonized, and the resulting gas, oil or tar, ammoniacal liquor and carbon residue utilized separately.

Analysis of a large number of samples of North Dakota lignite averaged on a dry basis; volatile matter 40.67, fixed carbon 53.33, ash (practically no sulphur) 6.00.

On carbonization, the products in round numbers are:—

1. Gas, per ton of lignite	10,000 cubic feet.
2. Oil or tar per ton	20 gallons.
3. Ammoniacal liquor	35 gallons.
4. Carbon residue	1,200 pounds.

Gas and Ammoniacal Liquor.

The yields of gas and oil depends largely upon the temperature and rate of carbonization. With a high temperature and quick carbonization the yields of gas will be high and of oil low; while with a lower temperature, and longer time in which to carbonize, there will be less gas and more oil.

The gas has a heating value of 450 British thermal units per cubic foot. It contains a good percentage of illuminants, but has about fifteen per cent. of carbon dioxide, which almost entirely destroys the illuminating power. This carbon dioxide can be removed by passing the gas through lime, but the process is too expensive for commercial application. The gas can be used as an illuminant by burning it in a mantle, but it is serviceable principally for fuel and power.

There is more gas in one ton of lignite than is required to carbonize the next ton. In practice only sufficient gas is removed to supply the requisite fuel to carry on the process. The remaining portion of the volatile is left to add heating value to the carbon residue.

There is therefore no charge for fuel in the process.

On distillation the oil yields:—

Light oils, benzine, toluene, etc.	11.5 per cent.
Carbolic, oils, some naphthaline	11.5 per cent.
Creosote oils	36.1 per cent.
Anthracene, some paraffine	18.4 per cent.
Pitch, hard	22.4 per cent.

This oil or its distillates can be put to many uses—fuel oil, creosoting oil, leather preservative, waterproofing, pitch, etc. Upon exhaustive distillation it yields aniline dyes, carbolic acid, and in varying proportions all the other coal tar products.

The ammoniacal liquor yields some acetate of lime, or if desired, acetic acid, and about 15 pounds of sulphate of ammonia per ton of lignite. There is a growing market for all of these materials, particularly the sulphate, as fertilizer.

Lignite Briquettes From Fines.

The lignite crumbles on carbonization, which renders possible a continuous carbonizing process, obviating the laborious charging and drawing of retorts, as practised in coal gas plants.

The cretaceous lignites retain largely their original woody structure, and hence do not break up so finely during carbonization. After removing by means of screens the small percentage of fines after carbonization, there remains practically lump charcoal of one-half to two inches in size. This can be used in gas producers, under boilers, and for domestic purposes. This lump charcoal is of about the same analysis as anthracite and has about the same heating value, but is not so dense in structure and therefore has somewhat more bulk per ton than the anthracite.

The fines have to be briquetted, or still further pulverized and burned as powdered fuel, a practice which is rapidly gaining favor.

Actual briquetting and burning tests of this fuel in carload lots demonstrate that satisfactory briquettes can be made with not to exceed 2 per cent. of starch and 6 per cent. of coal tar or lignite pitch as binder.

The briquettes burn with a short flame, no odor, no smoke and no clinker. They can be used wherever anthracite or bituminous coal is burned. They retain their structure in the fire until completely burned. They do not disintegrate or lose value in the weather, and can therefore be shipped any distance without loss.

The lignite coke is an ideal gas producer fuel. A satisfactory gas producer generating gas for power purposes from fuels containing a large amount of volatile, as does the raw lignite, is not available. But with the volatile removed, this lignite coke, transformed into producer gas and used in a gas engine to generate electricity, effects an enormous saving over the present method of producing electricity by means of boilers and steam engines. The gas producer requires only about one-fourth the fuel necessary with boiler and engine to produce an equal amount of horse-power. This producer gas also is an exceptionally good fuel for burning brick, tile, etc.

Value of Power Plant.

The matter of a large central power plant at the mines to generate electricity for transmission over a wide radius is essentially one of the quantity of current that can be sold, distance that it must be transmitted and evenness of load. If the current must be transmitted a long distance to a large centre of population there must be intermediate towns at which substantial quantities can be sold. This is simply a question of population. Of course, with cheap power available manufactories and people to use it will come rapidly. But, while the time is near when such a central power plant will be the logical thing, heed must be given also to the large demand for solid fuel, for gas producers, boilers and domestic purposes. Any large installation, therefore, would have as products not only electrical current, but coke, briquettes, fuel oil and other by-products resulting from the carbonizing process.

To defray the cost of carbonizing and briquetting there is the revenue from the by-products, and it is known that the income from this source will at least meet that charge. But aside from this, there is to be derived from this carbonizing process the enormous benefit afforded by the possibility of mining and shipping lignite the year round because the product is put into a condition which prevents deterioration no matter how long the fuel is stored or how far it is shipped.

LIFE UNDERWRITERS NEW OFFICERS.

The following officers were elected at the convention of the Life Underwriters' Association of Canada at Ottawa:—

Hon. president, J. A. Tory, of Toronto; president, J. B. Morissette, Quebec; vice-presidents, J. A. Johnston, Calgary; A. J. Meiklejohn, Ottawa, and the president of the National Association of Life Underwriters.

The executive includes:—Brantford, J. Burbank; British Columbia, W. J. Twiss; Brandon, E. Daw; Brockville, H. B. White; Central Ontario, Gordon Hall; Calgary, P. A. Wintermute; Cape Breton, A. R. McIsaac; Edmonton Dunlop; Eastern Townships, G. J. Alexander; Grey and Bruce, R. W. McGregor; Guelph, F. B. Hilliard; Hamilton, W. H. Seymour; Huron, Thomas Jolliffe; Kingston, J. B. Cooke; London, V. Reeve; Montreal, G. E. Williams and H. H. McKay; Winnipeg, J. A. Wilson and R. S. Rowland; Moose Jaw, Houston; Niagara Falls, McEvoy; Nova Scotia, S. D. Freeman; New Glasgow, P. McFarline; Ottawa, W. H. Stevens and W. Lyle Reid; Prince Edward Island, J. O. Hyndman; Port Arthur, G. J. Sedley; Prince Albert, T. C. Sinclair; Quebec, J. F. Belleau; Quinte, S. Burrows; Regina, J. H. H. Young; St. John, F. S. Farris; S. S. Marie, B. H. Carney; Toronto, Fred Chance and W. E. Eugert; Victoria, A. B. Fraser; Windsor, A. G. Roberts; Waterloo, W. M. Lockhead.

W. M. McBride, of Winnipeg, was elected to the executive of the National Association of Life Underwriters for one year and J. A. Tory for three years. The next convention will be held in Halifax.

◆

At the international medical congress at London, Mr. John Burns, after paying a tribute to the doctors for the improvements they had effected in the science of the cure and prevention of diseases, emphasized his point by showing that as the result of the combined application of medical and sanitary science to the problem of healthy living there had been 772,811 fewer deaths in England and Wales in the years from 1900 to 1911 than there would have been had the death rate of two decades earlier continued. Mr. Burns thought the ideal of the future work of physicians lay in advising the world as to the best means of preventing disease, dissuading people from habits inimical to their health and discovering early symptoms which, if neglected, would produce serious disease.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report exchange rates as follows at closing:

	Between Banks.		
	Buyers.	Sellers.	Counter.
N.Y. funds	1-32 pm.	1-16 pm.	⅛ to ¼
Montreal funds	5c. dis.	par.	⅛ to ¼
Sterling—60 days	8 11-16	8 23-32	8 15-16 9 1-16
do. demand	9½	9 17-32	9¾ to 9⅞

WINNIPEG BUSINESS SHOWS IMPROVEMENTS

Monetary Times Office,
Winnipeg, August 20th.

Representatives of *The Monetary Times* interviewed a number of Winnipeg business men during the past week and found that there was a distinct improvement in the general business situation, and all were optimistic as to the future.

Mr. J. H. Ashdown, ex-mayor of Winnipeg, and one of the largest hardware dealers in Canada, expressed the conviction that conditions would materially improve before the close of the year.

With reference to general trade he states that his firm's cash sales are equal to last year, that the general volume of business was as large and that collections were as good, if not better. Speaking of the attitude of the banks, he stated that these institutions, so far as he was aware, were not restricting their loans and advances to clients who engaged in general business. Money was not available for enterprises entirely new, or real estate speculation.

Now with a full average crop in sight, there doesn't seem to be any reason why there should be so much complaint as is heard from some quarters.

In industrial circles there is not the activity of a year ago, but it is felt that the retrenchment and review that the whole of Canada has undergone this season will prove a big advantage to new openings for next year.

Merchants and wholesale houses report that the sales for this season of the year have been fully up to the corresponding period of last year. Country merchants, however, are not laying in so large a stock of merchandise, and are ordering in smaller quantities as requirements warrant.

INSURANCE UNDERWRITERS' AGENCIES CRITICIZED

Canadian Departments Considering Matter—What the Missouri Commissioner Thinks

Insurance underwriters' agencies are receiving considerable criticism. The insurance commissioner in the United States are investigating their methods and drastic legislation is likely. The subject is also under consideration by more than one Canadian government insurance department, and new legislation in one or more provinces may be expected.

Commissioner Joseph Button of the Missouri Insurance Department, in a recent address on "Underwriters' Agencies," said that this question was the most pressing of all fire insurance problems, especially in view of the failure of companies through the liability assumed on underwriters' policies. He said:—

Some Early History.

"In its origin the underwriters' agency was a permissible if not, indeed, a desirable part of the fire insurance business. When new territory was opened up and companies desired to do business there for the first time, they were naturally without satisfactory hazard figures. None had been before them to ascertain just what losses they might anticipate and just where these losses were most apt to occur. In the circumstances nothing was more natural than that the companies join hands for the time being and agree to divide among themselves such losses as might occur. Then, too, in entering new territory the companies were confronted with the tremendous initial expense of opening new offices, advertising, investigating risks, etc. This made a union of agents as desirable as a union of companies, and led to the very simple expedient of an underwriters' agency which would issue the policy in its own name, with the guarantee of all the interested companies. At no time during the early years of underwriters' agencies was this agreement expected to be permanent or to serve any other purpose than those of reducing individual company liability and office expense.

New Phases Appeared.

"But as business grew and new movements were afoot in the insurance industry, the underwriters' agency came to serve two other and far less commendable purposes. The first of these was to afford an easy means of evading the single-agency provision, upon which many field representatives laid great emphasis. For very obvious reasons, the company operating in a given field wishes to limit the number of its agents as far as possible, provided, of course, that these agents will produce the maximum amount of business. But where an agent held the exclusive right to a territory and did not get all the business his company thought should be forthcoming, and was withal too valuable a man to lose, the underwriters' agency offered a handy solution of the problem. By permitting such an agency to use the guarantee of the company, more business would be forthcoming, and yet technically the company would not abandon the principle of single agencies."

He declared that the underwriters' agencies became a menace to the insurance business when it led companies into assuming larger risks than they could carry with safety, and while he said he was willing to admit such an agency was necessary in the development of new territory, he is firmly convinced that its growth is a positive danger and a nuisance in business. Mr. Button continued:—

To Correct the Evil.

"Three plans have been suggested to correct the evil of the underwriters' agency. The first is to make underwriters' agencies incorporate as companies under our regular insurance laws. This would, of course, end the danger to the policyholder were it possible to incorporate them without abrogating the policies not outstanding. But we are confronted with the simple fact that, precisely speaking, we have nothing to incorporate. What is the underwriters' agency? Assets and taxable shares of stock? Tangible values which can be utilized to protect the policyholders? None of these, but merely a name, backstood by companies which carry all the business they can and conform to the laws of the States in which they operate. If we want to put an end to the underwriters' agency, then we can do so by requiring the underwriters to incorporate; but this is merely saying that we purpose to end these agencies by the creation of new companies. This does not seem to me the shortest or the most desirable means to the coveted end.

"The second expedient proposed is that of requiring every underwriters' policy to be guaranteed by two or more companies. But here there are certain very plain obstacles. Granted that the guarantor companies are solvent and will not write more business than they can digest, including the business written by the underwriters, we can by this course protect the policyholder. But we have not touched the multiple agency feature of the problem, and we have but made additional trouble for ourselves in that we have made our task longer. Suppose, for instance, that we recommend and procure the adoption of a law requiring that every underwriters' agency have its policies guaranteed by two companies. Does it not follow that this protection of the policyholders is more nominal than real unless we are prepared to check at regular intervals the business of the parent companies and the underwriters' agency to see that all are within the limit of secured liability.

"As I see it, the adoption of this principle would mean, in effect, the approval of the principle involved and the virtual guarantee of the State that the underwriters' policy is ample protection. For my part I should hesitate to approve an underwriters' agency on such conditions.

Resort to no Subterfuge.

"The third expedient is the one that appeals to me. This is to make no bones of our purpose and to resort to no subterfuge, but rather to procure the enactment of a law which will require that all risks assumed by a company be taken in its own name and evidenced by its own proper policy. A few words written in our insurance laws would place this prohibition on our statute books and would end forever the existence of these concerns. By such a course we do what we should do in every case, assure the policyholder the guarantee of a company whose affairs we investigate. We give him no sense of false security and place in his hands no secondary obligation. We rather give him a policy signed by the officers of a given company as such and pledging the assets of that company to the liquidation of its claims. It is the simplest, shortest and surest solution of the problem."

◆

INDUSTRIAL NEW BRUNSWICK.

(Special Correspondence.)

St. John, N.B., August 18.

The Dominion Bridge Company has begun the work of placing the steel superstructure of the buildings for the new sugar refinery, and the Foundation Company is rushing the work of putting down the concrete piers which must yet be provided for some of the buildings. Already more than $150,000 has been spent, and nearly all of it on foundation work for the group of seven buildings.

The Victoria Mills at Fredericton, which were purchased last spring by Fraser, Limited, have been entirely remodelled with band saws, planing mill and shingle department, and began operations last week. It is intended to manufacture at least six million feet of lumber before the winter sets in.

The inspecting engineer for the provincial government reports that more than two million dollars has been expended in construction work on the St. John Valley Railway, the estimates for the month of July amounting to two hundred thousand dollars. It is expected that it will be possible to operate trains on the line between Centreville and Gagetown, passing through Fredericton, before winter, the length of this section being about one hundred and twenty miles.

The million dollar plant of the Canadian Sardine Company at Chamcook is closed, but it is supposed that there will be re-organization and that work will be again resumed. The plant was closed after a conference between Sir William Van Horne, Mr. Bosworth of the Canadian Pacific Railway, Mr. Richardson of the Bank of Nova Scotia and others interested.

The Dominion Pulp Company has doubled its capacity, and the merchants and others are feeling the good effects of the wages paid out to nearly three hundred employees of the company.

The Maritime Nail Company has purchased a rod-making mill of its own in Germany, and has just received the first cargo of rods direct by steamer. It will receive regular shipments hereafter, and sell what it does not require for its own plant in St. John and Fort William.

The Maritime Board of Trade will meet at Newcastle, N.B., on August 20 and 21. Among subjects to be discussed are municipal taxation, provincial ownership of telephones, agricultural and technical education, inter-provincial highways, the leasing of river fisheries, Intercolonial Railway affairs and other subjects of interest.

Although the permanent bridges have not all been constructed, rails have been laid and trains are running over the new railway from Minto in the Queens County coal fields to Fredericton. Shipments of coal are being made daily over the road for the use of the Canadian Pacific Railway, which will itself operate the Minto Railway when completed and will take for its own use large quantities of the coal produced at the mines.—M.

PROBLEMS OF THE PACIFIC COAST

Asiatic Immigration — Supplies of Water — Settlers and Land

Sir Richard McBride's visit to Great Britain is to get in touch with financial interests in London that they may learn first hand of conditions in British Columbia. It is felt that it is not known in London just how much development is taking place on the Pacific Coast, and the premier will no doubt point out how substantial progress is in this part of Canada.

Now that there is more white labor available in this province, the subject of Oriental exclusion is being widely discussed. At present Chinese can enter Canada on payment of $500 each, while Japanese come here under certain restrictions imposed by their own government. Some time ago, the Duncan, Vancouver Island, board of trade proposed that legislation be enacted something along the lines of similar laws in California that Asiatic races should not hold land here, and this week one of the Vancouver ratepayers' association went on record as opposing the entry of Orientals. The movement is growing stronger to have white labor, which is more reliable, given first chance, since they are better in every way if the future is to see continuous progress.

Victoria's Water Supply.

Application has been made at Ottawa for the subsidy which is available for the concern that invest money in a drydock. The proposal is to have one on Burrard Inlet. The necessity of such a construction has long been felt, and has been a subject of promotion for ten years past, without anything definite having materialized. In the past, the trouble has been that the project has been too big. While there is a large amount of work on this coast, the doubt was whether there was enough to make the venture a paying one. Now that the Government has offered to meet capital half way, it is very probable that a drydock will be built. Of recent years shipping has vastly increased, not only in the amount of tonnage but in the size of ships and the time is here when a big dock is necessary if shipping is to be facilitated. With docks at Esquimalt and Burrard Inlet, this coast will be able to take care of anything that may offer.

Victoria's Water Supply.

Victoria is making every effort to have a water supply adequate for its growing needs. Already large expenditures have been made in the scheme which has been in hand for two or three years, and it is proposed now to spend another million and a half dollars. Contracts have been awarded which will be contingent on the people approving this additional amount. The Leech River watershed will cost $573,725, but the only way to get a sure supply is to command the sources of water. Once these are secured, the city has an asset which counts much when consideration is given any municipal proposition by the world's financiers.

Vancouver Proposals.

The purchase of a power site on Bridge River, some distance north and inland, has been suggested to the city council of Vancouver, in order that a municipal power plant might be established. The promoters point out that power could be delivered here for $12, a saving of over 100 per cent. on the present cost. It is not probable that the city will undertake any other municipal plans than those already proposed. If it should be decided upon to take over the lines of the British Columbia Electric Railway Company in 1918, such a power may be necessary. The tendency has been, though, to consider what the end means before starting on a large scheme of municipal ownership, which might bring disaster in its train.

Once again it has been demonstrated that if good land is available for pre-emption people are eager to get it. This week two sections near Sechelt were opened, and for three days before the land office opened, men were on hand to keep perpetually on the stand at the door that they might be first to secure the location.

◆

BRITISH FIRM AFTER CANADIAN TRADE.

Mr. Benjamin Horton presiding at the annual meeting of the Molassine Company, Limited, manufacturers of stock foods, said:—"We have laid the foundation for a large business in America and Canada, the cost of which has been written off, and we anticipate a substantial income from these countries this year."

◆

Mr. Justice Astbury, in London, has made an order for the appointment of a receiver and manager for British Columbia Fisheries, Limited. It was mentioned that it was absolutely necessary to cable £5,000 to pay wages, and that a further £10,000 was necessary to deal with the present salmon pack.

CANADA'S BORROWING DISCUSSED

Reply to Charge that Canada Has Been Living on Capital—Money Has Been Well Spent

As stated in *The Monetary Times* last week, the London Times is discussing Canadian borrowings. In a recent article it says:—'

"Most of the serious Canadian newspapers, while contending that Canada's borrowings in the past have been justified, and, moreover, that still further borrowing will be justified if the money is to be got, admit that the position is changed by the apparent inability of the world's capital to meet the demands which are being made upon it. Generally speaking, therefore, while professing full confidence in Canada's position, they are preaching restriction of present expenditure. There is reason to believe that this doctrine reflects the views of the most responsible business and financial men through the country. It is also being cogently enforced by the attitude of the financial world in London and elswhere, since the last word as to whether further borrowing shall take place or not rests with the lender.

Dominion Government is Moderate.

"The substance of the charge against Canada may be put in a dozen words. It is that in the last five years she has overborrowed herself. This charge does not lie against the Dominion Government, which has been very moderate in its loan issues, and has met out of revenue much that might properly be called capital expenditure. The provinces, too, have been small borrowers. But the charge is laid against the municipalities, large and small, against the railways and against the industrial and commercial undertakings of the country. When it is developed in detail we find it alleged that Canada has been living on capital, and on borrowed capital at that; that her land values are greatly inflated; that her cities have spent extravagantly on public improvements; and that railway building and other enterprises have been undertaken beyond what the country can support. Much has been made of the adverse balance of trade against Canada. Indeed, the increasing surplus of her imports over her exports during the past few years has been pointed to as a conclusive proof of the whole matter.

Money Borrowed Well Spent.

"The reply of the apologists has amounted to a general denial. They admit that the borrowings of Canada during the past few years have been at a rate without precedent. But they declare that her growth in population and productiveness has also been at a rate without precedent, and that the money borrowed has, on the whole, been well spent. They contend that the new capital brought into the country has not been consumed in luxury, but has been invested in new works and enterprises and aids to production, which will yield an assured return. They declare that the rise of land values has to a great extent been justified.

They will admit, however, that there are cases where it has been pushed too far, particularly in the smaller towns of the West. But they say this is merely a form of the gambling which always goes on in some form or other where there is a sudden growth of wealth, and that the collapse, when it takes place, will affect the gamblers and not the solid prosperity of the country. They contend that the expenditure of the municipalities has not generally been greater than was needed to meet the reasonable requirements of their population, and that, while many towns have spent money on improvements which they could do without, they were perfectly justified in carrying out these improvements so long as they could borrow money for them at a low rate.

Railways and Industries.

"As regards railway building and industrial expansion, they declare that it has not proceeded too fast, but too slow, for a country in which the population is increasing at the rate of nearly half a million a year by immigration alone, and in proof of this they point to the congested state of the existing railway lines at certain seasons and to the great volume of imports from the United States, which might be produced in Canada itself if there were plants to produce them. As regards the argument drawn from the balance of trade, they contest the validity of this altogether.

"It is difficult to make anything in the nature of a judicial summing up between the two contentions. To a great extent they represent merely different points of view applied to the same facts, and the validity of either must depend on future events which are still uncertain, and the determination of which will lie outside as well as inside Canada. For instance, if prices, and particularly the prices of raw materials and food, through the world in general, continue to rise, the position of Canada will be much stronger than if they should stay where they are, or should fall. But before attempting to come to a general conclusion it will be useful to examine more closely some of the points raised."

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Bawlf, Alta.—August 1st.—Business section. Loss and cause unknown.

Bobcaygeon, Ont.—August 7th.—Mr. Wick's house completely destroyed.

Actinolite, Ont.—August 13.—Chapelle's hotel. Loss and cause unknown.

Logan, Ont.—August 12.—Mr. T. Reaney's barn. Loss and cause unknown.

Kingston, Ont.—August 12.—Schooner "Acacia." Loss slight. Cause unknown.

Douro, Ont.—August 15.—Mr. T. Hogan's residence. Loss and cause unknown.

Paris, Ont.—August 1.—Lumber pile at Paris Brick and Tile Company's yard.

Tweed, Ont.—August 10.—Mr. B. Fisher's barn. Loss unknown. Cause, lightning.

Sapperton, B.C.—August 9.—Royal Columbian Hospital. Loss slight. Cause unknown.

Atheistan, Ont.—August 10.—Mr. Lever's barn, Elgin Loss, $2,500. Cause unknown.

Orillia, Ont.—August 8th.—E. Long Manufacturing Company's storehouse. Loss, $14,000.

Ottawa, Ont.—August 15.—Shed at rear of 52 Sherwood Street. Loss and cause unknown.

Rexton, N.B.—August 7th.—The Rexton Hotel. Loss, $5,000. Insured. Cause unknown.

Brockville, Ont.—National Manufacturing Company's sheds. Loss covered by insurance.

Aurora, Ont.—August 18.—Grand Trunk Railway Station. Loss, $500. Cause unknown.

South Monaghan.—August 10.—Mr. E. Anderson's house and barns. Loss and cause unknown.

Tyendenaga, Ont.—August 17.—Mr. J. Topping's barns. Loss unknown. Cause, supposed sparks.

Yarmouth North, N.S.—August 12.—Mr. E. Allen's barber shop. Loss small. Cause unknown.

Edmonton, Alta.—August 12.—Acme Cleaning Company, Second Street. Loss and cause unknown.

Port Perry, Ont.—August 18th.—Mr. R. Harrington's barn. Loss unknown. Cause, lightning.

Chatham, N.B.—August 13.—Mr. M. Barry's residence, Pleasant Street. Loss and cause unknown.

Waterford, N.S.—August 12.—Transformer house, No. 17 Colliery. Loss, $1,000. Cause unknown.

Pelham, Ont.—August 14th.—Mr. J. Crow's barn. Loss, $3,500. Insurance, $1,800. Cause, lightning.

Weyburn, Sask.—August 8th.—Ideal Grocery Company's store. Loss, probably $4,000. Cause unknown.

North Vancouver, B.C.—August 8.—Shrapnel Block, Lonsdale Avenue. Loss small. Cause unknown.

Revelstoke, B.C.—August 5th.—City Hotel, Mr. C. Tapping, proprietor. Loss, $40,000. Cause unknown.

Frankford, Ont.—August 12.—Business block owned by S. Carry, Belleville. Loss, $7,000. Cause unknown.

Nanaimo, B.C.—August 11.—St. Matthew's church at Wellington. Loss, $5,000. Cause, supposed spark.

Perth, Ont.—August 18.—Messrs. T. A. Moodie and F. Consitt's barns. Loss unknown. Cause, lightning .

Tufts Cove, N.S.—August 7th.—W. Busch's bungalow completely burned. Insurance, $500. Cause unknown.

Bailieboro, Ont.—August 12th.—Mr. Armstrong's house, barns and the season's crop. Fairly well insured. Cause, spark.

Berlin, Ont.—July 18.—Mr. J. R. Strickland, King and Agnes Streets. Loss, $1,000. Insured. Cause, defective wiring.

Walkerton, Ont.—August 12th.—Barn and stables of Hartley House. Loss covered by insurance. Cause unknown.

Lansdowne, Ont.—August 12.—Mr. C. Ferguson's outbuildings. Loss, $3,000. Insurance, $2,000. Cause unknown.

Plymton Township, Ont.—August 12th.—Buildings belonging to J. Robertson and also 16 valuable sheep. Loss, $6,000.

Dryden, Ont.—August 6th.—Fischer Lumber Company's barn. Owner Mr. A. R. Hutchison. Loss, $1,000. Cause unknown.

Scotland, Ont.—August 12.—Mr. G. A. Biggar's residence. Loss, $4,000. Insurance, $1,150. Cause, supposed oil stove.

Bowmanville, Ont.—August 17.—Mr. S. J. Honey's farm buildings, Darlington. Loss, $5,000. Insurance, $1,000. Cause, lightning.

Omemee, Ont.—August 12th.—Courtney and Son's shingle mill. Loss, $1,000. Not insured. Cause, thought to be children playing.

Port Hope, Ont.—August 14.—Grand Trunk Railway car.

August 18.—Mr. N. B. Gould's house on Alexander Street. Loss and cause unknown.

Holland, Man.—August 9th.—The Farmers Elevator was destroyed. Loss, $10,000. Two cars belonging to Blackburn and Miller were in the elevator.

Owen Sound, Ont.—August 8th.—Brewster's Limited, store. Loss several thousand dollars. Cause, supposed to be rats or mice gnawing matches.

Winnipeg, Man.—August 8th.—The Churchill Club. Loss, $300. Cause, match thrown down.

August 11.—887 Dorchester Avenue. Loss, $25. Cause unknown.

Belleville, Ont.—August 13th.—D. Thompson's barn. Loss, $1,500. Cause, children with matches.

August 18.—Canadian Pacific Railway trestle work near Shannonville.

Brandon, Man.—August 7th.—Masonic Chambers. Loss, 1,000. Cause, supposed incendiary.

August 12.—Mrs. Maronski's residence. Loss, $2,000. Cause unknown.

Moose Jaw, Sask.—August 6th.—T. Young's hardware store at Briarcrest. Loss, $5,000.

August 14.—Mr. J. Thompson's barn, east of city. Loss, $5,000. Cause, lightning.

Amherst, N.S.—August 11.—Mrs. Allen's millinery parlors, Victoria Street. Loss, $2,500. Cause unknown.

August 15.—Mr. D. C. W. Hewson's building on Church Street. Loss, $14,000. Cause unknown.

August 16.—Mr. Belliveau premises, York Street. Loss, $800. Cause unknown.

Vancouver, B.C.—August 8.—Brick building on Powell Street burned. Loss, $30,000 to building and stock of Eagle Macaroni Works, Mussens, Limited, Pacific Builders' Supply Company and C. C. Snowden.

August 10.—Empire Engineering Works, corner Alder Street and Seath Avenue, destroyed. Loss, $10,000.

Gananoque, Ont.—August 9th.—Mr. Gordon Roger's launch. Loss, $1,000. Cause, explosion of accumulated gas. Two houses on King Street, one owned by W. Hale and occupied by W. Tompkins. Loss on building and contents, $3,000; building only insured; the other the residence of Mr. Richards and Mr. Pratt. Loss, $2,000. Insurance, $1,100.

Hamilton, Ont.—August 9.—Mr. W. Carmichael's barn, 267 Hughson Street, N. Loss, $500. Cause, lightning.

August 14th.—Metropolitan Furniture Company's warehouse. Loss, $6,000. Cause unknown.

August 16.—Tudhope Motor Company's garage and show rooms. Loss, building $500, five automobiles, $14,500. Cause, supposed spontaneous combustion.

Midland, Ont.—August 7.—Steamer "John Lee," owned by Messrs. Kinney Brothers. Loss and cause unknown.

August 19.—Messrs. Chew Brothers' lumber yards. The lumber was owned by the Hettler Lumber Company, the Freeman Lumber Company, Georgian Bay Shook Mills, Chew Brothers, J. G. King and Company and C. A. Larkin. The latter two are of Toronto. Loss, total, $250,000.

Montreal, Que.—August 12.—Shooting gallery at 138 St. Lawrence Boulevard, damaged. Loss, slight.

August 13.—E. Berzansky's restaurant, 127, Craig Street East. Loss and cause unknown. Rear 14 Richmond Square. Loss, slight. Cause, supposed dropped cigarette.

August 15.—Messrs. F. Tremblay and Company's lumber mill, etc. Loss, $30,000. Cause unknown.

August 19.—Kyle Chesbrough building, St. Peter and St. Alexis Streets. Loss unknown. One death. Cause unknown. Messrs. Crook and Corry's stable, rear St. Antoine Street. Loss unknown. One death. Cause unknown.

Saskatoon, Sask.—August 1.—K. Gommatt's stable, corner McKinnon and 7th Street. Loss, $500. No insurance. Cause unknown. Mr. Roger's residence, 825 Avenue I South. Loss. $50. Cause, defective chimney. No insurance.

August 4th.—Mr. A. H. Bodger's residence, 220 Avenue E. South. Loss, building, $200; contents, $200. Insurance Canada National. Building, $200; contents, $200. Cause unknown.

August 5.—Mr. J. O. Pickard's residence, 306, 4th Avenue N. No loss. Cause, chimney.

August 7.—Mr. J. C. Gordon, 214 Avenue E.N. Chimney fire.

August 9.—Mr. N. Guy's automobile. Loss, $25. Cause, lighted match.

Toronto, Ont.—August 13th.—Gold Medal Furniture Company's premises, Vanhorne Street. Loss slight. Cause unknown. J. Tuiffre's stable in rear of 585 College Street. Loss, $10. Cause, incendiary.

August 14.—Miss J. Ashdown's shed, 46 Maitland Street. Loss $300. Cause, supposed incendiary. Dr. Patten's motor-boat, 270 Lake Front, Centre Island.

August 16.—Tudhope Motor Car Company. Loss, $2,600. Cause unknown. Three houses owned by the Union Stock Yards, No. 13 Ryding Avenue, occupied by John McDonald, damage to building $500, to contents $50, insured; No. 15, occupied by Morris Vanderbilt, damage to building $500, to contents $50, insured; No. 17, occupied by James Webster, damage to building $500, to contents $20, contents uninsured; stable at 2166 Dundas Street. Cause, supposed sparks.

August 17.—Mr. T. Smith's premises, 62 Margaret Street. Loss, $600. Cause unknown. United Shoe Machinery Company's premises. Loss, $1,800. Cause unknown.

August 18.—1117 Yonge Street. Loss, $2,050. Cause unknown. Sheds rear 18, 20, 22 Abbott Avenue. Loss $75. Cause unknown.

THREE RIVERS JULY FIRES.

Three Rivers, Que., July fire loss was as follows:—

July 1st.—Mr. G. Nap's residence. Loss, $44. Cause, sparks.

July 4th.—Court House. Loss, building, $10,000; contents, $2,500; insurance, $22,500. Cause defective wiring.

July 6th.—U. B. Company's sawmill. Cause, sparks. Loss unknown.

July 20th.—Laurentide Pulp and Paper Company's sulphur store. Loss unknown. Cause, spontaneous combustion. Mr. G. Alb's photo store. Loss unknown. Cause, candle.

July 28th.—Mr. J. Dumont's residence. Loss, building, $20; contents, $60; fully insured. Cause, children with matches.

July 30th.—Casket factory owned by Messrs. Girand and Godin. Loss, $200. Fully insured. Cause, sparks from chimney.

UNITED STATES FIRE LOSSES.

The losses by fire in the United States and Canada during the month of July, as compiled from the records of the New York Journal of Commerce aggregated $20,660,900, as compared with $15,219,100 in the same month last year and $25,301,150 in July, 1911. The following table gives a comparison of the losses by fire during the first seven months of 1913 together with the same time in 1912 and 1911:—

	1911.	1912.	1913.
January	$21,922,450	$35,653,150	$20,193,250
February	16,415,000	28,601,650	22,084,600
March	31,569,800	16,650,850	17,511,000
April	17,670,550	16,349,400	16,738,250
May	21,422,000	21,013,950	17,225,850
June	20,691,950	16,103,450	24,942,700
July	25,301,150	15,219,100	20,660,900
Total seven months	$154,992,900	$149,591,550	$139,356,550

There were during the month of July this year, no less than 328 fires throughout the country where the estimated property damage reached or exceeded $10,000.

Canada's July fire loss as estimated from *The Monetary Times'* carefully kept returns, was $2,614,198 and fires totalling a loss of over $10,000, numbered forty.

CAPE BRETON ELECTRIC COMPANY, LIMITED

The Cape Breton Electric Company, Limited, reports for the year ended June 30th last, as follows:—

	1913.	
Gross earnings	$373,788	+ $27,350
Operating expenses	200,742	+ 9,298
Net earnings	$173,046	+ $18,052
Interest charges	55,931	+ 1,881
Balance	$117,115	+ $16,171
Bond sink. and imp. funds..	14,380	+ 500
Balance	$102,735	+ $15.671

CANADA'S GRAIN-SHIPPING FACILITIES

Not Enough Lake Tonnage—Elevators Needed—Montreal's Capacity

Monetary Times Office,
Montreal, August 21st.

Mr. W. G. Ross, chairman of the board of harbor commissioners, accompanied by Mr. M. P. Fennel, the assistant secretary of the harbor commission, proceeded as far as Fort William to ascertain the position as respects the grain shipping facilities. A number of points were considered, such as elevator capacity, present and projected, tariffs, freight rates and general equipment. The result might be summarized as follows: Provision for storage capacity of 40,000,000 bushels is made in the terminal facilities of the Grand Trunk Pacific at West Fort William on two piers. There are also two miles of wharfage with three freight sheds, and a coal handling plant having a storage capacity of 300,000 tons. In speaking of the effort to increase the movement of grain through Canadian ports, it was pointed out that notwithstanding that Canadian grain was shipped through the United States in bond, seeds not grown in Canada were found mixed with this grain when it reached the seaboard, yet the grain was sold to the European under the Canadian certificate. The cancellation of this certificate might mean that grain shipped via Canadian channels would command a higher price in the European market, but such action might be a hardship to the exporter unless Canadian shipping facilities enabled him to reach the market with his grain.

There is another reason to believe that the reason the St. Lawrence is not receiving the entire grain traffic of the Canadian Northwest is that there is an insufficient amount of Canadian lake tonnage, insufficient storage capacity at lake, bay and seaports, and insufficient ocean tonnage from Montreal.

Great Leak in Main Artery.

"The following table shows that the great leak in the main artery of Canadian transportation is not only still existent, but is increasing. In 1912, 44,519,182 bushels of wheat were were not only shipped from Fort William and Port Arthur to American lake ports, but all of it excepting 333,829 bushels was transported in American vessels.

Year.	In Canadian vessels to Canadian lake ports.	In Canadian vessels to American lake ports.	In American vessels to American ports.
1908	37,359,462	1,944,179	14,087,978
1909	37,296,735	3,315,646	15,972,860
1910	38,271,487	1,844,153	16,640,800
1911	36,378,535	1,258,469	32,548,553
1912	53,217,861	333,829	44,185,553

"These records show that, whereas the wheat shipments from the lake ports to lower Canadian ports increased slightly over 40 per cent. during the last five years, the shipments to American ports have increased 180 per cent. during the same period, and whereas in 1908 Canadian vessels shared to the extent of one-seventh in the carrying of the American routed grain, in 1912 their share dropped to one hundred and thirtieth part of it.

"Last year 44,519,182 bushels of wheat left these two ports routed through American channels and the Canadian marine lost its transportation to the American lower ports, which rightly belongs to it, by its scarcity of vessels, a scarcity which a deep-water channel to the sea would soon not only make adequate, but would divert to Montreal and other Canadian ports the greater portion of the grain trade which now seeks American ports.

Additional Elevator Storage Needed.

"In order to help our Canadian marine," writes Mr. Ross, "it is imperative that additional elevator storage should be provided at once, so as to obtain during the short season of navigation the maximum results from our ports. That vessel owners are anxious not to have any demurrage at Montreal is demonstrated by the verbal suggestion of Mr. Wolvin, of the Mutual and Canadian Interlake Lines, that the harbor commissioners should lease to him 500,000 bushels' capacity in the annex to elevator No. 1 or 2 for which he would be willing to pay the usual elevator rates and such additional operating cost as would guarantee a return of 4 or 4½ per cent. on the cost of the leased portion, or a similar arrangement, if it could be worked out, to what is done to the industries desiring wharves. This scheme's purpose being so that a regular schedule of sailings westward could be adopted for the season."

MANITOBA'S STORY OF AGRICULTURE

As Told by the Census Figures—Wheat Production During Past Decade Increased Over Eighty Per Cent.

Manitoba is bounded on the south by the states of Minnesota and North Dakota, on the west by Saskatchewan, on the north by the north-west territories and Hudson Bay, and on the east by Ontario. So says the census bulletin on Manitoba, just published, forgetting to add that Manitoba is also steeped in enterprise and encircled with optimism.

The area of this progressive province at the date of the census, 1910, was 47,188,298 acres, or 73,732 square miles, of which 41,169,098 acres were land and 6,019,200 acres water. By the extension of boundaries act, 1912, the area of the province was increased by 178,100 square miles, making the present area 161,172,298 acres, or 251,832 square miles, of which 148,432,698 acres are land and 12,739,600 acres water.

The rural population of Manitoba in 1891 was 111,498, in 1901 it was 184,738; in 1911 it had increased to 255,249. It was 73.11 per cent. of the total population in 1891, in 1901 the percentage was 72.38, and in 1911 it had fallen to 56.02 per cent. The rural population of the province in 1911 was greater by 38 persons than the total population as shown by the census of 1901.

The area of occupied land in 1911 was 12,367,355 acres as against 8,843,347 acres in 1901, and 5,228,272 acres in 1891, being an increase of 3,524,008 acres, or 39.85 per cent. in the last decade as compared with an increase of 3,615,075 acres, or 69.14 per cent., in the previous one. The occupied land constituted 30.04 per cent. of the land area of the province in 1911, or 8.33 per cent. of the land area within the present boundaries.

Number of Farms.

The number of farms in 1911 was 46,347, of which 38,825, or 83 per cent., were holdings of more than 100 acres each; in 1901 the number of farms was 32,495, of which 29,598, or 76 per cent., were holdings of more than 100 acres each.

The area of improved lands increased from 3,995,305 acres in 1901 to 6,762,582 acres in 1911, being an increase of 2,676,277 acres, or 69.26 per cent., in ten years; in the previous decade the increase was 2,763,194 or 224.26 per cent., and the increase of 1891 over 1881 was 981,695 acres.

Land in field crops increased from 2,756,106 acres in 1900 to 4,688,611 acres in 1910, being an increase of 1,912,505, or 69.39 per cent. in the ten years; the area under field crops in 1911 was 5,162,217 acres, being an increase of 493,606 acres over the previous year; land in orchard and nursery was 1,933 acres in 1911 as against 652 acres in 1901, being an increase of 1,281 acres, and land in vegetables and small fruits increased from 4,549 acres in 1901 to 18,328 in 1911.

Land Under Wheat.

The land under wheat increased from 1,965,200 acres in 1900 to 2,760,371 acres in 1910, being an increase of 40.46 per cent. in the decade. The wheat area of 1911 was greater than that of 1910 by 334,462 acres. There are increases in the area and production of all cereals for 1910 over 1900 excepting peas and mixed grains.

The following table gives in a condensed form the area and production of cereals and hoed crops for several census years since 1881:—

		1881	1901	1911	Percentage of Increase for 1911 over 1901	Percentage of Increase for 1911 over 1881
Population	No.	62,660	255,211	455,614	78.52	627.12
Occupiers of farms	"	9,077	32,495	46,347	42.63	410.60

	bus.	556,193	1,320,794	2,865,839	49.20	415.26
Roots	ac.	—	978	2,099	114.62	—
	bus.	198,121	232,243	522 807	125.11	150.71

The cultivation of tame grasses, alfalfa and forage crops mark a forward movement in the methods of farming. In addition to 124,954 tons of cultivated hay grown on 137,671 acres, the records show that 138,340 tons of prairie hay were harvested. Turnips, mangolds, beets, etc., had an area of 2,099 acres and a yield of 522,807 bushels in 1910 as against 978 acres and 232,243 bushels in 1900. The statistics of horticulture as presented in Table V. apparently establish the contention that the growing of fruit is practicable in Manitoba. In 1901 there were 652 acres under orchard and nursery as against 1,933 in 1911. The number of bearing apple trees increased by 3,201, of non-bearing by 10,560; there are also increases recorded in the number of bearing and non-bearing peach, pear, cherry and other fruit trees. The census of 1901 recorded that one bushel of peaches and three of pears were grown; this census states that 18 bushels of the former and 13 bushels of the latter were produced.

Of cereals, the largest gross monetary return per acre was given by peas with $20.51, followed by beans with $16.37, fall wheat with $15.67, corn for husking with $12.63, flax with $11.15, buckwheat with $11.06, and spring wheat with $10.34; and the smallest return was obtained from oats, rye and barley in the order named.

Value of Farm Holdings.

The average value per farm holding of field crops, vegetables and fruits was $1,024.71 in 1910 as against $518.03 in 1900, being an increase of 97.81 per cent. in the decade.

The statistics of live stock show that horses increased by 116,507 in the ten years, milch cows by 13,856, other horned cattle by 71,371 swine by 61,957, turkeys by 51,189, geese by 18,175, ducks by 11,030, hens and chickens by 1,342,735, and hives of bees by 2,106. Contrary to the general tendency in Eastern Canada to a decrease in the production of sheep, Manitoba had in 1911 37,322 sheep as against 29,464 in 1901, being an increase of over 26 per cent. in the decade.

No. of Live Stock.	1881.	1901.	1911.	Percentage of Increase for 1911 over 1901.	Percentage of Increase for 1911 over 1881.
Horses	16,418	163,867	280,374	71.10	1,607.72
Cattle	60,122	349,886	435,113	24.36	623.72
Sheep	6,071	29,464	37,322	26.67	514.76
Swine	17,282	126,459	188,416	48.99	990.24

The increases in the number of pure-bred animals from 1901 to 1911 indicate a growing interest in animal husbandry. The greatest improvement was made in horses and cattle.

The average value of horses in 1911 was $168.34; of milch cows, $40.25; of other horned cattle, $22.55; of sheep, $6.00, and of swine, $8.51, as against an average value for 1901 of $96.19 for horses; of $33.60 for milch cows; of $18.92 for other horned cattle; of $4.88 for sheep, and of $6.89 for swine. The total value of all live stock in 1911 was $62,730,477, an average per farm holding of $1,353.49 as against a total value of $25,902,201 in 1901, or an average per farm holding of $797.11, being an increase of 69.67 per cent. in the decade.

Average Value of Live Stock.

In comparing the average value of live stock for the two census years it may reasonably be assumed that the figures for 1911 are below rather than above the mark, owing to the inclusion of a greater number of young animals in the returns of the last census, which was taken as for June 1st, than there was in the previous census taken as for March 31st.

The increases in the values of farm animals and agricultural products are accompanied by increases in the values of farm lands owned, being $29.83 per acre in 1911 as against $11.54 per acre in 1901.

The value of live stock sold in 1910 is given as $10,926,459 as against $2,869,105 in 1900, being an increase of $8,057,354, or 280.83 per cent. in the decade. The value of animals slaughtered on the farm rose from $1,325,289 in 1900 to $1,874,500 in 1910, an increase of 41.44 per cent.; the value of dairy products, which was reported at $2,792,606 in 1901 had increased to over 9½ million dollars in 1911. Eggs gave a value of $605,534 in 1901 and of $1,765,189 in 1911.

As to the Hired Man.

The number of weeks of hired labor on the farm in 1910 was 600,758 and the value $5,379,219, being an average wage of $8.95 per week as against 419,248 weeks in 1900 with a value of $2,615,111 and an average wage of $6.23 per week, being an increase in the cost per week of farm labor of 43 per cent. from 1900 to 1910.

The total value of lands owned, buildings, farm implements, and live stock on hand was $465,810,806, with an average value per farm holding of $10,050, being an average of $6,739 for lands, of $1,355 for buildings, of $603 for farm implements, and of $1,353 for live stock on hand. The gross returns to the farmers as represented by field crops, fruits, live stock sold, dairy products, animals slaughtered on the farm, wool, eggs, honey and wax totalled $71,613,409, being an average per holding of $1,545. From the gross earnings must be deducted the fixed charges for seeds for feed for animals, for depreciation of farm implements and for labor, before the net revenue of the farmer can be estimated.

◆

Mr. A. E. Fisher, superintendent of insurance for Saskatchewan, has issued a circular, warning people against dealing with certain fire insurance companies. Several companies have been doing business without first making the necessary deposit to protect policyholders, and the circular issued by the superintendent gives a complete list of the companies who have fulfilled requirements.

GERMANY SPREADING COMMERCIAL ARMS

More Trade To Be Done With Canada—What a Close Observer Saw in the Fatherland

Germany year by year is taking a greater interest in Canada and is obtaining a larger share of the Canadian import trade.

The Dominion Government has recognized this development in Canada's trade relations and recently appointed at Hamburg, as special trade commissioner for Germany, Mr. C. F. Just, a capable and most suitable officer. Those who have studied the development of Germany and know the indomitable commercial energy of its citizens, anticipate considerable strengthening of the trade between Canada and the Fatherland.

The great development proceeding in Germany, of which so many of us in Canada are unaware, is strikingly shown in a volume, just published, by W. H. Dawson, under the title, Industrial Germany. It is well worth the perusal of those interested in this development. Mr. Dawson says that perhaps no specially German characteristic has proved of greater service in the struggle for commercial and industrial mastery than the faculty for organization and co-operation, and continues:—Individualism is good where it has free play, but under modern industrial conditions pure individualism is inadequate, and even were it not inadequate it is impracticable in many large spheres of private enterprise. The most striking expression of this instinct for organization is seen in the remarkable growth of large undertakings. In German official industrial statistics the employment of fifty workpeople connotes a "large" enterprise, but in fact such enterprises are nowadays regarded as very small. A dozen years ago an establishment of 1,000 workpeople was gigantic, but to-day no number below that would in the estimation of the industrialists themselves qualify for admission to the ranks of "large" undertakings. The occupation census of 1907 showed that there were 1,423 industrial undertakings employing over 500 persons, and that the average of all was 1,080. Of these undertakings 420 were in the mining, smelting and saltworks industries, with an average of 1,444 employees; 319 were in the machine and instrument manufacturing industries, with an average of 1,120; 216 were in the textile industry, with an average of 790; and 108 were in the metal working industries, with an average of 880.

Share Capital Increased.

Again, while between the years 1886 and 1909, the number of share companies in Germany increased by 144 per cent. (from 2,143 to 5,222), the amount of their share capital increased by 203 per cent. (from £243,800,000 to £736,865,000). In 1909 there were six companies with a capital between £7,500,000 to £10,000,000; five with a capital between £5,000,000 and £7,500,000; 19 with one between £2,500,000 and £5,000,000; 28 with one between £1,500,000 and £2,500,000; 47 with one between £1,000,000 and £1,500,000; and 124 with one between £500,000 and £1,000,000—giving a total of 229 companies, each with a capital exceeding £500,000, figures of striking significance in view of the fact that thirty years ago Germany seemed to be the chosen land of the small entrepreneur.

Tendency to Concentration.

The tendency to concentration is particularly strong in the coal, iron and steel, and electrical industries, and in banking enterprise; but it is also seen in retail trading in the form of the great stores. Against the old political maxim "Divide and rule," the modern Cæsars of industry and commerce advance the principle "unite and conquer." For years a hot fight raged over the theory of free competition, but now that free competition is every one's right, the men who clamoured for it have suddenly ceased to compete. The union now in favor may take various forms—a loose convention, a close combination, or a formal fusion or amalgamation—but whatever the form, the ends sought and, in fact, attained, are the elimination of competition and greater economy in working.

The extent to which concentration has been carried latterly may be illustrated by a list of some of the best-known enterprises with the capital they employ:—

Industry and Commerce.

F. Krupp, Essen	£9,000,000
Gelsenkirchener Bergwerksgesellschaft	7,800,000
Allgemeine Elektrizitäts-Gesellschaft	7,750,000
Phönix Colliery Company	5,000,000
Deutsch-Luxemburgische Bergwerks Gesellschaft	5,000,000
Siemens-Schuckert Werke (Electrical)	4,500,000
Berliner Handels Gesellschaft	5,500,000
amburg-American Shipping Co.	6,250,000
Nord-Deutscher Lloyd Shipping Co.	6,250,000
Grosse Berliner Strassenbahn	5,000,000

Finance.

Deutsche Bank	£10,000,000
Dresdner Bank	10,000,000
Reichsbank	9,000,000
Discontogesellschaft	10,000,000
Darmstädter Bank	8,000,000
A. Schaffhausenscher Bankverein	7,000,000
Commerz und Disconto Bank	4,250,000
National Bank	4,500,000
Mitteldeutsche Kreditbank	3,000,000

Here are 19 undertakings with an aggregate capital of £127,750,000, or an average of £6,750,000. Nearly all these huge undertakings have reached their present form by the absorption of a series of allied and, as a rule, rival enterprises. The great firm of Krupp is no exception to the rule. Undertaking after undertaking has been acquired until the gigantic Essen enterprise, with all its ramifications, now employs no fewer than 70,000 persons; and if members of families are counted, the livelihood and fortunes of nearly 250,000 persons—or exactly the combined population of the four smallest German principalities—are dependent upon the prosperous working of this one enterprise. The amalgamated works comprise six coal mines, a number of iron mines, cokeries, six iron and steel works, including rolling mills, the famous cannon works at Essen, a large shipbuilding yard, and a fleet of vessels for the Rhine transport service, worked from Rotterdam. The various works of this firm consume 2,500,000 tons of coal yearly, most of which is obtained from its own mines,

About the Krupps.

The direct line of Krupp is now extinct, yet it generally happens that some masterful personality is behind the enterprises united in the modern "combines," and these he is said to "control." The influence of individual men like Herren Stinnes, Thyssen, Funke, Haniel, Kirdorf and other industrial leaders of West Germany is enormous. So far has concentration gone that a well-known industrial leader said not long ago that the industry of Germany was to-day practically dominated by three hundred men. Herr Stinnes alone directs a combination which owns or "controls" over twenty coal mines, seven iron works, many iron ore mines in various parts of Germany, as well as in Luxemburg and France, twenty-six trading and shipping companies in seven countries, and a number of wholesale coal depots for the handling of his firm's output.

The recent evolution of one of the largest of his enterprises well illustrates the energy and ambition of the present generation of coal and iron magnates. Ten or twelve years ago, the German Luxemburg Mining and Smelting Company was formed with a capital of £50,000, on the ruins of a still smaller undertaking which had failed to keep abreast of the times. One by one additional undertakings were absorbed by the new company—coal mines, iron ore mines, smelting works, etc.—necessitating constant increases of capital, until the combination now represents a fusion of at least a dozen concerns in Luxemburg and Westphalia, with a working capital exceeding £5,000,000. Not only so, but the success which was not possible to the small enterprise has attended the course of the larger, the shares of the company to-day being quoted at 75 per cent. above par.

Regarding the Coal Industry.

The colliery industry of the Prussian provinces of Rhineland and Westphalia is more and more passing under the domination of a few large combinations, insomuch that legislation had to be passed several years ago, with a view to protecting the interests of the mining population.

Mr. Dawson then deals at length with the coal industry and continues:—

The same struggle between "pure" and "combined" works is going on in the iron and steel industry, and again the cause must be sought in the irresistible movement towards concentration. To-day the "pure" works, producing either iron ore, pig iron, or steel, are nearing extinction, and the mixed works are supreme.

Meantime, production falls more and more into the hands of a few large companies. In 1873 there were 244 separate iron works with 379 blast furnaces, and an average annual production per furnace of 9,200 tons; but in 1910 there were (Luzemburg included) 99 works with 303 blast furnaces, and an average annual production of 149,000 tons.

Mr. Dawson discusses in his book, published in English by Collins Press, London, the following phases of German life and industry:—Population and occupations, natural resources, state railways, development of the waterways, industrial concentration, the cartels and syndicates, central power and light supply, the organization of labor, the organization of capital, the home industries, and the colonial movement.

DIVIDENDS AND NOTICES

No. 332.

UNION BANK OF CANADA.

DIVIDEND No. 106.

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the paid-up capital and stock of this institution, has been declared for the current quarter, and that the same will be payable at its banking house in this city, and also at its branches, on and after Tuesday, the second day of September next, to shareholders of record on August 19th, 1913.

By order of the Board.
G. H. BALFOUR,
General Manager.
Winnipeg, July 15th, 1913.

THE HOME BANK OF CANADA

NOTICE OF QUARTERLY DIVIDEND

Notice is hereby given that a Dividend at the rate of Seven per cent. (7%) per annum upon the paid up Capital Stock of this Bank has been declared for the three months ending the 31st August, 1913, and that the same will be payable at its Head Office and Branches on and after Tuesday, September 2nd, 1913. The Transfer Books will be closed from the 17th to the 31st August, 1913, both days inclusive.

By order of the Board,
JAMES MASON,
General Manager.
Toronto, July 16th, 1913.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-half Per Cent. upon the paid up Capital Stock of this Institution has been declared for the three months ending 31st July, 1913, and that the same will be Payable at its Banking House in this City, and at its Branches, on and after Tuesday, The Second Day of September next, to Shareholders of record of 31st July, 1913.

By order of the Board,
H. V. MEREDITH,
General Manager.
Montreal, 22nd July, 1913.

THE CANADIAN BANK OF COMMERCE

DIVIDEND 106

Notice is hereby given that a quarterly dividend of 2½ per cent., upon the capital stock of this institution has been declared for the three months ending the 31st August next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 2nd September next, to shareholders of record at the close of business on the 16th day of August, 1913.

By order of the Board,
ALEXANDER LAIRD,
General Manager.
Toronto, 21st July, 1913.

THE BANK OF TORONTO

Dividend No. 128

Notice is hereby given that a Dividend of Two and Three-quarters Per Cent. for the current quarter, being at the rate of Eleven Per Cent. per annum, upon the Paid-up Capital Stock of the Bank, has this day been declared, and that the same will be payable at the Bank and its Branches, on and after the 2nd day of September next, to Shareholders of record at the close of business on the 14th day of August next.

The Transfer Books will be closed from the Fifteenth to the Twenty-third days of August next, both days inclusive.

By order of the Board,
THOS. F. HOW,
General Manager.
The Bank of Toronto, Toronto,
July 23rd, 1913.

THE ROYAL BANK OF CANADA.

DIVIDEND No. 104.

Notice is hereby given that a dividend of Three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Tuesday, the 2nd day of September next, to shareholders of record of 15th August.

By order of the Board.
E. L. PEASE.
General Manager.
Montreal, P.Q., July 17, 1913.

CANADIAN PACIFIC RAILWAY COMPANY.

NOTICE TO SHAREHOLDERS.

The thirty-second Annual General Meeting of the Shareholders of this Company for the election of directors to take the places of the retiring directors, and for the transaction of business generally, will be held on Wednesday, the first day of October next, at the principal office of the company, at Montreal, at twelve o'clock noon.

The common stock transfer books will be closed in Montreal, New York and London at 1 p.m., on Saturday, the thirtieth day of August. The preference stock books will be closed in London at the same time.

All books will be re-opened on Thursday, the second day of October.

By order of the Board,
W. R. BAKER,
Secretary.
Montreal, August 11th, 1913.

MONTREAL'S AUTO-BUS SERVICE

Monetary Times Office,
Montreal, August 21st.

It is now somewhere about a year since the talk of an auto-bus service for the city of Montreal resulted in the formation of a company which succeeded in obtaining a ten-year franchise for the operation of such a service on a number of the main streets of the city. Last spring it was announced that Duncan McDonald, formerly manager of the Tramways Company, would become the manager of the Auto-bus Company, and that the arrangements had proceeded to such a point that it could be said that 100 buses would be operating on the streets by the first of September. The date mentioned is now almost here and although not a single vehicle has yet been laid down here, a number are being shipped from the other side, and it is thought that some of these should be in operation by about the first of October.

Mr. McDonald is still absent, having sailed for England some weeks ago for the purpose of deciding upon the nature of vehicle and placing an order for a sufficient number of these for the purpose of commencing operations. The cars are of the type used by the London General Motor Bus Company. Altogether, contracts have been given for one hundred of these buses, and before long these will afford some relief to the congestion in the matter of passenger transportation in the city of Montreal. It is thought that the first operations will be in some of the more prominent streets which are not now served by the Tramways Company.

Bankers' Burglar and Fireproof Safe for Sale at ½ Regular Price

A splendid bargain. In perfect condition. For full particulars and price, address The R. S. Williams & Sons Co., Limited, 145 Yonge Street, Toronto. Attention, Mr. Shelton.

FOURTH EDITION—REVISED

Manual of Canadian Banking

By H. M. P. ECKARDT

MANUAL OF CANADIAN BANKING

The New Edition of this important book covers thoroughly all the features of the Bank Act of 1913.

The Book is listed by the Canadian Bankers' Association as a recognized text book on banking practice. Chapters on Organization of a New Bank; Selection of the Junior; The Junior's Post; The Cash Book; The Discounts; Teller and Customer; The Bank's Business in Exchange; Receiving and Paying; The Accountant; The Statements; Manager of the Branch; Financing the Crops and the Mines; Relations with other Banks and with Head Office; Inspection of the Branch; Head Office; The General Manager's Department; The Board; Liquidation of Failed Banks.

Price $2.50 Postpaid

SPECIAL OFFER

While the regular price of Mr. Eckardt's Book is $2.50, we offer as a special inducement to send the Book and a year's subscription to The Monetary Times of Canada (including the Annual Review) for $4.00. This offer applies only to new subscribers and not to renewals.

ORDER FORM

To The Monetary Times,
62 Church Street, Toronto

I hereby subscribe to Special Subscription Offer, for which I enclose {Check / M.O.} for **$4.00**

MONETARY TIMES OF CANADA

Montreal Toronto Winnipeg

LIABILITY INSURANCE BUSINESS IN CANADA

It is Not as It Should Be—Movement is on Foot for Companies to Improve Conditions

Last week, *The Monetary Times* discussed the circular issued by the New York State insurance department regarding the liability insurance business. He stated that the condition of the liability business has become so serious that his department intended to call the various companies to strict account in their conduct of this class of business. "The companies generally have been and now are writing liability business," he said, "at a premium insufficient to take care of the losses and expenses. This method of doing business means a loss to the companies, and its continuance will mean a loss to the companies, and its continuance will mean insolvency. The liability policy protects the assured not only against claims maturing during its life but also against claims maturing years after the policy expires, on account of accidents occurring during the policy year.

The New York department will insist upon the companies conducting their liability business upon a sound basis and in particular as follows:—

What The Superintendent Requires.

First.—Basing their underwriting upon statistical experience and the physical and moral hazard of each individual risk and free from the influence of competition.

Second.—Commissions not to exceed the percentages stated above.

Third.—Administration expenses to be minimized.

"It is found," added the New York superintendent, "through examination or otherwise, that any of the authorized companies of other states are transacting their business contrary to the above recommendations, and in such a manner as to jeopardize the interests of the assured, I will not hesitate to use the power vested by law in the superintendent of insurance to revoke the certificate of authority of any such company whenever, in my judgment, such revokation will best promote the interests of the people of the state."

Conditions In Canada.

How are conditions in Canada? is the natural question. Not as good as they might be, seems to be the answer. The managers of companies doing liability business in Canada generally admit that it is in an unsatisfactory state. Many of them prefer not to offer any criticism of the existing conditions, as it is understood that a committee is endeavoring to bring the companies together into some sort of an agreement which will, *The Monetary Times'* hopes, make for saner and sounder practices in the liability business.

"It is of vital importance," said one manager to *The Monetary Times*, "to both the employer and the employee, that the companies taking their risks should not only be financially sound at the time of accepting the business, but that they should be managed in such a manner that they will continue able to meet all legitimate demands that may be made upon them. When this is more fully realized by the general public there will, I believe, be co-operation between the companies, the employers and employees. Such co-operation would materially help to reduce expenses and to keep down exorbitant claims and prevent fraudulent ones. But first there must be co-operation amongst the companies."

Rates on Actual Experience.

The manager of another company doing business in Canada gave his views to *The Monetary Times* on the subject. While there is a manual of rates based upon experience, he says a system of special rating has been in vogue for some years, and which we think is very much abused by agents manufacturing so-called non-tariff competition, influencing the head offices to accept business at cut rates to meet this non-tariff competition. Business which has been unprofitable, is in many cases continued on the books of the companies at cut rates, and which should be increased to full manual rates, if not in excess of that. The companies cannot hope to make profit unless the rates based upon actual experience are adopted and the system of special rating done away with, and some provision made for the higher rating of undesirable business.

There seems to be an insane competition for business of a class at rates which the managers themselves know will not be profitable. Income counts more than profit with some managers, thus sacrificing quality to quantity, concluded this gentleman.

Canadian Companies May Get Together.

Mr. John Emo, general manager and secretary of the Canadian Railway Accident Insurance Company, Montreal, thinks that every responsible Canadian underwriter is entirely in accord with the action of the New York Insurance Department, the necessity for his action arising, he tells *The Monetary Times*, from the fact that various inexperienced and incompetent underwriters, in their greed for business secure same at rates too low to carry the hazard, at the same time paying exorbitant and unnecessary commissions to agents.

With regard to Canadian commissions, says Mr. Emo, with a few exceptions the companies transacting business in Canada are paying reasonable commissions. The following is the general scale:—25 per cent. personal accident and health insurance; 15 per cent. automobile, liability, plate glass and guarantee insurance.

Where the above commissions are exceeded, it is usually by an allowance in connection with a supervising agency or branch office, or for special services, other than the premium itself. It is to be regretted that the above recognized commissions are not so strictly adhered to as might be desired, but there is a movement on foot, says Mr. Emo, in which all casualty companies doing business in Canada are taking part, to place the business on a more practical basis by paying a uniform and reasonable commission, and by reducing expenses wherever possible. Such a course has proven itself to be absolutely necessary to casualty underwriters, if they wish to make an underwriting profit for the companies they represent.

◆

SASKATCHEWAN'S GROWING MUNICIPALITIES.

From various territorial units in the province petitions have been received by the Saskatchewan Government for municipal organization. The portion of Saskatchewan south of a point north of Prince Albert is divided into territorial units which have an average area of nine townships. There are a total of 367 of these units, 290 of which are already organized as rural municipalities. When any one of the 77 remaining has a population sufficient to warrant the taking on of the responsibilities as well as the privileges of local self-government, it is created a rural municipality, and the people who pay the taxes in such are allowed to elect six councillors and a reeve, which will be the local governing body of the community concerned.

The hamlet of Cedoux, situated about forty miles southeast of Regina on the Grand Trunk Pacific Railway is now a village.

The village of Kincaid, comprises a thriving community, and was built in anticipation of the extension of the Weyburn to Lethbridge line of the Canadian Pacific Railway.

The town of Sutherland, which is only about three miles from the city of Saskatoon, is taking steps to have its boundaries extended.

◆

BRITISH EMPIRE BUTTER PRODUCTION.

It is somewhat discouraging for the second year in succession to have to record a serious reduction in the import of butter into the mother country from the British Dominions. states Messrs. Weddel and Company's annual review of Great Britain's produce imports. The great increases made in the years ending June 30, 1910, and more notably 1911, when the highest export ever known was recorded, raised the expectation that the United Kingdom could rely upon a growing supply of butter from the outlying parts of the empire. The encouraging prospect then opened up has disappeared, and uncertainty as to these supplies being maintained in the future again prevails, notwithstanding the more favorable prospects for the coming year.

A reduction of 13,027 tons, or 24.6 per cent., from the previous season is a sad record to have to write over the past year, but it is unhappily true, the total import from the oversea dominions into the United Kingdom for 1913 being only 39,830 tons. That was 21,193 tons below the record year of 1911, when 61,023 tons arrived. The dominions of New Zealand and Canada show serious deficiencies for the past year, as also do the various Australian states, with the sole exception of Queensland, which increased her shipments by 2,307 tons.

The past year bear witness to the fact that Canadian supplies of butter to the mother country, which began to reach England about the middle of the nineteenth century, have come to an end, and the only consoling circumstance in connection with this fact is that it is due to the prosperity of Canada and her increased consumption arising from the rapid growth of population. So recently as in the year ended June, 1906, Canada sent no less than 15,145 tons to this country. In 1911-12 she sent 2,097, but this was an unjustifiably large export brought about by the extraordinarily high prices prevailing here in the autumn of 1911; and before the year closed Canada was compelled to import butter from Great Britain and from New Zealand, having over-exported her stocks, and not having enough to feed her own population.

HOLLINGER MONTHLY STATEMENT

Company Should Show Substantial Surplus After Large Aggregate Distribution

Monetary Times Office,
Montreal, August 20th.

Shareholders of Hollinger Mines last week received their dividend of 3 per cent., which is paid them every four weeks. This makes $990,000 disbursed in dividends by the company since last November.

To December 1st (the end of the first-half year of milling) profits from operations were $600,664.42. In the 6½ months ended July 15th, the latest statement from Manager Robbins gives profits from operations as $851,667.98. Having in mind that only 4,447 tons were treated by the mill between June 15th and July 13th, 1913, for a recovery of $23,129—making a loss in these operations—it would seem that the mill in the initial year of crushing, to July 15th, 1913, made a profit of $1,452,332.40, or 48 per cent. on its capital, in spite of strike, inefficient labor, alterations and other handicaps. Should the rate of production shown in the present statement be no more than maintained till the close of December, and should costs and economies be no more favorable, the company should show a surplus of $900,000 after having distributed $1,440,000.

Gain in Surplus.

The general manager's report for the period ending July 15th, showed surplus of $573,469.67, a gain of $39,146.76, as compared with a similar statement for four weeks ending June 17th, making gross profits of $129,146.76, or just $39,146.75 more than the dividend requirements of $90,000. Considering that $63,191.64 has gone towards additions to plant since January 1st, that $3,600 has been devoted to the purchase of building sites and that the production has been held back by troubles, the surplus of $573,469.67, on July 15th, after paying out $900,000, is an indication of what the mine can do.

Between June 17th and July 15th, the mill only ran 87 per cent. of the time and milled 10,056 tons, as compared with 11,867 in the previous four weeks. Average value of ore milled in later period was $19.70, against $16.50 in the previous. Also, approximate extraction reflects improved milling practice, recovery being 96.5 per cent. against 95 per cent. previously. Costs are 91c. higher, for general costs; milling cost is 25.6 per cent higher.

What the Manager Says.

Hollinger is apparently pursuing an aggressive and mining development policy while its surplus is mounting. Having the upper levels in shape to supply the mills for some time, the idea is to block out greater ore reserves. The general manager has a development programme in hand which will require many months. He says:—

"Work on the winze below the 300-foot level has been continued and the winze has now reached a depth of 113 feet. The vein dipped out of the winze at 94 feet. The winze will be carried to a depth of 125 feet before cutting the station, thus making the next level 425 feet. We expect to pick up the vein within 20 feet of the winze on the 425-foot lepel.

"The shaft on No. 7 vein has reached a depth of 34 feet on July 15th.

"Work has been started sinking on No. 44 vein, not included in estimate of ore reserves, careful sampling shows average values of over $50 per ton over the average width of 15 inches."

The foregoing deals with a situation now a month old. The station has since been out at 125 feet below the 300-foot level, and the main shaft is about through from the 300 to the 200-foot level, thus facilitating hauling. The shafts on veins 7 and 44 are deeper and values and widths are being maintained.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of ore in pounds from Cobalt Station for the week ended August 15th:—La Rose Mines, 94,800; O'Brien Mines, 87,080; Hudson Bay Mines, 86,235; Cobalt Townsite, 281,400; Cobalt Lake, 121,400; McKinley Darragh, 117,406; Nipissing, 127,975; Elk Lake, Miller Lake and O'Brien Mines, 47,232; total, 963,528. The total shipments since January 1st are now 25,148,670 pounds or 12,574 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

BANK BRANCHES OPENED AND CLOSED

During July 20 branches of Canadian chartered banks were opened and 8 closed. The following gives details of the branches opened and closed this year:—

	Opened.	Closed.
January	34	15
February	29	16
March	25	6
April	28	4
May	20	8
June	22	10
July	20	8

Houston's Bank Directory gives the following particulars for July:—

Branches Opened—20.

Alberton, P.E.I.	Bank of Nova Scotia.
Cedars, Quebec	Quebec Bank.
Fort George, B.C.	Bank of Ottawa.
Kingston, Ontario	Royal Bank of Canada.
Montmorency Village, Que.	La Banque Nationale.
Montreal, Que., Beaver Hall	Royal Bank of Canada.
Montreal, Que., 1022 Ste. Catherine St. East	La Banque Provinciale du Canada.
Oshawa, Ont.	Canadian Bank of Commerce.
Pinar del Rio, Cuba	Royal Bank of Canada.
Quebec, Que., St. Paul St.	La Banque Nationale.
St. Catharines, Ont.	Bank of Montreal.
St. Johns, Que.	Royal Bank of Canada.
St. Laurent, Que.	Banque d'Hochelaga.
St. Laurent, Que., St. Zotique Boulevard	Banque d'Hochelaga.
Ste. Perpetue (L'Islet), Que.	La Banque Nationale.
Ste. Rosalie (L'Islet), Que.	La Banque Nationale.
Toronto, Ont., Church St., and Wilton Ave.	Sterling Bank of Canada.
Toronto, Ont., Church and Wellington Sts.	Bank of Toronto.
Toronto, Ont., 1151 Yonge St.	Home Bank of Canada.
Winnipeg, Man., Elmwood Branch	Bank of Nova Scotia.

Branches Closed—8.

Contrecœur, Que.	La Banque Nationale.
Fort Frances, Ont	Imperial Bank of Canada.
Norton, N.B.	Bank of Nova Scotia.
Rocky Mountain House, Alta.	Imperial Bank of Canada.
St. Elizabeth, Que.	Canadian Bank of Commerce.
Sarnia, Ont., Devine St.	Bank of Toronto.
Summerberry, Sask.	Bank of Toronto.
Winnipeg, Man., Logan Ave.	Bank of Toronto.

LESS INDUSTRIAL UNREST.

According to the record maintained by the Dominion department of labor, industrial conditions showed an improvement in regard to labor disputes during July. There were 24 in existence as compared with 27 during the previous month. A still greater improvement is seen when the comparison is made between the present month and the corresponding period of last year when there were 46 strikes and lock-outs existing in the Dominion. During July, 1913, about 152 firms and 8,000 employees were involved in strikes and lock-outs as compared with 450 firms and 11,957 employees affected by trade disputes during the previous month. There was a slight increase in the loss of time to employees, about 188,000 working days being lost, as compared with approximately 181,000 during June. It may be mentioned that during July, 1912, upwards of 270,000 working days were lost from this cause. Two disputes of importance occurred during July, while of those that were in existence previous to this month, the most important as affecting industrial conditions, were those of coal miners on Vancouver Island and sawmill hands at St. John, N.B. These two disputes together accounted for a loss of upwards of 130,000 working days.

◆

The Aldergrove Farmers' Co-operative Society, Limited, has been incorporated in British Columbia. The shares are $5 each and the number is unlimited. The head office is at Aldergrove, B.C., and the directors are Messrs. Andrew Westland, Chas. Richards, and A. K. Goldsmith.

DEBENTURES FOR SALE

$1,164,706.40.

CITY OF OTTAWA, ONTARIO.

DEBENTURES FOR SALE.

Tenders addressed to "The Chairman, Board of Control," and marked "Tenders for Debentures," will be received by the City of Ottawa until 3 p.m., on Thursday the 28th August, 1913, for the purchase of $51,000 40-year debentures, $596,500 30-year debentures and $517,206.40 20-years.

They are all a liability of the city at large, and bear 4½ per cent. interest, payable 1st January and 1st July.

Two separate tenders will be received, one for $236,000 30-year debentures, and the other for the remainder of the debentures $928,706.40.

All tenders must be on the official form. The tender for the $236,000 debentures must be accompanied with an accepted cheque for $1,000 and the tender for the $928,706 40 year debentures with an accepted cheque for $5,000.

Accrued interest from 1st July, 1913, must be paid in addition to price tendered.

The $236,000 debentures are in $1,000 denominations, principal and interest payable at Ottawa.

The remainder of the debentures will be made payable in Ottawa, New York, or London, at the option of the purchaser, and in denominations to suit.

Delivery of the $236,000 debentures can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions, and official forms of tenders, can be obtained on application to the City Treasurer, Ottawa.

Sgd. J. A. ELLIS,
Mayor.

Ottawa, 4th July, 1913.

TOWN OF MAPLE CREEK, SASK.

DEBENTURES FOR SALE

SEALED TENDERS, marked "Tender for Debentures," will be received by the undersigned up to 12 o'clock noon of **Monday, the 25th of August,** for the purchase of the following issues of Debentures of the Municipality of the Town of Maple Creek:—

Cement Walks, $15,000.00, Local Improvement, 20-year, 6 per cent.

Waterworks and Sewerage Extensions, $10,000.00, 30-year, 6 per cent.

The by-laws authorizing this issue repeal those passed last year.

Copies of by-laws will be furnished intending purchasers, and full information regarding the Municipality can be obtained on application.

Price quoted to be net to the town, all expenses to be borne by the purchaser.

D. PATERSON,
Secretary-treasurer.

TENDERS FOR DEBENTURES

Sealed tenders marked "Tenders for Debentures" will be received by the undersigned up to 5 p.m. September 1st, 1913, for the purchase of $15,000 debentures, repayable in forty equal annual instalments, with interest at six per cent. per annum.

This issue is for the purpose of completing and furnishing St. Agnes Roman Catholic Separate School of Moose Jaw.

The highest or any tender not necessarily accepted.

EDW. J. BAKER,
Secretary-Treasurer.

The St. Agnes Roman Catholic Separate School District No. 22.

Moose Jaw, July 23rd, 1913.

CANADA AND MEXICO

Monetary Times Office,
Montreal, August 21st.

Montreal was much interested in the visit, to-day, of General Felix Diaz, accompanied by a party of distinguished Mexicans, all of whom were en route for Europe, presumably on a diplomatic mission. General Diaz was entertained at lunch by Mr. C. H. Cahan, K.C., who for many years was the representative of Canadian interests in Mexico, and while there was in close touch with ex-president Diaz.

What will be of special interest to Canadian financial interests is the assurance given by General Felix Diaz that Canadian companies in Mexico will be safeguarded to the utmost ability of the Huerta Government. Canadians had invested a great deal of money in that country and were looked upon with much favor and respect. The Huerta government had brought about peace in all parts of the country, save in the states of Sonora, Chihuahua and Coahahuila. These three states were along the American border. The remaining twenty-four states were quiet.

General Diaz and some of his attendants visited a number of the commercial and financial institutions, and paid a visit to the board of trade, under the guidance of Mexican consul Ansell, where secretary George Hadrill offered them every courtesy. The General and his staff will sail from Quebec.

◆

The following Canadian issues have been listed in London:—Algoma Central and Hudson Bay Railway, £97,400, fives; Southern Alberta Land Company, £250,000, sixes; city of Winnipeg, £690,000, four and a halves.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

PRICES DECLINE SLIGHTLY.

The labor department's index number of wholesale prices stood at 135.9 for July as compared with 136.9 in June, and 134.1 in July, 1912. The numbers are percentages of the price level during the decade 1890-1899. The chief advances occurred in grains and fodder, hogs and hog products, flour, oatmeal, wool, cotton and raw silk, with a decline in sheep, mutton, lambs, bananas, tin, metals, liquors, tobacco and sundries. Horse-hides and tallow were higher but cattle and beef were somewhat lower. Retail prices were comparatively steady during July. Eggs and hog products advanced, while butter showed a general decline.

CHANGES IN CAPITALIZATION.

Telfer Brothers, Limited, have increased their capital stock from $150,000 to $300,000, by the creation of 500 shares of new stock of $100 each.

The capital stock of Cochrane Hardware, Limited, has been increased from $250,000 to $500,000, by the creation of 2,500 shares of new stock of $100 each.

The capital stock of the Dominion Messenger and Signal Company has been increased to $200,000, the increase consisting of 1,000 shares of $100 each.

The Canada Weekly Printing Company, Limited, are applying for power to increase their capital stock to $30,000 by the issue of 400 shares of $25 each at par, 200 shares of said issue to be preference shares.

The Manitoba Cold Storage Company are applying for power to increase their capital stock from $150,000 to $300,000.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer:—

Alberta.

Irma, No. 2435, $1,000. R. J. Tate, Irma.
Neff, No. 1986, $1,200. G. Dyvig, Carkstadt.
Mantz, No. 2969, $1,500. E. A. Mantz, Hilda.
Atlanta, No. 2909, $1,000. Harry Spar, Stocks.
New Home, No. 2911, $1,000. C. Horn Minda.
Bawlf, No. 1463, $3,500. O. K. Eggan, Bawlf.
Coal Lake, No. 711, $1,200. R. Sykora, Millet.
Oakpark, No. 2967, $1,450. E. Anderson, Bawlf.
Price, No. 2977, $1,200. D. A. Heffner, Rumsey.
Ascot, No. 2952, $1,800. F. Ebbern, Wainwright.
Pella, No. 2780, $800. O. L. St. Pierre, Makaska.
Hardisty, No. 1659, $25,000. A. Mursell, Hardisty.
Diligence, No. 847, $800. A. Carriere, Diligence.
Badger Flatt, No. 1471. J. J. Strong, Claresholm.
Sandy Point, No. 2915, $1,600. E. A. Mantz, Hilda.
Pinehurst, No. 2916, $1,200. A. Rigby, Red Water.
Lineham, No. 2966, $800. P. F. Peirson, Lineham.
Cherhill, No. 2735, $800. John Seedhouse, Cherhill.
Beaver River, No. 2846, $1,200. E. Bricker, St. Lina.
Rosewood, No. 1899, $1,300. H. W. Hanstead, Killam.
Bathgate, No. 2955, $1,100. A. O. Chivers, Bathgate.
Wildhorse, No. 2896, $1,500. H. D. Stinson, Altorado.
Carrot Creek, No. 2875, $800. G. W. Kirk, Carrot Creek.
Middleton, No. 2877, $800. H. S. Whitehorne, Graminia.
Coalgate, No. 2894, $6,000. John Muffet, Jr., Commerce.
Sulphur Springs, No. 2918, $1,500. R. Benson, La Pearl.
Stonelaw, No. 2949, $1,200. W. Partridge, Sounding Lake.
Big Hay Lake, No. 2958, $800. R. McLeod, Halley P. O.
Dominion, No. 2893, $1,500. J. G. Buehler, Big Stone P. O.
Wagner, No. 2582, $1,200. J. J. Wagner, Pendant d'Oreille.
Setting Sun, No. 2850, $1,400. H. A. Halvoson, Metiskow.
Hastings Lake, No. 2939, $1,500. W. C. Stackhouse, Ministik.
Edmonton Roman Catholic Separate, No. 7., $40,000. E. Tessier, Edmonton.
Edmonton Roman Catholic Separate, No. 7, $20,000. E. Tessier, Edmonton.

A Company known as the Prince Albert Mining and Development Company, has been incorporated with a capital of $100,000 for the purpose of working a deposit of iron ore a few miles north-west of Prince Albert. The company has obtained a lease from the government of 1,200 acres of land.

ENGLISH COMPANIES RECEIVE BRITISH COLUMBIA LICENSES.

The following companies of London, England, have been licensed to do business in British Columbia:—Brentwood Beach Estate Company, Limited, Victoria, capital, $150,000; the Dominions Development, Limited, Victoria, capital, $250,000; Hudson Mining Company, Limited, Vancouver, capital, $500,000; Ptarmigan Mines, Limited, Victoria, capital, $1,500,000.

PROVINCIAL LICENSES GRANTED TO COMPANIES.

The following companies have been licensed to do business in Ontario:—Tonkin-du-Pont Graphite Company, Arizona, U.S.A., capital, $125,000; the Keystone Fireproofing Company of Canada (Dominion Charter), capital, $40,000; Malden Land Company, Michigan, U.S.A., capital, $50,000; the Dr. Peter Fahrney and Sons Company, Illinois, U.S.A., capital, $20,000; Great Eastern Realty Company, Limited (Dominion Charter), capital, $550,000.

The following companies have been authorized to do business in Quebec. Their chief place of business in the province is noted:—H. E. Talbott Company, Grand 'Mere; United States Steel Products Company, Montreal; Norcross Brothers Company, Incorporated, Iberville; Aberthaw Construction Company, Montreal.

The following Canadian companies have been licensed to do business in British Columbia:—The Thomas Davidson Manufacturing Company, Limited, Montreal, provincial office Vancouver, capital, $5,000,000; the Merchants Casualty Company, Winnipeg, provincial office Victoria, capital, $300,000.

The following companies have been registered to do business in British Columbia:—The B. F. Gooderich Rubber Company, Akron, Ohio, U.S.A., provincial office Vancouver, capital, $500,000; Chanslor and Lyon Company, San Francisco, U.S.A., provincial office Vancouver, capital. $200,000; Pacific Lock Joint Pipe Company, Seattle, Washington, U.S.A., provincial office Vancouver, capital, $150,000; Copeland Electric Stove Company, Michigan, U.S.A., capital, $40,000; Brayton and Lawbaugh, Limited, Portland, Oregon, U.S.A., capital, $25,000; the J. A. Brennan Drilling Company, Scranton, Pa., U.S.A., capital, $21,000.

POMOLOGICAL POSSIBILITIES.

The apple crop in Holland and Belgium will be small this season, and not in good condition, is the opinion given by Mr. J. T. Lithgow, Canadian trade commissioner at Rotterdam. On the Lower Rhine, and in the fruit-growing districts of western Germany, even worse conditions prevail, owing to the long continued wet weather, and the absence of sunshine. To supply the deficiency in the home grown article, it will be necessary to import more largely than usual, and the opinion is general that better prices should prevail.

The question of wider markets for the apple-growing industry on the Pacific coast of the United States is receiving careful attention. The record crop of 1912 was an unprofitable one; the prices fetched for much of the fruit shipped to England and the continent of Europe barely meeting the freight charges. A prominent Californian firm of shippers, who also at the same time are large owners of orshards, has been investigating the markets of the Far East, and arrangements have been completed for making shipments of fruit throughout the coming season, at regular intervals, to Manila, Yokohama, Shanghai, Hong Kong, Singapore, Bombay and Calcutta. It is anticipated that several hundred thousand of cases in the aggregate can at once be disposed of, and that the business is capable of very great expansion.

This new departure will probably interest fruit growers in British Columbia, as with the existing steamship communications with the Far East a portion of the crop of the province might well find an outlet in the same direction should the attractions of the home market not be sufficiently great, is the suggestion of Mr. C. F. Just, Canadian trade commissioner at Hamburg. In discussing, with a member of the firm referred to above, the question of the bearing of the Panama Canal on the prospects of the fruit exports to Europe, your commissioner gathered that the freights by the present route via New York would be entirely outclassed by the route via Panama. The present freight charges by the carload to New York averages 50 cents a case, or about $1.12, c.i.f. British or continental ports.

Steamers built for the trade, so the commissioner was assured, carrying not less than forty to fifty thousand cases could deliver at an average of 40 cents per case, all charges in, and practically without any greater length of time being occupied in the transit from the point of production to the eventual market.

CONDITIONS IN WINNIPEG.

A reader of *The Monetary Times* in Winnipeg, writes:—"With reference to financial conditions, I have not heard of much trouble here. Business seems to be jogging along. Some of the wholesale merchants say that collections are fairly good. I was talking with one of our largest retail merchants here and he assured me that they had had substantial increases every month in their sales. I feel satisfied that the successful harvesting of the crop will put everybody in better spirits, and this always has a very material bearing."

COMPANIES HAVE NEW HOMES.

The Great Lakes and Western Realty Company, Limited, is changing its name to the Great Lakes and Western Mortgage and Investment Company, Limited.

The Nova Scotia Development Company, Limited, has changed its name to the Nova Scotia Light and Power Company, Limited.

The capital stock of the Continental Oil Company, Limited, has been increased from $150,000 to $500,000, the increase consisting of 3,500 shares of $100 each.

MUNICIPAL FINANCING

Toronto Obtains Five Millions—Local Sales and Expenditures—Interest Rates Raised

Toronto has secured a one-year loan to the amount of $5,000,000 from Lloyd's Bank, London. The money is advanced against treasury notes with bonds as collateral. The interest charge is approximately 5½ per cent.

An English banking concern also holds an option on $2,000,000 of the city's debentures, the option expiring September 1st.

An offer has been received by Brandon Council from the Harris Trust and Savings Company, of New York, to purchase $275,000 10 or 20 years, 5 per cent. bonds at 88½. The same firm offered to buy a parcel of $41,000 at 86, 30 years at 5 per cent., and decided to accept the offer.

Proposals and Probabilities.

At a meeting of Point Grey Council, Mr. W. J. Twiss, of the Mutual Life Insurance Company, said that if the municipality really wanted to finance its own power plant that the residents themselves should purchase the bonds, that is providing they were issued in small denominations.

The money market and the bond situation was discussed at length at the recent meeting of the Saskatoon school board. The board has $110,000 in bonds on the London market for sale, the balance of a $175,000 issue, and from reports to hand it seems these will be disposed of soon.

While discussing the general financial policy of Winnipeg in connection with a deficit on the exhibition, support was accorded by the council to Alderman Crowe's statement that each year should bear its own responsibilities.

The suggestion has been made by a school trustee in South Vancouver that that municipality should not borrow any more money on the debenture plan, but should pay for improvements when they are made by a special tax. He argues that for every twenty cents borrowed eighty is paid, and that the burden on posterity is too heavy. The argument always has been that debentures should be spread over a long term for the very reason that posterity enjoys the benefit of the expenditure, and that it was hardly fair that the present owner of property should pay out for capital expenditure. Permanent improvements last a considerable time, and if a municipality adopted the principle of paying cash in the year the improvements were made, it would see one of two things happen. Either people would not go into the district and build homes for the pleasure of paying high taxes, or they would wait until the greater part of the burden had been borne by those already there. It is hardly probable that this suggestion will be adopted generally or approved.

Cities Need Money.

Owing to the increased value of money there is no demand for five per cent. forty-year debentures, so it has become necessary for Swift Current council to change the interest rate to six per cent. for thirty years. New by-laws will therefore be submitted asking the ratepayers to sanction this conversion. The amounts are $88,000 and $28,500.

Both the city of St. John and the school board of the city will shortly have bond issues to offer. The city has made large expenditures on important public services this year, and has important plans for next year, rendering it necessary to float loans.

ANOTHER ISSUE OVERSUBSCRIBED

The Canadian Northern Railway's issue in London of $7,500,000 five per cent. secured notes at 98 has been oversubscribed, the lists being closed in advance. The scrip was later quoted at ¾ premium for special settlement.

ANOTHER GRAND TRUNK ISSUE.

The Grand Trunk Railway is issuing £500,000 five per cent. notes in London in addition to the £1,500,000 notes sold a few weeks ago. The new issue was placed at 98½ as against 98 for the former, which is quoted at 1¾ per cent. premium.

MONTREAL HOPES TO FLOAT LOAN

The Bank of Montreal has informed the city treasurer of Montreal that a rising market may make it possible for the city to float its $11,000,000 loan before the end of the year. The loan represents the balance of the amount the city is authorized to float this year by virtue of the 1912 increase in its assessed valuation.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Lethbridge, Alta.—$362,500 debentures.

Bruderheim, Alta.—$500 debentures for purchasing fire apparatus.

Gadsby, Alta.—$2,500 debentures for grading street and building sidewalks and fences.

Oyen, Alta.—$3,300 debentures for grading streets, building sidewalks, and digging well.

Ottawa, Ont.—Up to August 28th for $1,164,706 debentures. Tenders to be addressed Chairman, Board of Control.

Rosetown, Sask.—Until Aug. 20th, for $13,500 7 per cent. 20-year debentures. A. Wilson Clark. (Official advertisement appears on another page.)

Wetaskiwin, Alta.—Up to August 20th, for $81,000 5½ per cent. debentures. E. Roberts, secretary-treasurer, Wetaskiwin. (Official advertisement appears on another page.)

Togo, Sask.—Until August 23 noon, for $10,000 20-year 6 per cent. school debentures. C. A. Hulse, secretary-treasurer, Consolidated S.D. of Makaroff. (Official advertisement appears on another page.)

Maple Creek, Sask.—Until August 25th noon, $15,000 (local improvements), cement walks, 20-year, 6 per cent; $10,000 waterworks and sewer extensions, 30-year, 6 per cent. D. Paterson, secretary-treasurer. (Official advertisement appears on another page).

DEBENTURES AWARDED

Rosthern, Sask.—$10,000, to Imperial Bank.

Eldersley R.M., Sask.—$4,000 6½ 20-year debentures, to Flood Land Company, Regina.

Brandon, Man.—$45,000 (of a block of $500,000 for sale) to the Canadian Phoenix Insurance Company.

Brandon, Man.—$316,000, to Harris Trust Company, New York.

RAILROAD EARNINGS

The following are the railroad earnings for the week ended August 14th:—

	1913.	1912.	Increase or decrease.
Canadian Pacific Railway.	$2,630,000	$2,677,000	— $47,000
Grand Trunk	1,150,198	1,098,423	+ 51,775
Canadian Northern	436,900	401,800	+ 35,100

CANADIAN DEBENTURES SOLD IN PARIS.

The Credit Foncier Franco Canadien has floated on the Paris market an issue of $3,000,000 debentures for investment in mortgages in Canada.

According to the last annual statement of the company, the Credit Foncier Franco Canadien had upwards of $40,000,000 invested in Canada. The high rates prevailing for mortgages on good properties make new investments of this kind attractive at present.

TORONTO'S HYDRO BONDS SOLD IN UNITED STATES.

In addition to Toronto's $5,000,000 issue, covering various improvement works, which was marketed in London, a second block was sold in the United States and includes securities valued at $4,250,000. They were on account of the hydro-electric system and comprise the first issue to be sold in connection with that undertaking. These were acquired by Messrs. N. W. Harris and Company, of Boston and Montreal.

This large bond house acquired and disposed of a block of $1,040,000 of Toronto's civic bonds earlier in the year.

Among other cities who have disposed of bonds in the United States this year are Vancouver, Hamilton, Edmonton, and Halifax, so that it would seem Canadian municipal securities are becoming more popular in the United States market.

THE WESTERN CROP

Why not drop the term "bumper" in relation to the crops of Western Canada? The suggestion comes to *The Monetary Times* from the West. It was possible to have such a crop when cultivation was limited to the Red River valley and a bit of central Manitoba. One can hardly conceive of any set of conditions which will now ensure a record yield from Winnipeg to the mountains, with every variety of climate and differing conditions of soil, where the altitude varies from nine hundred and fifty feet to over three thousand feet, and with open prairie and bush land.

Another important consideration is that in many parts of the country the farmer is less dependent upon his grain than in former years. Much progress has been made, particularly in Manitoba and Alberta, in the direction of diversified farming. The grain crop is still all important, but, nevertheless, consideration must now be given to the growing importance of dairy farming and stock-raising.

The reports from reliable sources in Western Canada lead *The Monetary Times* to believe that this year's crop will be a fair average crop, or possibly a little better than an average crop. One seldom sees a field of very heavy grain. There will be less than the usual number of reports of "tremendous" yields. No part of the country, however, is without a crop. It is all maturing satisfactorily, and weather conditions are good. In Manitoba, probably fifty per cent. of the oats had been cut by August 18th. Considerable wheat was also in stook. Saskatchewan was a few days later, but cutting was in progress there last week. In Southern Alberta the crop is early and is being rapidly harvested. The aggregate grain yield this year should be equal to that of last year, while the quality may be better.

An important consideration, of which the daily newspapers have taken very little notice, is that the farmer will get his labor this year for about sixty per cent. of what it has cost him during the past two years. The farmer is, therefore, feeling rather comfortable over the situation, and does not express any regrets for the general slackening of building operations in our cities. In Vancouver a few days ago the board of trade was negotiating with the Canadian Pacific Railway for a harvesters' excursion to be undertaken from Vancouver to the prairies, to give employment to the workmen of that city. This is a healthy movement. The abnormal construction works in our different cities attracted large numbers of workingmen to secure employment as carpenters and unskilled laborers at high wages. The farmer was deprived of legitimate help, and the cost of building in the city was increased through the wages paid to these incompetent workmen. This year the farmer can get help for his harvest at a remunerative price, and this condition should prove entirely to the advantage of the country.

A bad storm did a great deal of damage to the crop at a number of points in Manitoba, and warned us that until the grain is threshed the crop is not secure. This, however, was the first real damage from this source, and will not materially affect the general result. The most serious danger yet to be encountered is the possibility of frost.

After twelve months' freedom from wild speculation and the necessary curtailing of business operations through the scarcity of money, we should feel the benefit of the proceeds of the crop to a degree not usual in this country. Prices are rather better than last year, and there is every indication that this year's crop will give us more money than that of last year.

CANADA'S TRADE BALANCE

That there is nothing wrong with Canada, but a great deal wrong with the world's money markets is the statement of Sir Edmund Walker, one of our leading financial authorities. It is one, too, which should exterminate the pessimism, misgivings and criticisms of those who have purchased, despite the financial stringency, glasses of an unmistakable blue hue. Canada, being one of the most prominent borrowers overseas, was naturally the first mark of critics in a time of war and of a slim supply of capital. The tight money period through which we are passing is inconveniently embarrassing, and in some cases, destructive, but it is only a passing phase, one which we have had before and one which we will have again. It does not affect in any way the strength of Canada's economic foundation.

It is pleasing to note that the Dominion Government, via the pen of Professor Adam Shortt, of Ottawa, has given further official support to the national position, by the issue of an unusually interesting explanation of Canada's balance of trade. Professor Shortt shows that for over a decade past Canadian imports have increasingly exceeded Canadian exports, until for the twelve months ended April 30th, 1913, the returns stand as follows:—

Imports, not including coin and bullion....	$672,880,978
Exports, not including coin and bullion....	385,750,938
Leaving an adverse balance of...........	$287,130,040

At the same time during this period of expanding imports the balance of exchange in gold has not been against Canada, but on the whole in her favor. What, then, is the explanation of what appears to be at first sight an anomalous condition of international trade?

The explanation is simple, though the secondary consequences may be somewhat complex and remote. The great proportionate excess of Canadian imports over exports has at once resulted from, and is offset by the borrowing of outside capital by Canadian Governments, corporations and individuals and by the direct investment of outside capitalists in Canadian real estate, mines, timber and various enterprises. The chief channels through which these investments affect the imports and exports of the country may be summarized as follows: The largest investments of borrowed capital, representing hundreds of millions, have been made by the various public authorities—the Dominion and Provincial Governments and the municipal corporations. The three great railway systems of Canada also account for scores of millions, while many other corporations of a semi-public or purely commercial nature, real estate and other investments aggregate a vast total.

After discussing these factors in some detail, Professor Shortt reminds us that this very natural but nevertheless abnormal advancement of the country has not hitherto resulted in any inconvenience, because its lack of balance has been entirely met by the constant stream of foreign capital borrowed on Canadian account. A comparatively small proportion of this capital, however, has come to the country in the shape of money; almost the whole of it has been taken in the shape of goods. Thus the gap between exports and imports has been steadily widening, and will continue to do so until the construction of railways and other public works and the building of cities fall off. Then will result the inevitable consequence that a large proportion of people—employers and employed—must return to the production of articles for more immediate consumption and export. When this return movement begins the gap between exports and imports will gradually close. Finally, when the principal and interest of the hundreds of millions recently borrowed come to be paid exports will exceed imports with as little disturbance to the exchanges as we have found in the past. Both sides of the movement have been amply illustrated in the trade returns of the United States at various periods during the past century.

A writer in the London Times has also examined the Canadian trade balance. After discussing the various phases, he contends in conclusion, that the total burden of taxes and interest charges on capital borrowed abroad do not come to so large a sum as the cost of government per head on the population of the United Kingdom, and that the productive capacity per head of the population of Canada is certainly not less than that of the population of the United Kingdom. This, he thinks, should "show that the burden imposed on Canada, as a whole, by the present indebtedness of most of her large undertakings to the British investor is by no means so crushing as sometimes seems to be supposed."

ENGLISH AS IT IS WRITTEN

The Monetary Times received for publication an article, in French, on French investments in Canada. It was sent to a translation bureau, who guaranteed excellent work. Here is what was returned:—

"The need of defendind against the ambitions, often provocative, of a great European country, and also of protecting their industry and trade against proceedings of competitors, which want of invention and originality genius compels to flood all the world's markets—space to repeated steps of a broker's army so insinuating than tenacious—of products cleaverly imitated of which defects are only revealed after a certain use, have brought together two countries of which secular rivality printed its mark to each page of History."

We refrain from printing more.

The difference in the tongues of the world is awkward, but international business goes on just the same. *The Monetary Times* received the following letter from Moscow, Russia, the other day:—

"We beg to send us a specimen-number of your journal, having the intention to insert eventually in your newspaper. We also beg to call us the prices for insertion."

That is pretty good English, from Russia, for it obtains what it seeks. It is comparatively better English than some letters received from England recently, addressed, "Toronto, U.S.A.", and one which inquired regarding the whale fishing industry in Ontario!

English is rather roughly handled, and too frequently, in English-speaking countries. To add to the troubles of the Wall Street man forced to spend his summer in the city, says the Wall Street Journal, comes the necessity of employing a substitute stenographer in the vacation season. Wall Street diction is hard enough for the regular stenographer; the substitute finds it next to impossible. The employer of one of the substitutes not long ago tried to be particularly careful and distinct in his dictation. Nevertheless, "comptroller of the currency" emerged as "comptroller of the corn belt." A remark about the "drought district of Kansas" was interpreted as "grouch district in Kansas." Reverting to money matters again, the employer talked about taking bullion into the Bank of England, and the copy showed that bouillon soup had been taken into the bank. One of *The Monetary Times* vacation helps managed to address a letter to the city clock of Vancouver, instead of to the city clerk, while another, taking dictation on the Dominion Steel-Coal fight of some years ago, got it that Mr. Plummer and Mr. Ross were at "lager heads," that being the liquid interpretation of loggerheads.

The name of our paper, *The Monetary Times*, seems to be a prime obstacle for stenographers of all ages, experience and climes. Every week almost letters come addressed to The Momentary Times, while Monetary is spelled in a dozen ingenious ways. The Military Times was another title bestowed upon us. Whether by accident is not known, but The Monotonous Times and The Monastry Chimes are gratuitous titles which we remember but do not appreciate!

ST. BONIFACE STOCK YARDS

That Manitoba is not yet able to raise sufficient farm products to supply the home market was a fact emphasized by several speakers at the opening of the new stock yards at St. Boniface. Sir Rodmond Roblin especially noticed this fact, stating that it was not necessary that so much beef, dairy produce and vegetables should be purchased outside the province when they could be just as well produced within its borders. The development of the stockyards, with their improved marketing conditions, would be bound to increase the interest in mixed farming, and with it would come the other products.

The splendid St. Boniface stock yards are the result of the investigation of a government commission appointed in Manitoba to investigate stock shipping and selling conditions in the West. The outcome was the organization of the company which had constructed the present yards. These have been planned to give stockraisers and shippers every protection and assistance, and at the same time there are regulations which assure them the best protection of their industry and the greatest facilities for marketing their stock.

All live stock will be handled at cost, and the shippers and producers will have a representative on the board to see that this idea is carried out in every detail. There is another adjunct of the stock yards which will probably come in due course. That is the public abattoir. The stock yards will be of great assistance not only to Manitoba, but to all three western provinces. The land provided is sufficient for yard accommodation to handle 25,000 head of cattle a day.

SMALL CHANGE

Pay your bills and have faith.

* * * *

Even small change is acceptable these days.

* * * *

The July bank statement has not apologized for being late.

* * * *

At the crop manœuvres: "Country, front! Eyes west! Stand easy!"

* * * *

The Thaw case shows one of what complications the law machine is capable.

* * * *

A London report says money is harder, leaving Canada to add, to get.

* * * *

Calgary is learning the value of the modest cent. That is always a good sign.

* * * *

The thermometer, as a special favor, might keep its spirits up for a few weeks longer.

* * * *

Still, it does not help the man in street, to say it is credit and not money, that is tight.

* * * *

There is no need for alarm, wild criticism, or extravagance. Try only economy and adjustment.

* * * *

So there is no little life insurance Sun in the Home yet. The Ottawa officials are to say yea or nay.

* * * *

Some underwriters go so far as to place the emphasis in liability insurance conditions on the "lia."

* * * *

The Dominion government is calling for tenders for an ice-breaker—the height of midsummer impudence.

One could almost imagine the New York financial press as the frowning father and Canada the erring son.

* * * *

Sir Edmund Walker says there is nothing wrong with Canada—United States financial medicos notwithstanding.

* * * *

The United States Senate has accepted the Sugar Schedule. It is a novelty to see any Senate accept anything.

* * * *

Premier Borden at Toronto declined to dicuss the financial situation. That is the first refreshing breeze for a long while.

* * * *

Thomas W. Lawson, of Boston, striding over our crops, was another example of fools rushing in where angels fear to tread.

* * * *

A Montreal contemporary says a mining stock is not an investment. It is not always the mine to blame, it is more often the men.

* * * *

The price of sugar does not seem to have dropped with a loud thud since the Canada-West Indies trade agreement came into force.

* * * *

A Toronto contemporary prints the portraits of "prominent Canadians now on the ocean," which is better in tight money days than "being all at sea."

* * * *

"There is no public position on earth I would accept in lieu of the one I hold," says Premier Sir Rodmond Roblin, Manitoba. Why limit the geographical aspect?

* * * *

A Montreal paper wants to know who owns the streets of Montreal. Sometimes it looks as if the immaculate bond house junior and the aspiring hobble skirt do.

* * * *

Now they want the life insurance agent in Canada licensed. With all the society buttons he wears already, and a license, he will need then only a number plate on his dashboard.

* * * *

A black cat with a white-tipped tail walked on to the floor of the Toronto Standard Stock Exchange this week. The white tip to a stock exchange tale is not always to be trusted.

* * * *

An Oakville, Ontario, man pulled the bell-cord, stopped an express, was fined $35 and bound over in $3,000 not to do it again. It would have paid him to have hired a special from Hamilton.

* * * *

August is the month when we begin to think of September and of October's thanksgiving day, which brings us to November, and Christmas is then not far off. But spring will soon be here.

* * * *

The summer vacation is an annual period for the alleged transaction of business by temporary help. The fall revival of business is a similar period for the disentanglement of the same by the permanent staff.

* * * *

Mr. Sanford Evans, Winnipeg, says it would be good for the country if some of the young men playing with the country's finances were at railroad construction for the next ten years. It would certainly take the starch out of their alleged financial linen.

INSURANCE OF UNDER-AVERAGE LIVES

Company Formed to Write the Business in Canada—Promoters Say Thirty Millions Have Been Declined

A new company has secured a charter with a view to specializing in sub-standard life insurance. This is the Empire Life Assurance Company of Canada, which has authorized capital of $1,000,000, divided into 10,000 shares of $100 each. The head office of the company is in Toronto, and the officers are as follows: President, Hon. Thos. Crawford, M.P.P., Toronto, ex-Speaker in the Legislative Assembly of Ontario; managing director, George Boyd Wickes, Toronto; actuary and secretary, R. W. Barton, A.I.A., Toronto; chief medical referee, T. F. McMahon, M.D., Toronto. The company will shortly sell its stock.

Insurance of Under-average Lives.

In a pamphlet dealing with the insurance of under-average lives, Mr. Wickes and Mr. Barton say: "It is a matter of common knowledge that there are many people living to-day who at one time or another have been declined for life insurance. Although these persons often live long and active lives, they are unable to obtain the protection they need, because they cannot pass the standard of physical fitness required by the ordinary life offices. Such lives are known to insurance companies as under-average or sub-standard. That is, those who either from hazardous occupation, or from personal or hereditary taint, cannot be regarded as ordinary standard risks. For nearly a century a well-known English company has specialized in these risks in Great Britain, and for many years a leading New York company successfully wrote this class of business. The result has been a great benefit to the community and a profit to the companies."

Thirty Million Dollars Declined.

There are no published returns as to the total amount of business declined in the Dominion. After communicating, however, with all companies writing life assurance in Canada—Canadian, British and United States—the officers of the Empire Life Assurance Company, through the courtesy of these companies, are in a position to state that during the past three years at least $30,000,000 of business has been declined in the Dominion. The amount of these declinatures is also an increasing one—increasing with the total volume of business written by the companies.

Experience in Great Britain.

The Clerical, Medical and General Life Assurance Society of London, England, founded in 1824, to specialize in sub-standard assurance, is the oldest authority on the subject. By its act of incorporation eight of the board of directors must always be members of the medical profession. The long list of eminent physicians and surgeons who have served in this capacity is a recital of the leaders of the medical profession in Great Britain during nearly a century. Sir Richard Douglas Powell, Bart., K.C.M.G., M.D., physician-in-ordinary to H.M. the King, is the present deputy-chairman of the society.

The Clerical, Medical and General Life Assurance Society advertises examples of typical cases completed—cases that have been declined by several offices on account of rheumatic fever, heart and lung trouble, etc., which have usually been regarded as falling outside the scope of life assurance transactions.

"The completion over a period of nearly a century of many thousands of applications on these lives is proof that the terms quoted were acceptable to the assured," say Messrs. Barton and Wickes, "and the division of a surplus of twenty-three millions of dollars amongst its policyholders is a remarkable demonstration of the soundness of the business."

PACIFIC COAST FIRE INSURANCE COMPANY

The Pacific Coast Fire Insurance Company, Vancouver, have appointed Messrs, Reed, Shaw and McNaught, Toronto, managers of the company for the Province of Ontario. The Pacific Coast Fire Insurance Company up to date are having a successful year. Their loss ratio is lower than at the same period last year and the premium income shows an increase.

FORESTERS AT LAST RECOGNIZE THE ACTUARY.

The Independent Order of Foresters bill, which was passed at the last session of the Dominion Parliament, providing for the placing of the society on a sound actuarial basis, has been adopted by the supreme court by a vote of 178 to 28. Subsequently, on the motion of a delegate, who had voted against the bill, to make it unanimous, the vote was 200 out of 206.

WORKS MINISTER PEERS THROUGH HOROSCOPE

Mr. Rogers, at Edmonton, Talks of the Time Western Canada Will Produce 2,000,000,000 Bushels of Grain

No doubts regarding the present and future of the prairie provinces cloud the mind of Hon. Robert Rogers, minister of public works. Mr. Rogers is making a trip through the west, and at Edmonton expressed himself in no unmeasured terms. "Nothing can check the continued and still more rapid progress of western Canada," he said. "I am satisfied we are now reaping the greatest crop western Canada has ever known. Not more than 5 per cent. of the arable land in the prairie provinces has been touched by the plow, and yet we produced in the neighborhood of 500,000,000 bushels of grain When in the next few years our farmers bring 20 per cent. of the available land under cultivation we will be producing probably more than 2,000,000,000 bushels of grain, and ready sale will be found for all we can produce."

Price of Wheat.

Mr. Rogers said that the Canadian and United States farmers were glad to get 50 cents a bushel for their wheat ten to fifteen years ago, and to-day they grumble at 90 cents to a dollar. In ten years, he added, they will be receiving $1.50, and in 25 years they will receive $2 a bushel. The man who tills the soil will be king among men in 15 years, he added, as the capital value of all grain producing areas in every civilized country of the world is bound to increase by several hundred per cent.

"We must not forget," Mr. Rogers added, "that the world's population is increasing at the rate of 20,000,000 a year."

Hudson Bay Railway.

Replying to requests by officials of the Edmonton municipality and the board of trade, Mr. Rogers said that the Hudson Bay Railway will be completed to the shores of the Hudson's Bay early in the fall of 1914, by which time the work of making the Saskatchewan River navigable between Edmonton and Le Pas should be well under way. He added that with the completion of the Grand Trunk Pacific and the Canadian Northern railroads to the Pacific Coast there will come important branch lines, reaching out to meet the requirements of every grain producing locality in western Canada.

Importance of Edmonton.

"Edmonton is in an important position," added Mr. Rogers. "It is located at the gateway of the great Peace River country, a territory that is an empire in itself, and which promises to become the most productive part of our western prairie. More than that, the city of Edmonton is located upon the banks of one of the greatest rivers of the American continent. I have the greatest possible confidence that in the immediate future a great traffic will be developed on the Saskatchewan River between Edmonton and Le Pas, on the line of the Hudson Bay Railway leading to the Nelson River."

QUEBEC'S FINANCES

The statement of the receipts and expenditure of the province of Quebec for the fiscal year ended June 30th, 1913, shows a surplus of $429,892, receipts being $8,383,877, and expenditure $7,953,984. The largest item in the receipts is the Dominion subsidy of $2,025,705. Two next productive sources of revenue are the land and forests department, which is responsible for $1,760,466 and the duties on commercial successions, which amount to more than a million.

JULY BANK STATEMENT

The July bank statement was issued yesterday in its new form. The figures for the two months are:—

	July.	June.
Call loans, in Canada	$67,991,255	$68,642,377
Call loans, elsewhere	89,266,235	69,363,520
Current loans in Canada	858,429,069	899,260,009
Municipal and school loans	43,121,384	....
Current loans elsewhere	42,960,513	36,894,681
Demand deposits in Canada	356,585,196	362,769,928
Savings deposits in Canada	621,347,388	622,928,969
Deposits elsewhere	86,600,194	[illegible]

ENGLISH BANK RATE DOING ITS WORK

Four and a Half Per Cent. is Attracting Gold—Good Position This Fall

The four and a half per cent. rate adopted by the Bank of England for summer months has done its work as it always does, is the opinion of Mr. A. W. Smithers, chairman of the Grand Trunk directorate, who arrived in Canada the other day. This rate is attracting gold from all parts of Europe and the Brazilian States, South America, etc., with the result that up to three weeks ago the amount of gold and proportionate reserves for liabilities were never under what it was a year ago. Up to three weeks ago the Bank of England received £1,800,000, with the result that when I left England the situation showed an improvement both in the amount of gold held and the proportion to reserved liabilities equal to last year, and there is every appearance that gold will continue to arrive for another month before the autumn days set in.

In Good Condition This Fall.

"If this proves to be the case the bank will be in a good financial condition this autumn and a stronger position than a year ago, and if the policy on the part of the underwriters is continued, and issuing only carried on by making issues which are absolutely necessary, I think it is quite possible that we may get through the year on the 4½ per cent. rate. But if the underwriters take too sanguine a view of the situation, and do not continue to keep the brake on, this view may be upset.

Trade Makes a Record.

"Trade in Britain is greater than ever before; last year was a record. The imports and exports this year are standing over £1,200,000,000, and unless there is a falling off, of which there are no signs, during the remaining months, the trade of 1913 will considerably exceed the trade of 1912."

◆

MONEY RELAXATION WILL BRING REVIVAL

Sir Richard McBride spoke in London in appreciatory terms of the far-sighted policy of Sir Thomas Shaughnessy in keeping pace with the growing requirements of the western zones of the Dominion's railway traffic. "Should everything go well," said British Columbia's premier, "by the time the Panama Canal is opened British Columbia railway development will have so far advanced that the Pacific Coast province will be able to take a large measure of commercial and trading results that must follow the completion of that gigantic undertaking. Then we shall be able to claim a place in the industrial world second to none."

While the tightness of the money market had materially affected development, and some towns which had embarked upon public works were compelled to curtail their expenditures, he had no doubt that when the monetary situation is relaxed there would be a revival of activities.

◆

MAY BE NORTHERN FIRE UNDERWRITERS' ASSOCIATION

A movement has been inaugurated to form a Northern Fire Underwriters' Association with the same powers as other boards and with headquarters at Prince Rupert, B.C. It was decided at a meeting of the Prince Rupert committee of the Mainland Fire Underwriters' Association that the board companies represented on the committee be petitioned to form such an association. The companies represented are as follows:—Acadia, Ætna of Hartford, Agricultural of Watertown, Alliance of London, American of Newark, British America, British Crown, British Empire, Caledonia, Canadian Fire, California, Colonial Underwriters, Commercial Union, Connecticut, Delaware Underwriters, Employers' Liability, Franklin of Washington, Firemens' Fund, Franklin of Philadelphia, Guardian, General of Perth, Globe and Rutgers, General of Paris, Hudson Bay, Insurance Company State of Pennsylvania, Imperial Underwriters, Jersey Fire Underwriters, Liverpool, London and Globe, London Assurance, London and Lancashire, Liverpool and Manitoba, Los Angeles, L'Union of Paris, Michigan Commercial, Manitoba Fire and Marine, Mercantile, North West Fire, Niagara-Detroit Underwriters, National, Norwich Union, North Empire, Nova Scotia, Niagara, Newark, New Zealand, New York Underwriters, Northern, Occidental, Phoenix of London, Pacific Coast, Providence-Washington, Queens, Rochester-German, Royal Exchange, Royal, Reliance of Philadelphia, Springfield Fire and Marine, Sun, Svea, Union of London, Western Assurance, Westchester, Yorkshire.

HOW FIRE LOSSES CAN BE REDUCED

State Fire Marshal of Indiana Quotes Conditions in European Cities

The State fire marshal in line with his effort to bring about better construction of buildings in Indiana is mailing to his 1,500 assistants in that state a printed excerpt from a statement made by Mr. Richard Lieber, of Indianapolis, showing how European cities reduce their fire losses through proper attention to construction.

The contrast between American and European methods and results is forcibly shown in a comparison of Berlin, Germany, and Indianapolis. Berlin has a population of more than 2,000,000. Indianapolis has 250,000. Yet the fire loss in Indianapolis, according to Mr. Lieber's statement, is almost twice that of Berlin. His remarks along these lines are:—

Cities are Poorly Built.

"Our cities are so poorly built that a fire may spread throughout the building in which it started and from it to other property. A special consular report of 1905 shows that in such foreign cities as Havre, Rouen, Milan, Rome, Brussels, Antwerp, Leeds, Sheffield and Bristol, every fire in 1890 was confined to the building in which it originated, while in Dresden, Florence and Vienna and other cities, every fire was confined to the floor on which it originated.

"In Vienna there is no case known where the fire has extended beyond the building in which it originated. This is prevented by the solidity of the buildings, by strict fire regulations, and by a well-trained fire department, the latter consisting of five steam engines, but seldom called into action, and a large and sufficient number of hand engines.

Is a Partner in Crime.

"The average loss of Boston is $2,000,000. The loss of the average city of equal population in Europe is $150,000. Indianapolis, which, by the way, was lowest in the list of cities of over 200,000 inhabitants, has almost twice as much annual fire loss as Berlin. Other cities are, of course, far worse, but all of them have this in common, that their general run of buildings is of insecure or even hazardous construction.

"As long as the cities prefer the rights of the individual to the rights of the community we shall have this criminal participation in the fire loss. If it is right and fair to require a certain improved building construction for new buildings, these same laws should be rigidly enforced in the remodeling of standing risks. A city that fails in this is a partner in crime."

THE WESTERN SPIRIT, WITH TRIMMINGS

The following letter to an eastern loan company from a Saskatchewan client, was shown to *The Monetary Times* this week. It speaks for itself:—

"Dear Sirs:—In reply to your letter of the 18th of March, I must say that I can not pay you the interest on your mortgage this year.

"You seem to think you can make me pay this as you state in your letter that you will not allow it to remain. How shall I pay when I have not got it? You can make extension till next year or not just as you please, there are millions of acres of unoccupied land out here. And what good is it to us farmers any-way, we only get a d—— poor living from it, and if you are not satisfied with the way I am running your property out here come and run it yourself. You threatened to foreclose on the 3rd of April; why did not you? I am getting tired of waiting for it.

"I would advise you to wait till next year as you will get at least one more year's interest.

"Why is it that you fellows that produce nothing and do nothing useful own everything, and we that produce everything own nothing?

"You seemed to think that my last letter was too short, perhaps this will suit you better.

Yours, etc.,

"P.S.—You can answer this letter or not as you please."

CANADIAN EMERGENCY CURRENCY

Advantages and Importance of System Under New Bank Act Are Pointed Out

The following comments by The London Times upon the emergency currency features of Canada's revised bank act which became effective on July 1st, are of interest.

The new provision enables banks to keep all their available gold in a central reserve and issue their own notes, as and whenever they are required, dollar for dollar, in the reserve. It will be seen in a moment that this new provision is of very considerable importance in more ways than one.

The banks, under the old act, were able to issue their own notes to the amount of their unimpaired paid-up capital, and beyond to the extent of 15 per cent. on their capital and reserves during the crop-moving period. At April 30th last the paid-up capital of Canada's chartered banks was $115,799,217, and the rest or reserve funds amounted to $108,414,337, a total together of $224,213,554. The emergency circulation during the autumn and winter might, therefore, if necessary, reach $33,500,000. In November last year the emergency circulation actually approached $10,000,000, and the margin of emergency circulation available at that time was $20,000,000 or so. At ordinary times that margin would be ample, and it may be said at once that the central gold reserve provision is expected to operate more advantageously during that portion of the year in which the crops are, supposedly, not being moved.

Does Not Assume Ordinary Times.

But a prudent minister of finance will not assume that times always will be ordinary, and indeed it is possible that this autumn will see a situation of painful pressure upon Canada's financial resources. At such times a more or less insignificant action by a bank may start a panic, or at least a serious run on deposits. At the end of April last, deposits payable on demand in Canada were $365,340,002, and, after notice, $631,160,280, a total of $996,500,282. In November, when the pressure is usually at its height, they were last year $16,000,000 higher. To meet a run on such a huge amount a good deal more than $20,000,000 might very well be needed. Given time under the old system, the currency could no doubt have been engineered. But time is just what is not available at times of panic, and the new provision does all that is possible to economize time.

Can Be Released Instantaneously.

However, one does not anticipate crises involving runs on a large scale, and, as has been said, the central gold reserve is designed to serve a purpose in normal times. During recent years the banknote issues have frequently approached very near to the limit authorized between February and September. For instance, in June of last year the circulation was within $2,000,000 of the circulation in September, when the emergency clause operates. At such times a great deal of anxiety was caused bankers lest the authorized limit should be exceeded, and, as was explained above, the arrangements for changing from bank notes to Dominion notes were clumsy and took time. The system was inelastic in a country such as Canada, where great distances have to be traversed between the centre of the government and many of the most active centres of industry and agriculture. Under the new system any amount of banknotes may be held in reserve to be released instantaneously by the deposit of gold, or Dominion notes—and in practice, since the gold and Dominion notes are to a considerable extent expected to remain deposited in the central reserve, the circulation will be permanently extended.

A Tribute from the West

While we do not always agree with *The Monetary Times*, it is the most reliable guide in current journalism to all Canadian statistical information, and to the ordinary newspaper man it is one of the most invaluable of references, if he desires to keep in touch with financial matters —*Moose Jaw Times*.

UNITED STATES CURRENCY BILL CRITICIZED

Should be no Prohibition Against Rediscounts With Bonds as Security, Says Banker

Mr. George B. Caldwell, president of the Investment Bankers' Association of America, speaking of the proposed currency and banking law, says:—

"Our association favors the passage of a currency bill as soon as due consideration will allow. Our committee on monetary legislation, headed by John M. Nelson, of Baltimore, has carefully studied the subject, and has, in the name of our body, transmitted several recommendations tending toward a workable law. In our opinion the Owen-Glass bill can be made a good, useful working measure, with some changes. We are gratified, indeed, that the federal administration, while insisting upon the early enactment of currency legislation, is hospitable towards suggestions made in good faith for the improvement of the pending bill.

Considered an Objectionable Feature.

"One of the most objectionable features of the banking bill is contained in Section 14, prohibiting the rediscount of bills secured by bonds of any description. A fair and good law on this subject should give reserve banks as much latitude in discounting paper, based on well-secured bonds, as is consistent with sound banking. Good banking tells us that it is just as important, just as necessary to finance transportation, warehouse, terminal, elevator and other corporations contributing to the movement of crops as it is to finance the crops themselves. Besides government, state and municipal bonds are acceptable now, so to be consistent it would seem they would be acceptable as loan collateral, together with other good bonds.

"Two other features of the bill appear to our association as objectionable. We do not believe that control of the banking interests should be placed in the hands of a political body altogether. The Board of Control, which is to consist of the Secretary of the Treasury, the Secretary of Agriculture and the Comptroller of the Currency and four appointees of the President, one of whom shall be versed in banking, is a political body, pure and simple, and has been opposed because of the fear it might make a political issue of banking business. The results of this are self-evident.

Not the Banks.

"Again, the Investment Bankers' Association have strongly objected to the provisions that the Government should issue the currency, and not the banks. Federal reserve bank notes under the bill should be issued by the banks. One can readily see the situation that would develop if the Government were called on to redeem a promise to pay on demand in gold these federal reserve bank notes and found itself unable to fulfil its obligations. The notes should be issued by the banks and all responsibility of redemption should remain with them. We believe we voice the sentiment of the bankers and business interests of the country in urging that the salaries of each member of the federal board should be not less than $25,000 per year. Such responsibility placed in the hands of men at a less salary does not have our fullest confidence, nor demand the highest type of ability."

◆

ANGLO-CANADIAN JULY TRADE RETURNS

The following are official figures of the trade between Great Britain and Canada during July:—

From Canada.

	July, 1913.	July, 1912.
Wheat	£4,535,106	£4,841,012
Flour	1,259,781	1,300,933
Oats	480,649	312,471
Cattle	36,112	104,763
Bacon	544,268	687,236
Hams	233,871	131,610
Cheese	1,294,395	1,568,050
Canned salmon	518,675	609,405

To Canada.

	July, 1913.	July, 1912.
Spirits	385,245	373,528
Sugar	27,597	84,178
Wool	64,205	72,351
Hides	50,828	39,197
Pig-iron	66,679	113,497
Wrought iron	61,212	39,509
Rail iron	3,784	9,424
Plates	30,548	14,967
Galvanized sheets	338,041	197,714

The branch of the Bank of British North America at Forward, Sask., has been closed.

SASKATCHEWAN HAS ACTIVE INSURANCE DEPARTMENT

Superintendent Fisher Says Slight Revision of Laws Will be Effected—Business in the Province

To study the workings of the federal and other insurance departments, their methods of organization, and fraternal insurance, Mr. Arthur E. Fisher, superintendent of insurance for Saskatchewan, is visiting eastern Canada. The department of which he is head, commenced operations at the end of March. Already considerable business has been transacted, and the first annual report will shortly be published.

Interviewed by *The Monetary Times* this week in Toronto, Mr. Fisher, who is an enthusiastic official, and one who may be relied upon to protect the interests both of the legitimate insurance companies and the policyholders, stated that a large number of companies have been registered and licensed under the Saskatchewan Fire Insurance Act to transact the business of fire insurance within that province. Here is the list:—

Acadia Fire Insurance Company, Ætna Insurance Company, Alliance Assurance Company, Anglo-American Fire Insurance Company, Atlas Assurance Company, Limited, Alberta-Canadian Insurance Company, American Central Insurance Company, American Insurance Company, British American Assurance Company, British Crown Assurance Corporation, Limited, British Northwestern Fire Insurance Company, British Dominions General Insurance Company, British Colonial Fire Insurance Company, Caledonian Insurance Company, Canadian Fire Insurance Company, Commercial Union Assurance Company, Limited, Connecticut Fire Insurance Company, Canada National Insurance Company, Canadian Phœnix Insurance Company, Continental Fire Insurance Company, Central Canada Insurance Company, Continental Insurance Company of New York, Canada National Fire Insurance Company, Dominion Fire Insurance Company, Employers' Liability Assurance Corporation, Limited, Equity Fire Insurance Company, Equitable Fire and Marine Insurance Company, Fidelity-Phenix Fire Insurance Company of New York, Factories Insurance Company, Fireman's Fund Insurance Company, Firemen's Insurance Company of Newark, German American Insurance Company, Guardian Assurance Company, Limited, Germania Fire Insurance Company, General Assurance Company of Paris, General Accident, Fire and Life Assurance Corporation of Perth, Hartford Fire Insurance Company, Home Insurance Company, Hudson Bay Insurance Company, Imperial Underwriters' Corporation (now Dominion license) Insurance Company of the State of Pennsylvania, Insurance Company of North America, London and Lancashire Fire Insurance Company, London Mutual Fire Insurance Company of Canada, Law Union and Rock Insurance Company, Limited, Liverpool and London and Globe Insurance Company, Limited, London Assurance Corporation, Liverpool-Manitoba Assurance Company, Mercantile Fire Insurance Company, Montreal-Canada Fire Insurance Company, Mount Royal Assurance Company, National Fire Insurance Company of Hartford, National Union Fire Insurance Company of Pittsburg, Niagara Fire Insurance Company, North British and Mercantile Insurance Company, North-West Fire Insurance Company, North Empire Fire Insurance Company, Northern Assurance Company, Limited, Norwich Union Fire Insurance Society, Limited, Nova Scotia Fire Insurance Company, Northwestern National Insurance Company of Milwaukee, Ontario Fire Insurance Company, Occidental Fire Insurance Company, Pacific Coast Fire Insurance Company, Phœnix Assurance Company, Limited, Phœnix Insurance Company, Providence Washington Insurance Company, Palatine Insurance Company, Limited, Quebec Fire Assurance Company, Queen Insurance Company of America, Rimouski Fire Insurance Company, Royal Exchange Assurance, Royal Insurance Company, Limited, Security National Insurance Company, Saskatchewan Insurance Company, Scottish Union and National Insurance Company, St. Paul Fire and Marine Insurance Company, Sovereign Fire Assurance Company, Sun Insurance Office, Springfield Fire and Marine Insurance Company, Union Assurance Society, Limited, L'Union Compagnie d'Assurance contre L'Incendie, Paris, Western Assurance Company, Westchester Fire Insurance Company, Yorkshire Insurance Company, Limited, Western Union Fire Insurance Company (reinsured with Pacific Coast Fire Insurance Company), Winnipeg Fire Insurance Company (reinsured with Nova Scotia Fire Insurance Company).

Unlicensed Fire Insurance Unnecessary.

Nine of these companies have provincial licenses and the remainder Dominion licenses. This list has been printed by the Saskatchewan Insurance Department and posted in every post-office in the province with the injunction, "Look over your policies." With such a large number of licensed companies, unlicensed insurance in the province should be entirely unnecessary.

The annual report of the department will show that the gross amount of fire insurance written in 1912 in Saskatchewan was approximately $98,000,000, with a net premium income of slightly over $2,000,000. The losses paid were about $800,000. The net amount at risk on December 31st, 1912, was nearly $87,000,000.

The figures of fire commissioner McLean, who is doing excellent work to reduce fire losses in the province, show that to the end of July the fire waste this year has been $1,350,000, allowing 10 per cent. for unreported fires.

Life Company's Business.

The premium income of the life insurance companies in Saskatchewan last year was slightly over $1,500,000. There are 44 companies transacting this business in the province, 35 with Dominion licenses and 9 registered with the registrar of joint stock companies under the foreign companies act.

The following 15 companies are writing hail insurance in the province: The Saskatchewan, Alberta, Central Canada, Canada National, Hudson Bay, Canada Weather, Canadian Indemnity, British Crown, St. Paul Fire and Marine, Mount Royal, Excess Great North, British-America, Canada Hail, and the Northwestern National of Milwaukee. Four of these have Dominion licenses, while the other eleven are licensed under the hail insurance act and the order-in-council regulating the writing of hail insurance.

Hail Insurance in Saskatchewan.

The hail insurance business in Saskatchewan is an interesting study. This year an order-in-council was passed regulating it. It required Canadian companies to deposit $5,000 and foreign companies $10,000 with the provincial department of insurance, Dominion licensed companies being excepted. It also required that foreign companies, those whose capital is outside Canada, should make weekly reports of business written and of losses. As additional protection, 50 per cent. of the premium income reported by these foreign companies must be deposited in trust with the provincial treasurer, should he deem it necessary, this amount being available, if needed, for the payment of losses.

The provincial municipal hail act has to some extent affected the stock companies, as the amount of risk written per acre in districts where the municipal hail by-law has been adopted, averages $5 per acre, the farmer being automatically insured for a further $5 under the act. This brings his insurance up to the old standard of $10 per acre. But, as stated, the company insures for only $5 of that sum. On the other hand, the companies' liability is considerably more scattered. The majority of the companies are writing business on a cash basis. Owing to the money stringency, the business this year is not quite as large as it would have been under more favorable financial conditions.

The superintendent of insurance has nothing whatever to do with the operation of the municipal hail insurance act. This rests entirely with the municipal hail commission, two of the members of which are elected by the reeves and one by the provincial government.

Small Losses in Tornado Insurance.

Since the Cyclone in Regina there has been considerable activity in tornado insurance. Unrevised figures show that almost $3,000,000 of this risk have been written, with premium income of about $14,000. The losses paid have been less than $100. Climatic conditions in Saskatchewan are sufficiently good to keep tornado losses down to a minimum.

A slight revision of the Saskatchewan insurance laws will be undertaken in the near future. Questioned as to this, Mr. Fisher told *The Monetary Times* that he was not at liberty to indicate the nature of the revision until his suggestions had been submitted to the provincial secretary.

◆

PASTURES AND PRODUCTS IN ONTARIO

Ontario's pasture lands are referred to in a recent bulletin of the department of agriculture as being very dry, and much in need of rain, more especially in the eastern half of the province. Dairy products also were lessening, owing to the decided falling off in the milk flow. Cattle are remarkably free from disease, although some are on the lean side. Several of the department's correspondents claim that the shortage of roughage will compel farmers to dispose of some of their live stock in order to carry the remainder through the winter. The general opinion, however, is that careful feeding will meet the situation, more especially where there are silos. Much, therefore, depends upon the growing corn crop. In fact, corn is more and more regarded as the key to the Ontario fodder problem.

The majority of the returns speak of the scarcity and inferior quality of farm labor. However, the very favorable harvest weather, and the short straw of nearly all the grain crops, considerably lessened the demand for field workers during the busy season. Wide field implements and the interchange of labor between neighbors also tend to help out. Wages by the day ranged from $1.25 to $2.50, with board, usually found $2; by the month from $25 to $35 was commonly paid, although some skilled farm laborers commanded from $40 to $50 a month during harvest.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canada Bread Company.—At the annual meeting of the Canada Bread Company, the chairman, general manager Mark Bredin, expressed satisfaction at the conditions revealed. The company is strong in cash reserves, having nearly $500,000 in hand to carry on operations. The retiring board of directors was re-elected.

Canada Transportation Lines, Limited.—The first issue of securities of the new company that will be made will be of preferred stock, this issue having already been arranged for through Brown Shipley, of London. When this issue has been disposed of the plan to consolidate all the bond issues of the various companies will be worked out, it being the intention to have one issue against the entire mortgages of the various companies.

Halifax Electric Tramway Company.—A special meeting of the shareholders of the Halifax Electric Tramway Company is called for August 30, to obtain authorization for the issue of 6,000 additional shares of capital stock, thus increasing the capitalization to $200,000. This is all that can be issued under the company's charter as extended at the last session of the legislature, and the proceeds are to be used for extension and improvement to the tramway system. After the authority of the shareholders is obtained it will be necessary to secure the sanction of the public utilities commission.

Dome Lake Mining Company.—Three by-laws were placed before the shareholders of the Dome Lake Mining Company for approval at a meeting at Toronto. One was to increase the capital of the company by 250,000 shares at par, another to issue 100,000 of these at a discount, the previous holders having first right to subscribe, and a third providing for an increase in the number of directors from five to seven. The first of these alone was passed after much discussion. The stated object of the proposed issue was to provide for: (1) Pressing debts amounting to $15,000; (2) To pay for electrical equipment and working expenses. The total liabilities of the company are $60,000. Promises were given by Mr. O. N. Scott, who represented the General Assets Corporation, who control and manage Dome Lake, that full information as desired by some shareholders would be forthcoming at the next meeting.

Twin City Rapid Transit Company.—The total operating revenue of the Twin City Rapid Transit Company for the month of July amounted to $773,499, compared with $715,129, in the same month a year ago, an increase of 8.16 per cent. The operating expenses for the month reached the sum of $389,533, as compared with $355,232, an increase of 9.66 per cent. The net revenue was consequently $383,966, against $359,896 in July of last year, a gain of 6.69 per cent. Gross revenues of the company for the seven months from January 1st to the end of July have been, $5,004,030, compared with $4,641,249 in the corresponding period of a year ago, an increase of 7.82 per cent. Operating expenses were $2,555,758, an increase of 6.32 per cent. The net revenue for the seven months, as a result, is $2,448,272, as compared with $2,237,411, an increase of 9.42 per cent.

Canadian Northern Express Company.—The Canadian Northern Express Company reports to the United States interstate commerce commission for June and twelve months compared as follows:—

	1913.	1912.		Changes.
Total receipts for operating..	$87,203	$58,900	+	$28,302
Express privileges	34,051	22,890	+	11,161
Total operating revenues.	53,151	36,009	+	17,141
Total operating expenses ..	32,200	20,079	+	12,121
Net operating revenue	20,950	15,930	+	5,020
Taxes	631	871	—	239
Operating income	20,318	15,059	+	5,259
Twelve months:—				
Total receipts for operating.	957,275	622,325	+	334,949
Express privileges	372,602	241,413	+	131,189
Total operating revenues ..	584,672	380,912	+	203,760
Total operating expenses ..	369,833	202,128	+	167,704
Net operating revenue	218,839	178,783	+	40,055
Taxes	6,316	4,842	+	1,474
Operating income	212,522	173,940	+	38,581
Mileage steam roads	5,736	4,022	+	1,714
Mileage, other lines	22	22		

Duluth Superior Traction Company.—The weekly statement of earnings of the Duluth-Superior Traction Company for the first three weeks of the present month shows an increase of 10.4 per cent. on the period named, while earnings for the year to date show an increase of 9.5 per cent.

The statement is as under:—

	1913.	1912.	Inc.	Per cent. of inc. or dec.
1st week	$ 26,195	$ 23,887	$ 2,307	9.7
2nd week	25,228	23,418	1,810	7.7
3rd week	26,591	23,374	3,217	13.8
Month to date	78,015	70,680	7,335	10.4
Year to date	783,398	715,601	67,796	9.5

CANADA'S COTTON INDUSTRY

Monetary Times Office,
Montreal, August 27th.

The street has been discussing the possibility of a falling off in activity in the cotton industry, and the representative of *The Monetary Times* has made an effort to find out if the falling off, if it develops at all, is likely to be serious. From all that can be ascertained, it would seem that any doubt which may be entertained on the future of the cotton companies has its basis in the possibility of labor troubles. The Canadian textile companies have always had trouble in this regard. In former years operatives were very much worse paid than at present, and even now, while their condition is much improved, they are constantly being attracted to other lucrative employment.

At the present time, it is understood that all cotton companies are behind in their deliveries because of the shortage of help. Many of the employees, after being confined in the mills during the winter months, like a change and prefer to work out of doors during the summer. It is said that at Valleyfield, for example, many of the men who worked the looms left their regular employment in order to labor on the Valleyfield Canal. The question of labor in the textile mills is becoming more serious every year, and the only way to solve it will be on a basis of wages, so it is claimed. Any advance, however, coupled with the fact that the price of raw cotton tends gradually to advance, chiefly through advance in cost of cultivating the cotton plant, will mean an advance in the price of the manufactured article. These factors together will increase the cost of the goods to the cotton manufacturer, and the advance in the selling price may, for a time, lag behind this increased cost of production. If the cost becomes too high to the consumer, the demand for cotton goods is bound to fall off as other fabrics will take their place. On the whole, the situation is generally considered quite favorable, so far as concerns the demand.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Pine Ridge, Man.—August 16.—School. Loss, $600. Cause, lightning.

St. Thomas, Ont.—August 15.—M. C. R. station. Loss, $40. Cause unknown.

St. Ives, Que.—Messrs. Dawson Brothers' sawmill. Loss, $8,000. Cause unknown.

Somenos, B.C.—August 13.—Mr. Macneal's bungalow. Loss and cause unknown.

Jarvis, Ont.—August 19.—Grand Trunk freight shed. Loss and cause unknown.

Orwell, Ont.—August 21.—Mrs. P. Day's farmhouse. Loss and cause unknown.

Brandon, Man.—August 14.—Mr. R. Lane's coal shed. Loss, $800. Cause unknown.

Inverary, Ont.—August 22.—Model Cheese Factory. Loss, $3,000. Cause unknown.

Fergus Falls, Sask.—August 21.—Mr. G. Siem's barn. Loss unknown. Cause, lightning.

St. Sauveur, Que.—August 19.—Mr. A. Corriveau's residence. Loss and cause unknown.

Peterboro, Ont.—August 19.—McDonald's mills. Loss, $1,000. Cause, overheated dry kiln.

Wolfville, N.B.—August 12.—St. Andrew's Presbyterian Church. Loss and cause unknown.

Strathroy, Ont.—August 22.—Flour and feed warehouse. Loss and cause unknown.

Taymouth, N.B.—August 16.—Mr. J. A. Young's residence. Loss, $4,000. Cause unknown.

Welland, Ont.—August 26.—Mr. M. J. Brody's residence, Muir Street. Loss and cause unknown.

Morden, Man.—August 19.—Mr. A. H. Snellgrove's chopping mill. Loss and cause unknown.

Duncan, B.C.—August 16.—Messrs. Bazett and Bell's hardware store. Loss and cause unknown.

Bridgeburg, Ont.—August 20.—Mr. O. C. Teal's planing mill. Loss, $20,000. Cause unknown.

Prince's Beach, N.B.—August 8.—Mr. C. T. Nevin's summer cottage. Loss, $500. Cause unknown.

Emerson, Man.—August 19.—Mr. G. Dillabough's barn, 9 miles west of town. Loss and cause unknown.

New Westminster, B.C.—August 10.—B.C.E. Company street car. Loss, $25. Cause, motor burnt out.

Vancouver, B.C.—August 8.—Tug "Calcium," owned by Harbor Lime Company. Loss and cause unknown.

Ogdensburg, Ont.—August 17.—Belfry barber shop, fruit store and butcher store. Loss and cause unknown.

Prescott, Ont.—August 20.—Mr. J. Wade's residence, North Channel. Loss unknown. Cause, lightning.

Hamilton, Ont.—August 18.—183 St. Catherine Street. Loss, $100. 62 and 64 Margaret Street. Loss, $250.

Enniskillen, Ont.—August 17.—Mr. A. McIntyre's barns. Loss, $2,000. Insurance $500. Cause unknown.

Deseronto, Ont.—August 26.—Messrs. O. Vandusen, E. Green and D. Powless's residences. Loss and cause unknown.

Sault Ste. Marie, Ont.—Algoma Steel Corporation's switchboard. Loss estimated one million dollars. Cause, lightning.

Goderich, Ont.—August 22.—Kensington Furniture Company's factory. Loss, $50,000. Partially insured. Cause unknown.

North Winnipeg, Man.—August 22.—Mr. J. Bradley's residence 152 Polson Avenue. Loss, $2,500. Cause, coal oil stove exploded.

Prince Albert, Sask.—August 18.—Mr. P. Dashneau's residence. Loss, $3,000. Mr. D. Lacertes' residence. Loss, $300. Cause unknown.

Sherbrooke, Que.—August 23—.—Three residences owned by Messrs. S. A. McFaden and R. C. McFaden and Mrs. G. Reed. Loss, $10,000. Cause, supposed spark.

Elmvale, Ont.—August 21.—Mr. Copeland's sawmill, edger, planer, lath mill, shingle mill and about a quarter of a million feet of lumber. Loss and cause unknown.

Belleville, Ont.—August 24.—Mr. F. Gray's barn near Plainfield. Loss unknown. Cause, lightning.

August 21—Walker Foundry, owned by Mr. J. McCarthy. Loss, $100. Cause, spark from stack.

Harwich, Ont.—August 20.—Mr. H. Smith's residence, Communication Road. Loss and cause unknown.

August 22.—Mr. J. Campbell's barns. Loss, $2,500. Cause, lightning.

Sydney, N.S.—August 11.—Y.M.C.A. Loss, $30,000. Cause unknown.

August 21.—Messrs. McQuaig and Konig's building, Charlotte Street. Loss, $500. Insurance, $2,500. Cause unknown.

Ottawa, Ont.—August 19.—Mr. W. F. Fraser's sash and door factory. Loss, $15,000. Insurance small. Cause unknown.

August 20.—Messrs. Shepard and Morse' lumber yards. Loss, $8,000. Mr. T. McLaughlin's yard. Loss, $5,000.

Maryfield, Sask.—August 23.—Business section. The loss will amount to over $20,000, estimated as follows:—E. B. McRory, building, $3,500; stock, $15,500; partly covered by insurance; White Brothers, buildings, $1,800; stock, $600, covered by insurance; I.O.O.F. lodge, $800, insurance, $550; A.F. & A.M. lodge, $500, loss nearly covered by insurance.

St. John, N.B.—August 20.—Home for Incurables. Loss, unknown. Cause, supposed incendiary.

August 21.—Government wharf. Loss, $100. Cause, engine burst barrel of gasoline. Mr. Steven's residence, 23 Main Street. Loss, slight. Cause, children playing with matches.

Montreal, Que.—August 21.—695 St. Paul Street. Loss, $17,000. Cause unknown. 170-184 Ann Street, sheds. Loss, $14,000. Cause unknown. 2214 St. Hubert Street. Loss, $15,000. Cause unknown. Dominion Textile Company's mill, Notre Dame Street East. Loss, $1,000. Cause picker.

August 22.—Rideau Shoe Company's premises, Ontario and Desjardins Streets. Loss and cause unknown.

August 24.—Viau's departmental store. Loss and cause unknown.

Harcourt, N.B.—August 16.—Ten dwelling houses and eight barns. Losses, L. J. Watson, house, $1,000, on furniture, about $800 and cash, three hundred. Insurance, $350. Miss Annie Campbell, house and barn, about $600, no insurance. Rev. R. H. Ensley Stavert lost valuable library. Sankey Cail, house and barn, about $900, no insurance. Mrs. James Carter, of Millerton, vacant house valued at $700. Miss Bernice Pride, house and barn, valued at $1,900, furniture, over $500 and about one hundred and fifty cash, insurance $1,000. Mrs. Mary Watson, house and barn worth $1,000, insurance $500, occupied by Thomas Lamkey. Mrs. James Buckley, dwelling, store and barn, filled with hay and some farming implements, value of property $1,200. Insurance is $500 on building, none on furniture. Mr. W. F. Buckley had $1,000 insurance on the stock lost. Mrs. Geo Bates, Vancouver, the Powell house and barn, $600, no insurance. Mrs. Archibald Ferguson, dwelling and barn, $1,200, insurance $600, no insurance on furniture.

Toronto, Ont.—August 19.—334 Berkeley Street. Loss, $500. Cause unknown.

August 20.—Bond building, Simcoe and Wellington Streets. Loss, building, $100. Ross and Wright, Toronto, adjusters for assured. Randall and Johnston. Loss, $6,000. Insured. Dickerhoff, Raffloer and Company. Loss, $10,000. Insured. Cause unknown. 126 Wellington Street West. Scott and Bowne. Loss, $800. Ross and Wright, adjusters for the assured. W. J. Bush and Company. Loss, $240. Ross and Wright, adjusters for the assured. Palter Brothers. Loss, $1,500. Ganong Brothers. Loss, $500. European Agencies. Loss, $350. Ross and Wright, adjusters for the assured. H. S. Wardell. Loss, $500. Ross and Wright, adjusters for the assured. Cause, spontaneous combustion. 31, 35, 37 Henry Street. Loss, $400. 167-9 De Grassi Street. Loss, $100.

August 21.—196 Peter Street. Loss, building, $400; contents, $250. Cause unknown.

August 23.—83 McCaul Street. Loss, $4. 1189 Bloor Street. Loss, $10.

RAILWAY EARNINGS

The following are the railroad earnings for the week ended August 21st:—

	1913.	1912.	Increase or decrease.
Canadian Pacific	$2,506,000	$2,694,000	— $188,000
Grand Trunk	1,144,416	1,097,394	+ 47,022
Canadian Northern	396,200	372,900	+ 23,300
For week ending August 14th:—			
Temiskaming & N. O. ..	$31,490	$30,863	+ $ 627

CANADIAN PACIFIC RAILWAY'S YEAR

Revenue and Expenditure—Retirement of Bonds—Many Improvements Made.

The thirty-second annual report of the directors of the Canadian Pacific Railway, being for the twelve months ending with June 30, shows the following results:—

Gross earnings		$139,395,699
Working expenses		93,149,825
Net earnings		$ 46,245,874
Net earnings of steamships in excess of amount included in monthly reports		1,245,563
		$ 47,491,437
Deduct fixed charges		10,876,352
Surplus		$ 36,615,085
Deduct amount transferred to steamship replacement account, $1,000,000, and contribution to pension fund, $125,000		1,125,000
		$35,490,085
From this there has been charged a half-yearly dividend on preference stock of 2 per cent., paid April 1st, 1913	$ 1,473,386	
And three quarterly dividends on ordinary stock of 1¾ per cent. each, paid January 2nd, 1913, April 1st, 1913, and June 30, 1913	10,150,000	
And interest on instalments on new stock subscriptions, paid October 15th, 1912	569,813	
		$ 12,193,200
		$23,296,884
From this there has been declared a second half-yearly dividend on preference stock, payable October 1st, 1913	$1,486,626	
And a fourth quarterly dividend on ordinary stock of 1¾ per cent., payable October 1st, 1913	3,500,000	
		$ 4,986,626
Leaving net surplus for the year		$ 18,310,257

In addition to the above dividends on ordinary stock, three per cent. was paid from special income.

The working expenses for the year amounted to 66.82 per cent. of the gross earnings, and the net earnings to 33.18 per cent., as compared with 64.89 and 35.11 per cent., respectively, in 1912.

Stock Issues and Financing

Four per cent. consolidated debenture stock to the amount of £1,938,394 was created and sold, and of the proceeds the sum of £1,051,619 was applied to the construction of authorized branch lines, and £886,775 was devoted to the acquisition of the bonds of other railway companies whose lines constitute a portion of the system, the interest on which had been guaranteed by the company.

Four per cent. preference stock to the amount of £1,569,091 was created and sold, the proceeds being used to meet capital expenditures that had been previously sanctioned.

The guarantee of interest was endorsed on four per cent. consolidated bonds of the Minneapolis, St. Paul and Sault Ste. Marie Railway Company to the amount of $2,623,000, issued and sold to cover the cost of 131.15 miles of railway added to that company's system.

During the year 474,798 acres of agricultural land were sold for $7,487,268, being an average of $15.77 per acre. Included in this area there were 7,944 acres of irrigated land which brought $48.88 per acre, so that the average price of the balance was $15.20 per acre.

Shares of ordinary capital stock to the amount of $2,000,000, being the difference between the capital stock outstanding and the amount authorized by the shareholders October 7th, 1908, were sold in the market early in the year and realized a premium of $2,860,821.80, which will be used for additions and improvements to the property.

Completion and Construction of Lines

In pursuance of the company's policy of building and extending branch lines in western Canada to provide present and incoming settlers with transportation facilities, a line is projected from a point near Swift Current, on the main line in Saskatchewan, in a northwesterly direction, to cross the Lacombe branch at or about Coronation, and eventually to reach Sedgewick, a station on the line between Saskatoon and Edmonton, a total distance of 290 miles. The first 115 miles of this line should be constructed without delay, and the balance in stretches as circumstances may seem to warrant; two other lines, one of which will run northeasterly from Bassano, on the main line in Alberta, to a connection with the Swift Current line, a distance of 118 miles, and the other from Gleichen to Shepard, a distance of 40 miles, should be built within the next year. These lines will serve important agricultural districts north and south of the main line and will answer all the purposes of a second track between the points mentioned for some years to come. The Weyburn branch, running south of, and parallel to, the main line in Saskatchewan and Alberta, to a connection with the Alberta Railway south of Lethbridge, a total distance of 436 miles, of which 196 miles have been constructed, or are in process of construction, should be further extended year by year until completed. Branch lines from Gimli, Manitoba, in a northerly direction for a distance of 26 miles, and from Snowflake, Manitoba, in a westerly direction, a distance of 9 miles, and an extension of the Suffield branch in Saskatchewan, 27 miles, will be of substantial service to settlers in these respective districts.

The directors will ask the shareholders to sanction the construction of such part of this mileage as have not already been authorized, and the issue, from time to time, of the required 4 per cent. consolidated debenture stock to meet the expenditure.

Much Double Tracking

Among the important additions and improvements now in process of execution are, 29 miles of second track between Islington and Guelph Junction, on the Ontario Division, to cost $750,000; 133 miles of additional second track between Sudbury and Port Arthur, on the Lake Superior Division, to cost $5,300,000; 178 miles of additional second track between Brandon and Calgary, to cost approximately $5,000,000; 18 miles of second track and grade improvements, including a double track tunnel, five miles in length, between Six Mile Creek and the "Loop," near the summit of the Selkirk Mountains, at a cost, without electrification, of about $8,000,000; 139 miles of second track between Revelstoke and Vancouver, in stretches where it will give the most immediate relief, to cost $6,350,000.

When this work is finished and the new lines between Regina and Shepard, to which reference has already been made, are constructed, there will be 200 miles of double track between Sudbury and Port Arthur, leaving 352 miles to be provided in the future; between Port Arthur and Calgary there will be 1,095 miles of double track, leaving gaps aggregating only 165 miles, and between Calgary and Vancouver 158 miles of double track, leaving 488 miles to be built hereafter.

A second track on such a large portion of the main line between Sudbury and the Pacific coast will relieve the congestion that has prevailed from time to time, and will enable the company to handle traffic more expeditiously and economically, and the construction of the long tunnel, between Six Mile Creek and the "Loop," will eliminate four and one-half miles of snow-sheds that it would be necessary to reconstruct at very great expense if the present location of the railway through that section were adhered to. It is not the intention of the directors to proceed with the second track in the more difficult sections along the Thompson and Fraser rivers until the Kettle Valley line is ready for traffic between Midway and Hope, in 1915, so an alternative route will be available between Medicine Hat and Vancouver via the Crow's Nest Pass if anything unforeseen should occur during the prosecution of the double track work to obstruct traffic on the main line.

The purchase of two intermediate steamships for the Atlantic trade, 500 feet long, 64 feet beam, 11,600 gross tonnage, 15 knots speed, to cost approximately £300,000 each, and two steamships for the Pacific coast service, 395 feet long, 54 feet beam, capable of making 22½ knots per hour at sea, and to cost approximately £200,000 each, is to be approved by the shareholders.

The two Atlantic steamships are required for second and third-class passengers and freight traffic between European ports and Canada, and the two fast passenger steamers for the Pacific coast will further improve the service now being provided for the large and growing passenger business between Vancouver, Victoria and other ports on the Pacific coast.

Twenty Million of Bonds Retired

When the last issue and sale of ordinary capital stock was authorized a portion of the proceeds of the sale was directed to be applied to the retirement of the outstanding five per cent. first mortgage bonds of the company that mature in 1915, and, therefore, the directors deemed it desirable to give notice to the holders in May last that the company would receive and pay for any of the bonds that might be surrendered before the end of the fiscal year. Pursuant to this notice, bonds to the amount of £4,234,700, or $20,608,873.33, were delivered and paid for. These, with the bonds that the company had previously acquired, make a total of £4,487,900, or $21,841,113.33, that have been retired and cancelled, leaving outstanding bonds to the amount of £2,703,600, or $13,157,520, to be redeemed and cancelled as opportunity offers.

For the convenience of those desiring to make transfers in Montreal of shares of your ordinary capital stock, the Bank of Montreal has been appointed registrar and the Royal Trust Company has been appointed transfer agent for the Montreal register.

The mileage covered by the statement of gross earnings and working expenses has increased from 10,983 miles in 1912, to 11,602 miles in this fiscal year. The business of a number of these new lines will add but little to the gross income for a time while traffic is being developed, but meantime their maintenance and operation have a marked effect on the working expenses. This, coupled with expenditure for maintenance of way and of equipment and advances in the wage scale in some branches of the service, will account in a large measure, for the abnormal increase in working expenses over the previous year.

The item "railway and equipment" in the balance sheet is $69,491,729.27 more than it was in 1912, after applying upwards of $10,000,000 from surplus account. Of this amount $30,137,885.86 represents the cost of additional rolling stock, $9,113,050.21 the expenditure for the construction of branch lines, $36,809,675.82 for additions and improvements to your property, and $3,126,347.32 for additional shops and machinery over the whole system .

The undermentioned directors will retire from office at the approaching annual meeting. They are eligible for re-election: Mr. David McNicoll, Mr. Charles R. Hosmer, Hon. Robert Mackay, and Hon. James Dunsmuir.

What Balance Sheet Shows.

The condensed balance sheet on June 30, 1913, shows:

Assets

Railway and equipment	$452,320,780
Ocean, lake and river steamships	23,049,283
Acquired securities (cost)	100,207,933
Properties held in trust for the company	4,386,260
Deferred payments on land and townsite sales	44,499,115
Advances to lines under construction	13,750,205
Advances and investments	12,072,205
Material and supplies on hand	18,628,206
Current assets	11,253,284
Temporarily invested in Government securities	10,088,734
Cash in hand	30,274,848
	$720,531,465

In addition to above assets, the company owns 6,287,250 acres of land in Manitoba, Saskatchewan and Alberta (average sales past year $15.77 per acre), and 1,697,994 acres in British Columbia.

Liabilities.

Capital stock	$200,000,000
Payments on subscription to new issue capital stock ($60,000,000 at 175)	63,451,667
Four per cent. preference stock	74,331,339
Four per cent. consolidated debenture stock	163,257,224
Mortgage bonds	13,157,520
Algoma Branch, first mortgage	3,650,000
Current liabilities	30,511,302
Interest on funded debt and rental of leased lines.	1,391,801
Equipment obligations	880,000
Equipment replacement fund	2,425,426
Steamship replacement fund	5,061,338
Appropriation for additions and improvements	17,912,996
Reserve fund for contingencies	3,569,463
Lands and townsites sales	63,334,285
Surplus	77,597,100
	$720,531,465

Railway Equipment and Service.

The statement of the equipment on June 30 shows the company to have the following:

Locomotives	2,052
First and second-class passenger cars, barrake cars and colonist sleeping cars	2,063
First-class sleeping, dining and cafe cars	436
Parlor cars, official and paymasters' cars	84
Freight and cattle cars (all kinds)	79,085
Conductors' vans	1,274
Boarding, tool and auxiliary cars and steam shovels	5,414

together with ocean, lake and river steamers.

The work done in the carriage of freight in the two past years was as follows:

	1912	1913
Flour, barrels	8,459,850	8,093,936
Grain, bushels	151,731,691	171,952,738
Live stock, head	1,663,315	1,782,986
Lumber, feet	2,806,735,006	3,210,306,090
Firewood, cords	305,079	293,536
Manufactured articles, tons	7,196,225	9,519,346
All other articles, tons	9,092,821	9,625,665
	1912	1913
Number of tons carried	25,940,238	29,471,814
Number of tons carried one mile	10,391,650,965	11,470,001,871
Earnings per ton per mile	0.77c	0.77c

The passenger traffic record was as follows:—

	1912	1913
Number of passengers carried	13,751,516	15,480,934
Number of passengers carried one mile	1,626,577,067	1,784,683,370
Earnings per passenger per mile	1.96c	1.99c

INSURANCE RATES ON ST. LAWRENCE

London Underwriters' Decisions—Arguments of Quebec Boards of Trade.

The institute of London underwriters has come to an important decision respecting the rates of insurance to be charged for the St. Lawrence trade. According to the Times, the institute, in consideration of the extensive works undertaken by the Canadian government for the improvement and safer navigation of the river, has appointed committees to confer with Lloyds and other marine insurance companies, says a Canadian Associated Press cable.

Among the alterations to be submitted to the institute are, first, that vessels are to be allowed to trade to Halifax and St. John without any additional premium; second, that the period of navigation for the fixed additional premium may be extended to the 15th or to the end of October, and, third, that a smaller additional premium should be charged for cancelling Baltic and British North American warrantys.

Said to be Discrimination

Canadian interests considered this matter also at a convention of delegates from the boards of trade of the province of Quebec which was held at Chicoutimi to take into consideration marine insurance rates on the St. Lawrence. The rates of insurance on grain cargoes from Montreal to Liverpool last year ranged from 25 cents per $100 in summer to 45 cents per $100 during the latter part of November, while from New York and Boston the figure was 15 cents per $100 throughout the whole year.

That the difference constitutes an effective discrimination in favor of United States ports is indicated by the fact that of 87,579,696 bushels of Canadian wheat which were forwarded from Fort William and Port Arthur last year, 45,326,450 bushels were shipped to Europe through the Dominion, and 42,252,246 bushels via the United States. Of grain of all kinds, nearly 64 per cent. exported from Canada last year went via the States. Besides this, Canadian flour to the extent of 1,364,250 barrels was forwarded through United States ports.

Rates Have Been Lowered

The Monetary Times, discussing marine insurance rates of the St. Lawrence route, a few weeks ago, said:

"In view of the recent controversy regarding the insurance rates on cargoes between Canada and the United Kingdom, the following figures, compiled from official statistics prepared by the Government, are submitted, from which it will be noted that the rates in 1900 were over double what they were in 1912. There has been a gradual drop in the rates since 1900, and, comparing these in periods of six years, the results are as follows: The average insurance rate via Montreal to United Kingdom by first-class steamers was in 1900, 56c. per $100; in 1906, 32½c.; and in 1912, 25½c. The reduction in 1912 on the 1900 rate is 31½ c. per $100, or over 56 per cent.

The average insurance rate by tramp steamers via Montreal in 1900 was 1.15 per $100; in 1906, this had been reduced to 95c., and in 1912 the rate by tramp steamers via Montreal averaged 61c., showing a reduction on the 1900 rates of 54c. per $100, or equal to 47 per cent.

The rate by first-class steamers via New York in 1900 was 20c. In 1906 this had dropped to 17½c., while in 1912 the New York rate was 15c., a reduction on 1900 rates of 5c., or equal to 25 per cent., from which it will be seen that a reduction in rate via Montreal covering the period between 1900 and 1912 was proportionately greater by 50 per cent. than the reduction via New York during the same period.

◆

PUBLICATIONS RECEIVED

A volume designed primarily for the use of secretaries, directors and managers of companies, is the Manual of British Columbia Company Law, by Messrs. Douglas and Rorie. This is both authoritative and replete with information for their guidance and for others interested in laws dealing with corporations.

The joint authors of which are, one a well known company lawyer, and the other a chartered accountant, both having had a wide experience both in Canada and in England in the respective fields.

Manual of British Columbia Company Law: Douglas and Rorie. Burroughs and Company, Calgary.

◆

The Hon. W. T. White, Minister of Finance, before sailing from England, said that he found the financial situation greatly improved since the conclusion of peace in the Balkans, and he was quite satisfied that the financial world in London understood perfectly that Canada in all great fields of production, was only on the threshold of her development.

PACIFIC COAST TRAFFIC

Visit of Minister of Public Works—British Columbia Fisheries Company—Grain Trade

(Staff correspondence.)

Vancouver, August 25th.

Announcements made by Hon. Robert Rogers, Minister of Public Works of Canada, who is on the coast this week, show that the government is keeping its eye on development in this part of Canada. Hon. Mr. Rogers states that great progress has been made since his last trip and the remark is accompanied with announcements of what the government has in hand to meet the development, which shows that what Mr. Rogers says is sincere.

Official mention is made of the negotiations for a drydock on Burrard Inlet, at North Vancouver, the capacity to be about 16,000 tons and the cost two and a half million dollars. The opinion was also expressed that a large portion of the grain grown on the prairies would find export through the western ports of the Dominion. The minister visited the Fraser River, where a million dollars is being spent in improvements which, it is expected, will make the channel deeper and permanent.

Mr. Rogers will investigate the possibilities of the construction of a bridge across Seymour narrows, by which route it is hoped that through railway connection may be given Victoria. He inspected the large works going on at the wharf, and said that the inner harbor would have any dangers to navigation removed. When all these works are carried out, much greater facilities will be given to shipping.

River Navigation.

With development in the northern interior, attention is being paid to the great waterways, navigation on which will facilitate commerce and settlement. Steamers ply on the Upper Fraser now for a considerable length, and with the object of inspecting the whole inland system, Hon. F. W. Aylmer, Dominion public works engineer for Yale-Cariboo, will make a trip along the Fraser to Tete Jaune Cache and coming back will ascend the Nechaco and Stewart rivers. Mr. Aylmer, who has his headquarters in the province, is not unfamiliar with this territory, but he will undertake to see just what obstructions are in the way of more extended navigation. In instances, only a barricade of rocks prevents boats going many miles further. The extension of water routes in the northern interior will mean much to the settlers in the initial stages of the country's development.

While the minister of marine was on the coast, the salmon canners presented a memorial to him of considerable length. In this were outlined their several grievances, which it was promised will be laid before the government.

Mr. Wilfrid Doughty, general manager of the British Columbia Fisheries, which has applied in London for a receiver, makes the direct charge that the company was forced to this action by the refusal of the banks to extend to them the usual and necessary financial assistance generally extended to the fish packers in respect to the heavy calls made upon them during the latter part of the season. Sir George Doughty, M.P., of England, who has been in Vancouver as chairman of the company, laid the facts before a meeting of the creditors. The appointment of a receiver is necessary to carry on business through a London bank that is interested, not that operations will be permanently discontinued. The company has expended over three-quarters of a million dollars in the north during the past eighteen months, the greater part of which passed through one bank. Although the company is financially solvent and although personal guarantees were made by prominent members, the necessary money was not forthcoming from the banks.

May Build Flour Mills.

Mr. Hedley Shaw, of Toronto, general manager of the Maple Leaf Milling Company and Hon. D. C. Cameron, of Winnipeg, are on the coast. Discussing the export of grain from Pacific ports, Mr. Shaw points out that the effect of shrinkage is yet to be solved. It may be better to ship the grain whole or it may be that it should be manufactured into flour. In the latter event flour mills will be established on the coast.

◆

NEW ISSUES TO BE MADE.

The shareholders of Ritz-Carlton Hotel Company, of Montreal, Limited, have been notified of a meeting to be held on Friday, September 5, to sanction a by-law authorizing the directors to issue for the company second mortgage ten-year six per cent. gold bonds, aggregating at their par value seven hundred and fifty thousand dollars, and Halifax Tramway shareholders will be asked on August 30th to ratify an issue of $600,000 additional capital stock, bringing the total outstanding capital up to $2,000,000.

OPTIMISM PREVAILS IN WESTERN CANADA

Satisfactory Harvest Conditions—Preparations for Handling Wheat—Business Prospects

Monetary Times Office,

Winnipeg, August 26th.

Good progress is being made in the western harvest fields, and with the exception of some local damage in each of the three provinces from hail during the past ten days, there has been no frost or other damage.

Latest reports to hand indicate that the early sown wheat will not yield as good a return as that which was sown later. *The Monetary Times* has discussed the crop situation with a number of business men, such as; grain exchange officials, bank managers, railroad officials and wholesale merchants, who are interested in the west and who have been receiving reliable reports.

The weather of the past few days has not been good harvest weather but is now more satisfactory, and if there is a continuance of same during the next two or three weeks the bulk of the crop will have been harvested.

The three railroads are making extensive preparations for handling the crop and as there is a goodly supply of harvest hands now in the west it is expected that a quick movement will be the result. Estimates that have come in from several reliable sources show that the 1913 crops of wheat, barley, oats and flax should be well over the 400,000,000-bushel mark—these figures being subdivided to a production of 200,000,000 bushels of wheat, 200,000,000 bushels of oats, 50,000,000 bushels of barley, and 18,000,000 bushels of flax. Taking into consideration the prevailing prices of grain, this year's yield should give to the west trading value of over $250,000,000.

Manitoba Prospects are Bright.

The Hon. Geo. Lawrence, minister of agriculture for the province of Manitoba, returning from a tour of the province, states that late crops were maturing well and that sections where threshing was taking place the grade of wheat was higher than last year.

Deputy-minister Bedford, who covered central Manitoba, reports that the recent severe storms did apparently little damage in central Manitoba, and states that the fine warm weather since the heavy rain has greatly improved conditions and that there is now every indication of good returns even from the very latest sown crops.

General Business Conditions.

The outlook in the west appears brighter. Wholesale merchants are now shipping fall orders to country points. They state that orders are being curtailed to some extent and are confined principally to staple lines. Some of the dealers in heavy hardware are being very careful, as in fact all wholesale merchants are regarding new lines of credit, stating that it is better to have their goods piled up in their warehouses than shipped out only to have trouble in making collections.

Regarding collections, managers of loan companies state that payments of principal and interest are coming in fairly well, and one loan company manager stated they were not curtailing their loans on farm property, but were doing very little in the city.

There seems to be practically no speculation in real estate, but, notwithstanding, this real estate and property that is in demand is always turning over, and at market prices.

◆

THESE INSURANCE COMPANIES WILL ENTER ALBERTA.

Under the Act respecting insurance companies the following have been licensed to do business in Alberta:—The Canadian Surety Company (guarantee); the Equitable Life Assurance Society of the United States (life); the Quebec Fire Assurance Company of Canada (fire); Life Guarantee and Accident Company of London, England (guarantee, accident including automobile, sickness and burglary); New York Plate Glass Insurance Company of New York, U.S.A. (plate glass).

◆

The canneries of northern British Columbia report a lean year for the season just closing, the sockeye salmon pack totalling only 180,000 cases. The average pack of the last sixteen years was 750,000 cases. Puget Sound canneries, however, report a big season. The Fraser River pack amounts to 500,000 cases this year, against a million in 1911.

BRITISH GOODS IN CANADA

Sir Edmund Walker Gives Erring Manufacturers a Few Good Hints

Sir Edmund Walker, who has just returned to Toronto from a trip to England, made some interesting statements regarding the Canadian market and the place of British goods to a representative of the London Daily Chronicle.

"In Canada," he said, "we have a population of 8,000,000, and before many years there will be 20,000,000 or 30,000,000. It is now a great market for the goods of the world; in the near future it will be a greater one. In every other part of the British Oversea Dominions the British type of manufactured goods has become the standard. The British manufacturer has had the market to himself, and if a competitor comes along he has to offer something like the British article.

Influence of United States.

"But in Canada conditions are reversed. At every turn in her history she has felt the influence of the United States. There are no frontiers between the two countries except that of the Custom Houses, and the 100,000,000 on the one side have impressed their ideals upon the 8,000,000 on the other. We wear the same style of clothing, we use the same kind of machines, we read their newspapers—and I am sorry to say ours are of the same type. It is only lately that we have been able to get English magazines with the same facility that we could get American ones.

"Living so near to us, the American manufacturer saw our market and its possibilities, and immediately proceeded to seize it. He flooded us with goods of his own type of manufacture, and we have become accustomed to that type.

Must Make Right Types.

"The British manufacturers do not seem to have grasped the full significance of this fact. They are apt to think that we prefer American goods. As a matter of fact we do not; we are so British that we should infinitely rather prefer to use British goods—provided that they are made according to the types to which we have become accustomed.

"But the British manufacturer seems to have no idea—or very litte idea—of this. He cannot bring himself to make those things which his customers want. He will insist upon sending them the things which he thinks they ought to want.

"Let me give you one or two illustrations. There are certain classes of engines which we buy from Great Britain, partly because they are British, but chiefly because they are the best we can get. Yet we have the utmost difficulty in getting them repaired, because the British manufacturers will not remember that the threads of a screw are made to turn the reverse way in Canada and the United States.

"Again, when I was last over here, I bought an English motor-car, which I found to be far better than any car of American make. Yet if I want any spare parts I have to write to England for them, as there are no means of getting them in Canada. On the other hand, another firm of British makers of motor-cars has set up a garage in one of our big cities, where spare parts can be obtained and repairs carried out. The consequence is that they are selling as many cars as they want to.

Song of the Shirt.

"In America we wear shirts which open all the way down the front. When my son was last in London he replenished his wardrobe, but he could not find a single shirt maker in London who would make his shirts to open down the front."

"Then you think there are great openings in Canada for British goods?"

"I am sure there are," replied Sir Edmund. "I should like to see some sign that British manufacturers recognize its importance and are trying to study the class of goods we want. They must look ahead. They might not make much money at first, but they would get a standing ground for the time when the demand increased, as it is bound to increase.

"You may be sure of this:—What we want to buy from the outside we would much rather buy from Great Britain than anywhere else—if her people will only try to understand what we want."

◆

CAPITAL STOCK INCREASES.

The capital stock of St. Regis Land Company, Limited, has been increased from $75,000 to $200,000, the increase consisting of 1,300 shares of $100 each.

The capital stock of S. A. Early and Company, Limited, has been increased from $25,000 to $100,000.

The capital stock of the Tate Telephone Company, Limited, has been increased from $900 to $1,500.

MIX PICK AND SHOVEL WITH FINANCE

Sanford Evans Says Railroad Construction Would Be Good for Young Men Playing at Finance

Concentrated sarcasm for some of the young financiers, so-called, of this country, was offered by Mr. W. Sanford Evans, of Winnipeg, in an address to the Association of Canadian Clubs in conference at Hamilton. "The building of the Canadian Pacific Railway with shovel and pick was the best university this country ever had," he said. "It made for sturdy men. Do you know what Canadians would say to that kind of work now? They would say that it was not white man's work.

Playing With Finances.

"It would nevertheless be a good thing for the country if some of the young men who are now playing with the country's finances were now and for the next ten years busy on railroad construction work. The present financial stringency is the best thing that could have happened to Canada. It is a question whether it will last long enough, however.

"It has demonstrated as nothing else could the inherent soundness of our financial institutions, and it has put a temporary check on things which are not sound. The present stringency is caused by conditions in Europe, which check the flow of outside money into Canada. When this condition occurs it means a little squeezing for all of us to get into our cramped quarters, but that is about all.

Attitude Towards Work.

"The class will rule this country which first has the right attitude towards work, and which secondly practises sound finance. There is no honest work which is not white man's work and good for native Canadians."

LIABILITY INSURANCE BUSINESS

New York Superintendent Issues Final Directions—Limitation of Cost of Business

The New York insurance superintendent means business with the liability companies. On June 20th he addressed a letter to all companies authorized to transact the business of liability insurance in New York State, calling attention to the serious situation then existing in the liability business. He then stated that his department would insist upon the companies conducting their liability business upon a sound basis, and in particular as follows.—

1. Basing their underwriting upon statistical experience and the physical and moral hazard of each individual risk and free from the influence of competition.

2. Commissions to brokers not to exceed 15 per cent., and perhaps a slight increase over that to agents, but in no event should total commission exceed 20 per cent.

3. Administration expenses to be minimized.

Before taking final action, the New York department waited until replies were received from the various companies, in order that consideration could be given to any suggestions that might be made.

Must Have Limitation.

In the replies that have been received, several of the companies have raised the point that the limitation should be placed upon the total business-getting cost or acquisition expense, as well as on the amount of commissions to be paid. This is a point well taken, for a reduction in commission would mean nothing should salaries or other allowances be increased to the extent that commissions had been reduced, and the directions have been modified so as to include a limitation on the total acquisition expense.

The companies have been unanimous in their approval of the sentiments set forth in the superintendent's letter of June 20th, and have expressed their intention of complying with its requirements. A considerable number of the companies have already notified the department that they are now conducting their liability business along the lines outlined in his letter. Others, while approving the recommendations, have not as yet taken any real steps along the lines suggested, but have been apparently waiting for final directions. These final directions, says the superintendent, are as follows:—

These Are Final Directions.

1. Your underwriting to be based upon general statistical experience, modified by the physical and moral hazard of each individual risk and free from the influences of competition.

2. Commissions to brokers not to exceed 15 per cent. of the premium, and perhaps a slight increase over that to agents, but in no event should total commissions exceed 20 per cent. of the premium.

3. Total compensation, including salaries, commissions, and all other allowances to all brokers, agents, agency directors and branch office managers not to exceed 20 per cent. of the total premium income.

4. Administration expenses to be minimized.

These directions become effective October 1st, 1913, and apply to all of the liability and workmen's compensation business written. If any existing contracts provide for commissions or allowances in excess of the above requirements, they should be modified accordingly.

What the Department Wants.

Companies are requested to forward to the department not later than October 1st, 1913:—

1. A schedule showing the liability and workmen's compensation rates in effect from October 1st, 1913.

2. A schedule showing the rate of commissions to brokers and agents in effect from October 1st, 1913, on liability and workmen's compensation business.

3. A schedule giving a synopsis of all branch office and agency contracts, which provide compensation for salaries or allowances in addition to commission, showing the compensation, including salaries, commissions and all other allowances, in effect October 1st, 1913, on liability and workmen's compensation business.

4. A statement showing what steps have been taken toward minimizing administration expenses.

The schedules and statement requested above are to be certified to by two of the principal officers of the company.

Conditions in Canada.

The conditions in Canada were discussed by *The Monetary Times* last week. As then stated, the managers of companies doing liability business in Canada generally admit that it is in an unsatisfactory state. Many of them prefer not to offer any criticism of the existing conditions, as it is understood that a committee is endeavoring to bring the companies together into some sort of an agreement which will, *The Monetary Times* hopes, make for saner and sounder practices in the liability business.

It is generally expected that commissions on liability insurance will be reduced in view of the mandate of Superintendent William T. Emmet, of the New York Insurance Department, who said that brokerage and commissions are too high, says the Spectator. There is an inclination on the part of underwriters to take such action, although so far only one company has announced a reduction on commissions. The company members of the Workmen's Compensation Service Bureau have advanced rates in the following States: North Carolina, 25 per cent.; Alabama, 25 per cent.; Mississippi, 33⅓ per cent.; Tennessee, 33⅓ per cent.; Oklahoma, 33⅓ per cent.; Kentucky, 50 per cent.; Kansas, 50 per cent.; Arkansas, 65 to 80 per cent.

Offers have been made, it is understood, by several of the newer companies writing workmen's compensation to reinsure this line, because of the unsatisfactory results.

Compensation Liability Rates.

The workmen's compensation rates are being filed with the Industrial Commission of Wisconsin according to the new law, but as the rates and systems vary so greatly the companies are watching with interest the situation that is developing. The conference companies have filed the manual issued by the Workmen's Compensation Service Bureau, while a number of other companies in many cases have filed this manual, but have changed the rates to suit their own ideas. In other States the system of the conference companies is to permit each company to rate its own renewals and make all rates known to other members at least sixty days before expiration, but this is held to be in violation of the new anti-discrimination act.

COMPANIES WILL CHANGE NAMES.

The name of the Walker-Knisely-Woods Company, Limited, has been changed to Woods-Walker Company, Limited.

The William Sugarman Company, Limited, will change its name to B. Lauer and Company, Limited.

Smith and Whitney, will make application to change its name to Whitney and Company, Limited.

The Cement Products Company, Limited, will make application to change its name to Whites, Limited.

The Standard Trading Company, Limited, will make application to change its name to Standard Discount Company, Limited.

CHARTERED ACCOUNTANTS' CONVENTION

The Dominion Association of Chartered Accountants will hold its eleventh annual convention at Winnipeg, September 2nd, 3rd, and 4th. Mr. A. E. Phillips, of Winnipeg, is the secretary, and is making all arrangements. A large attendance of accountants from all parts of the Dominion is expected. The programme has been arranged as follows:—

Tuesday, September 2nd, 9 a.m.—Meeting of council, registration of members. 10 a.m.—Official reception of members. 11 a.m.—Opening session. President's address. Appointment of committees. Appointment of auditors. 1 p.m.—Complimentary luncheon at the Royal Alexandra hotel, tendered by the Institute of Chartered Accountants of Manitoba. 2.30 p.m.—Consideration of report of committee on uniformity of standards amongst provincial societies. 4.30 p.m.—Address by Vere Brown, western superintendent Canadian Bank of Commerce, on "The Banker and the Accountant."

Wednesday, September 3rd, 9.30 a.m.—Presentation of paper on "Municipal Accounting in the Prairie Provinces," by O. J. Godfrey, of the Saskatchewan Institute. 12.30 p.m.—Adjournment for luncheon. 2.30 p.m.—Consideration of reports of committees on "Canadian Chartered Accountant." Financial report. Auditor's report. 4.30 p.m.—Address by Judge Robson, public utilities commissioner of Manitoba, on "The Accounting of Franchise Companies to the Public Utility Commissions." 7.30 p.m.—Annual dinner of association at Royal Alexandra hotel.

Thursday, September 4th, 9.30 a.m.—Presentation of paper on the "Timber Industries of British Columbia," by W. E. Hodges, of the British Columbia Institute. 12.30 p.m.—Adjournment for luncheon. 2.30 p.m.—Receiving reports of constituent societies. Report of registration committee. Place of meeting, 1914. General business. After adjournment, meeting of council. Election of officers. 8 p.m.—Smoker by the Manitoba Institute in the Royal Alexandra hotel.

Insurance men want to be protected by Federal licenses, and they want it made a crime to let an insurer off with a part of his first payment. They also want it made a crime for any unlicensed person to canvass for life insurance. The growth of monopolistic restrictions conceals in time their absurdity.—Toronto Globe.

MARKETING CANADA'S GRAIN

V.

THE DOMINION AND ITS NEIGHBOR

Comparison of Crop-handling Resources — Inspection Methods

The grain fields of Alberta lie, on the average, over 1,200 miles from the terminal storage points and those of Saskatchewan about 800 miles. And between Fort William and the most westerly boundary of grain growing in Canada there is no interior storage elevator of large capacity, except the new one now being erected by the Canadian Pacific Railway at Winnipeg, and there is no inspection point west of Winnipeg for east going grain. In the grain area south of the boundary line very different conditions exist. The spring wheat fields of Minnesota and North and South Dakota lie, on the average, not more than 600 miles from Minneapolis and Duluth, with terminal storage capacity of about 72,000,000 bushels. The winter wheat fields further south lie within easy reach of Kansas City, with a terminal storage capacity of nearly 12,000,000 bushels, of Omaha with interior storage of over 7,000,000 and of St. Louis with about 11,000,000 bushels. These winter fields are, on the average, about 500 miles from Chicago with a storage capacity of over 28,500,000 bushels, and a similar distance from Galveston with 4,000,000 and New Orleans with about 5,400,000 bushels.

Elevators Throughout Grain Growing Area.

In the United States large storage elevators are, therefore, not confined to ports on lake and sea, but are found throughout the whole grain growing area at strategic points for assembling, marketing, milling and distributing the grain. Several states have each their own inspection department, and some of these states carry on inspection at a number of points within the state. Minneapolis maintains local inspection offices at St. Cloud, Sleepy Eye, New Prague, New Elm and Kasota, in Minnesota, and at La Crosse, in Wisconsin. These local inspections serve the purpose of assisting the milling industry at the points named.

Illinois maintains inspection, not only at Chicago, but at Joliet, Decatur, Kankakee and East St. Louis, and quite large quantities of grain are inspected at some of the points.

Not Concentrated in One Market.

Grain dealing is not concentrated in any one market, but it is carried on in several highly important markets throughout the country. Chicago, for example, receives grain from areas as far off as Kansas, Nebraska, Minnesota and South Dakota. St. Louis receives grain from Illinois, Kansas, Iowa, Nebraska, Minnesota and Dakota, and Kansas City ships grain to St. Louis, Chicago, Toledo and Minneapolis. Terminal storage and inspection are brought nearer to the producer and alternate shipping routes are open, each shipping route well equipped with transportation, storage and inspection facilities.

The federal system of inspection has undoubted advantages over the states or provincial system, as, for example, in regard to uniformity of grades. But as the grain fields grow in area and as they extend west and north, grain shippers in the farther parts of the field feel more acutely the delay in getting grades and outturns. Whatever difficulties the states or provincial system of inspection may have it undoubtedly brings inspection, terminal storage and trading nearer to the shipper, and it appears to enlarge the facilities required for the quick handling of grain.

◆

TRACTION ENGINE COMPETITION IN BELGIUM

The department of trade and commerce is informed that the Belgian Minister for the Colonies has organized an international competition of traction engines and other ploughing machines. A sum of 70,000 francs will be appropriated for the best machines, and indemnities up to 15,000 francs will be granted to the competitors who have received no orders.

Canadian manufacturers are invited to take part in this competition, which will be held at Chassart, near Fleurus, Belgium, from the 24th to the 27th of September next.

VALUE OF LIFE INSURANCE

XXVII.

How to Capitalize Your Capabilities

BY C. A. HASTINGS

There is no difficulty in saving provided you can do the following three things:—

(1) Not spend unnecessarily.
(2) Earn more than the wherewithal to buy necessaries.
(3) Possess the ability to work.

You have only then to find the best investment coupled with the preservation of your capital. Assuming, in this case, that the reader possesses the above three essential factors necessary to saving, that he is a man who is either in some profession on his own account—such as medicine, accountancy, etc., or is employed in a business at a fair salary with good prospects in view. I, therefore, come down to this statement, that what he is earning is his capital—it is merely what his capabilities are worth annually, and—consequently—those dependent upon him have to rely on his being able to continue doing this. He must, therefore, capitalize his capabilities, and must not consider himself—for one moment—in the same class as the man who has capital, either in cash or the equivalent of cash, though he may be commanding a very good salary.

Now then, his only method to procure the same income as he is enjoying, after his death, is provided by life assurance.

Could Create Large Estate.

Take a man aged thirty, drawing say $4,000 per annum, he could create an estate of $25,000 at an approximate rate of $495 per annum, which premium would be payable only during his life-time, and whenever his death occurred, which might be twenty-four hours after the first payment, his family would receive $25,000 which, according to rates that are being obtained to-day in this country, would produce $2,000 per annum and upwards—but, if invested in any sound security would produce a safe income of $1,500 per annum.

As the "Joint Stock Companies' Journal" stated:—

"The risks of life are many, and it is a fortunate thing we do not waste time thinking of them." Nevertheless, I am not saying we can all put by $495 per annum, and every man must consider his position, his abilities, his chances in business, his chances of poor health or competition. Anyway, whatever amount is laid on one side annually for life assurance will never cause any worry as to the possibility of loss, wholly or in part; and the income derived therefrom is perpetual and does not rely on the business training of its possessor.

Keep Want Away.

It is true that the income thus derived, in the case I have illustrated, is less than what the assured earned, but that same man, though he is sure not to acknowledge it, realizes that he has the satisfaction, by a little unselfishness on his part, of having created an estate that will keep want out of his family's reach forever. He will know that, at the worst, his family can live independently, and there are many men who are in the position to do this—who desire to do this—and who should know, that their last chance of exercising this privilege may come any moment, when opportunity will no longer hold out a helping hand, and then will begin the struggle that could have been kept at arm's length for ever.

◆

MORE ELEVATORS FOR ALBERTA

Forty-six line elevators will be built in Alberta this year in time to handle this season's crop by the Alberta Farmers' Elevator Company, Limited, authorized under the Farmers' Elevator bill passed at the last session of the Alberta legislature. The work of construction of half of these elevators is in progress now and the materials for the others have been purchased and are on the ground at the various locations.

◆

Messrs. A. E. Ames and Company, the well-known Toronto financial house, have issued their "Investors' Reference," 1913-1914. This booklet contains statistical data of about 180 companies, whose securities are more or less traded in on the exchanges. There will also be found in the first part of the booklet investment information, and towards the end, tables are given showing the range of prices of securities from 1908 to 1913; also a table showing the approximate yields on stocks and bonds bearing dividends or interest at various rates.

TWENTY-FOUR MILLIONS OF CAPITAL

Is Total Accredited to this Week's Newly Incorporated Companies

One hundred and twelve charters have been added this week to the large total granted in Canada. The capitalization is in excess of $24,000,000, and the largest companies are:—

Calgary Flour Mills, Calgary	$5,000,000
Herendeen Flour Company, Toronto	5,000,000
Southern Canada Power Company, Montreal	3,000,000
Montreal Holding Company, Montreal	1,500,000

Thirty charters have been granted to the Pecol Drilling Company. Apparently they will bore for oil in Canada. The two Toronto directors, *The Monetary Times* is informed, have been in London for more than a year past.

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	Number of Companies.	Capitalization.
Quebec	17	$ 5,979,000
Ontario	58	10,627,000
Alberta	22	7,155,000
Saskatchewan	13	700,000
British Columbia	2	150,000
Totals	112	$24,611,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Victoria, B.C.—Canadian Vending Machines, $100,000.

Vancouver, B.C.—Armstrong Kerr Company, $50,000.

Lumsden, Sask.—Lumsden Brick Company, $50,000.

Waldeck, Sask.—Dafoe, Lewis and Prentice, $20,000.

Blairmore, Alta.—Blairmore Coal Lands, $500,000.

Longueuil, Que.—La Compagnie Ouellette, Beaulieu, $45,000, (lumber). J. H. Ouellette, F. Beaulieu, J. R. Dion.

Howick Station, Que.—Howick Paving Company, $10,000. J. H. Lefebvre, T. Vass, C. A. Vass, both of Casaville.

Quebec, Que.—Agricultural Implements Manufacturing Company, $75,000. F. C. Dufour, A. Bilodeau, L. Turcotte.

Palmerston, Ont.—Kreutziger Company, $100,000, (general dealers). L. Kreutziger, A. Kreutziger, M. Kreutziger.

St. Catharines, Ont.—Model Homes, $40,000. W. A. Notman, R. L. Notman, H. C. Babel, all of Buffalo, U.S.A.

Dundas, Ont.—Tocan Manufacturing Company, $250,000. A. C. Caldwell, W. A. Welsh, T. J. Palmer, both of Hamilton.

Prince Albert, Sask.—Saskatchewan River Transportation and Fuel Company, $200,000. Zoellner Sons, $40,000.

Kingsville, Ont.—Ecothermal Stove Company of Canada, $100,000. B. Jasperson, G. Jasperson, C. J. Green.

Saskatoon, Sask.—People's Theatre Company, $75,000. Waldorf Cafe, $10,000. Minas Certuchena, $50,000.

Fort William, Ont.—Emil Anderson Company, $200,000. A. H. Dowler, G. Olson, E. Brown.

Preston, Ont.—S. J. Cherry & Sons, $10,000, (grain dealers). S. J. Cherry, G .A. Cherry, W. Cherry.

Niagara Falls, Ont.—Douglas Ice Company, $50,000. F. A. Douglas, H. A. Campaigne, Mrs. I. M. Douglas.

Westport, Ont.—Westport Rural Telephone Company, $7,000. W. S. Ripley, J. F. McNally, J. Myers.

Orono, Ont.—Pioneer Threshing Company, $10,000. E. N. Armour, E. MacMahon, R. S. Anderson.

Burlington, Ont.—Mitchell's Investments, $500,000. J. F. Mitchell, A. F. Spiers, W. C. Kerns.

Regina, Sask.—W. G. F. Scythes and Company, $50,000. Sykes Company, $20,000.

Moose Jaw, Sask.—Caufield Farms, $75,000. Farm Products Company, $25,000.

Killam, Alta.—Scottish Alberta Land and Loan Company, $250,000.

Saltcoats, Sask.—Commercial Travellers Hotel Company, $75,000.

Kerrobert, Sask.—Western Farmers' Elevator Company, $10,000.

Medicine Hat, Alta.—Easy Starter and Speeder Company, $10,000.

Macleod, Alta.—Excelsior Development Corporation, $500,000.

Holland, Ont.—Berkeley Trout Club, (no share capital). J. F. H. Wyse, W. R. McRae, both of Toronto; W. J. L. McKay, Orangeville.

Ottawa, Ont.—Les Chanoinesses Regulires des cinq Plaies de notre Sauveur, (no share capital). M. L. Gauthier, L. Richard, A. Tremblay. Cartier Realty, $50,000. J. R. Touchette, J. F. H. Laperrier, H. Laperrier.

Hamilton, Ont.—Cameron Island Syndicate, $200,000. J. Routledge, H. Hennessey, H. J. Kirkpatrick. Halliday Company, $40,000, (general merchants). H. C. Nunn, H. E. Northrup, J. H. Slater.

Calgary, Alta.—Calgary Flour Mills, $5,000,000. W. C. Robertson, A. deB. Winter, F. A. McAllister. Healy, Knapp, Morgan and Company, $10,000. McCutcheon and McGill, $40,000. Hawk Eye Crushed Rock and Gravel Company, $20,000. Alberta Wine Company, $25,000. J. B. Anderson Lumber Company, $25,000. Murray's, Limited, $30,000. Matinee Company, $10,000.

Edmonton, Alta.—North-West Biscuit Company, $50,000. Canadian Mercantile Company, $25,000. Clark Cobb Engineering Company, $50,000. Alberta Chemical Rubber Company, $150,000. Wales Canada Investment, $30,000. J. J. Candy Manufacturing Company, $25,000. Edmonton Adjustment Agency, $10,000. Central Alberta Hotel Company, $10,000. Hardisty, $10,000. Edmonton Silver Black Fox Company, $375,000.

Montreal, Que.—Ouareau Country Club, $20,000. G. A. Forbes, H. Day, G. S. Robertson. La Compagnie des Terrains de Laprairie, $49,000. J. Charruau, E. Charruau, J. P. Trepanier. Ideal Ladies Tailoring Company, $1,000. H. Weinfield, P. Ledieux, J. Y. Fortier. Peerless Amusement Company, $99,000. H. N. Chauvin, G. H. Baker, H. E. Walker. Exploitation agricole et d'elevage, $50,000. A. Joeckel, L. Joeckel, E. Fournier. Southern Canada Power Company, $3,000,000. C. H. Cahan, O. B. MacCallum, M. Lewis. Occidental Trust Company, $100,000. R. T. Mullin, A. P. Mathieu, G. H. Semple. Holly Trust Company, $50,000. R. T. Mullin, O. Mathieu, J. Gilmore. Combine Investment, $150,000. J. Chevalier, J. Robert, F. Paul. Valley Construction Company, $250,000. A. D. Gall, R. B. Hutchison, both of Westmount; L. Gosselin. Montreal Holding Company, $1,500,000. W. W. Skinner, G. G. Hyde, G. Williamson. American Kitchen Products Company of Canada, $30,000. W. J. Schieffelin, H. S. Livingston, B. J. Weil, all of New York City. William Clark, $500,000, (canned goods). W. R. L. Shanks, F. G. Bush, G. R. Drennan. L. E. Moulton and Company, $50,000, (plumbing contractors). L. A. Moulton, J. A. Cousineau, H. McG. Wamboldt.

Toronto, Ont.—Pecol Drilling Company, $500,000. Pecol Company (No. 1), $75,000; (No. 2), $75,000; (No. 3), $75,000; (No. 4), $75,000; (No. 5), $75,000; (No. 6), $75,000; (No. 7), $75,000; (No. 8), $75,000; (No. 9), $75,000; (No. 10), $75,000; (No. 11), $75,000; (No. 12), $75,000; (No. 13), $75,000; (No. 14), $75,000; (No. 15), $75,000; (No. 16), $75,00; (No. 17), $75,000; (No. 18), $75,000; (No. 19), $75,000; (No. 20), $75,000; (No. 21), $75,000; (No. 22), $75,000; (No. 23), $75,000; (No. 24), $75,000; (No. 25), $75,000; (No. 26), $75,000; (No. 27), $75,000; (No. 28), $75,000; (No. 29), $75,000. The provisional directors of all 30 companies are: A .P. Poussette, A. A. Dickson, both of Toronto; S. Hogarth, of London, England. Exmoor Realty Company, $150,000. G. D. Waters, L. F. Black, H. A. Hall. Thomas Ogilvie and Sons, $200,000, (dry goods). A. M. Garden, C. A. Moss, W. Lawr. Herendeen Flour Company, $5,000,000. T. G. Watson, J. L. Mallory, J. R. Empringham. Monarch Optical Manufacturing Company, $40,000. F. M. McDowell, G. R. Sproat, K. W. Wright. Hapwins, $25,000, (real estate), (a private company). W. L. Carr, C. J. F. Collier, A. B. Nind. Ontario Hockey Club, $30,000. O. H. King, A. Gilmour, A. Cochrane. Art Publication Company, $40,000. G. H. Sedgwick, H. A. Beckwith, W. F. Huycke. Canadian Mineral Development Company, $40,000. G. B. Balfour, J. Barker, H. C. Balfour. St. Petersburg Graphite Mining Company, $500,000. R. D. Moorhead, L. Macaulay, J. E Anderson. Ormeau Park Land Company, $40,000. J. Ferguson. J. W. Payne, S. A. Keers. The Tube and Pipe Bending Company of Ontario, $100,000. J. F. Edgar, J. E. Maybee, L. M. Lewis. Hudson Parker, $40,000, (general merchants). D. I. Grant, M. MacDonald, E. G. Black. Canadian Tobacco Utilities, $100,000. A. Hawes, Mrs. G. E. Hawes, A. L. May.

BANKERS ELECT PANEL OF AUDITORS

First Election Under the Revised Bank Act—Personnel of the Bankers' Association

The general managers of the chartered banks met this week to elect a panel of qualified auditors from amongst whom shareholders may select an auditor for the examination of the affairs of the bank in which they are interested.

This is the first time such action has been necessary, the election of auditors being covered by a new clause in the revised bank act. The association must select not less than forty and the list is to be sent to the Minister of Finance. Their names will be published in due course in the official Canada Gazette. A director or officer of the bank may not be appointed as an auditor.

At a special meeting of the Association trustees for the gold reserve fund were elected as follows:—The Canadian Bank of Commerce, the Bank of Montreal and the Royal Trust Company. The Royal Trust Company was chosen custodian.

Powers and Duties of Auditors.

The auditors' powers and duties are defined by the Bank Act, which says:—

"Every auditor of a bank shall have a right of access to the books and accounts, cash, securities, documents and vouchers of the bank, and shall be entitled to require from the directors and officers of the bank such information and explanation as may be necessary for the performance of the duties of the auditors.

"If the bank has branches or agencies it shall be sufficient for all the purposes of this section if the auditors are allowed access to the returns, reports and statements and to such copies of extracts from the books and accounts of any such branch or agency as have been transmitted to the chief office, but the auditors may in their discretion visit any branch or agency for the purpose of examining the books and accounts, cash, securities, documents and vouchers at the branch or agency.

"It shall be the duty of the auditors once at least during their term of office, in addition to such checking and verification as may be necessary for their report upon the statement submitted to the shareholders, and at a different time to check the cash and verify the securities of the bank at the chief office of the bank against the entries in regard thereto in the books of the bank, and should they deem it advisable, to check and verify in the same manner the cash and securities at any branch or agency."

Shareholders to Receive Report.

A full report must be made by the auditors to the shareholders on the following matters:—

1. On the accounts examined by them.
2. On the checking of cash and verification of securities.
3. On the statement of the affairs of the bank submitted by the directors to the shareholders.

The auditor's report must also state:—

1. Whether or not they have obtained all the information and explanation they have required.
2. Whether in their opinion, the transactions of the bank which have come under their notice have been within the powers of the bank.
3. Whether their checking of cash and verification of securities agreed with the entries in the books of the bank.
4. Whether, in their opinion, the statement referred to in the report is properly drawn up so as to exhibit a true and correct view of the state of the bank's affairs according to the best of their information and the explanations given to them, and as shown by the books of the bank.

Members of Bankers' Association.

The report has to be attached to the bank's annual statement and read at the annual meeting. Any further statements of the affairs of the bank submitted by the directors to the shareholders is also subject to audit and report.

The election of the panel of auditors is but one of the few important duties of the Canadian Bankers' Association.

The members of the Association are as follows:—

Honorary presidents, George Hague, Montreal, Sir Edmund Walker, C.V.O., LL.D., Canadian Bank of Commerce.

President, D. R. Wilkie, Imperial Bank of Canada.

Vice-Presidents, Geo. Burn, general manager, Bank of Ottawa: Alex. Laird, Canadian Bank of Commerce: E. L. Pease, Royal Bank of Canada; H. V. Meredith, Bank of Montreal.

Council, E. F. Hebden, Merchants Bank of Canada; T. F. How, Bank of Toronto; B. B. Stevenson, Quebec Bank; Jas. Elliot, the Molsons Bank; N. Lavoie, La Banque Nationale; G. P. Scholfield, Standard Bank of Canada; C. A. Bogert, Dominion Bank; H. B. Mackenzie, Bank of British North America; G. H. Balfour, Union Bank of Canada; John Turnbull, Bank of Hamilton; W. D. Ross, Metropolitan Bank; H. A. Richardson, Bank of Nova Scotia; T. Bienvenu, Provincial Bank of Canada; Col. Jas. Mason, Home Bank of Canada.

All the members of the council are general managers.

The auditors of the Association are Messrs. F. G. Leduc, Banque d'Hochelaga, and J. Gillespie Muir, chief accountant, Merchants Bank of Canada. The secretary-treasurer is Mr. J. T. P. Knight, of Montreal.

Photographs of some of the members appear on other pages.

The members of the Canadian Bankers' Association, are well versed in the banking business. For most of them it has been a profession for the greater part of their years. On this point, Professor J. F. Johnson, in his report to the United States Monetary Commission on the Canadian banking system, said:—"The general managers of Canadian banks are, without exception, men who have been in the banking business since boyhood. They have worked their way up through all the grades of employment by the force of brains, industry, character, and good health. They know from experience the task of every employee and they know when it is well done. They hold their positions because they have proved their fitness. They are, in other words, professional bankers. Untrained outsiders can not break into the banking business as they do in the United States."

◆

CANADA LIFE'S BUSINESS ABROAD.

In a recent issue of *The Monetary Times* it was stated that the net amount of life insurance in force outside Canada and written by the Canada Life Assurance Company in 1911 was $28,635,786. This should have been $38,635,786. The amount in 1912 had increased to $40,832,314. This well known company is doing considerable business abroad and has the second largest amount of insurance in force in other countries of the ten Canadian companies doing business abroad.

◆

LONDON AND NEW YORK OPINIONS ON CANADIAN PACIFIC RAILWAY

The Canadian Pacific Railway and its stock continues to be a prominent topic in the British and foreign press. The Westminster Gazette, of London, says:—"Without a doubt, the main reason for the decline in popularity of Canadian Pacifics is the evidence afforded by the weekly traffics and monthly statements that huge increases cannot continue for ever. The quieting-down of international politics has deprived the market of those sensational price-movements that attracted the born gambler to dabble in the shares. Canadas, for the time being, do not jump up and down at the rate of five points a day, while the small investor, with his purchases of odd lots of shares at high premiums, is much less conspicuous than he was a few weeks ago, before the traffics became as moderate, compared with the corresponding period last year, as they are now. Canadas have gone out of fashion. The Dominion is looking forward to a bumper harvest that shall make financial conditions better all over the country. If the promise of the crops is fulfilled, the Canadian Pacific stands to benefit hugely. Until it is seen whether this will come to pass or not, the investor and speculator appear to be content to give Canadas something of a rest."

The New York Journal of Commerce says:—"Some of those who expect that the Canadian Pacific Railway will sooner or later find means to distribute a stock bonus, through segregating its land assets or in some other manner, evidently base their expectations largely on the rapid growth of the company's surplus."

"The annual report due this fall will not, of course, deal with the premium on the 1913 issue of $60,000,000 at 175. That premium will amount to $45,000,000 which sum is far in excess of any premium with which the directors have had to deal. It seems a very large amount to apply as an appropriation for additions and improvements. At any rate it would be five or six times as large as any appropriation made for that purpose up to 1912. If it is decided to leave a portion of the amount in surplus account the surplus proper will be well over $100,000,000 at the end of the current fiscal year, without counting any surplus earnings. And the surplus plus the balance at credit of land sales account will perhaps approach $200,000,000."

HOW TO SECURE LIFE INSURANCE PROSPECTS

Practical Pointers From Experienced Field Men—Underwriters Must Evolve Their Own Systems.

How I secure my prospects, was the topic of a lively discussion at the first day of the convention. Mr. O. B. Shortley, superintendent of the Ottawa district of the Metropolitan Life, was of the opinion there are many different ways of securing prospects, and did not believe that any two men can use the same system, and be successful. He said, "I have often tried to get men to do it my way, and they could not possibly do it. Neither could I canvass their way. A man must have a great deal of originality and work out a system of his own. Personally, I make it a point to become acquainted with the most successful professional and business men of the city. Not altogether for business purposes, but because it is pleasant. I never fail to tell people about my company, and I have secured many applications simply through talking about the company I represent.

"To be a successful insurance man, or a successful business man, in this line of business, one must be absolutely square, up and above board and honest. Not only about his own company but about every other company, or anything else he may do. Obtain the confidence of all the people you meet, and success will follow you.

"Believe in the city you live in. Have every faith in it. You sometimes find people who are always finding fault with the town or city in which they reside. In other words, they are always knocking their own town. This is a mistake.

"One must love the business he is in, the company he represents, and the community in which he lives. If there is a man present at this convention who does not love the insurance business I would advise him to give it up, as no man can be a success unless he throws himself heartily into his work."

Obtains Proposal at First Interview.

Mr. W. C. Gaden, Montreal, said he interviewed a man only once. He never went back. He usually got his application. If he did not get it the first time, the prospect had to send for him. Mr. Gaden said he never quoted statistics but he made his prospect understand that he had come to write him for life insurance. He told the prospect that there was no guarantee that physical conditions and health would be the same thirty days hence as to-day and that he needed life insurance at once. In short, the prospect was made to understand that he had to take life insurance at once and that the agent was doing the insurer a favor.

Mr. H. B. Andrews stated he obtained a large number of prospects from the already satisfied policyholders of his company. Keep on good terms with the existing policyholders, concluded Mr. Andrews. That policy, with eternal vigilance and hard work, would secure prospects.

Mr. Johnson, of Calgary, gave personal experiences of obtaining prospects. He invariably obtained all possible information regarding men likely to be able to take insurance. He sent them literature; his agents visited them. He got, for instance, a list of wealthy Englishmen farming in his district. He commenced his campaign by sending them an annual report. The Englishman liked figures and to examine reports regarding the company.

Mr. T. Hendry, Brantford, was another underwriter who believed in securing all possible information about the prospects in the district. For instance, in the country regions, he got a list of the farmers, learned what he could about them, started down the concession line, wrote a man of some influence, and used that fact to write the next fairly big man, and so on. The smaller men could be written on the return trip. Mr. Hendry wrote eighty-eight policies, in such a way, in one year.

On one occasion he had been told of a farmer with a mortgage of $700 on his farm. The money had been borrowed from a sister, who desired it repaid. He learned all the circumstances, went into the harvest field and tackled the farmer while on the binder. The farmer found that the insurance man knew the circumstances so well and put up such a good argument for insurance that the agriculturist took a policy.

Mr. Hendry thought the insurance man should take part in public life, become a member of the school board or some other body. He should keep in the public eye as a man who desired to help the betterment of his town.

He did not agree that a man should write only life insurance. He had often written a man for a good life insurance policy, because he had satisfied him with fire insurance.

Study the Man

Mr. Thomas Mills, Kingston, Ont., stated that the way he secured his prospects was to study them, their families, and their needs, business, financial strength, etc. Then, with full confidence in the company he represents, and the business he is in, he approaches the prospect and cultivates his acquaintance. "I go with him along his line of thought," said Mr. Mills, "and never oppose him, unless I see he is radically wrong in his reasonings. I always guard his interests as well as my own. He will see it and know it. I canvass a man so that I shall never be ashamed to meet him in after years. I let comparisons of rates, plans, etc., be honorable and above board. After a canvass, I always leave the door open to return and do not go back too often, or too soon, and any and every time try and come away with the proposal in my pocket and use it (with the proposer's permission) on my other prospects before sending it to head office. It is one thing to secure a prospect and another thing to secure a proposal.

"I never lose sight of the fact that man is mortal and that life insurance is insurance and investment and not investment and insurance. I impress the fact that there are two important things every man should do, namely, (1) Insure his life; (2) Make his will. The agent must not forget to insure his own life and not grow so familiar with the subject that he will conclude 'Every man is mortal but me.'

"I never try to bury the insurance element of any policy too deep in the grave which is lined with the evergreens of seven per cent. gold bonds and four per cent. compound investment policies and all the rest of it, because life insurance is life insurance and always must be considered, mainly, as such. Nevertheless, I do not fail to emphasize the fact that every policy carries with it the investment, as well as the safety element, such as cannot be gained in any other investment, and the security is beyond question, so long as our superintendents of insurance do their duty fearlessly and well, and they usually do."

MUST IMPROVE LIFE INSURANCE SALESMANSHIP

Also Increase Percentage of Persistent Business—So Said Mr. J. F. Weston.

In an excellent address, Mr. J. F. Weston, general manager, Imperial Life Assurance Company, stated a great deal of work remained to be done both by the Life Underwriters' Association and the Life Officers' Association. This would have to be performed jointly.

"In objecting to departmental interference," said Mr. Weston, "we practically assumed responsibility for the enforcement of the act in so far as it sets penalties against the commission of certain recognized offences. While we assumed these responsibilities, the department had laid upon it fuller inquisitorial duties, so that their reports now contain complete information as to the results of our transactions.

"This places us here in Canada, with our reasonable measure of freedom, in competition with companies which work under the laws of other states where the limitations we objected to apply. The public is interested in the results, and the latitude we will be allowed in the future depends largely upon the efficiency of our present work."

Keep Out Bad Agents.

Regarding the great necessity of good character in agents, the speaker said:—

"You, as field men, in the prosecution of your work, cover the recruiting ground from which new agents are to be drawn, and you are in a far better position than your head offices to select and develop them. The better you discharge your duties in this respect, and the nearer you come to supplying the demand of your companies for new men by furnishing them with men of character and efficiency, who are capable of doing business on business lines, the less liable you are to have thrust amongst you the outcasts of other countries trained in fraud and the methods which brought discredit upon our business there and limitations on the actions of honest men. Limitations under which these nefarious tricksters were starved like rats in times of famine, and they drag their pestilential influences across our borders and threaten our freedom and good repute.

"They come by scores to our cities. The other day one of these landed in Victoria—he had been operating in Oregon, but complained that the bankers there had got into the game and charged them 25 per cent. for discounting their notes. If we would give him two hundred dollars to start and allow a certain brokerage commission, he would write us $1,000,000 in Canada. I do not know to what extent these undesirables have found employment here. I do know they have been seeking it, for I have had many of them call on me. I have even had them suggest that they would come to us if we would add certain clauses to our policies which they held were all-important as selling points, but which, so far as I could see, served no purpose, unless their ambiguous wording might give an impression of value which was not guaranteed. They are not always so easy to detect in their method of approach.

Head Office Does Not Want Them.

"I know that no head office wants them. We will welcome here in Canada any honest man of any race or nationality. We need them all in our business, but we do not want fraudulent or trick salesmen. There is in this country a great and growing demand for honest insurance to be honestly sold, and the duty of your association is to insist on honest practice, while at the same time you train men to efficiency in sufficient numbers to enable your companies to cope with the great opportunities which are expanding before them to-day.

"Consider the magnitude of our business as expressed by the combined assets of our companies, and you will find it is larger than any single one of the great industries which serve as a basis of our financial and commercial prosperity. We do not create wealth, but our system enables the individual to secure his hold on the wealth of the community, protecting the interests for which he is responsible and projecting the value of his existence beyond the limit of human life. It gives us a tremendously strong hold upon all classes of our citizenship, but we have no right to appeal to all that is finest and best in a man without also doing, each of us, our part to make and to keep conditions in our business such that we will not abuse the trust reposed in us.

Must Improve Salesmanship.

"At the moment there is no more practical issue than that of improving the methods of salesmanship and increasing the percentage of persistent business and by so doing relieve the persistent insurer of the cost of the waste resulting from our present methods. On the other hand, there are agencies of all our companies which really do business by carrying their transactions to a business conclusion by paying for the risk they place upon their companies. I see before me several men who I know for years have been large producers. They have used such latitude as their companies allowed, and have collected almost every item that fell due from year to year. With such men, not-takens are almost unknown and lapses very few. Now, the benefit of the work of these men is largely cancelled by the operations of the other class, and it is a responsibility resting on you field men to improve the general practice, and you can do much in that direction."

LEGITIMATE BUSINESS MEN ARE UNDERINSURED

But Speculators Possibly Carry Too Much Insurance —Mr. D. E. Kilgour Sounds Warning Notes.

During the past few years there have been many business distractions which have made it difficult for life insurance companies to add to their agency forces as extensively as they should have done in order to be in line with the general business prosperity and be prepared for the consequent increasing business possibilities, said Mr. D. E. Kilgour, Toronto. Notably among these distractions has been the call for real estate agents. This has been an entirely abnormal condition of affairs, but it is obvious that in future we shall not have such severe competition from this source, at least, and that we will be able to welcome into our midst not only many men who have been lured away from our field forces, but others who are now free to enter our ranks. Unlike many forms of real estate agency work, the work of a life insurance agent is productive and legitimate. The call of our country to-day is for producers, and I know of no man who in the best sense of the word and on the most rigid economic grounds has a better claim to the term producer than the life insurance field man.

Need for the Part-Time Agent.

There is a variety of opinions on the subject of the part-time agent, but for my own part I believe that we must be slow in doing away with the services of part-time agents. Our one aim should be to place the life insurance business upon as stable and truly economic a basis as possible. Localities of limited population, as you know, make it impossible for a man engaged solely in the life insurance business to earn a proper competence. In these places, as well as elsewhere, we must continue to find it profitable to employ part-time men. There will continue to be a constant and increasing demand for the entire services of life insurance underwriters who by virtue of their devotion to the business become experts and leaders in the calling. Sometimes I think that in the equation of life we introduce too often the personal factor to the neglect of other factors, all of which are interdependent and correlative. We must all remember that what is best for the life insurance business as a whole is best for us who are engaged in the work.

Some Are Overinsured.

The past few years have been marked by big advances in new business. It has occurred to me that possibly a good deal of this new business has not been entirely of a satisfactory kind. I have every reason to believe that there has been an undoubtedly large proportion of the business coming from men engaged in transitory and unstable occupations. The men engaged in legitimate business—the professional men, the artisans —are still lamentably underinsured, but the sub-dividers, the speculators, and generally speaking, men of ephemeral wealth are, I think, in many cases, insuring to a greater extent than they have a legitimate right to do. Legally speaking, every man has an unlimited insurable interest in his own life. Though this may be true, I am firmly convinced that there is a large element of moral hazard in connection with big insurances of this nature, an opinion justified by the mortality experience based on amounts-at-risk. There is, comparatively speaking, the same relation between the amount of insurance a man has a right to carry and the capitalized value of his earning power as exists between the fire insurance carried on a building and the value of the building itself. Nor should we overlook the almost inevitable tendency of this class of business to discontinue.

On the general question of selection of risks, differences frequently arise between head office and the agents. I think, however, I can speak honestly for the head office when I say that it invariably endeavors to deal with the risks justly and equitably.

Companies May Aim Too High.

In connection with life insurance investments, there has been during the past few years an undoubted tendency to place an increasing proportion of the funds in the high interest-bearing securities, notably mortgage loans. Should we not recall that at one time this form of investment proved neither too safe nor too profitable, and is it not possible that competition will carry the companies too far in the direction of high interest-earning securities? After all, trusteeship is the underlying principle of our business, and to the extent that we depart from this we are pursuing an unwise and unsafe course.

Policy loans, as might be expected, have been largely on the increase. One of the chief advantages of a life insurance policy is the fact that it is in a sense a reserve account. Banks hold gold or government bonds for reserve purposes. From a financial point of view a reserve of this kind is absolutely necessary. The Bank of England never allows its reserve of gold to fall below a certain percentage of its liabilities. Is there any better form of reserve for an individual than a life insurance policy? It affords protection to his estate; it provides an increasing and ever-available fund for himself in time of commercial need; but it is poor business policy on the part of the individual to draw too much on his reserve, and this is what is happening at the present time. Nor can we overlook the fact that a heavily indebted policy in most cases means a lost policy to the company. What suggestions have the field men for improving the business in this respect?

Some of the Delegates to the Life Underwrit

The Delegates "looking pleasant" and taking a bre

Echoes of the Life Und

There are still sheep without the association fold.

Why not fewer five-minute topics and more time to them?

Reduce the policy loan, may be the next order from head office.

An ingenious parody on a life insurance policy was handed around.

There are yet people who have religious arguments against life insurance.

The Manufacturers and Metropolitan had the largest delegations at the convention.

The Life Underwriters' Association convention will go to Halifax in 1914 and to Calgary in 1915.

Mr. J. T. Chenard, Quebec, protested against the taxes mulcted from life insurance agents in several small towns in his province.

The only thing they want to know now is what were the sweet words Tory, of Toronto, whispered on Thursday morning to Burrows, of Belleville.

The long and the short of it—Kavanagh, of the Metropolitan Life, and Wickware, of the Imperial. The thin and the not so—ditto, and Alexander, of Richmond, Que.

No official organ of the association could play a prettier tune than did Mr. Johnston, of Calgary, in his invitation to meet there in 1914, but the choir sang another tune for that year.

Everything that drank gasoline was pressed into service for the motor ride to the experimental farm—from the trim tourist to the luxurious limousine, from the trade truck to the battlefield boneshaker.

Mr. G. McCuish, Montreal, on behalf of the Dominion Life Underwriters' Association, in a pleasing address, presented retiring president Tory with a cluster of diamonds as a mark of their affection and appreciation.

Retiring President Tory stated he had followed the advice of The Monetary Times and had deleted poetry, quotations, etc., from his presidential address. The result was one of the most businesslike addresses on record.

The Calgary invitation died hard but gamely.

The Ottawa association worked hard and did well.

Which would you rather, judge the prize essays or go fishing?

The only time the fire smouldered was during the pension discussion.

Mr. Blackader, of the Dominion insurance department, was at the banquet.

As one delegate said, Mr. Campbell, official reporter of the convention, is "all write."

Mr. W. Lyle Reid said that the Ottawa mint was busy—keeping pace with tight money.

Modesty is one of the true characteristics of the life insurance man—Mr. Johnston, Calgary.

Mr. Johnston, of Calgary, achieved fame as the man "who dared to criticize Canadian Pacific Railway beefsteak."

To obtain transportation privileges home, they had to search the highways and byways and basements for delegates.

In New England there is a city named after a man who did not believe in life insurance. The name of that city is Marblehead.—Neil D. Sills.

An invitation was issued to every insurance man in Canada to attend the World's Insurance Congress at San Francisco from October 10th to 15th, 1915.

Wilson, of Winnipeg, wanted a cold bath and they sent him ice for his hot water—that is what one gets for living in a city where the cold is the kind you do not feel.

Mr. Neil D. Sills' invitation to Canadian life insurance men to the United States insurance agents' convention at Atlantic City was introduced with musical honors—the twelve o'clock gun and siren.

Mr. Fisher, superintendent of insurance for Saskatchewan, attended the convention and stated that he thought the supervision of insurance in all its branches could best be accomplished by looking after the interests of the agents in every way.

WHAT THREE GREAT CANAD

"Every man in such a civilized country as Canada, should carry a life insurance policy."
—Sir Wilfrid Laurier

"Life Insurance
the judgment of all ri

Association Convention at Ottawa last week

resh air in the grounds of the Experimental Farm, Ottawa.

ters' Association Convention

The addresses in French made good oratorical dessert.

The French-Canadians carried off many of the convention honors.

To prevent sentimental lapses, the life underwriter should stand up.

How far might a crooked man reach if he were straight. —Neil D. Sills.

The Kingston association has every life underwriter in Kingston as a member.

Mr. Johnston, of Calgary, is a silver-tongued orator and an insurance man of ability.

Ottawa and Toronto dailies reported the gathering as that of the "Fire Underwriters' Association."

A Quebec insurance agent faked a death and made a claim —which only shows what non-membership of the association will do.

"We could help the government insurance department and they could help us, if they would mix with us more."—Mr. J. A. Tory.

Mr. Mills, of Kingston, said the newspapermen would never get their proper reward in this world—another argument for life insurance.

Hon. Rodolphe Lemieux seemed very anxious for the health of the Dominion government. He should take out a policy on its life.

Poetry, quotations, dictionary definitions, Latin, Greek, and other extraneous matter was less in evidence than hitherto, much to the benefit of the convention. But there is still room for improvement.

Ex-President Taft was said by Mr. Sills always to buy two tickets for a baseball game. Some underwriters seemed to doubt whether two seats would quite accommodate Mr. Alexander, of Richmond, Que.

H. B. Andrews, Winnipeg, spoke of reading life insurance articles in financial journals written by men who knew nothing about insurance, forgetting that it is next to impossible to get the insurance men themselves to write for those journals.

The 1913 convention was the most businesslike on record.

"Chuck full of enthusiasm" was how a delegate dubbed John A. Tory.

Belleau, of Quebec—the oratorical acme of French-Canadian politeness.

There were forty-two at the meeting of the executive committee on Monday evening, the largest attendance on record.

The banquet orchestra invariably competed with instead of assisting the impromptu singing. The result was discord and defeat of the orchestra by two bars and a cheer.

◆

NEW OFFICERS OF THE LIFE UNDERWRITERS' ASSOCIATION

The following officers of the Life Underwriters' Association of Canada were nominated:—

Honorary President—J. A. Tory, Toronto.

President—J. B. Morrisette, Quebec.

Vice-Presidents—J. A. Johnston, Calgary; A. J. Meiklejohn, Ottawa, and the president of the National Association of Life Underwriters.

Executive Committee—Brantford, John Burbank; British Columbia, W. J. Twiss; Brandon, E. Daw; Brockville, H. B. White; Central Ontario, Gordon Hall; Calgary, P. A. Wintemute; Cape Breton, A. R. McIsaac; Edmonton, Dunlop; Eastern Townships, G. J. Alexander; Grey and Bruce, R. W. McGregor; Guelph, F. B. Hilliard; Hamilton, W. H. Seymour; Huron, Thos. Jolliffe; Kingston, J. B. Cooke; London, V. Reeve; Montreal, G. E. Williams, H. H. Kay; Winnipeg, J. A. Wilson, R. S. Rowland; Moose Jaw, Houston; Niagara Falls, McEvoy; Nova Scotia, S. D. Freeman; New Glasgow, P. Macfarlane; Ottawa, W. M. Stevens, W. Lyle Reid; Prince Edward Island, J. O. Hyndman; Port Arthur, E. J. Seeley; Prince Albert, T. C. Sinclair; Quebec, J. F. Belleau; Quinte, S. Burrows; Regina, J. H. H. Young; St. John, F. S. Farris; Sault Ste. Marie, R. H. Carney; Toronto, Fred Chance, W. E. Nugent; Victoria, A. B. Fraser; Windsor, A. G. Roberts; Waterloo, W. M. Lockhead.

Auditors—Geo. Jenkins and T. Johnson.

Representatives to Executive Committee, National Association Life Underwriters—Chairman of Executive Committee, ex officio, W. McBride, for one year; J. A. Tory, for three years.

S THINK OF LIFE INSURANCE

d commend itself to
hinking people."
—Premier Borden

"Among my friends now are men in whose arms I am one day to die to give some benefit to my family."—Hon. Rodolphe Lemieux, K.C.

WANTS LIFE INSURANCE AGENTS LICENSED

By the Dominion Government, Rebaters Prosecuted and Amendments to Insurance Law—Address of Mr. John A. Tory.

The licensing of all life insurance agents by the Federal Government insurance department and the need for further amendments to the Dominion Insurance Act were but two of the many important suggestions in the address of Mr. John A. Tory, retiring president of the L.U.A.C.

Dealing with legislation past and future, Mr. Tory said:—

"During the past year different associations have been called upon to take action in connection with legislation in individual provinces, and we have been able to accomplish much good, but there is a further work for us to do. The bill proposed by the Ontario Government with reference to proof of age was one that would have meant a great hardship to the field men and would no doubt have reduced very materially the amount of their production, but your executive officers, working in connection with the Life Officers' Association, were able to show so conclusively that the bill was unfair that a splendid compromise, satisfactory I think to all concerned, was secured.

Watching the Legislatures.

"It is very essential that the Legislative Committee appointed by the Executive Committee this year keep in close touch with the different Legislatures as well as with the Federal Parliament. Always be prepared for any emergency that may arise. The local associations should back the Dominion officers to the very limit. The support given the Dominion Association in the province of Ontario last winter was magnificent.

"Now, as to the future, I believe the legislative committee should seek to have enacted an amendment to the Dominion Insurance Act which would make it compulsory on the part of the insurance department to prosecute cases of rebating where the facts are submitted to them by the local association and the fines should go to the insurance department to pay for the prosecution.

"Another thing that should receive immediate attention is an amendment that will prevent the switching of business by unscrupulous agents from one company to another. Rebating is practically a thing of the past, but a worse evil in my opinion is misrepresentation and the switching of business. When you switch a policy, in nine cases out of ten, you do an injury to the assured and he suffers a financial loss.

License the Agents.

"The misrepresenting of policies should be placed in the same class, and should be prohibited. You ask me how to overcome these two evils. I think it can be done in a very simple manner, and that is, allow no man to solicit life insurance in any manner unless he has a license issued by the federal government. This license should be issued free of cost to the different companies.

"Then when any local association or a committee of the Dominion Association submit proof to the insurance department that an agent has misrepresented or switched a policy, his license should be suspended or cancelled. Put that law on the statute books of Canada and you would do away at once with switching and misrepresentation. The Union Life incident also shows the necessity of amendments to the insurance law."

Business of Life Insurance.

Discussing the business of life insurance generally, Mr. Tory said:—

"I sometimes wonder whether we are fully alive to the possibilities of our business, whether we grasp the magnitude of it. At no time in the history of the world has the value of life insurance been so clearly shown as during the year 1913. This has been a strenuous year for many a business man.

"The close of 1912 showed signs of the coming financial storm. Men who thought they were worth a lot of money found it necessary to borrow. They applied to banks and other financial institutions and were unable to do so, and the life insurance policies that they had paid premiums on for years and in some cases thought little of, proved to be the means by which they were tided over.

How It Has Grown.

"No one can calculate what life insurance has been to many a man this year. So much so that the insurance business, the insurance companies, to-day stand in a class by themselves in the eyes of the people. In Canada, in 1912, there was insurance in force of $1,089,077,232. Divide this amongst a population of, say, eight millions, and you will at once see how the Canadian people value life insurance. During the same year there was paid to policyholders in Canada nearly $23,000,000.

"In 1902, just ten years ago, the amount of insurance written in Canada was slightly over $80,000,000. Ten years later, in 1912, we wrote $243,000,000 of insurance. In 1902 we had about $509,000,232 of insurance in force in Canada; in 1912, $1,089,077,232.

"The Canadian people appreciate as no other people the value of life insurance, but, gentlemen, if the Canadian people have shown such faith in our business as to place us in a class by ourselves, is it not true that a greater responsibility rests upon us as field men than rests upon any other class of people. Let us demonstrate to the insurance companies, to the people, that we realize our responsibilities, that our aim and object is to place our business on a higher plane than ever before, and, at the same time, to protect the public and their savings.

"Let us endeavor to convince the underwriters remaining outside of our association that we need them, that they can be of service to us, and that we can be of service to them. We have had to feel our way, in the past, as it were, but now we have reached full manhood let us become a more aggressive organization for the good of all mankind."

Mr. Tory also dealt at length with many routine and other matters. He suggested another year's trial to the plan of district vice-presidents of the Association, the appointment of a permanent paid secretary, great care in the selection of executive committee members, and the establishment of an official organ of the Association.

As to Educational Features.

"During the past year," said Mr. Tory, "steps have been taken to have insurance taught in several of the commercial high schools and we believe it is possible for a series of lectures to be given the coming winter in every commercial high school in the large cities of Canada. The superintendent of schools in one of the cities of the Dominion is thoroughly in favor of the plan and thinks that each province should have a series of lectures on life insurance given to all commercial scholars. If we had a permanent secretary this would be part of his work, the arranging of lectures in different provinces and the securing of members from the Life Officers' Association, the Insurance Institute, and also from our own Association as speakers."

Mr. Tory urged that every life insurance agent should become a member of the Association.

"If the executive officers of every life insurance company doing business in Canada," he said, "would make it compulsory for every field man in their employ to become a member of the Association, you would at once see an improvement in the general class of business, less lapses, better selection of risk, and a higher type of field man, and I believe the time is not far distant when every contract shall have a clause in it that the representative must become a member of some association. The closer and more friendly the relationship the better for the business."

Question of Taxation.

The question of taxation is becoming more acute every year, said the president. "We believe," he continued, "that every agency manager and his corps of agents should seriously consider if it should not be part of their canvass when discussing life insurance with their clients, not so much perhaps to reduce the present taxation, although we are absolutely convinced that the taxing of life insurance premiums is all wrong, but to prevent increases. We therefore recommend that we place ourselves on record as being opposed to the taxation of insurance premiums, and pledge our support to the Life Officers' Association in any campaign that they may undertake against taxation."

AWARDS OF CUPS AND PURSES

Mr. C. H. Armstrong, of the Imperial Life Assurance Company, Toronto, was the winner of the essay competition, "Life Insurance as a Factor in Social Economics." This was received by Mr. G. W. Hunt on behalf of Mr. Armstrong. Mr. A. N. Mitchell, in presenting the cup, stated there were not two parts in life insurance; there was no fence between the head office and the field force. When the field force did right, it benefited the head office. If the head office made a mistake, the field force felt it. Mr. Mitchell protested against government taxation in the insurance business, and thought the policyholders should be posted on the matter. They could stop this innovation with their votes.

The Winnipeg, Quebec, Peterborough and Kingston associations were presented with purses of gold in the membership competition.

The prize to the local association showing the largest percentage of increase in membership, presented by Mr. John R. Reid, was awarded to Winnipeg.

Mr. W. B. Campbell was given a cup as a mark of appreciation of his good work in connection with the meetings of the Toronto association.

The Quebec association won the cup presented to the association which held the six best meetings during the year, presented by Mr. A. H. Vipond.

The prize of fifty dollars in gold, presented by Mr. George H. Allen, general manager, Travellers' Life Insurance Company of Canada, for the best essay on how to close a risk, was awarded to Mr. Cushing, of the Sun Life Assurance Company. The winner has had four years' experience in actuarial spheres and two years in the field, he preferring the field work. Mr. Allen made a pleasing speech in presenting the prize, speaking of the good work of the association movement and the raising of the standard of the life insurance business.

GOOD LIFE INSURANCE BUSINESS STAYS

Problem of Lapses Largely Solved by Careful Selection —Agents Should Never "Press" a Prospect.

Punctuated with anecdotes, quotations and Macbridisms, a dissertation on how far a man should be pressed by the life insurance agent in canvassing was given to the Ottawa convention by Mr. William McBride, of Winnipeg. Introducing his subject with some good insurance vaudeville, Mr. McBride claimed an agent was not justified under any circumstances in coercing a prospect into closing a contract. The speaker got his experience in pressing men into insurance twenty-four years ago, just after he launched into the business. "In Kenora, Ontario," said Mr. McBride, "I pressed a man into applying for a policy and squeezed out of him the premium $34.50 just after he was examined. A few days after he accused me of hypnotizing him and cheating him of $34.50, said he would never pay another premium, and that he would do all in his power to damn my business in Kenora. I handed him his $34.50 and expressed my regret at having convinced him against his will.

"A few days later I had a similar experience in Keewatin, three miles from there. I settled the matter in the same way. I then firmly resolved that I would never in any way press any man into closing an insurance deal. Ever since I have scrupulously observed that resolution.

Line of Least Resistance.

"In canvassing for insurance, we must follow the line of least resistance. Experience should teach us that the moment we begin to press a man we arouse his hostility and awaken his combativeness. To produce results we must approach a man in a calm, composed, dignified manner, and thus command his attention and win his respect. If we are not willing to wait patiently till his ideas are matured and the psychological moment is on, but begin pressing him to a conclusion, he will at once detect our overanxiety, and the vacant spaces in his cranium will soon be filled with the justifiable and firm conviction that his interests are only secondary in our minds, and that the raison de'etre of our persistence is self-aggrandizement, and he is very likely to look upon us as men possessed of unlimited impertinence. Ever keep in mind that persuasion is produced by arguments addressed to a man's nobler feelings, and that conviction is produced by arguments addressed to a man's understanding.

"The main redeeming feature in the Armstrong Insurance Bill was the one that put an end to too much high pressure business obtained south of the line, and limited the amount of new business written by any one company in one year. As a result, a more abiding kind of business was put on the books, more attention given to conserving the business in force and reinstating lapsed policies.

Effects of High Pressure.

"The effects of high pressure methods are just as conspicuous on our side of the line. A few days ago I read an article in which it was stated that in Canada alone over $500,000,000 lapsed or non-placed policies had been written off the books within the last decade. What is the principal cause of this appalling, expensive and wanton waste of insurance funds? Simply the fact that unhealthy rivalry and the high pressure systems in vogue have incited agents to press men into taking insurance before they have been sufficiently educated to see the importance of it, or before they have thoroughly understood the misfit plans sold them by agents who have thought more of their commissions than of selling a policy exactly adapted to the means, the age, the family conditions or business needs of the applicant.

"In insurance we have had too much which is the natural sequence when applicants have not been given time to read, mark, learn and inwardly digest, but have been crowded into insurance hot-houses and prematurely ripened by overanxious agents. Such a high pressure process does not produce consistent and persistent policyholders. Let the agents learn that the business that stays is the business that pays, and that the prevention of lapses is infinitely better than the restoration of them. Abandon all undue pressure of prospects, and imbue your mind with the fact that properly managed companies judge of an agent's ability not by the volume of his business, but by the stability of it.

"In earlier days, when agents had more destructive than constructive tendencies, a large percentage of lapses was caused by unscrupulous transplanting processes. Thanks to our fraternal association movement, and our developing human tendencies to co-operate for mutual protection, that is now reduced to a minimum, but still the percentage of lapses pursues from year to year the almost even tenor of its course, and with very little diminution.

Stability of Business.

"The greater the pressure brought to bear upon men, the less the stability of our business. Before being fully persuaded in their own minds, men have too often been either wheedled or pressed into taking insurance by the temptation of quarterly or half-yearly premiums being presented. Every time you write a quarterly premium you multiply by four the annual chances of a lapse. In the last four years I have not had a single non-placed policy written by myself, and in the last twenty years my own non-placed policies have not, I think, averaged over one a year. I do not say this for self-commendation, but to prove to you that my theory of never pressing a man enhances the stability of the business.

"When prospects know that a certain agent never presses, he can always get a hearing and a welcome that would not be accorded an agent who is known as a most persistent presser for new business. I have proved this theory to my own satisfaction in my own quiet way during many by-gone years when I have been in several competitions for volume of new paid business, and my colleagues in the same company know that I was never beaten except once, when I took second place. I wrote during the twelve months ended last July 1st more paid-for applications than any other agent in our company's employ. I know my own limitations and that my ability is mediocre, hence I attribute any little success I have had to my adopting a plan of never under any circumstances pressing anyone, and never being in unseemly haste to whip out an application or rush a man off to the doctor the very moment he has given an answer in the affirmative."

◆

GREAT WORK OF LIFE INSURANCE

It Has Become One of the Greatest Financial Institutions in Canada—Address of Mr. T. B. Macaulay.

Mr. T. B. Macaulay, managing director of the Sun Life Assurance Company, delivered a striking address on the business of life insurance at the Ottawa banquet. Introduced as the friend of every man who carried the rate book, he first spoke of the great work done by the Association movement. It had lifted the profession, ennobled and cleansed it.

The first insurance company was founded in Egypt when Pharaoh took the surplus of the seven years of plenty and saved them against the seven years of famine. Insurance policies dated back to the time of Babylon.

The first permanent insurance company of the modern type was the old Amicable, founded over one hundred years ago. It passed out of existence so that it could be remodelled to suit modern conditions. Some of the difficulties experienced by that old company continued down to the present time. To-day the companies were still trying to solve the problems. Life insurance differed radically from fire and marine insurance on several points. The chance of death to life increases year by year. The fire hazard remained about the same. A fire policy could be cancelled without hardship to the holder, not so in the case of a life policy.

How to Base Premiums.

The question of premiums had been a difficult one. It was originally thought that the annual premium should increase with the age of the insured. This had been tried by the assessment and other societies but had failed badly. A man could not afford to pay say six dollars per thousand dollars of insurance the first year, increasing to eight, ten, thirty, fifty, a hundred and so on. If, then, life insurance could not be successfully given on the plan of steadily increasing premium, how could it be given? On the old line life insurance plan, was the answer. Instead of paying the increasing premium, every person paid a premium, which consisted of two parts—first, for the risk of death at the age of insurance, and second, to make up for later deficiencies in the premiums of later years.

This meant that life insurance companies had become great accumulators of funds. That was why those companies were among the greatest financial institutions of the world. Those doing business in Canada had already accumulated over $300,000,000. Unlike bank deposits, that amount could not be withdrawn. It had been invested by the companies, profitably and in a far better way than the average small policyholder could invest.

Greatest Financial Business.

Life Insurance must always be one of the foremost financial businesses. While the banks, in times of financial stringency, were putting on the brakes, the life companies were one of the most important factors in relieving the stringency by loaning money right and left. While the population of Canada had increased about twenty per cent. in the past fifteen years, the gain in insurance funds had been fifty per cent. But life insurance companies did not exist only to accumulate funds, although that was one of the necessities. They existed primarily to pay out money to widows and orphans.

Life Insurance in Force.

The life insurance in force in Canada to-day was over $1,100,000,000. That meant the companies were under obligation to pay that amount during the next generation. How many homes would that hold together? How many children would that enable to get an education who would otherwise not get it?

Mr. Macaulay's definition of life insurance was organized philanthropy, or philanthropy reduced to a business basis.

If, concluded Mr. Macaulay, a wealthy man chanced to die in a time of financial stringency, $100,000 of life insurance might save $1,000,000 of securities. It would prevent the bank pressing the estate for settlement by a sacrifice sale. Life insurance was for poor and rich alike.

PART-TIME LIFE INSURANCE AGENTS

Pros and Cons of Employing Them—Advantageous in Rural Communities.

What is the place in the economy of an agency and the legitimate purpose which the employment of a part-time man may serve? was the question of Mr. A. J. Meiklejohn, district manager of the Confederation Life Association's Eastern Ontario branch. One of the most important purposes is the education and development of a promising apprentice to the end that he may permanently give all his time to the business. Those who are entrusted with the management of agencies and the building up of a staff are quite aware of the fact that with rare exception men do not succeed in this business until they are at least twenty-five or thirty years of age; by that time the capable ones, which are the only ones we want, have become established in some other line of business or professional life. It follows that until insurance schools are established for the education and preparation for this profession, as well as others, that we must draw our recruits from men who are already entered successfully in some other occupation. It would scarcely be fair in any case to induce a man to give up a satisfactory position to undertake insurance writing, and we find it necessary frequently to give such men part-time contracts in order that they may try themselves out—for no one knows whether he will prove a success until he has been given a fair trial. I do not believe in the employment of part-time men in cities and towns that are large enough to satisfactorily justify the placing of full-time men, but in small places and rural districts the part-time local agent may serve a good purpose. It is important, however, that he should be a man of excellent standing in the community, thoroughly reliable, and carry sufficient weight that an introduction by him of his client to the general agent will give a respectful hearing, and in this way a great deal of time may be saved, as the local agent merely serves the purpose of getting in touch with business and interesting his prospect in a proposition and then introducing an experienced salesman to his client. In rural districts especially the public look upon anyone who has anything to sell with more or less suspicion, and a proper introduction by the right local agent, a man who has the confidence of the public, will disarm the client of his suspicion.

Help at the Start

I have found it more advisable, especially in placing new men on my agency list as part-time men, to give them commission contracts which call for the same commission with or without help from the general agent. Although this does not work out to success with a lazy agent who wants you to do all the work and give him the commission, I think it well to let him understand from the beginning that he must have some preparation with his client before accepting an introduction from him with a view to closing the business. On the other hand, with an agreement of this kind, a new agent will not hesitate to ask you to come in and help him at any moment he feels that there is a chance of closing up some of his business. As soon as the agent has become sufficiently competent to do business by himself, it is well to increase his commission on business done alone and in accordance with his ability, even though he may not ask for this increase. I find it is a good plan to offer some type of bonus for a minimum production as a stimulation to keep up his interest and give a steady production. Sometimes a very little suggestion, as, for instance, putting it up to the agent to average a $1,000 per week, will serve an excellent purpose. During the early months of a part-time man's contract it is very important to keep a constant supervision of his work and do everything possible to encourage him. A good start is an excellent incentive for future success. It is stimulating to him to have the district manager point out at the end of six months that he has given satisfaction and that the manager is expecting him to equal, if not better, his first six months' production. The district manager or general agent who has a wide field and a large staff will frequently find it impossible to visit every member of his staff as often as he would like. I have found that a short, bright letter with a word of encouragement or timely suggestion is sometimes quite as good as a personal visit.

May Finally Adopt Underwriting Profession.

One of the first things I do when I get a new idea or suggestion is to try it out myself and then hand it on by letter to the members of the staff. A part-time man thus feels he is part of the machinery of the institution he represents and is led to take some pride in his company. I have noticed in localities where a successful part-time man who has developed a certain amount of pride in his company is at work, that letters from policyholders speaking well of the company come in quite frequently to the branch offices. This, of course, is one of the most encouraging signs, as the better a company is known and the more satisfied its policyholders are the easier it is to write business. This confidence which the local agent has in his company speedily diffuses itself throughout the whole community, if he is the right kind of man.

Having developed a bright part-time man who is perhaps engaged as clerk in a country store, or machinery agent, or bank clerk, into a state of some efficiency, one can only wait until the institution to which he belongs treats him in a manner which he disapproves when the company will be able to adopt life insurance. I have had some success with insurance brokers in small places who write fire, life and accident. As soon as it is possible to give him a renewal contract, I take an interest in keeping up his production, and I have found as a rule he writes a comparatively steady business of a good kind. The city insurance broker I have nothing to do with. The chief difficulties in the way of successfully handling part-time men are the danger of them dying out—they will write a few of their friends, and unless carefully watched may stop there. When their productiveness has ceased I find it wise to call in their rate books and cut them off the list. There is a psychological moment in the agent's success, when they have to be watched very carefully and encouraged and helped to tide them over this period of loss of interest.

Relations Between Client and Agent.

Another difficulty frequently presents itself, arising from the fact that as soon as you get a man into a position to do business he is sure to receive flattering offers from other companies, which in the majority of cases he finds when it comes to finally signing up an agreement are really no better or as good as the contract he has. It has the effect to upset him and to lead him to be on the lookout for the last cent possible to get out of the business. Then again, the badly-informed and untrained part-time man is liable to be guilty of misrepresentation, due generally to ignorance, which is found to cause trouble to the company. It is better to carefully point out to him from the beginning the absolute necessity of familiarizing himself with the contract which he sells and getting some general knowledge of the company he represents. I insist on having the part-time man take considerable trouble in placing policies with the client; to go over the contract and explain it fully to his client. This not only satisfies the policyholder, but serves as an education to the local agent.

Mr. Burrows, Belleville, was entirely opposed to the part-time man. He usually did little business, but claimed the commissions.

WHAT LIFE INSURANCE CAN DO

Prominent Men Speak of the Benefits of a Policy to Rich and Poor Alike.

There was no doubting the enthusiasm of the men and the magnitude and future prospects of the business at the annual banquet of the life underwriters of Canada at Ottawa last week. Faith in the work and in the future was the predominant note of the excellent speeches. Controller Parent, in English and French, welcomed the delegates to Ottawa. Mr. W. Lyle Reid, president of the Ottawa Life Underwriters' Association, proposed the toast of the ladies in a happy little speech, stating in passing that the chief talking point in selling life insurance was woman.

Mr. J. E. Kavanagh, superintendent of agencies in Canada of the Metropolitan Life, in toasting "Life Insurance," said it could be defined from many standpoints, that of the insurer, the insurance agent, the beneficiary, the public in general, government supervision. From the public standpoint, it might be described, he continued, ironically, as a clever scheme on the part of many healthy people of the country, which employed a number of agents throughout the land with instructions to call on the other people of the country, get them to sign an application, to visit the doctor, satisfy him, and then for the next twenty or fifty years to remind them that they had wives and children and mothers and that they might die one day!

How Life Insurance Helps.

There were other definitions. Life insurance was a business that enabled sweethearts to get married before they had saved a great deal of money. It enabled the young man to go into business similarly, because of the insurance on his life. It enabled men to build houses, buy homes, get mortgages, for men to enlarge business.

The life insurance business was just beginning to see its growth. Some thought that the business was overdone. He thought it was but in its infancy. People were just beginning to realize its great possibilities, not only as protection against death, but also against trouble in business, against sickness. Serious efforts were being made by the companies to prolong life by mitigating social evils and the ravages of tuberculosis. The business was tending to make the country in which we live a better one.

Most Talkative Business.

In an eloquent address of some length, Hon. Rodolphe Lemieux, K.C., spoke to the toast of "Canada," tracing the heroism and hardships of the early French settlers in Canada and the constitutional changes in the country's history. "You rightly think that Shaughnessy, Mackenzie, Van Horne, and Mann are great railroad pioneers, but what could they have done without the men who first blazed the trail—La Salle, Jolliette, Champlain?" Describing the growth and resources of the country, no one knew, he said, better than the insurance man the significance of the constant volume of immigration.

Mr. Lemieux had had his strong prejudices against the insurance agent, but among his friends now were men in whose arms he was one day to die to give some benefit to his family. It was always difficult for even a lawyer to speak after an insurance man. When he studied for the bar, he was told a lawyer should be the best speaker in the country, bar the insurance agent. Life insurance was the most talkative business in the world. Of all institutions in Canada, insurance was the best—after politics and the bar.

HOW TO PREVENT POLICY LAPSES

Companies Must Keep in Contact with Holders, and Agents Should Explain Contracts Purchased.

The lapse question has always been a problem in life insurance, and the convention indulged in a brisk discussion on the matter. How to prevent lapses? That was the question for answer. Mr. E. R. Machum, St. John, said the best way to do that was to sell life insurance to the right kind of people, while Mr. McConkey, Toronto, thought the best way was to keep in touch with the policyholders and to post them regularly regarding conditions of the company.

Mr. Stevens, Ottawa, agreed that contact with policyholders was a good thing. They should be written to and visited as often as possible. This helped not only to get new business, but also to prevent lapses.

Mr. A. H. Vipond, Montreal, was of the same opinion, and also advocated the sending of a special letter to those who looked like lapsing.

Mr. White thought that a thoroughly well understood contract was one way to prevent lapses. When a policy was placed the agent should read it over to the man, point by point, so that he would know exactly what he had got.

Something Wrong with Salesmanship.

Mr. Ruby, secretary of the Mutual Life of Canada, considered that over-persuasion by the agent was one of the chief causes of lapses. Another was that the policyholder did not always understand his contract. Confusion of plans on the part of the policyholder was more often responsible for lapses, rather than that the policy had been misrepresented by the agent. This was a great tribute to the agent.

Mr. J. F. Weston, in his address, also dealt with the question of lapses. "We all recognize," he said, "the waste resulting from not-taken policies and lapses. They are both altogether too heavy in all our companies. How are we going to lessen them? If the rules of head offices were at fault, then somewhere near the same results would occur in all agencies, but this is not the case. Here and there a large agency will year in and year out have few, if any, not-takens and very few lapses, while other agencies with similar conditions show abnormally high in both. There is clearly something wrong with the salesmanship and it is up to you to find out and correct this fault. It may be urged that head offices press for too much new business; that is no answer, for the mere sending in of applications of men not inclined or not able to pay is not business at all, and the sooner we awake to this fact, the better it will be for all concerned. There is no question in my mind that the privilege of giving long terms for the settlement of premiums has been abused to the point where the question of payment has been kept as far from the applicant's mind as possible during the canvass and treated in such a manner that it has created the impression that a note given in settlement of an insurance premium is not an obligation to the extent that it is where given in settlement of any other account. I know that this view prevails to a surprisingly large extent and the percentage of these notes which are not paid is evidence that we hold the same view. Either that, or we are forced to the humiliating conclusion that we do not possess business ability in the same degree as men engaged in other work."

Sell Suitable Contracts to Clients.

Mr. Monaghan, of Quebec, stated that he had always acted on the principle that it paid the agent and the company best to reject any person or applicant of whom he had serious doubts regarding physical or financial standing. "Eliminate these and seek at every time in your canvassing the healthy, the sober, the thrifty, and you will build up an agency where lapsing will be at a minimum, and where the business will pay agent and company in the long run.

"The business on which the second year's premium has been paid is a pretty fair criterion of non-lapsing business. I believe and I can certify that on the average my lapse is three per cent.; the average lapse on all the companies doing business in Canada averages over twelve per cent. when the second premium should be paid.

"The French people, who compose seven-eighths of my clients in Quebec, if not as quick to decide on taking out a risk as other races, are certainly more tenacious in holding on to their insurance once it is taken out.

Lapses in the West

"Out in the West the lapse is necessarily higher owing to the restless and unsettled character of many of its people. They are new settlers and not educated as eastern people on the permanent benefits of life insurance. The opportunities they have for investing their money, as well as the large alluring profits they can realize on real estate and other ventures, are not calculated to encourage the slow life-long thrift which is a necessary condition in lapse exemption.

"The best method then to prevent lapsing is in careful selection, honest dealing on behalf of the agent towards his clients, the judicious placing of the amount the insured is able to carry, or, in other words, the absence of overloading; these conditions being granted, the insured, besides, should from time to time receive suitable literature from the company in which he is insured. He has a right to be informed yearly on its financial standing, its progress and its general welfare. Finally, the company must meet the policyholders' wishes in issuing a policy and insurance literature in the language familiar to the insured. An English-speaking policyholder will not thank you if you send him a French policy and French literature; nor will a French policyholder bless you if you present him with an English policy or English literature."

◆

DOCTORS, ETHICS AND LIFE INSURANCE

Relation of Medical Profession Should Be Strictly Professional—Candidate for Insurance Might Seek Advice from Examiner.

It seems that this is a subject which every well-informed underwriter has settled views upon, for it is only within the past year that this or a similar subject has been disposed of by the executive of our association in the negative, suggested Mr. G. J. Alexander, district manager at Richmond, Que., of the Manufacturers Life Company, in reply to the query, Should doctors assist agents in closing business? The case I refer to is one in which a Canadian life insurance company made special offers or terms to their medical examiners for assistance in closing business—i.e., they were to receive for their assistance remuneration in excess of the medical fee (and I don't think it is necessary for me to explain what would happen to the other agents who happened to have this doctor examiner for his company).

This was considered by the executive of the association as malpractice which should be eliminated from the business. The matter was taken up with the Life Officers' Association in such a manner that I understand practically all the old line companies wrote their examiners a letter to the effect that if they were examining for the company just referred to, that they could consider their appointment as examiner for them cancelled.

What better proof do we require than the record of this case in which the Canadian life insurance companies, the Life Officers' Association and the Life Underwriters' Association of Canada appear to me to say nay in no uncertain sound?

But perhaps you will say I have taken the wrong view of the question—is there not some way we could use them? From whatever angle you view the question the practice of it opens up a broad way of temptation, which will result in malpractice in the business.

Only Answer a Negative One.

The medical examiner should be an unbiased employee of the company, don't tempt him.

I know from conversation with leaders of the medical profession that they consider it derogatory to its higher aims, and to the strictly professional relationship the physician should bear towards both the candidate for insurance and the insuring company to have the examiner viewed as being pecuniarily interested in other than a strictly professional way.

A few years ago a striking example of this very subject came under notice; it was a case where a special agent of a company, and without his company's knowledge, made an arrangement with some doctors whereby they were to receive in addition to their medical fee a local agent's commission on all business secured, and I assure you the tactics employed by this combination in securing business were the worst I ever knew. I am sure no insurance company's interests could be safeguarded, nor be of first importance, under a combination such as I have just referred to.

Let the doctor then remain in his unbiased dignity. Let us as solicitors get out and hustle and secure our business by fair, square salesmanship, and then answer this question in the negative.

Personal Opinions and Experiences.

Mr. W. McBride, Winnipeg, disagreed with the previous speaker. He once wrote a man for $2,000. The medical examiner was also the family physician and he was asked to get the prospect to increase the amount to $5,000. The doctor did so, but he did not ask for commission and would not have got it if he had done so.

Mr. Lewis, superintendent of agencies, Continental Life Insurance Company, thought that one could not prevent the candidate asking the doctor's advice. Neither could one prevent the doctor assisting the company, in many cases.

Mr. A. H. Vipond, Montreal, disagreed. The doctor should not assist agents in closing business.

Mr. J. R. Reid, Ottawa, was of the same opinion.

Mr. G. Williams referred to the wholesale employment of doctors by a certain life insurance company in Quebec province. This company had over three hundred doctors as shareholders. This Mr. Williams described as a mischievous mixture.

Mr. Gaydon, Montreal, thought there was no doubt whatever that the assistance of doctors to close business was not a proper practice.

SUB-STANDARD RISKS

It Should Not Be Difficult to Arrive at Safe and Uniform Standard to Deal With Them, Says Actuary.

The actuaries of Canada and the United States are, for the most part, members of three leading actuarial bodies—the Actuarial Societies of America, the British Institute of Actuaries and the Faculty of Actuaries of Scotland, said Mr. D. E. Kilgour, actuary of the North American Life Insurance Company. The British Institute of Actuaries, as you know, is the parent actuarial body and embraces in its membership, perhaps, the most distinguished and able actuaries of the present day. The contributions to the Journal of the Institute of Actuaries form an encyclopaedia on life insurance. The papers that are presented to the journal show every evidence of painstaking preparation. There are those people who claim that the Institute of Actuaries lays too great stress on the theoretical aspect of actuarial work; that, after all, our business is chiefly concerned with what occurs in the ordinary course of practice, and further, that we should aim at practical rather than theoretical attainments. In making this observation we should not overlook the fact that correct practice must invariably follow correct theory, and that the theorist is not infrequently the forerunner in human progress. The life insurance interests owe a debt of gratitude to the work performed by the Institute of Actuaries. Every man, whether engaged as an actuary or as a field man, may well keep for himself the motto of the Institute of Actuaries:—

> ''I hold every man a debtor to his profession, from the which as men of course do seek to receive countenance and profit so ought they of duty to endeavor themselves by way of amends to be a help and ornament thereunto.''

The Actuarial Society of America, though of comparatively recent origin, has done and is doing splendid work for life insurance. As a student preparing for the examinations of the society as well as a past examiner for the fellowship degree, I can assure you that the work involved in preparing for the actuarial examinations is no sinecure. The subjects prescribed are many and broad. A man must not only be well versed in the intricacies of actuarial science, but he must also be a common-sense practical man before he can receive his fellowship degree. I have sometimes thought that it might be a good thing if we could add to the curriculum of the actuarial student a term or two of active agency work. My own slight experience along these lines has shown that field work increases a man's efficiency, broadens his outlook and enlarges his sympathies.

Specialized Mortality Investigation.

Notably among the important things done by the Actuarial Society of America have been what is known as specialized mortality investigation of some ten years ago, and the work now being done in connection, medico-actuarial investigation. In this investigation the leading companies of the United States and Canada have contributed their experiences in an attempt to ascertain the deviation from the average mortality rate, of the actual mortality experienced, in a great number of special classes. These classes not only include the insured following certain special occupations, but those subject to certain medical impairments as well as those having special family history. The experience of the companies was also contributed in order to determine a standard table of height and weight and to ascertain the effect of build on longevity. So far two volumes giving the results have been published. The first volume dealt with (1) Standard Table of Height and Weight; (2) Standard Mortality Rates to be used for obtaining the expected deaths from the various classes studied. The second volume deals with (1) Influence of Build on Mortality among Men; (2) Mortality among Women; (3) Causes of death among men and among women. The results of by far the most important parts of the investigation are still to be published. The new standard tables of height and weight are remarkably similar to those previously used by the companies.

The general result of the investigation into the influence of build on mortality among men discloses the fact that under forty years of age an over-weight is a better risk than an average-weight, and that over forty years of age the underweight is a better risk than an average-weight. One might conclude from this that there is a certain incidence in the relation of height and weight at which the mortality may be expected to be most favorable. I think, possibly, however, we will continue desiring, as in the past, a minimum departure from the average. The lesson to be drawn from this experience is that a marked deviation in any direction is decidedly undesirable. Over-weights, especially among the older risks, have proved to be, as was expected to be the case, unfavorable risks, and the man who ''laughs and grows fat'' must continue to pay the penalty for his hilarity.

The insured women were divided into four classes, spinsters, married women—beneficiary, husband,—widowed and divorced. The mortality among the women was found to be higher than among men at the younger ages at entry, and lower at ages at entry sixty and above. An adverse selection was found in the earlier policy years. In the four classes the ratios of the actual to the expected deaths were 81 per cent., 126 per cent., 114 per cent. and 105 per cent. The committee stated that it did not follow from the high mortality among married women that the companies should not insure them, or that it was impossible to select married women so as to obtain as favorable an experience as among men. Reference was made to one company which had a favorable mortality in a group of married women who had paid the premiums out of their own incomes and whose children were the beneficiaries.

The question of moral hazard enters so largely into the insurability of women that it must not be inferred that one class comprises necessarily better lives than the others. We can only conclude that there is a relatively larger proportion of the superior lives likely to insure in the one class than in the other.

Mortality Among Negroes.

The mortality among negroes and North American Indians was found to be very unfavorable, and this, in spite of the fact that there was, no doubt, a much more rigid selection in their cases. The higher mortality is therefore, in all probability, due to racial distinctions.

One can hardly foretell at this juncture just what effect the finding of this investigation will have on life insurance underwriting. It may lead to greater differentiation in the classification of risks: it presumably will tend to broaden our now fairly extended class of sub-standard or under-average lives. I hope for the sake of our agency forces that our companies will be able to come to some common understanding as to the best practical method of treating with the classes studied. At present, there is considerable dissatisfaction caused by the great variety of methods employed by the different companies, and it should not be impossible or impracticable for us to arrive at a safe, scientific and reasonably uniform standard for dealing with risks not accepted as standard. To the extent to which our increased knowledge will enable us to grant the boon of life insurance to more people, the work of this investigation will be a blessing.

EVERY MAN IN CANADA SHOULD CARRY A LIFE INSURANCE POLICY

This Was the Advice of Sir Wilfrid Laurier at the Ottawa Convention Last Week—He Was ''Rejected'' for Many Years.

In a pleasing and witty speech to the Underwriters on Tuesday afternoon, Sir Wilfrid Laurier advocated the benefits of life insurance. This he did by telling personal anecdotes and experiences, and left his hearers with the impression that one of Canada's most prominent citizens is a great believer in the necessity and benefits of life insurance.

Sir Wilfrid spoke ''as a little bit of an insurance man,'' as for some years he had been a director of a Canadian life insurance company. He had studied for some time the development made by the life insurance business in Canada. While it had been satisfactory it had not been sufficiently so. There was an increase in the business every year, but not as large as it should be. Every man in a civilized country, such as Canada, should carry a life insurance policy.

Sir Wilfrid told of a friend of his, a lawyer, who consistently refused to carry a policy on his life. He said he did not need an insurance company, he could invest his own money as well as the company. Sir Wilfrid told his friend that the insurance company's business was to invest money in certain ways, while his business was law. The friend, as were all men, was living under the shadow of death. He was married and had a family. Death had spared him, but when it did come his family would be left unprovided for by life insurance.

Sir Wilfrid Was Rejected.

Sir Wilfrid told the convention that he was thirty years of age before he could get insurance on his life. He made application to many offices, but they would not take him. When he was thirty-six the Sun Life took him. They gave him a policy on the medical certificate of Mr., now Sir James Grant, who said that Sir Wilfrid was good for probably ten years! ''I have only to die to get my money,'' said the ex-premier, amid laughter, ''but as I do not care greatly for the money, I will leave it where it is for the present!''

Any young man, wealthy or otherwise, with a wife or family should take out an insurance policy, said Sir Wilfrid, so that the family should not be left destitute or unprovided for by life insurance.

Every Citizen Should Carry a Policy.

The leader of the opposition recalled the introduction of compulsory insurance in Germany and England. This was not necessary in Canada at present, but a policy should, all the same, be held by every citizen of the Dominion.

Concluding, Sir Wilfrid said that whatever differences of opinion were held by those who lived in the Dominion, they all had the same motive at heart, the welfare of our country, Canada.

A supply of the above article, in circular form, will be sent gratis to life insurance agents in Canada making application to ''The Monetary Times,'' 62 Church Street, Toronto. Please state how many copies are required.

LIFE INSURANCE LEGISLATION

Résumé of Recent Enactments—Unfairness of Taxation.

Life insurance companies of Canada have had an extended period of comparative calm since the troublous days of investigations and legislative proposals and enactments. It has been frequently remarked that few, if any, other commercial or financial interests could have withstood the assault so well, had they been stacked with the same energy and virulence as has been experienced by the life companies. Mr. D. E. Kilgour, the well-known Toronto actuary, thought that this showed that above the men and the management is the institution of life insurance itself, which, in the absence of fraud and treachery, is unassailable and invulnerable.

The Dominion Insurance Act, he continued, while safeguarding the business to the extent of requiring publicity and providing for a proper audit and valuation, has left the management comparatively unrestricted. The moot question of the value of government inspection has been brought to a head by recent events in Canadian life insurance, but whatever our opinion may be, I think we must conclude that inasmuch as good faith and common honesty are prerequisite in any business, we cannot hope that by using the most rigid system of inspection we may protect the public against every form of delinquency.

In Canada and in England we have not yet accepted socialistic standards of legislation. and we are for some time to come largely committed to an individualistic form of government. Whether or not some of the vexing problems which have concerned our management would have been partly solved by certain legislative restrictions, I hold that it is in the interests of the business and the public that we should continue to base our legislation on comparative freedom of action, personal managerial responsibility and true publicity with proper means to ensure the same.

While there have been no radically important changes in our insurance legislation, there have been a number of minor bills presented in the last few years affecting the business.

Bill Met With Defeat.

In February, 1911, a bill entitled "An Act to Amend the Insurance Act" was introduced before the Senate of Canada. The object of the bill appeared to favor the borrower by providing that if a mortgage was due it might be paid at any time to suit his convenience by giving one month's notice and paying a bonus of one month's interest. As matters stood the borrower had the privilege of paying off his mortgage at any time before maturity by paying a bonus of six months' interest. This bill met with defeat.

In March, 1911, a bill entitled "An Act to Amend the Corporation Taxation Act" was introduced into the legislature of the province of Manitoba by the provincial secretary. By it it was proposed to impose a tax of three-quarters of one per cent. on investments in the province in addition to the one per cent. tax on gross premiums. This bill was strenuously opposed by the life insurance interests, and while it was not withdrawn entirely, the tax was reduced to one-quarter of one per cent. on the gross income investments of all kinds in Manitoba.

In March, 1911, a bill was introduced in the province of Nova Scotia entitled "To Supplement the Revenues of the Crown." The new bill provided that every insurance company transacting business in the province should pay a tax of one per cent. calculated on the gross premiums received in the province. A strong effort was made to have the tax reduced to one-quarter of one per cent. and for the inclusion in the act of a provision giving the companies relief from municipal and local taxation. The original tax was. however, allowed to remain, the government agreeing to amend the municipal act so that no further tax would be imposed upon the companies, though leaving still in existence the tax imposed in the cities of Halifax and Sydney.

Foreign Companies in Alberta.

In the early part of 1911, information was received to the effect that foreign companies had been soliciting business in the province of Alberta without the necessary license authorizing them to do so. Steps were taken and legislation procured to prevent this form of poaching, and it was enacted that after the first of January, 1913, no foreign company would be allowed to carry on business in that province until such company furnished the provincial secretary with evidence that it was conducting its business satisfactory to the Dominion Government.

In the same year, legislation was also enacted by the Ontario Government in the form of a revision to the insurance act. This was introduced as a part of the recommendations of the special judicial committee appointed to revise the statutes of Ontario. While the alterations suggested were, for the most part, of minor significance, there were one or two sections involving principles which it was thought proper to assert; for instance, special exception was taken to the clause —placing in effect policies as soon as delivered. While in drafting the section the committee no doubt had in mind classes of insurance other than life. still no effect was given to the representations of the life interests. The position taken by the government was that it could not very well interfere with the work of its own commission, however much they might appreciate the effect of our position.

In April of this year, new insurance acts were passed by the legislatures of the provinces of British Columbia and Alberta. Companies operating under a Dominion license were not affected to any extent.

Proof of Age.

In March last the following amendment to the Ontario Insurance Act was introduced:—Where the age of a person is material to a contract of insurance such age shall be inserted in the policy issued at the time of the issue, and in the absence of fraud such age shall be binding on all parties to the contract of insurance, unless within one year from the date of the said issue an error in the age so inserted is discovered, when the said policy may be rectified accordingly. The proposed amendment met with defeat at the hands of the special parliamentary committee, although the amendment which went into effect on July 1st was not much more satisfactory to the life insurance interest. This is as follows:—

"Every insurance corporation registered under this Act shall send to every person with whom the contract is made within one month thereafter a printed notice mailed to the last known address of the insured in such form as the superintendent shall approve, and annually thereafter until the proof of age is admitted, stating that the age of the insured is material to the contract and evidence that the age stated in the application is the true age of the insured will be required before the policy is paid."

This notice was also to be printed in red ink in type not smaller than ten point upon all notices to the insured and upon all receipts for premiums.

Life Insurance Legislation.

While on the whole we may agree that our Provincial and Dominion legislation on life insurance is sane and fair, we cannot overlook the fact that life insurance taxation is not only improper but entirely inimical to the best interests of the public whom the legislation is supposedly designed to serve. There are not lacking signs of prospective attempts to oppose additional taxation on life interests. As men actively engaged in the business, we must all not only resolutely oppose any addition to our taxation, but use our best efforts in an attempt to do away with all forms of life insurance taxation. The final arbiter is the public, and, as the public pay, it is a question of feasibility whether we should not consult them in advance. Taxes on accumulated capital are not only a tax on thrift, but are opposed in every respect to the principle of income taxation on the grounds of which premium income taxation is improperly and unfortunately defended.

◆

GOVERNMENT RECOGNIZES IMPORTANCE OF LIFE INSURANCE

So Said Premier Borden, but First Consideration Must Be Always Security of Policyholders.

In his welcome to the life underwriters, Premier Borden made it plain that he realized the importance of the business of life insurance and that he and his colleagues would always give the greatest consideration to the suggestions of the underwriters so long as consistent with the public interest.

Life insurance, said the premier, was certainly a work which should commend itself to the judgment of all right thinking people. It was under the supervision of a special department of the government, who thought, as he was sure did the underwriters, that the security of the policyholders should always be the first consideration. The department was under the direction of the Hon. W. T. White and consistent with the public interest, every possible consideration would be given to the suggestions and representations of members of the association.

Life Insurance in Universities.

The premier was struck with the suggestion made at the convention, that there should be established in the universities courses of life insurance. This would be a desirable innovation.

With a country of vast area such as Canada, partly unexplored, with a relatively small population, such gatherings as the Life Underwriters' Association convention helped the units of the nation to understand each the other. Men from various parts of the country were brought together, east was brought face to face with the west; those who gazed on the Pacific began to understand the interests and ideals of the maritime provinces.

In this great country, the only danger seemed to be the danger of too rapid development, a development which might overreach itself in some sphere of activity. The good sense of the Canadian people, however, should check anything of that kind. The upbuilding of national character should not be overlooked.

As to National Insurance.

There was other than individual insurance, there being the great question of national insurance, the safeguarding of our national heritage.

Finally, said Mr. Borden, the government was prepared to co-operate with the Life Underwriters' Association in every way, so far as the public interest would permit.

PROBLEM OF POLICY LOANS IS SERIOUS

Life Insurance Men Discuss Ways and Means to Induce the Policyholder to Keep Down His Borrowing.

An interesting discussion was heard at the life underwriters convention on the question of loans on the life insurance policy. Mr. Mills, of Kingston, Ontario, suggested that when a policyholder applied for a loan he should be granted it only in instalments. It might tend to keep his loan to a smaller amount than at first intended.

This would not do, thought Mr. Burrows, of Belleville, as when a man wanted a loan he wanted the amount asked and in one sum.

Mr. George Williams, Montreal, thought that the solution of the problem was with the field man. The manager should deal personally with the policyholder making an application for a loan. They should be persuaded not to borrow, and if they must, to borrow only the minimum amount. This should assist to reduce the number and size of loans. Mr. Williams quoted an article in a recent issue of The Monetary Times showing the good effect of the manager's personal touch with the policyholder in this way.

Suggests Higher Interest Rates.

Mr. Reeve, of London, Ontario, suggested that rates of interest on insurance loans should be raised to seven per cent. If a man borrows a considerable amount, he should be asked to take another policy to cover the amount borrowed. Letters should be periodically written to borrowers asking them to reduce their loans.

Mr. A. N. Mitchell, general manager of the Federal Life Insurance Company, said the policy loan situation was bad in Canada. Loans on policies were increasing to the detriment both of the companies and of the policyholders. Interest rates could not be increased, he thought. A rate could not be set for New Brunswick that would operate equally well in Calgary. Neither could the loans be paid in instalments.

Talk Plainly to Policyholder.

There was only one way, he thought, of meeting the evil. "We have got to tell the policyholder," said Mr. Mitchell, "that unless he is in absolute need and that unless there is no doubt whatever that he has to borrow on his policy, he is wrong." In many cases, he continued, the borrower uses the money for a purpose which will endanger rather than assist the future of his family. Insurance was to assist rather than to endanger the family. In many cases the borrower speculates with his loan. The companies should get policy loans down to a legitimate minimum. The tremendous lapse through overborrowing on policies should be prevented.

AGENTS WHO ARE A MENACE

Discussing life insurance agents who are a menace to the business, Mr. V. Reeve, London, said that the Life Underwriters' Association came into being because of such agents. The "rounder" takes a contract with a company, rushes in a lot of business, makes a record, no matter how, and then goes on to another company. His methods were a menace. The best way to do away with that and other bad types was to adopt the plan existing in Michigan, the licensing of every man who solicits life insurance. Over 159 agents were driven out of that State last year as a consequence. (A Voice—"Some of them come to Canada.")

Mr. Adams, Hamilton, thought that the "twister" was the worst menace in the business and did the most damage. Everything should be done to eliminate him.

PENSIONS FOR LIFE INSURANCE AGENTS

A brisk discussion occurred on pensions for life insurance agents. Mr. Burrows, Belleville, led it, stating that he thought agents were entitled at least to renewal interest for life. Mr. J. A. Tory, Toronto, did not want the Life Underwriters' Association to fight the Life Officers' Association on this matter, but, rather, to work with them. Pensions could not be obtained through the association. The agents would have to confer with the individual companies, many of whom were already planning annuity or pension schemes for their men. Mr. Vivian Reeve, London, agreed, as also did Mr. John R. Reid, Ottawa.

Mr. T. J. Parkes, Sherbrooke, wanted to know whether the agents were prepared to sacrifice part of their commissions now in order to obtain pensions later, several delegates replying in the affirmative, and others indicating that was a detail to be considered after the broad principle had been decided.

Mr. Reid, of the head office, London Life Assurance Company, thought no harm could come of a general resolution from the association approving the principle. Mr. Johnston, Calgary, did not see why the agents should be in fear of the Life Officers' Association. Without the agents there would be no such officers' association. Mr. Lewis and others spoke briefly.

Finally a resolution, proposed by Mr. Andrews, Winnipeg, was passed favoring a pension scheme for agents, and a copy will be sent to the head office of every life insurance company doing business in Canada.

IDEALS IN LIFE INSURANCE WORK

One of Them is Steady Production—How to Stimulate It.

"Steady production is an ideal to be attained in life insurance work," said Mr. A. S. Wickware, of Ottawa, in a vigorous address, "but first one has to get the producer. It is realized more and more as time passes that men of large capacity for work and ability to do business, are required. Is it not a fact that many failures in life insurance work are brought about by lack of training? Each man has his own individuality. He must do his work in his own way under proper guidance. Is the ideal—steady production—sufficiently encouraged? Train him while young to be a steady producer, and it will become a habit as he grows older in the work. One of the difficulties in securing men of proper calibre for the work is the argument: "When I get old and cease to be a producer a young man will be put in my place, and I am out." Many of our companies have provided liberally for the old members of their staff, but why should a man not have some pension coming to him as his right? Not as a gratuity. I believe if some pension scheme could be evolved along the line of steady production it would give a great stimulus to the work.

Production Per Month.

"I do not mean by steady production, a production per annum, but a production per month. When training men for the work if special inducements could be given for a monthly production along the line of a pension scheme, I believe good results would follow. It would keep the work constantly before the agent, and a better class of business would be secured. Again, the minimum per month should be low. Constant application month by month, in my opinion, would produce a large volume in several months of the year.

"Another stimulus to steady production is in the policyholders. Do not get too intimate with them. It is bad for business. Make sure at all times to be friendly—keep them posted from time to time about the success of your company—do not sell them fire insurance, accident insurance, real estate or stocks. It is bad for business, too. Study your client's needs at all times, and never consider the amount of your present commission. In other words, build for the future.

Two Personal Experiences.

"Ten years ago I secured an application, the premium was $26.00, a note was taken at two months. He is a bright young fellow and has prospered. I have kept in friendly touch with him in his successes, and in the success of our company. Four years later I wrote him for a much larger amount, another note was given for the premium. Two years later I secured another application, the amount not as large as the second, premium settled in cash. Last year I wrote him again, premium $500.00, C.O.D., and I am not done yet. Next time I anticipate bringing his insurance up to $50,000.

"A year and a half ago a stranger was introduced to me by a friend of mine. The stranger asked a favor, which was at once granted as it was in order. He was grateful for the favor, and suggested that as he was about to be married he would give me an application for $2,000 and more later. Later he gave me an application for $3,000. I keep in close touch with him. We are friendly but do not overstep the bounds of friendship. Through his introduction to different persons since the first of this year I have secured five applications—two for $2,000 each, two for $1,500 each and one for $3,000.

Art of Selling Life Insurance.

"Let me quote a successful insurance salesman. 'The whole secret of keeping busy in life insurance salesmanship,' he says, 'is in keeping your endless chain plan constantly in operation, like a chain conveyor, supplying you with prospects Try it on the men who turn you down just as well as those who give you applications, and you will never have a working hour in the day without an appointment of some sort to keep you on the move. And moving, hustling, seeing people and talking insurance will bring in a steady stream of applications as surely as the sun rises and sets.' "

MOST DIFFICULT RISKS SECURED

A brief discussion on difficult risks was held. Captain Manley told of a visit he made 19 years ago to a boat at Halifax. He talked life insurance to the captain and other officers. He tried to fill in the application form for the captain, but the ink froze as it came out of the pen. Another man, presumably a life agent, was sitting aboard, but said little. It became a duel of wits and after an all day fight the captain signed the dotted line, so did the second officer, despite the fact that the other agent had tried to switch them to his company.

Mr. F. T. Stanford, Toronto, related an experience in canvassing with a carriage maker, who carried $1,000 insurance, and who was married, 35 years of age, and had a family. He tried to get him to increase the amount to $5,000. The prospect answered all the questions, but obstinately refused to sign the application. Mr. Stanford got another agent on the job, who shamed the prospect because he carried so little insurance under the circumstances. He took the $5,000. So the most difficult risk he (Mr. Stanford) had secured, was secured by another man.

WISE WORDS FROM ESSAYS

PRIZE AND OTHERWISE

LIFE INSURANCE AS A FACTOR IN SOCIAL ECONOMICS.

By Charles H. Armstrong, Toronto.

(Winner of Cup)

That the business of life insurance has found a place in present-day commercialism and home-life, and that such place can be supplied in no other manner, is a fact which is not only generally believed, but is being incontrovertibly proved as the years roll on. The enormous growth and the rapid development of the business during the last few decades furnish ample food for thought to the skeptic. The statistics of some other countries might be used with more force than those of our own country, but it is the intention to deal with the growth of the business as evidenced by the abstract of the report of the superintendent of insurance of the Dominion of Canada, just published, and to endeavor to deduce therefrom the relation of the business to the social problems of mankind.

Thirty years ago, during the year 1882, there were policies issued in Canada to the extent of $20,112,755, while last year, 1912, the policies issued totalled in amount of insurance $219,205,103, an increase of more than ten-fold in a generation. Considering the comparatively slow growth in population during the period, this is an enormous increase, paralleled by possibly not another commercial industry in the country. This expansion can be grasped more thoroughly perhaps if we take the net amount of insurance in force at the close of the years referred to. In 1882 there was in force $115,042,048, and in 1912, thirty years later, $1,070,265,559.

Existing Insurance in the Dominion

Now, as the population of Canada is about 7,500,000, this means a policy of over $140 for every man, woman and child in the country. Or again, as approximately half the population are infants, and half the adults are women, there remain less than 2,000,000 men in the country, a large number of whom are uninsurable, and also a large number of whom are foreigners or belong to the submerged tenth. Assuming that half the adult male population is insured, each one will leave an estate of more than $1,000 of insurance when he dies. Is not this a wonderful state of affairs? In what other manner could such a happy condition be consummated? Of course, this is an average; we know that many leave much more insurance than this, while many leave none at all. But as an average, it speaks volumes for the possibilities of the business.

If, then, the protection afforded by life insurance, as the average found in the preceding paragraph illustrates, can be taken as a criterion of the manner in which the Canadian public views the situation, should not the actual benefits conferred by such thoughtful provision justify the all-discerning public in its unique position in this respect? In order to demonstrate the fact that Canadians are not suffering from any illusion in regard to the meaning of life insurance, it is only necessary to examine the figures as published in the Report referred to. During the year 1912 the companies operating in Canada received in premiums $45,917,774, and paid to policyholders $22,956,526. (These figures, of course, do not include business done outside of Canada by British and United States companies.) That is, the companies paid in benefits 50 per cent. of the gross amount paid to them by way of premiums, the balance being either used for operating expenses or held in the reserve and surplus funds of the companies. And this is the history of every year for a generation back. The public receives in one year half of what it pays in during that year, and still enjoys the protection, as exemplified by the average pointed out above.

Protection for Home and Business.

Aside from the relative bearing of the amount paid to that received, is not $22,956,526 a stupendous sum to be paid in one year, for the most part to widows and orphans? Who can estimate the extent to which homes are brightened, or distress relieved by the distribution of this amount? Or in what other manner could a like happy result be attained? Considering the case from this point of view, the business of life insurance takes upon itself something of the eleemosynary, which lifts it above the commonplace money-making enterprises of this extremely commercial age. It is, in fact, a boon to humanity, for it is known that a large percentage of the criminal cases is the direct result of poverty, and in the proportion that poverty is relieved, there should follow a diminution of crime.

Within the last few years, moreover, another office has been discovered for this modern Penates. If homes can be protected against financial loss caused by the death of the bread-winner, why cannot business institutions in like manner be protected against a similar loss, or, as has frequently happened, utter ruin caused by the untimely death of some man, whose ability, intelligence and experience were the backbone of the business? The answer is not only that they can be, but that they have been and still continue to be protected in this manner. Business men at the head of industrial and financial institutions are rapidly awakening to an appreciation of the usefulness, nay even the necessity, of life insurance as a safeguard to business. The need of such protection has spread so that not only large corporations but also small partnerships are availing themselves of the benefits derived from the carrying of commercial life insurance. Many are the uses to which such insurance can be put in this regard, and many are the ends it can serve. It strengthens a firm's credit, it insures stability, it is an ever-increasing asset and in the case of the death of the person insured, it often averts financial embarrassment.

Privileges and Options of Contracts

As the business transacted in Canada has increased in volume, and as its sphere of influence and usefulness has widened, a proportionate advance has been registered in the liberality of the contracts offered. The provisions relating to days of grace for payment of premiums and time allowed for applying for the restoration of lapsed policies have been improved, so that the policyholders of to-day are in a much better position in respect to these features than were those of thirty years ago. Foremost, however, among the innovations, must be mentioned the various provisions dealing with non-forfeiture. The practice of the different companies is not equally advantageous to the insured, but the general trend of each in this matter is toward the most generous treatment of its policyholders, and every step in this direction is a source of gratification to those far-seeing individuals who have made, or intend to make provision for their dependents by means of this scheme. Nor are these increased privileges granted to policyholders the result of legislation, but rather are they the outcome of a healthy competitive growth. Any development fostered under such circumstances is bound to culminate in a better commodity, which does not necessarily follow if attempts are made to force the companies by peremptory parliamentary reform.

As the majority of the beneficial privileges and options of the present contracts offered by Canadian life companies are the result of a healthy competition, so also are the diversified forms of insurance which may be purchased. These various plans are calculated to meet the heterogeneous circumstances of all, and also can be regulated in many cases to suit the vicissitudes of fortune of the individual. No one, therefore, need feel that life insurance cannot fill the requirements of his particular case, as the elasticity of the principle involved obviates the necessity of anyone harboring such an erroneous conception.

Companies Employ About Ten Thousand

Not least of the considerations which render this business such a factor in the eternal round of human activity, is the fact that it furnishes employment to such an immense army of men. In Canada there are forty-six active, operating companies, with their office staffs and their field staffs, and although it cannot be accurately ascertained at the moment to what number the aggregate of employees of these companies amounts, a conservative estimate would place it at something approaching ten thousand, many of whom have families dependent on them. The arms of this business stretch from coast to coast, giving employment to a large number and prepared to provide ample protection for every insurable person.

In view of the employment furnished, the aid rendered to business concerns desiring expansion and the strengthening of their credit, the protection afforded, and the large sums paid annually under contracts, it may be confidently asserted that the importance of this business to the entire social and financial fabric of the country cannot be over-estimated. In view, also, of the rapid progress made during the last quarter of a century, and of the latitude for expansion, it is not only a possibility, but may be considered as highly probable, that the average of protection enjoyed by the entire adult male population of the country will be augmented in the near future in no unsatisfactory manner. When this average attains to such a figure that each will leave, at death, a fair competency to his dependants, then may this same business of life insurance lay claim to have fulfilled its mission to society perfectly. And there is no reason why this goal may not be reached.

LIFE INSURANCE AS A FACTOR IN SOCIAL ECONOMICS.

By M. Monaghan, Quebec.

Two concrete cases which within the present year have come under my own observation will elucidate how not only the widows and orphans respectively were protected during the current stringency in the money market, but they will clearly exemplify as well how they were enabled to weather the storm and stress, pay their debts, and ward off a forced sale, which would have been imperative in both cases, had not the insurance companies placed the lifeboats at their disposal.

In the first instance, the husband who died at age 40, had a $5,000 policy on his life. The claim was immediately settled, all the deceased's debts were paid, leaving the balance of $4,000 deposit for the savings bank. His widow had some valuable property which the insurance money enabled her to have a clear title to, and a few days ago she placed it in the market and realized, owing to adventitious circumstances, a very handsome sum thereon, which will place her and her children beyond peradventure of a doubt, if not in affluence, at least in comfortable circumstances. A forced sale in this case, had not the insurance lifeboat come to the rescue, was a foregone conclusion.

The second instance was not only eminently philanthropic, but it was singularly pathetic. The policyholder B. was for two long and weary years afflicted with a painful and fatal malady. He was reputed rich by his neighbors, but the great expenses incurred during his illness completely absorbed all the ready cash he had laid aside. After his death, his will was probated, and it was found, as in the first instance above cited, that he was rich in property, that his debts had to be liquidated in order to satisfy his heirs. His wife was, however, but the relic of her former self. Two long years of assiduous attention both night and day left its traces. Her husband, who was a proud man, once confided to me what strenuous efforts he had made fifteen years ago, when he was comparatively poor, to carry on his insurance. To use his own expression, "he begged and borrowed" sooner than let it lapse. His insurance policies amounted to $15,000. This sum was paid in due course; all debts were liquidated and the widow was ordered to the seaside by her physician for a few months' rest. She slowly but surely recuperated her almost vanished strength, and is to-day conducting her husband's business aided by her children, who are coming of age.

Every experienced life underwriter has met many such cases in the course of his career. They indicate most clearly how the social equilibrium is not only maintained but created and fostered.

Humanitarian Factor in Social Fabric

The benefits of life insurance, however, are not restricted to the relief of the widow and the orphan: they reach out to the general public just as the sun shines and with its beneficient rays illumines the earth, giving life, joy and happiness to all created things. It is no easy matter to realize to the full extent the enormous sums that were distributed last year alone in Canada and in the United States, among widows, orphans and policyholders.

It will be readily understood, as these results of life insurance are adequately appreciated by the public from a commercial and financial point of view, the role it plays as a factor in social economics. Industry is cultivated, thrift is encouraged, prosperity and happiness are advanced inversely, as vice, poverty and laziness are uprooted and cast aside.

If we could but realize how many women and children in every county, city, town and village, are rescued from the grip of poverty and degradation every year by the strong arms of life insurance; if we could duly appreciate the comforts which accrue to old age from endowment policies; if we contemplate the many and multiform benefits which the business man receives under the aegis of life policies, we should arrive at no other conclusion than that as a means in social uplifting it is the most beneficient, the most utilitarian and the most humanitarian factor in building up and consolidating the social fabric.

LIFE UNDERWRITERS' ASSOCIATIONS AS AN ELEMENT OF SOCIAL PROGRESS

By J. F. Belleau, Quebec.

It is now an acknowledged fact that the securing of new insurance business and even the maintaining and renewing of registered policies constitute the occupation of skilled professional experts presently called soliciting field agents. That important body of men is virtually one of the three essential organic factors of regular chartered companies operating harmoniously through guaranteed legal contracts, not as mere adjuncts that can be discarded at will as a useless old horse or old broom, but practically on the permanent co-operative principle. It is, therefore, no wonder that such an important class of the social community should seek to secure all the privileges of regular professional associations.

Everybody now looks favorably on this first move of creating a dignified professional sentiment, through the means of our underwriters' associations, positively a great social progress. I feel confident that every soliciting agent in Canada, seeing this great aim in view, will flock into the ranks of our associations, and all of them make themselves equal to the occasion.

Let me say a word of appreciation in favor of the insurance press, the devoted help of which, in publicity, can never be overestimated. I wonder why the daily press does not reproduce more often, for the benefit of the general public, at least a summary review of the interesting reading matter contained in the insurance periodicals, thereby benefiting the large popular mass of policyholders who never have the chance of being educated, with authority and impartiality, on the merits of their best interests in life insurance education. I would humbly suggest that this vital point of social progress should be taken up by all underwriters' associations, and carried out as a material help to the insurance field agents generally. By all means, let the people be generously educated, with impartiality through the press, helping greatly to discard vulgar fallacies, and remove mountains of prejudiced ideas. Our associations stand, furthermore, for various other accomplishments through a proper program of education.

Positively there is no room here for rebaters, twisters, sharpers, wreckers, and even for notorious so-called record-breakers against all principles of honor and loyalty towards their more moderate fellows of the same professional brotherhood.

It seems to me that too many over-ambitious men answer too freely to the frenzied pressure for record-breaking business. They look too much for grand things rather than for good things, they rush blindly to the great quantity regardless of the quality, they prefer being dazzled by the appearance of tallness against the safe principle of strength and soundness. Hence, as a logical consequence, so many accidents, domestic troubles and financial calamities.

Everyone will return home fully convinced that the organization of underwriters' professional associations is a sine qua non of: first, greater scientific knowledge, higher education and ethics; second, as being the royal road to fortune and lasting prosperity, and third, as the best medium for increased power and social influence.

WHAT METHOD OF TRAINING DEVELOPS THE HIGHEST EFFICIENCY AMONG SOLICITING AGENTS.

By R. M. Cushing, Montreal.

In any sale there are four factors: the salesman, the goods, the buyer, and the sale or meeting of the minds.

The agent may strengthen his personality by caring for his health, by intensifying his powers of observation, study, memory and imagination; by increasing his reliability through cultivation of the positive feelings; and by developing his power of will.

The agent must needs know well the contents of his manual, and the various policy contracts issued by his company. He should know both the general economic value of life assurance, and the particular conditions in life for which various policies are suitable. Some knowledge of the history of life assurance as a whole and of his own company in particular will be very useful. Finally, competition demands that he shall know competing policy contracts, and wherein his own company's are to be preferred. While it is quite unnecessary for an agent to be an actuary, yet an acquaintance with the first principles of actuarial science will be of great assistance, both in enabling him to answer difficult questions from prospects, and also in bringing him into closer sympathy with his superiors and his home office.

Knowledge of life assurance may be obtained through books and periodicals, manager's instruction, conversation with fellow-agents, and company or college courses. The last source is as yet in its infancy, but is growing steadily in importance. Many excellent books and periodicals are now obtainable, in many cases from agency managers; many of the latter also take great pains to impart knowledge whenever possible, notably at agency meetings; and underwriters' associations afford valuable opportunities to talk with other agents and to hear instructive speakers. It is advisable for an agent to read regularly at least one good insurance periodical, in order to obtain new ideas and to refresh his mind on half-forgotten points. Some men find indexed scrap-books of great help in preserving valuable clippings; others make good use of note-books.

Imagination and Industry

In finding prospects, imagination is the greatest aid, and industry the next. From a number of sources, the following may be mentioned: personal acquaintances, introductions, company records, newspaper items, public records, directories, advertising. In this connection the friends' reports called for in the applications of many companies form a splendid introduction to the applicant's friends. A company's records are a mine of information; old policyholders may be induced to increase their assurance, or to suggest the names of fresh prospects. In the newspapers, notices of births, marriages, promotions and so forth may afford valuable leads; lists of club members and other more or less public records deserve consideration. Briefly, the methods of finding prospects are limited only by the agent's ingenuity and energy. When the prospect has been found, however, it is of great importance that the agent should understand something of the science of character analysis.

In endeavoring to effect a sale, the agent has for resources his personality, his specialized knowledge of life assurance, and his ability to read human nature. He must now consider how to use his resources effectively; in other words, how to express himself to best advantage. The prospect will be influenced by the ideas expressed, the language conveying them, the voice, bearing, gestures and facial expression of the agent. Therefore all these points deserve attention in preparing for the final issue.

Now in every sale there are four steps: the buyer's attention must be won—his interest must be awakened—his desire aroused—the action of buying must take place. If, however, the sale is to be mutually satisfactory, the buyer must feel confidence in the salesman, and finally satisfaction with his purchase. The first four mental states are necessary in every sale, the last two if a permanent business is to be built up; and every life assurance company desires permanent business.

HABITS AND QUALIFICATIONS OF A GOOD AGENT.

By J. T. Lachance, Quebec.

Some agents seem to think it necessary to tell larger stories about dividends and surrender values than any other agent, and to give the most positive assurances that the company which they represent is far better in every respect than any other. In discussing the qualification of truthfulness I propose to speak on the subject with exceeding plainness, and not to leave unsaid anything necessary to purify the moral atmosphere of the agency business.

An agent should deal honestly with the applicant. By this I mean that he should not allow himself to recommend any plan of insurance which will not continue to be satisfactory to him. He should not let his greed of the first commissions urge upon him a five or ten year endowment with a costly annual premium, when a whole life policy, or life policy with fifteen or twenty annual payments, would do just as well, and be a great deal more appreciated by the policyholder, as soon as he learned the difference between them. A great part of the disfavor into which life insurance has fallen among a certain class of men, and the greatest part of the lapsed and paid-up policies, are traceable to the misrepresentations made by agents in procuring the application. An agent should never tell a man in moderate circumstances and with a growing family that he had better take a ten year endowment instead of a whole life policy, costing the same annual premium, for instance, unless he is convinced that this is the form of policy which upon trial will be found most satisfactory to the insured.

Agents have been greatly to blame in the past for thus recommending plans of insurance that were not adapted to the circumstances of the applicant, for the purpose of securing a larger commission. He should be frankly told what form of policy is best calculated to meet his needs. But the companies have been to blame as well as the agents, owing to the failure of the officers to properly grade the commissions, thus making it more lucrative for agents to insure on certain plans than on others. More information now prevails, however, than formerly on this subject. Applicants themselves exercise a more intelligent discrimination regarding their forms of contract in connection with their special requirements.

People Understand Business Better

They depend more on their own judgment and less on that of the agent. The whole business of life insurance is better understood by the people than formerly. In all cases when the applicant does not express any preference for some particular plan of insurance, after finding out what one is really best for him in his present condition, the agent should urge that which is the best adapted to his circumstances. Then the policy will not be so apt to lapse, the renewals will be more promptly paid, and the company will have a better reputation for the honorable dealing of its agents. In all these matters the agent is not working for himself alone, but for the company, which is interested in having a class of business which will stay on the books till the claims mature. By taking a manly, straightforward course, by consulting the real interests of the insured, and recommending only such forms of policies as will be really satisfactory when clearly understood, the agent is honoring his calling and laying a foundation for many future renewals.

A dissatisfied policyholder, one who believes that he has been misled by an agent, is capable of doing an immense deal of harm. Perhaps he rushes into print, showing how the agent promised one thing and the company perform another; how he does not get the expected dividends; how the company will not give him any surrender values; and all the neighborhood is excited about the swindle of life insurance. If the company does not fulfil all the promises which the agent made when soliciting, he is very apt to hear of it when he collects the renewals.

Policies Are Short Lived

It is a lamentable fact that the policies, as a class, are short-lived; in the best companies only nine or ten years is estimated the average, while in France and Great Britain the average age of a policy is upwards of twenty years, or about three times as great as ours. And this is largely owing to the dissatisfaction of the public and the misrepresentations which agents have made about future dividends, surrender values, liberality of the company, etc. Life insurance in this country has not been overdone, but a thorough reform in the class of soliciting agents is imperatively demanded.

But the fault is not wholly on the part of the agents; the officers of many companies are equally to blame. The agent is taught that his business is merely to get applications and to forward the premium, no matter what statements have been made to procure them. No attempt is made by such companies to elevate or purify the business. If the agent succeeds in bringing in a sufficient number of applications, he is honored with a front seat, if not, he is of no importance.

But in contrast to this there are some companies which take a noble stand against all kinds of misrepresentation and deception in soliciting. They are not so numerous as they should be, but I hope their number is annually increasing. Such companies will be the most prosperous when once the people learn that they are never deceived or disappointed by their agents. When Mr. A. T. Stewart, the wealthy merchant of New York, was once asked what was the greatest difficulty he had to overcome in his business, he replied, it was to make his clerks speak the truth. In his immense palatial stores, the largest on the continent, no misrepresentation of the quality of the goods was allowed. The same rule should be insisted upon in soliciting life insurance; the standard of veracity should be placed high, and then the business will be more honorable and more profitable.

HARVESTING IS PROCEEDING WELL

Some New Wheat is Already on Market—Maritime Provinces Hay Crop.

Mr. Andrew Kelly, of the Western Canada Flour Mills Company, writing on August 21st to The Monetary Times on the western crop outlook, says:—

"I feel that it is everything that we could desire. You may have heard about rain and hail storms within the last week. In some cases reports say that there was an enormous amount of damage done, but we find that there has been very little, in fact, the opinion of the best posted people here, is that no more than one-half of one per cent., and a great many are inclined to believe that the good that the rain has done will almost more than balance the injury that was caused by the hail storms.

"Harvesting is going along nicely, and there has been three cars of new wheat on the market, all of which have graded No. 1 Northern. All we require now, is dry weather in order to let the farmers get their crop havested in good condition, and I am still of the opinion that this country will harvest the best crop that has ever been produced in the three western provinces, and the percentage of good wheat will be much larger than it has been in the last three or four years."

Cutting of the grain is now general in Saskatchewan, according to crop reports received by the provincial government. Conditions continue good, and the prospects are that not only will the crop be large, but that it will be of fine grade.

Crop conditions, at present, are of the best in Alberta, writes a correspondent to The Monetary Times. In the south, cutting is fairly general, and undoubtedly a better yield is being harvested than in 1912. To the northward, the grain is yet green, but present weather is helping it along, and a continuation of ten days more like this week means much to those who are yet more or less depending upon their grain alone. Sixteen hundred men, to assist in the harvest, have gone from this city to date, on the one cent per mile rate, and no scarcity of labor or material is reported from any point in this district.

Maritime Provinces Hay Crop

Crop conditions in Nova Scotia have improved considerably as a result of the recent rain. The hay crop is generally 15 to 20 per cent. above that of last year, and has been successfully harvested. At the Agricultural College, Truro, one block of seven acres produced 28 tons of first-class hay—this means four tons to the acre.

The Maritime Provinces are the only parts of America which have a full crop of hay this year.

Oats and other cereals are equally good.

Mr. Fullerton, of the Nova Scotia agricultural college, who has recently made a tour of the province, says that crops were never better. In a few areas, potatoes, owing to the drought, will be a short crop.

Apples are certainly a low crop, probably not more than 40 per cent., about 500,000 barrels, and part of these are scabby.

The season of 1913 will be remembered in Ontario as one of the most favorable for the harvesting of hay and the cereals. The former was never handled in more perfect weather, and grain crops so far have stood up well for cutting, and have been housed under perfect conditions.

LIFE INSURANCE IN THE SCHOOLS

A helpful address was delivered by Mr. Neil D. Sills, president of the National Association of Life Underwriters. Mr. Sills hails from Richmond, Virginia, and told a host of anecdotes of and experiences in the life insurance business. He spoke at length on the good work of the association movement, and thought that the highest type of salesmanship was in the life insurance business.

He thought great educational work could be done in the schools for the cause of life insurance. In the high school at Richmond, Virginia, the underwriters gave four lectures: (1) The history and magnitude of life insurance; (2) The safety of life insurance; (3) The different policy forms; (4) The privileges of the policy.

Mr. Sills was of opinion that the income policy was becoming the favorite, and he predicted it would soon be the most popular policy.

He then described the different ways adopted by agents in securing prospects. These mostly included the adoption by the agent of the policy of taking absolutely for granted that the prospect was going to take life insurance. Mr. Sills added that the life insurance policy should always fit the special circumstances of the man taking insurance.

Lloyd George's is Canada's best friend, as his heavy taxing of England's landlords has forced the land owners to leave the Mother Country and invest their capital in the Dominion.—D. W. Cameron, of Lochiel, Scotland, at Toronto.

MONTREAL COLLECTIONS REPORTED ONLY FAIR

Monetary Times Office,
Montreal, August 27th.

That the difficulty of making collections in the North-West is a very real one is attested by financiers in Montreal who have had a number of unpleasant experiences west of Winnipeg. It would seem that in more than one instance collections of considerable sums which were counted upon by eastern interests could not be made at all, the result being serious inconvenience to some of the larger commercial institutions of this city. One man who has had a large experience in connection with North-West collections of late offers the view that results in August are not likely to be satisfactory, it being his experience that only about 15 per cent. of the accounts falling due were met. He adds that this month is likely to prove about the worst, although September will be very little better. It is now the end of the old crop season, and finances are low throughout the whole west, more especially as the banks have been applying pressure to bring about a more healthy state of affairs and the adjustment of necessity occasions many complications. Harvesting, however, is now in full swing throughout the whole country, and presently threshing will take the place of cutting. Shortly thereafter the grain will begin to move east in large quantity. As soon as this movement begins the situation with respect to collections should show improvement. Practically no alteration will be noticeable in September, although October should begin to place the farmers in funds once more. By November and December the cash situation should have resumed a normal condition and thereafter it is hoped and fully expected that complaints concerning collections will reach a minimum again.

GREAT WEST LIFE'S BULLETIN

The bulletin of the Great West Life Assurance Company refers to discussions in various quarters on work and wages, the cost of living and the proper allotment of income. It is gratifying to observe that in most of the model budgets prepared, life insurance is emphasized as one of the most important items of expenditure, says the bulletin. Two typical tables secured from different sources, are cited. One purports to include the necessary items to be covered by the income of a British working-man earning $7.00 a week, (say 28 shillings). The London County Council, responsible for the table, recommend the allotment of 50 cents, or 2 shillings a week, for life insurance.

The other table applies to an average mechanic's family in Winnipeg. The investigator places the monthly expenditure at $100, and sets down for life insurance a minimum of $50 a year. He says:—

"Insurance should properly be reckoned as a necessity. In the case of the death of the breadwinner adequate provision should be made to cover funeral expenses, to provide for the maintenance of the widow and children, otherwise the family becomes a charge on the community. Further, there ought to be adequate provision for old age."

The Great West Life Assurance Company reports the following business for the first six months of 1913:—Applications received January-June this year, $13,067,906; applications received January-June last year, $12,715,513; increase, $352,393. Business issued January-June this year, $11,344,530; business issued January-June last year, $11,186,338; increase, $158,192. Business in force June 30th, 1913, $89,922,546; business in force June 30th, 1912, $75,397,196; gain for the 12 months, $14,525,350. Ledger assets June 30th, 1913, $12,199,876; ledger assets 1st January, 1913, $11,263,438; increase for half year, $936,438. Premium receipts January-June, 1913, $1,486,512; premium receipts January-June, 1912, $1,307,511; increase for half year, $179,001. Interest receipts January-June, 1913, $395,037; interest receipts January-June, 1912, $324,803; increase for half year, $70,234. Number of applications received January-June, 1913, $5,570; number of applications received January-June, 1912, $4,655; increase for half year, 1913, $915.

On a bid of $3,500,000 the plant of the Michigan and Lake Superior Power Company passed into the possession of the first mortgage bondholders of the defunct company, represented by Mr. A. F. Weill. Their bid was the only one made. It is understood that as soon as the plant passes out of the receivership it will be handed over to the Michigan Northern Power Company, a new corporation, and that it is their intention to repair and improve the plant. The big plant was sold to satisfy holders of first mortgages vaued at $5,285,000. Foreclosure was ordered after the company had failed to pay anything for ten years.

REPORT OF THE ANNUAL MEETING
OF THE
WESTERN TRUST COMPANY

The Seventh Annual General Meeting of the Shareholders of the Western Trust Company was held in the Company's Board Room at their Head Office, 274 Main Street, Winnipeg, Manitoba, on Wednesday, the 13th day of August, 1913.

Mr. A. J. Adamson, the President, occupied the chair.

The Secretary read the minutes of the last annual meeting of the Shareholders of the Company, and the Report of the Directors and the Financial Statement was then submitted to the meeting as follows;

REPORT OF THE BOARD OF DIRECTORS

SEVENTH ANNUAL REPORT

To the Shareholders of the Western Trust Company:

The Directors of the Western Trust Company have pleasure in submitting their Seventh Annual Report, which shows the results of the Company's business from June 30th, 1912, to June 30th, 1913, accompanied by the Balance Sheet and Profit and Loss Account of the Company.

During the past financial year, the Company has for the first time been working with the subscribed capital fully paid up; consequent upon which there has been a marked augmentation of the transactions of the Company. The results of the operations have been more than satisfactory, as reference to the Financial Statement submitted to the meeting will show that there has been an increase in the profits closely approximating 50 per cent. in comparison to those of the year immediately preceding.

Throughout the period under review the interest payments on loans have been satisfactorily met, which is largely due to the conservative policy adopted by the board as to limiting advances to high grade securities. The Reserve Account has been increased from $100,000.00 to $150,000.00, the latter amount representing 15 per cent. of the paid up capital of the Company.

The Auditors have examined the securities of the Company in their usual careful manner and their certificate is attached to the Financial Statement.

By order of the board,
A. J. ADAMSON, President

FINANCIAL STATEMENT AS ON 30th JUNE, 1913

LIABILITIES

		$127,210.66

AUDITORS' REPORT

To the President nnd Directors of the Western Trust Company:

Gentlemen,—We beg to report to the shareholders of the Western Trust Company that we have audited the books and accounts of the Company for the year ended 30th June, 1913, verifying the cash receipts and payments during the year, with the several bank accounts, the amounts due at 30th June from borrowers, and the bank balances at that date. We have examined the mortgage securities taken during the year and have found them in order, and duly certified as valid; and have inspected all those held by the Company at the end of the year, finding them likewise in order and according to the mortgage ledger accounts. We have found the books and accounts, including those at Regina, to be correct and sufficiently vouched, and we certify that the accompanying Profit and Loss Account and Balance Sheet exhibit a true and correct view of the state of the Company's affairs for the year and as at 30th June, 1913.

CROSS & MENZIES,
Chartered Accountants, Auditors

Winnipeg, Man., 1st August, 1913

The adoption of the Report was moved by Sir R. P. Roblin and seconded by Mr. J. A. Thompson and was unanimously adopted.

A comparative statement showing the progress of the Company since it commenced business was laid before the meeting in the following form:

Financial Year ending	Paid-Up Capital	Reserve	Net Earnings for Year	Total Assets
June 30th, 1907	$ 238,726.07	$	$ 4,076.29	$1,293,324.90
June 30th, 1908	244,427.50	12,500 00	17,851.62	1,691.963.28
June 30 h, 1909	252,879.00	25,287.90	25.340 71	2,279,606.62
June 30th, 1910	385,050.00	38.505.00	33,496.48	3,114,813.95
June 30th, 1911	580,600.00	58,060.00	54,026.76	3,497,558.35
June 30th, 1912	1,001,266 65	100,126.00	80,120 43	6,293,258 38
June 30th, 1913	1,005,000 00	150,000.00	126,284.79	6,617,333.63

which showed very substantial progress during the year just closed.

The election of Directors was then proceeded with and the following gentlemen were duly elected Directors of the Company for the ensuing year:

BOARD OF DIRECTORS

President—

ALAN J. ADAMSON, Esq., President The Western Trust Company. Vice-President North Empire Fire Insurance Co.

Vice-President—

SIR R. P. ROBLIN, K.C.M.G., Premier of Manitoba and Minister of Agriculture. Director of Northern Crown Bank, Winnipeg, Man.

JAMES JOHNSTON, Esq., Broker, Winnipeg, Man.

MICHAEL LONG, Esq., Vice-President and Manager The North Empire Fire Insurance Co., Winnipeg, Man.

J. D. McARTHUR, Esq., Railway Contractor, Winnipeg, Man.

JOHN A. THOMPSON, Esq., Vice-President Moose Mountain Lumber & Hardware Co., Winnipeg, Man. Director The North Empire Fire Insurance Co.

G. R. WHITMORE, Esq., Merchant, Regina, Sask.

JOHN E. ADAMSON, Esq., Barrister, Winnipeg, Man.

F. E. KENASTON, Esq., President The Minneapolis Threshing Machine Co., Hopkins, Minn. Director The Union Bank of Canada.

KENNETH MACKENZIE, Esq., Director Canada Life Assurance Company, Winnipeg, Man.

HON. J. H. ROSS, Senator, Moose Jaw, Sask.

J. G. TURRIFF, Esq., M.P., Late Commissioner Dominion Lands, Ottawa, Ont.

A. B. COOK, Esq., Sheriff, Regina, Sask.

JAMES G. BAIRD SMITH, Esq., C.A. (Scot.), Secretary Western Trust Company, Winnipeg, Man.

At a later meeting of the Directors, Alan J. Adamson was elected President, and Sir Rodmond P. Roblin, K.C.M.G., Vice-President of the Company for the ensuing year.

DIVIDENDS AND NOTICES

No. 332.

UNION BANK OF CANADA.

DIVIDEND No. 106.

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the paid-up capital and stock of this institution, has been declared for the current quarter, and that the same will be payable at its banking house in this city, and also at its branches, on and after Tuesday, the second day of September next, to shareholders of record on August 19th, 1913.

By order of the Board.
G. H. BALFOUR,
General Manager.
Winnipeg, July 15th, 1913.

THE ROYAL BANK OF CANADA.

NOTICE OF QUARTERLY DIVIDEND

Notice is hereby given that a Dividend at the rate of Seven per cent. (7%) per annum upon the paid up Capital Stock of this Bank has been declared for the three months ending the 31st August, 1913, and that the same will be payable at its Head Office and Branches on and after Tuesday, September 2nd, 1913. The Transfer Books will be closed from the 17th to the 31st August, 1913, both days inclusive.

By order of the Board,
JAMES MASON,
General Manager.
Toronto, July 16th, 1913.

PROPOSAL TO FORM CO-OPERATIVE BANK FOR SASKATCHEWAN

(Special Correspondence).

Regina, August 26th.

The formation of a co-operative bank for the province of Saskatchewan is the proposal which has been laid before the commission on agricultural credits by Mr. W. C. Paynter, of Tantallon. Mr. Paynter has submitted details of his proposition. He contends that a co-operative bank will form the only permanent solution of the financial problem of the west.

Mr. Paynter's suggestion is that settlers subscribe $50,000, paying $25,000 to be deposited with the Dominion Bank until such time as the bank is ready for business. Of this, $5,000 would be retained by the government for the bank redemption fund. The greater part of the paid-up capital should be spent in bank premises throughout the province. The co-operative concern would be empowered to issue notes to the total value of the buildings.

The statement reads further as follows:—"The wealth producers of the province will support such a scheme by depositing their surplus cash which the bank should loan only for productive purposes to producers in our own province, The co-operative bank can soon get all its notes in circulation through the agency of the Co-operative Elevator Company and by creating a spirit of loyalty to our own institution would all do our best to keep our notes in circulation as a medium of exchange, and keep turning in the notes of the other banks." He concludes as follows: "We can find ample room for all available funds, in the purchase of bonds and debentures of known reliability in our own province."

◆

The Bank of Nova Scotia has opened a branch at Chandler, Gaspe County, Que. Mr. G. T. Kennedy being in charge.

Bankers' Burglar and Fireproof Safe for Sale at ½ Regular Price

A splendid bargain. In perfect condition. For full particulars and price, address The R. S. Williams & Sons Co., Limited, 145 Yonge Street, Toronto. Attention, Mr. Shelton.

RICHELIEU FINANCING COMPLETED

A cable message from London states that the financial arrangements have been completed under which the Canada Transportation Lines, Limited, takes over the assets of the Canada Interlake Line, Quebec Steamship Company, the Ontario and Quebec Navigation Company, and the Steamship Haddington, and all that now remains to be done in order to complete the Canadian navigation merger is to include the Richelieu and Ontario Navigation Company and the subsidiaries.

The London board of the Canada Transportation Lines has been constituted as follows:—

Sir Stephen Furness, M.P., chairman of Furness-Withy, Limited, and the British Mercantile Trust Company; Sir A. Trevor Dawson, deputy chairman and managing director of Vickers, Limited; Sir Vincent Caillard; Albert Vickers, chairman of Vickers, Limited; F. Lewis; W. Grant Morden; Claude Bryan, director of the British Maritime Trust.

Mr. Grant Morden has arrived in Canada from London as the fully-qualified representative of the London board, to complete all matters necessary in Canada in order to prepare the basis of the public issue in London of the debenture stock of the Canada Transportation Line soon after the holidays. The bankers of the issue are Brown, Shipley, and Company, and the London County and Westminster Bank.

DEBENTURES FOR SALE

TENDER FOR DEBENTURES

Tenders will be received up to twelve o'clock noon on Friday, the 19th day of September, A.D. 1913, for the purchase of an issue of $40,000 worth of debentures for the purpose of purchasing stock in the Laurentia Milk Company, of Saskatchewan, Limited, repayable at the end of a period of ten years, and bearing interest at the rate of 5½ per cent. per annum.

The highest or any tender not necessarily accepted.

J. P. MARSHALL,
Secretary-Treasurer,
Town of Battleford.

Battleford, Sask., 21st August, 1913.

RURAL MUNICIPALITY OF BEAVER, NO. 276, SASKATCHEWAN

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

UNITED STATES FINANCIERS AND THE DOMINION

Empire-building in the West Suggests Great Possibilities from Development

Every one who has followed the various steps taken by President C. S. Mellen of the New Haven Railroad Company in the direction of creating an organic system covering entire New England has not failed to observe that his thoughts have frequently been centred upon Canada and not so much the Canada which is the neighbor of New England as the new Canada—that region in which empire building upon a magnificent scale is now in progress, says Holland, in the Wall Street Journal. President Mellen on the other hand and his associate in railway management in the far West, the late President Hays of the Grand Trunk, on the other hand, regarded England and imperial Canada, especially the western part, each as supplementing the other in commercial relations.

Probably the broad-minded vista of railway opportunities which has been characteristic of Howard Elliott since his management of the Northern Pacific will not fail to impress upon him the value of the mutual relationship which can be established between the New England section of the United States and Canada.

The government of Canada has been doing what New England as a section has never thought of doing. For the imperial government began, some fifty years ago, a most comprehensive and far-reaching method of exploiting the wonderful resources of Western Canada and the transportation facilities by which these resources could be made available. In the south, there are evidences that the method adopted by the minister of the interior of Canada will be imitated.

Results from Publicity.

If publicity is the expedient policy for the great industrial corporations of the United States there is no reason why it should not be expedient policy for the people of each of the states as it has been found to be a highly advantageous policy for Canada. Publicity in its broadest meaning is nothing but advertising. It may not always be paid advertising, but the full reports of the United States Steel Corporation and the wonderfully clear exposition which the latest report of Theodore N. Vail of the American Telephone and Telegraph Company are, from one point of view at least nothing but advertising. The Canadian policy of publicity brought into Canada in a few years about a million and a quarter of immigrants and a great many million dollars. It has been officially stated that these results were secured, in part at least, by an expenditure of about two and one-half million dollars in publicity work.

The empire building which is now in progress in Western Canada and which reflects to some extent the plans of President Mellen for creating an organic railroad system in New England and the purpose of the late President Hays of carrying his Grand Trunk system across New England, with terminals at Providence and Boston, compares favorably with any work now in progress anywhere in the world involving the opening up of new and hitherto uninhabited regions and cultivating the prodigious natural resources which have awaited cultivation. Inevitably the growth of Western Canada within the next twenty-five or thirty years is to have a very influential relation to the growth of the United States. Canada is now the largest market for some of the American products. Canada is beginning to tempt American manufacturers to establish their plants within its boundaries.

To Be Great Seaport.

The contemplated plan of Governor Foss of Massachusetts to shift one of his manufacturing plants from Massachusetts to Canada furnishes a most important object lesson. One of the great American manufacturing corporations, at one time, seriously contemplated the removal of its plants to Canada and at this time the corporation managers are turning over in their minds the feasibility of removing some or all of their plants to Canada in case they find the new tariff law would be permanently detrimental.

A year or two ago one of the largest of the ocean steamship companies owned in Great Britain was purchased by another company and the reason given for that purchase was that the steamers of the purchased company would be available for use after the Panama Canal is open, so that the expected increase in wheat production in Western Canada could be made available for English markets by the utilization of the Panama Canal. This wheat, it is expected, will be transported from the fields to the new terminal which the Grand Trunk is now to establish on the Pacific Coast near the southern boundary of Alaska. The terminal is likely to become the greatest seaport anywhere in the world located as far north as this seaport is to be.

The fleet of steamers will receive the wheat at this particular Pacific terminal of the Grand Trunk and will transport it unbroken in bulk to Great Britain by way of the Panama Canal, and that is likely to be as large a part of the commerce of Great Britain as will pass through the canal excepting some between the west coast of South America and Great Britain.

The railroads of Canada have co-operated with the Canadian government in carrying on a plan of publicity the results of which have already been magnificent. The managers of these railroads appear to realize that if publicity is the wiser part in informing the people as to the details of operation; of financing and like matters there is no reason why it should not be the wiser part to adopt if business for the railroads is to be desired. The railroads of Canada have recognized the vast influence which may be exerted by a skilful and honest method of advertising the resources of the country and the opportunities the railroads furnish for making these resources available.

AGAINST GROUP LIFE POLICIES

A resolution striking at the issuance of group life insurance policies unanimously was adopted at an executive session of the American Life Convention at St. Paul. Life insurance men, representing old line companies, denounced group insurance, by which an employer, for instance, puts into effect a blanket policy insuring all his employees against death. It was declared inimical to legal reserve life insurance, unfair and dangerous.

The life insurance men also adopted unanimously a committee report which vigorously opposed the upward trend of medical fees for old line insurance. The report said that, while $5 was the usual fee charged in some sections, $3 was entirely sufficient to guarantee sound medical examinations.

WESTERN TRUST COMPANY.

Discussing at the seventh annual meeting, the business of the Western Trust Company, of Winnipeg, for the past year, Mr. A. J. Adamson, the president, was able to report that the interest payments on loans have been satisfactorily met, largely due to the conservative policy adopted by the board as to limiting advances to high grade securities. The reserve account has been increased from $100,000 to $150,000, the latter amount representing 15 per cent. of the paid-up capital of the company. During the past financial year, the company has for the first time been working with the subscribed capital fully paid up. This has resulted in a marked increase of the transactions of the company. There has been a gain in the profits of nearly 50 per cent. in comparison to those of the year immediately preceding.

Here is a statement showing the development of the company since it commenced business:—

Year ended June 30th.	Paid-up Capital.	Reserve.	Net Earnings.	Total Assets.
1907	$ 238,726	$	$ 4,076	$1,293,324
1908	244,427	12,500	17,851	1,691,963
1909	252,879	25,287	25,340	2,279,606
1910	385,050	38,505	33,496	3,114,813
1911	580,600	58,060	54,026	3,497,558
1912	1,001,266	100,126	80,120	6,293,258
1913	1,005,000	150,000	126,284	6,617,333

The company's assets are as follows:—Real estate mortgages, $1,132,962.88; stocks and shares, $54,102.99; office furniture, $2,712.34; other assets, $9,881.86; cash in banks, $4,475.51—$1,204,135.58. Trust guaranteed and agency funds.—Real estate mortgages, $988,990.22; cash in banks, $48,040.86—$1,037,031.08. Trust estates and agencies.—Unrealized original assets held for collection and administration, $4,376,166.97—$6,617,333.63.

The net profits for the year ended June 30, 1913, after making all proper deductions, were $126,284. Dividends to shareholders at 7 per cent. per annum absorbed $70,159. The reserve account was strengthened and $7,177 was carried forward.

The company is making good progress under efficient management and a strong directorate.

The city council of Regina is arranging to give better fire protection in the residential section. Three hydrants will be installed in every block so that there will be no difficulty in getting plenty of water in cases of fire.

MUNICIPAL FINANCING

Ottawa's Annual Bond Sale—Calgary Seeks Capital—Schools a Factor in Bond Market

The Dominion Government loan of $80,000,000 which reaches maturity on October 1st will be paid off. It bears interest at 4 per cent., and is the last of the list of loans at that rate.

Municipal finances have been easier for the past month at Calgary. An offer of $1,000,000, at 6¾ per cent., may be accepted by the city, a rate which, though apparently high, covers all expenses and commissions. More than 4,000 men are on the city pay-roll, but many of these will be dropped off now, as some construction work is completed. Nothing new is being inaugurated.

The Calgary public school board is disposing of $750,000 worth of bonds to Messrs. W. C. Langley and Company, New York, at approximately 88, at 5 per cent. These are forty-year bonds, one-fortieth repayable annually, and interest semi-annually. Demand for more school accommodation made it necessary to secure this money.

Ottawa's Bond Sale.

Tenders were opened yesterday for the purchase of $51,000 40-year debentures, $596,500 30-year debentures and $517,206.40 20-years debentures of the city of Ottawa. They are all a liability of the city at large, and bear 4½ per cent. interest, payable 1st January and 1st July. Accrued interest from 1st July, 1913, must be paid in addition to price tendered. The $236,000 debentures are in $1,000 denominations, principal and interest payable at Ottawa. The remainder of the debentures will be made payable in Ottawa, New York, or London, at the option of the purchaser, and in denominations to suit.

Two Vancouver bond houses were among the applicants for the bonds which the city is selling locally, the total sales of which are anticipated to amount to $100,000.

Money For Schools.

Victoria school board are to notify the city council that the sum of $160,000 will be required. The chairman of the committee on finance, stated that the board required $270,000 till December, and was $160,000 short, for which it would want debentures sold.

The township of Melancthon has been building steel bridges. Finding that the rate of interest on loans had been increased by the banks the township authorities are borrowing from people in the township, on properly secured notes, at 5 per cent.

Changes in Canadian securities in London during the past week were noted as follows:—

Dominion of Canada inscribed, redeemable 1947, 2½ per cent., 73 to 75.

Dominion of Canada registered, 1930-50, 93 to 95.

Province of Nova Scotia, 1954, 3½ per cent., 82 to 84.

Winnipeg, 1914, 5 per cent, 100 to 102.

◆

DEBENTURES AWARDED

Grey County, Ont.—$20,000 5 per cent. 20-years, to Messrs. Stimson and Company, Toronto.

Montreal East, Que.—$80,000 5 per cent. to Messrs. J. A. Mackay and Company, Montreal.

Melville S.D., Sask.—$20,000 6 per cent. 30 instalments, to Messrs. C. H. Burgess and Company, Toronto.

Maisonneuve, Que.—(Schools).—$205,000 5½ per cent. 40-years, to Messrs. J. A. Mackay and Company, Montreal.

◆

PERSONAL NOTES

Mr. A. L. Crossin, of Messrs. Oldfield, Kirby and Gardner, Winnipeg, is in Toronto this week.

Mr. A. W. Smithers, chairman of the board of directors of the Grand Trunk Railway, is in Montreal, preparing to make his annual inspection of the system.

Mr. Arthur E. Fisher, superintendent of insurance for Saskatchewan, is in Toronto, as the guest of Mr. A. E. Donovan, M.P.P., manager for Ontario of the Mutual Life Insurance Company of New York.

Mr. A. E. Moulds has been appointed manager of the Manitoba branch of the Gresham Life Assurance Society, Limited, in succession to Mr. W. G. Johnson. Mr. Moulds was district agent and then district inspector in Winnipeg.

Mr. F. F. White, who was appointed provisional liquidator of the Canada Iron Corporation, is a member of the New York house of Messrs. Deloitte, Plender and Griffiths. It is understood that Mr. White will be appointed permanent liquidator with a view to the reconstruction of the company.

COMPANIES LICENSED IN VARIOUS PROVINCES.

The following companies have been licensed to do business in Ontario:—The Klotz Company, Limited (Dominion charter), capital, $40,000; O'Reilly and Belanger, Limited (Dominion charter), capital, $100,000; Bogue Brothers and Henry, Limited (Dominion charter), capital, $50,000; Norfolk Fruit Farms, Limited (Dominion charter), capital, $100,000.

The following companies have been registered to do business in Saskatchewan:—The Guardian Accident and Guarantee Company, the Northern Improvement and Investment Company, Limited, the Marsch, Siems-Carey, Smith Company, Limited, the Standard Reliance Mortgage Corporation and the Okanagan United Growers, Limited.

The following companies have been registered to do business in Alberta:—The Alberta-Indianapolis Land Company, Indianapolis, capital, $6,000; Crushed Stone and Gravel Company, Saskatoon, capital, $200,000; Standard Reliance Mortgage Corporation, Toronto, capital, $5,000,000; Okanagan United Growers, Limited, Vernon, capital, $10,000.

The following companies have been licensed to do business in British Columbia:—The Consolidated Film Company, Limited, Montreal, provincial office, Vancouver, capital, $150,000; the Gordon Development Company, Limited, Toronto, provincial office, Vancouver, capital, $499,900; the Kee Lox Manufacturing Company, Limited, Windsor, Ont., provincial office, Vancouver, capital, $2,000.

The following companies have been registered to do business in British Columbia:—Ballou and Wright, Seattle, Washington, U.S.A., provincial office, Vancouver, capital, $65,000; Clyde Iron Works, Augusta, Maine, U.S.A., provincial office, Vancouver, capital, $1,000,000; Monitor Oil Company, Cleveland, Ohio, U.S.A., provincial office, Vancouver, capital, $25,000; Shea-Mac Vaugh Engineering Construction Company, Portland, Oregon, U.S.A., provincial office, Victoria, capital, $10,000.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer:—

Alberta.

Hilltop, No. 2507, $500. J. Jones, Gainford.
Victor, No. 2897, $1,800. C. D. Holm, Victor.
Glendon, No. 2935, $1,400. L. Stead, Glendon.
Gatine, No. 2753, $1,500. T. A. Walker, Carbon.
Macleod, No. 47, $3,500. E. F. Brown, Macleod.
Stanger, No. 2970, $1,000. L. H. Mercer, Stanger.
Macleod, No. 47, $13,500. E. F. Brown, Macleod.
Bituma, No. 2856, $1,200. W. H. McMillan, Bituma.
Springburn, No. 2994, $1,600. E. R. Briggs, Oyen.
Butte Vale, No. 2839, $1,200. W. A. Walker, Sedalia.
Rose Glen, No. 2767, $1,500. J. Bearss, Rose Glen.
Bye Moor, No. 2927, $1,600. L. Brown, Hartshorn.
Northern Crown, No. 2940, $1,000. J. Swan, Chauvin.
Golden West, No. 2490, $1,600. W. H. McEwan, Hoskin.
Shamrock Valley, No. 2943, $1,500. W. O. Melson, Elk Point.
East Edmonton, No. 98, $5,000. E. Gee, Box 4425, Strathcona.

Saskatchewan.

Bell, No. 2999, $1,000. E. Donovan, Sceptre.
Oleskow, No. 540, $700. Paul Kyba, Veregin.
Stayner, No. 701, $2,200. H. M. Clark, Grace.
Blofield, No. 1307, $800. R. R. Bruce, Tuxford.
Wakaw, No. 1338, $6,000. J. H. Flynn, Wakaw.
Divide, No. 2894, $1,800. W. M. Phalen, Wallard.
Viceroy, No. 3007, $5,000. And. Moffett, Viceroy.
Kochmstedt, No. 2938, $1,700. J. Janhsen, Denzil.
Round Up, No. 2949, $1,500. L. Matasky, Ceylon.
Hepburn, No. 1059, $1,000. J. Schmidt, Hepburn.
Spiral, No. 2950, $1,800. Mrs. A. Moffat, Lone Star.
Observation, No. 3004, $1,700. J. E. Assels, Forres.
Blooming, No. 2917, $1,400. S. A. Balgard, Blooming.
Preeceville, No. 2850, $2,500. Jas. Fraser, Preeceville.
Garthland, No. 2977, $1,000. M. G. Isbister, Wingard.
Treherne, No. 783, $400. H. H. Robinson, High Hill.
Bengough, No. 978, $7,000. A. D. Bruce, Bengough.
Fife Lake, No. 2908, $1,000. R. F. Clapp, Little Woody.

MORE AGRICULTURAL PRODUCTION

Much is heard respecting the immigration of farmers from the United States to Canada, but little is known of what authorities in Western Canada term a strong movement of agricultural population from the Canadian West to the neighboring republic, a movement said to comprise many of our best farmers. The total emigration from Canada to the United States during the year ended June 30th amounted to 150,000 people. Mr. John Clark, the immigration commissioner of the United States in Montreal, told a westerner that the immigration of the permanent residents of Canada to take up their permanent residence in the United States would likely amount to 200,000 during the coming year. He has the names and addresses of each of those people, their residence for the previous six months and their present addresses. This accentuates the necessity of something being done immediately to attract people to our fertile acres, but more important still to make conditions such as will keep them permanently there.

Writing to *The Monetary Times* on this subject, a western correspondent says: "We must devise a means at once to throw two or three hundred million dollars more of our products into the world's commerce, and that must be largely of grain. We cannot compete successfully with certain countries in Europe in the smaller articles of the farm. Russia has increased her exports of butter 200 per cent. One-half of the butter that reaches the British market originates in Russia."

Canada can well afford to consider ways and means of increasing its agricultural production. The more products that are grown, the better will be the national position. Excellent reasons can be ascribed for the existence of an unfavorable trade balance in the Dominion, but there is no good reason why this should not be made far more favorable by greater production.

MUNICIPAL FIRE INSURANCE

A proposal that the city of Calgary should give all its fire insurance business to one firm has brought out, in addition to the opposition to this plan, the idea of the city carrying its own risks. The annual premiums on municipal property amount to $12,000. The city council has a splendid fire-fighting equipment and losses in past years have been trivial. Instead of paying all the premiums, as now, the latest suggestion is that a portion of it be funded every year until the total was large enough for the city to carry its own insurance.

The proposal for municipal fire insurance is made periodically but often its fallacies have been pointed out. Only a few weeks ago, Regina made a similar suggestion. Luckily the civic authorities were sufficiently wise to reject the idea. A few days later part of the city's exhibition buildings were burned with losses that would have entirely obliterated the municipal fire insurance fund and left it in debt besides.

It is often forgotten that the fire insurance premium is ever ready to meet the fire risk, present every minute, day and night. Fire may occur at any moment, the loss may be $1.00 or it may be $1,000,000. Whatever is the loss, the fire insurance companies will pay—if the insurance is placed with reputable companies. Civic fire insurance has been tried and has invariably proved a disastrous failure.

COST OF LIVING AND WAGES

According to cabled messages, a report of the Imperial Board of Trade, just issued, shows a large increase in the cost of living and a comparatively small gain in wages. Workers have to pay seven per cent. more now for the necessities of life than they did seven years ago, and there has been no increase of income to offset the advance.

The latest report on wholesale prices in Canada for the year 1912 by Mr. R. H. Coats, of the Department of Labor, shows that conditions are little better in Canada. At any rate, this is the case in the matter of cost of living. The general depression in 1907 did not have the lowering effect on the cost of living that it had on general business. The figures presented by Mr. Coats, who has made a special study of the subject, also show that during the past year the steeply upward trend of the weighted line in his charts may be regarded as reflecting the serious aspect of the rise.

From a cost of living standpoint a better criterion is afforded by retail prices—those paid for small quantities to the ultimate middleman—of articles entering largely into domestic consumption. Since the beginning of 1910, the Department of Labor at Ottawa has secured on the fifteenth of each month from its fifty correspondents a return showing the current retail prices of twenty-eight articles which enter prominently into cost of living, together with a statement in each case as to the prevailing rental for a representative workingman's dwelling of the better class, with and without sanitary conveniences. It is thought that probably 80 per cent. of the expenditures of the ordinary family are represented in these returns, while the localities selected are the most important industrially in the several provinces. The prices on the first of each quarter in the years 1910, 1911 and 1912, reported in this way to the department have been averaged and the results are tabulated below. It will be seen from these statistics that the general trend of retail prices was strongly upward in 1912. The most satisfactory way of estimating the total effect of these changes is to work out a family weekly budget in the terms of the average prices for the several years. Here are typical weekly expenditures on staple foods, fuel, lighting and rentals for a family of five with an income of $800 per year, for the years 1910, 1911 and 1912:—

Commodity.	Quantity.	Cost, 1910.	Cost, 1911.	Cost, 1912.
		c.	c.	c.
Beef, sirloin steak	2 lb.	36.8	39.8	41.8
Beef, chuck roast	2 “	25.4	26.6	28.0
Veal, forequarter	1 “	12.2	13.1	14.3
Mutton, roast, hindquarter	1 “	15.8	16.8	17.9
Pork, roasting, fresh	1 “	17.8	17.4	17.5
Pork, salt	2 “	34.4	32.4	33.0
Bacon, best, smoked	1 “	23.5	22.9	23.1
Lard, pure leaf	2 “	39.8	36.0	36.2
Eggs, fresh	1 doz.	30.8	32.1	33.4
Eggs, packed	1 “	28.3	27.2	30.4

Butter, dairy, tub	2 lb.	52.4	53.4	59.2
Butter, creamery prints	1 “	31.1	32.0	34.8
Cheese, Canadian, old	1 “	17.5	18.6	21.0
Cheese, Canadian, new	1 “	17.0	17.5	19.6
Bread, plain white	15 “	64.1	64.5	61.5
Flour, ordinary family	10 “	32.0	33.0	33.0
Rolled oats	5 “	21.5	21.5	22.0
Rice, good medium	2 “	10.4	10.6	11.4
Beans, handpicked	2 “	10.0	10.6	11.4
Apples, evaporated	1 “	11.8	13.0	13.6
Prunes, medium quality	1 “	11.8	12.1	13.0
Sugar, granulated	4 “	24.0	24.0	26.0
Sugar, yellow	2 “	10.8	10.8	12.0
Tea, black	¼ “	6.2	6.2	7.5
Tea, green	¼ “	7.5	7.5	7.5
Coffee	¼ “	8.7	8.7	9.4
Potatoes	2 pks.	28.2	47.1	51.6
Vinegar, white wine	⅛ pt.	.7	.7	.8
All foods		$6.749	$7.009	$7.407
		c.	c.	c.
Starch, laundry	⅓ lb.	3.1	3.1	3.2
Coal, anthracite	1/16 ton.	39.7	41.0	51.1
Coal, bituminous	1/16 “	34.4	35.5	36.7
Wood, hard, best	1/16 cord.	41.2	43.0	42.1
Wood, soft	1/16 “	25.5	30.7	30.1
Coal oil	1 gall.	24.3	23.2	22.7
Fuel and lighting		$1.651	$1.734	$1.827
Rent		3.810	4.120	4.372
Grand total		12.241	12.894	13.638

It will be seen that a weekly budget which would have cost $12.24 in 1910, cost $12.89 in 1911, and $13.63 in 1912. The increase in 1911 over 1910 was 6.1 per cent., and in 1912 over 1911, 5.8 per cent., amounting to 63 cents in 1911 and to 74 cents in 1912.

An interesting side-light is thrown on the price movement of 1912 by noting the number of articles which showed increases or decreases in average price or remained unchanged compared with 1911. Altogether, 287 articles are available in the present report and its predecessor for such a comparison. Of this total, 180 showed increases, 55 showed declines, while 52 were unchanged. In other words, 63 per cent. of the number advanced, 19 per cent. declined, and 18 per cent. remained the same. In a similar list last year, only 45 per cent. advanced, while 30 per cent. declined and 25 per cent. were stationary.

These results are obtained by the Ottawa statisticians with what may be considered a very modest basis of calculation. The weekly cost of living for the average family of five probably looked more formidable than thirteen dollars and sixty-three cents.

The two features of the British report, are that the rise in the cost of living has been world-wide and greatest in Canada. The gain has been greater in foreign countries, with the exception of France, than in Great Britain. The greatest increase has been in Canada, Austria-Hungary, the United States, and Japan. Since 1900 the rise in Austria-Hungary has been 35 per cent.; Belgium, 32 per cent.; Germany, 30 per cent.; Italy, 20 per cent. In the same period the British and French rise has been only 15 per cent. Canada heads the list with a rise of 51 per cent. Australia and New Zealand show comparatively modest rises of 16 per cent. The increase in Canada, in fact, is the largest for any part of the world.

The compilers of the report admit that they have had difficulty in bringing together diverse figures and values from all parts of the empire into a general comparison. Their conclusions, however, if not absolutely reliable, are none the less interesting.

For instance, taking 100 as an index number, we find the following changes in the level of food prices since 1900:—

	1900.	1905.	1912.
United Kingdom	100	103	115
France	100	97	115
Germany	100	114	130
United States	100	113	...
Canada	100	111	151
Australia	100	101	116
New Zealand	100	107	116

As regards changes in the cost of housing and clothing, the information available is too limited and fragmentary to admit of international comparison.

ICE CREAM AND BUTTER

There are several reasons why Canada has become an importer of butter. The growth of the home market is one, the lack of the farmers' enterprise is another. The increase in the consumption of ice cream is a third. Statistics of the cream and ice cream trade in twenty-four Canadian cities, collected in 1912, show that the manufacture of ice cream in these places uses up cream that would make 1,500,000 pounds of butter, or over 4,000,000 pounds of cheese. This estimate takes no account of the hundreds of similar smaller businesses in the various towns of the Dominion. The managements of these ice cream establishments report that their trade in 1912 showed an increase of 70 per cent. over 1911, notwithstanding it was a cool season. It is estimated that in the present year Canada will import approximately 7,000,000 pounds of butter, the bulk of which will come from New Zealand. The dairy farmer in Canada should not have to worry about his market.

SMALL CHANGE

The revival of the piano trade must not be confused with the current plethora of notes.

They seem to know in England all about the Canadian "cyclone," of which we still have to learn.

* * * *

A Toronto daily says "The West is all right." That is the kind of stuff that makes the West justly indignant.

* * * *

Calgary should do without a stock exchange. Toronto and Montreal exchanges have all they can do to earn their salt.

* * * *

A Londoner says he has seen "more sloppy business come from Canada than is sent over by any other country, excepting Turkey"—some critical grease, that.

* * * *

The Port Arthur real estate men got sixty automobiles and invited the public to take a look at the recent developments—a pretty good way to bridge the quiet days.

* * * *

There is a man on one of Thunder Bay Islands who claims he was placed there on the island by a Port Arthur doctor whose name he cannot remember and that he was told he had an incurable disease and must remain on the island until liberated. This must be a bad case of subdivisionitis.

BRITISH COLUMBIA'S FOREST WEALTH

Commercial Considerations—Soil, Climate and Growth—Reforestation is Not Yet Necessary

Over one hundred million acres of wood land, of which upwards of sixty-five million acres may be regarded as actually or potentially capable of producing merchantable timber, is an estimate of British Columbia's lumber resources, though, outside of this, the land is not of value. On this area nature has been busy for a great many years storing up what is to-day one of the greatest of the few extensive reserves of commercial timber left in the world. It is estimated that this area contains over three hundred billion feet board measure of timber, comprising over half the standing timber of Canada. When the question of forest planting is linked with such a resource, it becomes of interest, even though the importance of planting to the perpetuity of the resource yet remains to be seen.

Consideration of Reforestation.

The matter of reforestation has been considered in connection with British Columbia from three points of view:—1—Silvicultural. 2—Financial. 3—Economic.

Owing to a very favorable combination of soil and climate, nowhere, at least in the temperate zone, do trees grow more rapidly and persistently than on the Pacific slope of North America; nowhere is natural reproduction more prolific and vigorous. In fact, this very readiness of nature to undertake the work renders discussion almost superfluous.

However, it has been demonstrated that reforestation is practicable in British Columbia. Not only would it be possible to reproduce those trees which are indigenous to the soil, but also other exotic trees such as the hardwoods.

Arriving at Conclusions.

But, in a province which is cutting as yet only one-fifth of the annual growth of its forests, it is naturally hardly necessary for man to undertake to facilitate the reproductive processes of nature.

It may be concluded, then, that artificial reforestation is neither necessary nor, relatively speaking, desirable over the major part of British Columbia to-day. With regard to the three considerations mentioned above, the following conclusions have been arrived at:—

First, forest planting in British Columbia is silviculturally possible, hardwoods may be grown as well as softwoods; second, forest regeneration in British Columbia is financially practicable, as also is forest planting; third, forest planting is not now, in general, necessary, nor is it the most profitable way to spend time, energy or money in British Columbia.

WESTERN CANADA'S PAYING POWER

This Fall it is Likely to be Greater Than Hitherto—Outlook is Splendid

Excellent conditions in Western Canada were reported in an interview which *The Monetary Times* had the other day with Mr. C. W. Rowley, manager of the Winnipeg branch of the Canadian Bank of Commerce. Present indications, he said, are for a crop above the average, which will grade well and be inexpensive to handle. Mr. Rowley is a keen, conservative observer, and the utmost reliance can be placed in his reports and opinions.

"From all reports that we have received from our branches, customers and others who have travelled over the country," he continued, "we have no hesitation in saying that unless some mishap occurs between now and the time the farmers deposit their dollars or cents in the bank, the West will have as great, if not greater, paying power than it has in the past. The last month or six weeks has been as nearly ideal as possible.

Reduce Harvesting Expense.

"The grade will probably be better than usual, the straw is short and that will reduce the expense of harvesting. Add to this the improvement in mixed farming and cattle, sheep and hog raising that has taken place during the past year, and the West should be able to pay considerable of its debts and ease things materially in the East by so doing. Of course there will be districts and individuals whose crop will not come up to the average, but this happens in all countries every year. Possibly it is on account of drought, or too much moisture or hail or some cause over which the farmer has no control, but I am satisfied in the majority of cases it is lack of knowledge, industry and method or poor management on the part of the farmer.

Safe, Sane and Sound.

"I am firmly convinced that Canadian conditions are on a safer, saner, sounder basis to-day than they have been for some time. Everybody is working a little harder and a little longer and cutting out extravagant habits and reckless expenditures, and all these things combined mean an easing of general conditions throughout Canada, no matter what the financial conditions may be elsewhere, and also that the next ten years in Canada will show a greater development along immigration, agricultural and mercantile lines than during the past ten years."

GOVERNMENT ELEVATOR AT PORT ARTHUR

It Will Be Ready This Month—Can Unload Twenty Cars Simultaneously

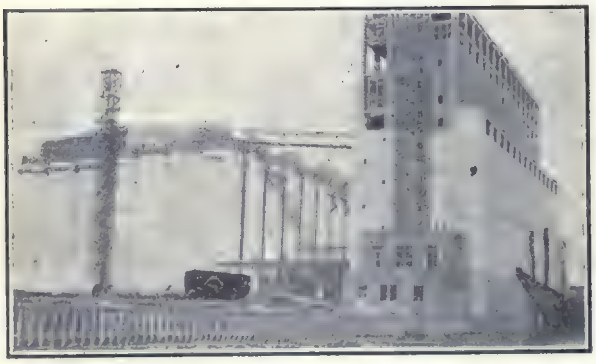
The Dominion Government grain elevator at Port Arthur is nearing completion, and from present indications will be able to handle grain by September 20th. The structural work is almost finished, and most of the machinery is on the site, and is now being put in place. One force of men is at work installing the high potential power line to the plant, while another is laying tracks, which will give the Canadian Pacific Railway access to the elevator. The Canadian Northern Railroad already has its tracks laid into the elevator, and arrangements will be made later to give the Grand Trunk Pacific Railroad a similar connection.

Building the Government Elevator at Port Arthur.

The elevator is of reinforced concrete construction throughout, except that in the walls of the working house brick panelling is used in a skeleton of reinforced concrete. This latter construction was used to facilitate rapid erection of the house, and adds to its appearance as well. So inflammable material is included in either building or machinery.

Operated by Electric Power.

The elevator will be operated by electric power throughout, and a separate motor has been installed for each machine. Twenty cars can be unloaded simultaneously, the unloading capacity of the house being about forty cars per hour. An interlocking device connecting the valves of the car hoppers prevents any possibility of mixing the contents of one car with that of another. The normal loading capacity to boats will be about 75,000 bushels per hour, but for the first hour this can be increased to 115,000 bushels.



The Government Elevator at Port Arthur will be Opened this Month.

The working house towers to a height of 185 feet above the water level. It contains seventy-five circular bins of about 7,000 bushels capacity each, fifty-six interspace bins of 3,000 bushels and thirty-six outer-space bins of 1,500 bushels capacity each. Its total capacity is about 750,000 bushels. The storage house has seventy circular bins, each 24 feet in diameter and ninety feet in height of 30,000 bushels capacity, together with fifty-four interspaces of about 8,000 bushels capacity each. The total capacity of the elevator is 3,250,000 bushels. In designing the elevator especial provision was made for a large number of bins of small capacity for storing small lots of grain that may require separate binning.

The working house is equipped with ten hopper scales of 2,000 bushels capacity, with a garner of equal capacity over each scale. The elevator legs are as follows: five for receiving, five for shipping, five for cleaning, one for screenings, one for drying, one for oats, and two for flax. Fifteen sets of receiving cleaners are provided for cleaning oats, wheat and barley, and fifteen additional cleaners can be installed when they are needed. Special machines are also installed for separating oats from wheat, in addition to two screenings separators and two flax separators.

At the south end of the working house a drying plant is installed in a separate building. This has a capacity of 48,000 bushels per day, and is for drying damp, tough or wet grain, and putting such grain in condition for storage.

Will be Busy Site.

A revetment wall is being built around three sides of the site, which contains about 32½ acres. The site was formerly covered by water, but is now being filled in level with the top of the revetment wall. A slip 1,200 feet long will provide ample space for the largest lake boats alongside the working house. Four lines of railroad tracks extend through the house and beyond it for a distance of 800 feet, so that eighty cars can be spotted at one time, and taken into the house by the car-pullers. Provision has been made for increasing the capacity of the elevator to a total of ten million bushels, should additional capacity be required, and the site affords ample space for increasing this capacity still farther.

◆

GRAND TRUNK CHAIRMAN ON CONDITIONS

Payment for Rolling Stock—Bank Rate—Company's Future Intentions

Monetary Times Office,
Montreal, September 4th.

That conditions for obtaining money are improving would seem to be the conclusion from the statement of Mr. A. E. Smithers, chairman of the Grand Trunk Railway, who reached here last week from England. At any rate, in explaining the circumstance that his trip is later in the season than usual, he said:

"I was detained in England later than usual to attend to arrangements for the payment of rolling stock ordered last spring. I accomplished this by issuing one and one-half million five per cents. at 98 and another half million at 98½. The issue was oversubscribed. The payment was for some 8,000 cars and 50 engines."

While it was known here that the Grand Trunk Railway flotations as well as others had been successful recently in London, the matter was brought home all the more by Mr. Smithers' presence as well as by the somewhat more cheerful view being taken of market affairs, recently, and the street interpreted the absence of warnings about the difficulty of obtaining money as a good augury.

Situation in England.

Furthermore, Mr. Smithers spoke most hopefully of the situation in England, pointing out that trade was greater last year than ever before, imports and exports amounting to more than £120,000,000,000, and that unless there was a falling off during the remainder of the year, the present year would register another high record.

Mr. Smithers also spoke of the financial strength of the Bank of England, remarking upon the effectiveness of the 4½ per cent. rate in attracting gold from all parts of Europe and in fact from practically all over. The result was that the proportion of reserve to liability was being splendidly maintained and, notwithstanding what might be the case elsewhere, they had never fallen below the levels of a year ago.

Grand Trunk and Terminals.

Replying to rumors which had been circulating to the effect that the Grand Trunk Pacific entertained the intention to divert the western trade of Canada at Cochrane Junction through United States ports, he denied that such was the case. He said the company realized that its success depended upon the good-will of the people and there was absolutely no intention to act in the manner suggested.

It would appear also that no action has yet been taken regarding terminals at the city of Quebec. No proposition has yet been placed before the Grand Trunk Pacific by chairman Leonard of the Transcontinental Railway Commission. So far as is known, chairman Leonard is still in negotiation with the Canadian Pacific Railway concerning a union station, including the building of a terminal, but up to the present nothing definite has yet been submitted to the Grand Trunk Pacific, either in this connection or in connection with the construction of railway shops at St. Malo.

◆

A branch of the Bank of British North America has been opened at James Bay, Victoria, B.C., under the management of Mr. E. J. M. Williams.

LAURENTIDE COMPANY'S SATISFACTORY REPORT

Company's Expansion During Year—Markets and Outlook for Products

Monetary Times Office,
Montreal, Sept. 3rd.

The Laurentide Company for the year ended June 30th, 1913, showed almost the same profits as for the previous year. These were 10⅓ per cent. on the common stock. Owing to the fact that the amount paid out in dividends was larger than the previous year, the surplus earnings for the year, after write off, were $31,487 less than a year ago, amounting to $163,085, or 2.22 per cent. on the capital stock. This surplus, being added to that at the beginning of the year, makes a total of $355,658. The manufacturing account was as follows:—

	1911-1912		1912-1913	
Net for groundwood, sulphite pulp, paper and cardboard		$ 910,846		$ 911,998
From lumber and miscellaneous		98,706		104,761
		$1,009,552		$1,016,758
Bond interest and other charges	$152,099		$129,973	
Betterments to plant	102,880		128,700	
		255,979		258,67
Profits for the year		753,573		758,085
Dividends		540,000		576,000
		213,573		182,085
Depreciation		20,000		20,000
Surplus for year		$193,573		$162,085

It will be observed from the above that about $25,000 more was expended in betterments to plant this year than was expended last year. It will be remembered that an explosion took place in the sulphite plant during the year, thus interfering with earnings. It will also be remembered that recently the company made a new issue of stock for the purpose of increasing the water power of the company.

The above statement, showing total earnings of 10⅓ per cent. on the stock and surplus for the year of 2¼ per cent., after liberal allowances for depreciation, should be encouraging to shareholders, in view of the fact that the company will be in a very strong position with respect to water-power after the present works have been completed.

Expenditure and Expansions.

In this connection it is worthy of comment that, in addition to the amount shown in the above statement as expended for betterment, no less than $471,728 was expended during the year on capital account for the new power development, $62,735 being expended for the enlargement of the sulphite mill, $112,162 for extension to ground wood mill, $71,379 for extension of steam plant, $160,912 for additional timber lands, and $53,179 for real estate at Grand Mere.

The annual meeting of the company took place on Tuesday last, Sir William Van Horne presiding. Mr. George Cahoon, vice-president, speaking informally after the meeting, stated that the explosion in the sulphite plant had disorganized that branch of the business for at least six weeks, during which time did they not only lose the profit on the sale of sulphite, but they had to purchase the company's requirements from outside, paying very high prices. He also stated that the power development was making satisfactory progress, that he had secured the opinion of the best experts, all of whom agreed that the proposition was a simple one, and that the cost of development promised to be less per horse-power than any similar power development on the continent.

Business Was Steady.

Notwithstanding the large number of paper companies that had come into existence during the past year, the Laurentide output, said Mr. Cahoon, had not been, excepting the new print department, appreciably affected. The Laurentide's diversity of product and their market all over the world, made their business a steady one.

He saw no difficulty of earning from the paper business, alone, the money necessary to pay dividends and interest on the cost of the power development, so that when the time came to sell their power, what they get out of it would be so much additional earnings.

The directors and officers of the company were re-elected as follows: Sir William C. Van Horne, president; Mr. George Cahoon, vice-president; and Messrs. James Ross, R. B. Angus, Charles R. Hosmer, Edwin Hanson, and F. A. Sabbaton.

STEAM BOILER INSURANCE TRANSACTED IN CANADA LAST YEAR

Eight companies are transacting steam boiler insurance in Canada under the jurisdiction of the Dominion Insurance Department. Their premiums for 1912 amounted to $135,377. Over $35,000,000 of steam boiler insurance was in force in this country at the end of last year. The losses incurred during 1912 totaled $158,512.

At a recent meeting at Quebec for the International Casualty and Surety Underwriters, Mr. Brainerd presided at the meeting of the steam boiler section. Mr. W. H. Boehm spoke on "Factors of Safety in Engineering and Insurance." He announced that an important improvement in the present condition of transacting steam boiler and flywheel business is about to take place. "The American Society of Mechanical Engineers," he said, "has appointed a commission to prepare a standard code for the construction and safe operation of steam boilers. This commission consists of Mr. John A. Stevens, consulting engineer; Professor R. C. Carpenter, of Cornell, and Professor E. F. Muller, of the Massachusetts Institute of Technology, representing the steam users' interest; Mr. C. L. Huston, representing the steel manufacturers' interest; Mr. H. C. Meinholtz and Mr. Richard Hammond, representing the boiler manufacturers' interest: and I have been accorded the honor of representing the boiler insurance interest. The preliminary work has been completed, and the code is now being put in tentative form. When this has been done I shall have the pleasure of submitting it to you in order that we may secure the advantage of your criticisms and suggestions before the new code is put into final form."

The following officers of this section were elected: Chairman, Lyman B. Brainerd; standing committee, C. H. Holland, Edson S. Lott, Duncan Reid, F. J. Hillas.

Mr. Boehm says:—"The steam-boiler and fly-wheel business has been in more or less of a demoralized state ever since the competitive writing of these lines began. There has been no co-operation as to insurance requirements for the proper construction and safe operation of boilers and fly-wheels; and there has been no interchange of experience or statistics, or opinions as to the rates for which steam-boiler and fly-wheel insurance could be written with safety. Company after company has entered the field, depressed rates, demoralized the business generally and then retired. The cost of boiler and fly-wheel inspection has steadily increased on account of the increase in the hotel and traveling expenses of inspectors, and the increasing mass of data required to be placed on file by state authorities. The loss ratio has increased on account of the greater amounts that must now be paid for personal injury losses under the new liability and workmen's compensation laws, and for other reasons. Rates have steadily decreased until they are now too near the danger line either for safety of the companies, or their policyholders. The remedy for this condition, not only as respects steam-boiler and fly-wheel insurance, but as respects other lines of the casualty and surety business, lies in co-operation."

The following table gives details of the steam-boiler insurance in Canada last year:—

(1912)	Premiums of the year	Number of policies new and renewed	Amount of policies new and renewed	Number of policies in force in Canada at date	Net amount in force at date	Losses incurred during the year	Claims paid	Unsettled claims not resisted
Boiler Inspection and Insurance Company	$73,367	1,191	$11,671,200	2,586	$23,701,200	$80,984	$1,221	$10,000
Canadian Casualty and Boiler	29,706	1,378	11,498,767	1,035	7,714,800	946	1,046	none
Fidelity and Casualty	15,930	242	3,611,000	170	2,501,000	850	450	400
Hartford Steam Boiler	1,200	.....	....	.....	....	75,000	none	75,000
Maryland Casualty	12,190	138	2,251,800	210	3,519,700	332	1,332	none

WESTERN CANADA'S MUNICIPAL LOANS

Suggested Organization of Authority to Advise, Investigate and Approve Schemes and Consolidate Municipal Loans for Flotation

By R. O. WYNNE-ROBERTS, M. Inst. C.E., M. Can. Soc. C.E., F. R. San. Inst., Consulting Engineer, Regina.

THIRD ARTICLE

In my previous articles on the subject of municipal loans, I referred to the procedure observed in this and other countries with respect to the authorization of loans and to the suggestions made concerning the possibility of the governments assisting municipal authorities by floating consolidated loans on their behalf.

This time I desire to deal further with the matter of assisting the municipal authorities by the creation of an organization to advise, investigate and approve of schemes and consolidate the municipal loans for flotation.

As already stated, in England and Wales, no municipal authority can borrow money for public works without first obtaining the approval of the Local Government Board. When the scheme is approved and the amount of the loan required is sanctioned by the Local Government Board, then the authority may approach the Public Works Loan Commissioners which is a separate Government department and which "if it deems fit" may advance money at from 3½ to 3¾ per cent. per annum. This money is voted by Parliament in each session out of the Local Loans Fund controlled by the National Debt Commissioners. It is evident that this money is intended for small municipalities, because the assessable value must not exceed a certain sum ($1,000,000) and the money must be for certain works. These limitations, however, are sometimes relaxed.

Question of Assessable Value.

As the assessable value in England and Wales is based upon the rack rent and not on the actual value of the properties, the limit above mentioned would in Canada, consequently be equivalent to about $12,000,000 or $15,000,000, but it may be possible that after taking various conditions into consideration the British limit would be equal to about $20,000,000 in Western Canada.

As the cities in Saskatchewan are the only instances where the assessable value is $20,000,000 or over, then such limit would apply only to the towns and villages and probably the same condition would obtain in other Western Provinces.

In England and Wales every scheme is investigated locally by an Engineering Inspector before the same is approved and the loan is sanctioned. When the indebtedness of the municipality does not exceed one-half of the borrowing powers, the local enquiry is not insisted upon, otherwise the above procedure must be observed. In Scotland, however, the Local Government Board only investigates by local enquiries those schemes for which loans from the Public Works Loan Commissioners are applied for, and the latter department usually acts on the Local Government Board's recommendation.

I have before me a copy of the 37th annual report of the Public Works Loan Commissioners (1911-12) from which the round figures given below have been extracted. The following are a few of the amounts issued by the Public Works Loan Board by way of loans up to 31st March, 1912:—

OBJECT	ENGLAND	SCOTLAND	TOTAL	OUTSTANDING
Education - - -	$160,000,000	$32,000,000	$192,000,000	$100,000,000
Electric Light - -	9,000,000	800,000	9,800,000	6,000,000
Housing - - -	23,000,000	1,500 000	24,500,000	6,500,000
Public Health Works	184,000,000	16,000,000	200,000,000	90,000,000
Other Purposes - -	—	—	151,000 000	62,000,000
TOTAL - -	—	—	$577 300,000	$264,500 000

Average Interest Rate.

The average rate of interest charged in 1911-12 was slightly over 3½ per cent., although over 15 per cent. of the outstanding balances bear only 2¾ per cent., 27 per cent. at 3¼, 39 per cent. at 3½, and 11 per cent. at 3¾, the rest at intermediate rates and up to 5 per cent. interest.

The foregoing statistics are interesting as showing the magnitude of the financial assistance rendered by the British Government to the Municipal authorities.

During the year 1911-12 about $12,000,000 were advanced.

While the aggregate amount lent is great the number of authorities actually helped in this manner is not stated. During the 37 years a large number of the loans advanced by the Public Works Loan Board had matured but there are left:

Educational loans from 1,120 authorities
Electric work from 50 authorities.
Housing loans from 1,150 authorities.
Public Health loans from 1,900 authorities.

As the authorities in England and Wales and Scotland can go where they please for money, the above figures represent only a fraction of the number of authorities requiring loans and the total amount required. Besides, all large authorities must obtain their loans privately.

What Western Canada Pays.

At present towns and villages in Western Canada pay from 5½ to 8 per cent. for borrowed money, to which must be added a sum for repayment of the loans in proportion to the number of years they are spread over. It will therefore be seen that the burden of capital charges in the West is from 2 to 4½ per cent. greater than in Great Britain. If an assurance can be given that the schemes have been enquired into by an impartial organization, so much the better for the investors, and if any reduction can be effected in the interest so much the better for the ratepayers.

Having given some statistics and facts relating to how British Government assists small municipalities and having previously shown how investigations by an independent Board into schemes of public works result in the authorities obtaining money on very low terms, it may be useful to outline a proposition by which means similar authorities in Western Canada can be assisted.

Personnel of Proposed Board.

In the first place as the personnel of the Board would have to be such as to command the respect and confidence of the public and the investors, it would be desirable to include men who have either been appointed to offices of trust or have been elected by representative societies to positions of honor as an appreciation of their sterling worth and merit, and to add to these, men who by extended experience and training can investigate, report and advise on technical matters, so the proposition is to create and establish a Municipal Board comprising of say:—

The Chief Justice as Chairman,
The Minister of Municipal Affairs or his Deputy,
The Minister of Finance or his Deputy,
The President of the Union of Municipalities,
The second Delegate of the Union of Municipalities,

One person experienced in municipal law and administration, who would also act as Secretary,

One person experienced in municipal finance, who would have charge of the flotation of the loans, and

One person experienced in municipal engineering, who would hold the local enquiries and generally watch the progress of the works authorized.

The Deputy Chairman to be elected by the members.

Clerical assistance and office accommodation to be provided.

The technical members to be paid salaries commensurate with their responsibilities and the advisory members to be paid a fee for attendance and also their expenses.

Government Would Guarantee Loans.

By this means the Government which would guarantee the loans and the municipalities which would receive them, would be represented and could work in harmony. By this means also the confidence of the Government, municipalities and the investors would be established and in the trinity of interests there would be satisfaction.

All municipalities or those where the assessable value do not exceed $20,000,000 should submit to the Municipal Board plans, specifications, estimates and reports of any schemes for which authority to borrow money is applied for.

Where the scheme was satisfactory and the indebtedness (including the amount applied for) did not exceed 10 per cent. of the assessable value, no local enquiry would be held, unless ordered by the Board. In all other cases, local enquiries would be held, at which the municipal officials and others could give their evidence in support or in opposition to the application.

The inspector would report to the Board the result of his investigations and the Board would decide by majority of votes whether the scheme was to be approved, rejected or referred back for amendments. If the Board decided to approve, then it would sanction the loan and the period of repayment.

When the Board had approved of any scheme and sanctioned loans for the same, it would submit a list of the same to the Government Executive for endorsement and the Government guarantee.

Consolidate the Loans.

When all was in order, the Board would consolidate a number of loans and negotiate its flotation on the best possible terms, and pay over to the municipal authorities the proceeds in return for duly authenticated debentures.

By this means the smaller municipalities will no doubt obtain money on more advantageous terms, than at present, as the investors would appreciate the value of the Government guarantee and the value of the security as well as the assurance that the money was for approved schemes.

If this arrangement was adopted, it would be a matter for consideration whether it would be necessary to submit the money by-laws to the ratepayers, because they would have ample protection and further the necessity of obtaining authority from the Department of Municipal Affairs or the Bureau of Public Health would have to be decided, as the schemes could be sent to them for criticism before the Board arrived at any decision.

As the Government through the Board would in this manner be involved in the supervision of the expenditure of the loans advanced, it would be necessary for the Municipal Authorities to have their loan accounts audited by an approved outside auditor twice a year, and the auditor's certificate and report forwarded to the Board. The Engineer to the Board would also from time to time have to inspect the works during execution.

The authorities would repay the loans with interest in a manner to be prescribed by the Board, and in the event of any municipality defaulting, the Board would be empowered to appoint a Receiver to collect the rates on its behalf.

The expense of the Board would be borne by the towns and villages on the basis of their individual assessments, or the Board would have to charge a small additional interest to cover the expense, or the Government would bear the cost as is done in Great Britain. All this would be decided upon by the Legislature when the matter came up for discussion.

If the provinces should consider this proposition worthy of adoption and should Municipal Boards be created, then it is possible that the requirements, stipulations and procedure may differ sufficiently in each province as to become anomalous. With the view to the different Boards acting more or less in harmony in this respect, it would be highly desirable that they should meet in annual conference to discuss various points of mutual interest and thus, as far as possible, prevent any anomalies occurring.

Only one Department to Satisfy.

Such an organization and procedure as is here roughly outlined would be a homogeneous body, the towns and village authorities would have interest in it, and they would have only one department or body to satisfy instead of two as in Great Britain. The Board would be in closer touch with the public and be a little more sympathetic than would be the case if it was purely an official department without representation. The development of sanitary works would be on more co-ordinated lines than is at present possible. The municipalities would have the satisfaction of receiving such information as would be available on prospective schemes, while the investors would have the satisfaction of knowing that the money was invested on undertakings approved by an independent public organization such as they are accustomed to in Great Britain.

◆

UNIFORM MUNICIPAL ACCOUNTING

The Ontario Government will be asked by the Ontario Municipal Association to establish a municipal department with a Minister at its head. Moreover, either the Provincial Administration or the Federal Government will be requested to appoint a commission to devise a uniform system of accounting for municipalities.

Mr. George H. Lees, of Hamilton, said that municipalities were making costly experiments in road-building, sewage disposal, waterworks plants, sales of bonds, accounting systems and other questions. A municipal department would be able to collect a great deal of information which would save the municipalities large sums of money, and a great deal of unnecessary work. He also urged that if a uniform system of accounting were provided it would be possible to publish annually statistics analysing and comparing the cost of civic works and governments.

He also pointed out the necessity for comparative municipal statistics, and recommended that each municipality prepare similar data for every department and sub-department.

AMERICAN AGRICULTURAL FINANCE COMMISSION

Report of Investigation is to be Compiled—Four Canadian Provinces are Represented

Plans have been perfected for the compilation of the report of the United States Federal commission on agricultural co-operative finance and agricultural co-operative associations, following the completion of its labors abroad. The organization has established headquarters in Washington with the senate committee on interstate commerce; the American commission on agricultural co-operation, which has co-operated with the Federal commission in its investigation into European methods, has also established itself in Washington, and will compile a report on the subject to be submitted to the governors of thirty-six States and the premiers of four Canadian provinces which were represented by delegates on the United States commission. The members of the commission recently returned from a three months trip abroad, having arrived home from Europe on July 26. In their quest for information on rural credit systems they visited Italy, Hungary, Austria, France, Germany, England, Ireland and Wales. Sub-committees also toured Russia, Denmark, Switzerland, Holland, Belgium, Norway, Sweden, Egypt, Spain and Scotland. A complete report is to be made to Congress by the commission before the end of the year. Since the commission's return, a statement has been issued by its Director General Dr. C. J. Owen, to the State governors' and farmers' organizations, in which he says:—

Value of Organized Rural Population.

"The commission is deeply impressed with the vital importance of a thoroughly organized and united rural population. In this respect the countries of Europe offer a lesson which may not long be disregarded in America without serious consequences. The agricultural interests of most of the European countries visited by the commission are organized along one or more of the following lines: Credit, production, distribution and social organization for the betterment of country life.

"It is the opinion of many of the leaders of this movement in Europe that the question of rural credit ought not to be divorced from co-operation for business purposes and the general organization of community life in rural districts. In some countries visited, agriculture and country life interests generally are thoroughly organized and co-ordinated. The studies of the commission emphasize the necessity of defining the functions, on the one hand, of the government, and on the other of voluntary organizations, in promoting the development of country life. In some of these countries great emphasis is placed upon the value of voluntary associations and such State aid as involves governmental control over the activities of rural organizations is deprecated as tending to stifle the initiative of the people.

Modify European Systems.

"Rural conditions, environment and temperament in Europe differ widely in the various countries and also differ from rural conditions, environment and temperament in America as conditions differ in our several States and provinces; therefore, it may be necessary in some cases to modify these European systems if they are to be adapted to meet the needs of American farmers. At the same time, co-operative effort among the farmers of America might well be more generally employed and the facts gathered should be of great value in developing methods suited to the needs of the farmers in the several sections, States and provinces.

"To this end, the United States Commission, with a membership in the thirty-six States and in four provinces of Canada, has effected an organization, with headquarters in Washington, and invites the aid and co-operation of farmers and all agricultural organizations and persons concerned in promoting a more prosperous and contented rural life as the enduring basis of our material, social and civil welfare. The commission has selected two committees which will devote their entire time to drafting the final report regarding the investigation.

◆

CROPS IN NEW BRUNSWICK

The farmers of New Brunswick are harvesting excellent crops, and much larger ones than was anticipated in the early summer. The potato crop will probably be the largest one on record, and already the question of outside markets is receiving attention. The United States market will be of some advantage if the new tariff in that country is adopted, although there will still be a duty on New Brunswick potatoes. The Munson Line has arranged to give a monthly service between St. John and Cuba for the benefit of potato shippers.

AUGUST FIRE LOSSES

Total is Over Three Million—Many Large Fires

The Monetary Times' estimate of Canada's fire loss during August amounted to $3,034,775, compared with July loss of $2,579,698, and $1,164,760 for the corresponding period of last year. The following is the estimate for the August losses:—

Fires exceeding $10,000	$2,405,022
Small fires	233,915
Estimates for unreported fires	395,838
	$3,034,775

The following are the monthly totals of the losses by fire during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
January	$ 1,275,246	$ 2,250,550	$ 3,002,650	$ 3,913,385
February	750,625	941,945	1,640,153	2,037,386
March	1,076,253	852,380	2,261,414	1,710,756
April	1,717,237	1,317,900	1,355,055	1,470,622
May	2,735,536	2,564,500	2,251,815	2,123,868
June	1,500,000	1,151,150	4,229,412	3,069,446
July	6,386,674	5,384,300	1,741,371	2,579,698
August	1,667,270	920,000	1,164,760	3,034,775
September	894,125	1,123,550	883,949	....
October	2,195,781	580,750	1,416,218	....
November	1,943,708	1,506,500	1,184,010	....
December	1,444,860	2,866,950	1,769,905	....
	$23,593,315	$21,459,575	$22,900,712	$19,939,936

Large Fires.

The fires at which the loss was estimated at $10,000 and over were:—

Athabasca Landing, Alta.	business section	$500,000
Montreal, Que.	building	70,000
Toronto, Ont.	August fires	136,356
Wilkins, N.S.	box factory	50,000
Montebello, Que.	twenty-nine buildings	80,000
Montreal, Que.	factory	100,000
Erin, Ont.	business section	30,000
Hamilton, Ont.	foundry	20,000
Orillia, Ont.	sheds, etc.	10,500
Montreal, Que.	iron works	100,000
North Battleford, Sask.	store	15,000
Brock, Sask.	business section	100,000
Cranbrook, B.C.	lumber mill	35,000
Charlottetown, P.E.I.	warehouse	30,000
Charlottetown, P.E.I.	factory	25,000
Cobalt, Ont.	hotel, etc.	50,000
L'Epiphanie, Que.	sash and door factory	25,000
Montreal, Que.	lumber mill	30,000
London, Ont.	hotel stables	10,000
Moose Jaw, Sask.	business block	20,000
Sault Ste. Marie	garage	10,000
Wardner, B.C.	planing mill	30,000
Hepworth, Ont.	freight sheds, etc.	10,000
Campbellton, N.B.	stores, etc.	10,000
Calgary, Alta.	garage	22,000
Stratford Beach, Ont.	factory and cottages	250,000
Humboldt, Sask.	business section	50,000
Harcourt, N.B.	houses, etc.	10,000
Orillia, Ont.	storehouse	16,166
Revelstoke, B.C.	hotel	40,000
Holland, Man.	elevator	10,000
Amherst, N.S.	building	14,000
Vancouver, B.C.	business block	30,000
Vancouver, B.C.	engineering works	10,000
Hamilton, Ont.	automobile showrooms	15,000
Midland, Ont.	lumber yards	250,000
Bridgeburg, Ont.	planing mill	20,000
Goderich, Ont.	furniture factory	50,000
Sherbrooke, Que.	three residences	10,000
Sydney, N.S.	Y. M. C. A. building	30,000
Ottawa, Ont.	sash and door factory	
Maryfield, Sask.	business section	20,000
Montreal, Que.	factory	17,000
Montreal, Que.	sheds	14,000
Montreal, Que.	building	15,000

Many Buildings Destroyed.

The structures damaged and destroyed included: 90 houses, 45 barns, 27 stores, 12 factories, 10 hotels, 8 sawmills, 5 business blocks, 4 garages, 3 schools, 3 lumber yards, 3 sash and door factories, 3 steamers, 3 restaurants, 2 stations, 1 transformer house, 1 elevator.

There were destroyed: Horses 73, cows 8, calves 9, sheep 16, pigs 20, chickens 200, automobiles 18, 12,400,000 feet of lumber, bushels of wheat 1,600, hay 220 tons, waggons 3, buggies 3, 5 railway cars, 1 grain separator. Of the presumed causes, 39 were attributed to incendiaries, 20 lightning, 18 children and matches, 6 sparks, 3 dropped cigars or cigarettes, 3 spontaneous combustion, 3 mice gnawing matches, 1 each overheated dry kiln, motor burnt out, oil stove exploded, oil stove, picker, defective wiring, gas explosion, friction, defective chimney, candle.

During August 29 lost their lives through fire.

The following are the monthly totals compared with 1909, 1910, 1911 and 1912:—

	1909.	1910.	1911.	1912.	1913.
January	16	27	27	27	14
February	8	15	12	11	21
March	16	20	18	24	22
April	18	37	20	15	11
May	21	15	28	18	33
June	16	52	13	6	18
July	4	15	110	9	9
August	17	11	22	16	29
September	10	10	13	6	..
October	26	16	17	21	..
November	34	19	20	22	..
December	33	19	17	28	..
Totals	219	256	317	203	157

The fires at which the fatalities occurred were:—

Revelstoke, B.C.	burning building	3
Montreal, Que.	coal oil set clothing alight	3
Brockville, Ont.	burning building	1
Montreal, Que.	gasoline stove explosion	1
Grand Forks, B.C.	gasoline stove explosion	1
London, Ont.	filling oil stove	1
Strathmore, Alta.	burning building	3
New Dundee, Ont.	set clothing alight	1
Edmonton, Alta.	lit fire with coal oil	1
St. Johns, I. of Orleans, Quebec	burning building	7
St. Marys, Ont.	oil stove caught fire	1
Montreal, Que.	burning building	1
Montreal, Que.	burning building	1
Little River, N.B.	set clothing alight	1
Montreal, Que.	set clothing alight	2
Regina, Sask.	set clothing alight	1
		29

Provincial Fire Losses.

The fire waste in each province for first eight months of this year has been estimated by *The Monetary Times*, as follows:—

Ontario	$6,067,461
Alberta	3,357,028
Quebec	3,201,576
Manitoba	1,057,112
Saskatchewan	1,867,065
Nova Scotia	1,364,651
New Brunswick	909,230
British Columbia	768,234
Prince Edward Island	447,567
	$19,939,936

◆

CANADA INTERLAKE LINE

Payment has been made to those shareholders of Canada Interlake Line, Limited, who deposited their shares for cash under the recent offer made to them, write Messrs. A. E. Ames and Company, Toronto. It has taken a little longer than was anticipated to complete the organization of the new Canada Transportation Lines, and it will, therefore, be about two months before those who elected to take securities of this company in exchange for their Interlake shares will receive their new certificates. It will be recalled that in the issue of Interlake shares which was made in December last, the preference stock was offered at par, carrying a bonus of 15 per cent. in common stock, and holders have now received 107½ in cash, while many investors who purchased the preference stock at from 88 to a little over 90 in the open market have received $100 a share. This has, no doubt, been pleasing to the holders, in view of the fact that many substantial securities have shown declines in the quiet markets which have obtained during the current year.

◆

The eleventh annual convention of the Dominion Association of Chartered Accountants opened at Winnipeg on Tuesday.

An English corporation, the Canadian Resources and Development Company, has taken hold of Port Arthur's housing problem. The firm has a tract between the two cities cleared of bush and opened up with well made roads. They are embarking on building high-class workmen's cottages.

MUNICIPAL FINANCING

Ottawa Disposes of Its Issue to Toronto and Boston Bond Houses—Raising Debenture Interest

Ottawa disposed of its issue of debentures for general civic improvements, etc., amounting to $928,706, to Messrs. G. A. Stimson and Company, of Toronto, for 94.55, and the school bonds, amounting to $236,000, to Messrs. N. W. Harris and Company, of Montreal and Boston.

The bids were as follows:—

	Civic bonds.	School bonds.
Geo. A. Stimson & Company, Toronto...	94.55	
N. W. Harris & Company, Montreal and Boston	92.379	92.379
Bank of Ottawa	91.77	91.77
Dominion Securities Corporation	91.43	91.43
Wood, Gundy and Company, Toronto	92.03	90.59
Murray Mather and Company, Toronto ..	90.27	90.27
E. H. Rollins and Company, Boston	94.47	90.47
Dominion Bond Company, Montreal	90.49	
C. Meredith and Company, Toronto	87.05	

The different purposes and terms of years for which the amounts will be spent are as follows:—City's share local improvements, $142,159.89, 20 years; local improvements, $145,150.23, 20 years; local improvements, $860.43, 20 years; local improvements, $17,545.21, 20 years; local improvements, $144,590.64, 20 years; water works (aqueduct, etc.), $85,000, 30 years; annex, Howick Hall (Lansdowne Park), $12,000, 20 years; electric, $150,000, 30 years; Keefer Street drain, $2,400, 20 years; water works, $78,000, 30 years; water works, $35,000, 30 years; artesian wells, $15,000, 20 years; water works, $4,000, 30 years; water works, $8,500, 30 years; Preston Street sidewalks, (moving), $10,000, 20 years; bacteriological laboratory (equipment), $10,000, 20 years; Smallpox Hospital, (equipment, etc.), $10,000, 20 years; Kent Street relief sewer, (extension), $7,500, 20 years; parks, $51,000, 40 years; total, $928,706.40.

Calgary's Needs and Proposals.

Saturday, September 27th, has been chosen as the date upon which the ratepayers of Calgary will express their wishes with regard to the $2,300,000 by-laws for various municipal improvements. It is thought by having the vote on Saturday, to obtain a thoroughly representative opinion. As the city has more than ten thousand qualified resident property owners, the outcome is awaited with interest. The matter of issuing city bonds to citizens was discussed at the meeting of the city's finance committee, and the proposal was received favorably, though no definite action was taken. Information upon the subject will be obtained from other cities. The finance committee decided to recommend that the city solicitor be instructed to petition the Alberta legislature for permission for the city to raise the interest rate on a large block of securities from 4½ per cent. to five per cent. It has been found that the money market will not take 4½s, and that in order to dispose of them they must be raised to fives.

"I think the legislature would give the city power to take that action. They realize the change in the financial situation, so there should be no difficulty in obtaining the consent of the government," suggested one of the aldermen.

A by-law was given readings changing the interest fixed on by-law No. 10 of 1913, from 6 to 7 per cent. at the Point Grey council. This by-law authorized the borrowing of $250,000.

North Vancouver bonds may be placed before the public in units of $100 if the suggestion made to the council is adopted. The treasurer reported there is little or no demand in London for short-time local improvement bonds, and proposed that the issue be sold over the counter in his office. The plan was referred to the finance committee for consideration.

Vancouver May Have Overdraft.

At the end of the present financial year, despite Vancouver's economy, there may be an overdraft which, although not as large as the existing one of $1,631,336.11, will be in the neighborhood of $800,000.

The proposal of the Calloby Advertising Company that Vancouver authorize it to sell local debenture bonds through a publicity campaign was not entertained.

Mayor Hardie and Alderman Williamson, of Lethbridge, are visiting Eastern Canada to dispose of an issue of that city's bonds.

"I see there is some disappointment in Canada at the failure of certain Canadian municipal loans, but with the whole world coming to London for money, with places elsewhere offering higher interest and giving security equal to that of the Canadian municipalities, this was to be expected." So said Lord Northcliffe, at Quebec.

"If it were not for the sentimental interest taken in Canada," he continued, "the loans would not have done as well as they have. Statements made in Canadian newspapers that attempts have been made to crab Canadian loans in London are preposterous."

Changes in Canadian bonds last week are cabled as follows:—Dominion of Canada loan, redeemable 1938, 3 per cent., 83-85; Province of Quebec issued, in Paris, 1919, 4½, 100-102; Province of British Columbia, 1941, 3 per cent., 77-79; Dominion of Canada, registered, 1938, 3 per cent., 83-85; Newfoundland inscribed, 1945, 3½ per cent., 90-92; Province of Saskatchewan, registered, 1951, 93-95; Victoria, B.C., sterling bonds, 1920-60, 86-89.

◆

POOR IMITATION OF CANADA'S BANK ACT

That is How Well Known New York Professor Describes United States Currency Bill

That the Glass-Owen currency bill of the United States is a poor imitation of the Canadian Bank Act was the opinion expressed by Professor Joseph French Johnson, Dean of the New York University School of Commerce, Accounts and Finance, a well-known and practical man, in an interview with *The Monetary Times* this week. The professor thought that because Secretary of State Bryan had passed a resolution at the Democratic convention, unfavorable to the establishment of a central bank, the democrats were now trying to frame a banking bill in accordance with the Bryan resolution but in reality on the central bank principle.

Like Twelve Wild Horses.

"We have, in the United States," said Professor Johnson, "tried every financial and banking experiment, except this one. The present currency bill is akin to a man in a vehicle, representing the federal currency board holding the reins of twelve horses but each with a jockey, representing the proposed twelve local boards. All the jockeys will be pulling a different way against the chief driver or the federal board, with what result one can imagine. Every local board will want a maximum amount of gold in times of stress and each district, through its local board, will be fighting the other with that end in view.

"The United States Chamber of Commerce passed a resolution favoring an advisory committee of bankers who would be paid a salary in keeping with the office, who would sit at the meetings of the federal board, be constantly in touch with and advise them. An advisory committee will be appointed but they will neither be paid nor will they attend the sessions of the federal board unless specially invited." Professor Johnson thought this would not work satisfactorily.

Not Much Like Canada's Act.

He added that some people in the United States thought the Glass-Owen currency bill would give that country a system similar to that of Canada but on examination of the two would show the Canadian system much superior, and indeed there were few points of resemblance.

Professor Johnson, who was a visitor to Toronto this week, thinks a good deal of the Canadian banking system, which he examined a few years ago on behalf of the National Monetary Commission of the United States. His report comprised about 200 pages and several charts.

◆

"Canada's credit still shines brightly in London, and will continue to do, providing care is exercised by those Canadians who are prominent in the financial world. It would be a mistake, of course, to say that Canadian propositions enjoy the same remarkable popularity as obtained a year or two ago in the money market of the world. The mere presence of the Canadian label on an issue no longer ensures its success. To be successful, the issue must bear the unquestionable stamp of merit. In view of the great financial stringency brought about by the recent Balkan war, London has necessarily to exercise greater care than ever in the process of loosening the strings of the money bag. Canada, which, for a great many years to come must be a very heavy borrower, will, however, always enjoy favor in London as long as money is asked for the working out of sound and legitimate enterprises only."—W. L. Palmer, of London Financial News, now visiting Canada.

MARKETING CANADA'S GRAIN

VI.

SELLING BY SAMPLES

Commissioners Suggest Time is Ripe for Markets

The natural way of selling an article is to show it to buyers. When its volume becomes very large, as in the case of Canadian grain, this method becomes impracticable, with the result that there is shown instead either a sample of it, or a certificate stating its qualities according to the judgment of men accepted by both parties as competent and as disinterested.

Some countries sell by sample alone. The United States combines sample trading and trading by grades in every one of its grain markets. Canada is unique in having enacted legislation which made sample trading impossible. For in the terminal elevators through which most of the grain must pass, individual lots are merged in the general bin containing the grade to which the lots belong, and no trader can give a special price for a lot, the identity of which he cannot preserve.

The grading system undoubtedly cheapens transportation and storage, gives buyers and sellers the advantage of expert opinion on the grain offered, makes easier the financing of the grain by means of warehouse receipts, facilitates trading on the Exchange, and in many ways assist the production, transportation, storing and trading of grain. And if a perfect set of grades could be found, a set that would represent differences in value, and that would give no privilege to any class or interest, much could be said in favor of the Canadian plan of making sample trading impossible.

Grain Grown in Certain Districts.

Few would claim perfection for the set of several hundred grades which were recognized until lately. That set of grades tends to rob the grading system of much of its value, tending, as it did, to confusion, and to the reduction of the storing and handling capacity of the elevators; and apart from these objections, few would claim that the differences fairly represented the milling value of the grain. Western milling companies show a preference, and give a small premium, for grain grown in certain districts. They buy this grain and they do not need to send it to the terminal elevators, where it would be merged with grain of the same grade from other districts. They experience, therefore, no competition from those who send their grain to the terminals.

In every grade there are choice individual lots. For these the general grade price is too low. There is much grain slightly bleached, or slightly smutted, that really is as good as grain in high grades, but the law classifies it "bleached" and "smutted" and prevents the producer getting anything like its value. Western mills may give a small premium over the grade price for such grain, but there again the system of grading and binning gives them the field to themselves. As a commercial question there is no doubt whatever that the co-existence of the two methods of trading—by sample and grade—is preferable to the sole existence of one.

The main objections to sample trading are two in number. One is about mixing the grain and the other is about transporting it. The one comes from some of the producers and the other from some of the railway men.

Mixing and Milling.

It is not denied that nature mixes, and that her mixtures have to be corrected before the grain is ready for milling. Part of the process may be done in the elevators, but part, it appears to be held, must not be done except in the mills. It is indeed charged that even in the terminal elevators mixing is done, and it is suspected by some that there is mixing practised in some of the transfers elevators, Canadian and American, through which Canadian grain passes to the foreign markets.

But the argument is that mixing will be profitable to the terminal elevators, and that none of that profit will go to the producers. Only the terminal elevators will have, it is said, mixing facilities. Only they then will be able to secure the lots of grain that have special mixing values, and as the mixing will lower the grades of export grain, the export price will fall, and upon this lowered export price the price paid to the producer will be based.

(To be Concluded.)

LONG SAULT DAM SCHEME

Is Condemned by the Conservation Commission—Strong Reasons Advanced

The project for damming the Long Sault rapids, which created so much discussion last year, is condemned by the Conservation Commission, Ottawa. Plans that were filed in 1910 have not been approved, and the New York State legislature has revoked the charter under which the company concerned had secured certain rights on the United States side. Behind the project was said to be the Aluminum Trust, which sought a monopoly of half a million horse-power.

The Conservation Commission opposes the scheme on the following grounds:—

(1) That the Ashburton treaty provides that "The channels in the River St. Lawrence on both sides of Long Sault, Croil and Barnhart Islands," shall be equally free and open to the ships, vessels and boats of Great Britain and the United States. No constructions which would interfere with navigation in the slightest degree can be erected in any of the said channels without the consent of Great Britain.

Serious Damage Might Result.

(2) It is quite possible that serious damage would result from the construction of the works. Engineers have, it is true, given an opinion that there is no probability of such damages. On the other hand, the opinion of the residents along the shore and the most experienced navigators and observers is apparently almost unanimous in holding that the probability of serious damage is very strong.

(3) The proposed diversion of water by the dam between the Long Sault Island and Barnhart Island would take from the main navigable channel between Barnhart Island and the United States mainland about 50 per cent. of its water. The effect of such a diversion of water from the navigable channel is impossible to estimate.

(4) The construction of the dams in question will result in compelling navigation (other than by the Cornwall Canal) to follow a new route known as the South Sault Channel. Experienced navigators are of the opinion that this route will be much inferior to that now followed.

Small Expenditure in Canada.

(5) The time will undoubtedly arrive in the history of Canada, when deeper navigation upon the St. Lawrence will require to be provided for by the Canadian Government. Should the works proposed by the St. Lawrence Power Company be constructed, the government would no longer have a free hand in undertaking such an enterprise.

(6) The proposed scheme of the St. Lawrence Power Company contemplates making use of the Canadian side of the river simply as a convenient landing place for a dam. A very slight examination of the plans of the company is sufficient to make it clear that only a small portion of the contemplated expenditure will take place in Canada, and only a very small proportion of the total power developed will be developed in Canada.

(7) Looking at the whole scheme, it does not appear that any serious attempt can be made to show that Canadian requirements or Canadian interests are an appreciable factor in the plans of the company.

No Market for Power.

(8) No market exists at the present time upon the Canadian side for the power proposed to be developed, or for any appreciable portion thereof. When any large quantity of power is required in the territory tributary to the proposed works it can be otherwise divided.

(9) Should the time come when further power is demanded by Canadian interests, and the placing of a dam across the St. Lawrence River is determined upon, one-half of the power to be generated thereby will belong of right to Canada, and should be permanently retained for Canadian use without any exception or qualification.

Regarded as Illusory.

(10) The suggestion that power can be generated on the American side, or generated on the Canadian side and exported to the United States, and that thereafter, when it is required in Canada, the company can be ordered to deprive its United States customers of the power and deliver it in Canada, is regarded as being entirely illusory.

(11) The time will undoubtedly come when the powers will be of enormous value. The present proposal contemplates giving away a valuable asset, without substantial consideration, to a foreign company.

(12) The obvious conclusion from the facts above recited seems to be that the plain duty of Canada is to retain her rights, ownership and jurisdiction absolutely unimpaired and untrammelled.

CANADA HAS FOUND FINANCE IN LONDON TOO SIMPLE

Discussing the famine of capital, the London Economist says: "Without being unnecessarily bearish, we may perhaps suggest that the young countries which have been so freely financed by Europe in the last fifteen years are passing through a phase that corresponds to the experience of the young, enterprising firm. The promise of Canada is undisputed, but there is not the same confidence in Canadian promotions, partly because so many fingers have been burnt in land companies, or timber limits, or manufacturing corporations. No doubt also the borrowing of municipalities has in the past been made far too easy, and as we look back in the light of current rates on some of the issues of four or five years ago, we can only wonder how the English investor ever came to put his money into them. There is, we think, a general feeling that Canada has found finance in London too simple, and that her natural enterprise has been over-encouraged.

"Argentina is not the popular tune that it was five years ago, mainly because her railways have been less prosperous, and because the English investor now realizes that even in the Argentine it is possible to spend capital without an immediate return of interest. The readiness of British capitalists to supply funds enabled the Argentine Government to set the railways competing for the right to build, and to force the growth of railroad mileage with comparatively little regard for the interests of the railway shareholders. The finance of these Argentine companies is not likely to become easier in the next two years. In Mexico the illusion of a settled Government has been shattered since the fall of Diaz, and the rate of interest has suddenly jumped to an almost prohibitive figure. The bank manager, to return to our simile, has taken fright, and the country suddenly finds the tap turned off with a jerk.

"This change in the attitude of the European capitalist will not, we think, be denied by anyone conversant with English finance, and in considering whether the rate of interest is going to fall, whether the famine of capital is going to continue, the fact that the change is taking place is of great significance. If the taps which supply capital to the new countries were suddenly turned off, the rate of interest, so far as they are concerned, would go up, and their development would be checked."

ONTARIO'S FIELD STATISTICS

The following statistics of the principal field crops of Ontario for 1913 show the acreage as compiled from individual returns made by farmers to the Ontario bureau of industries, and the yields as estimated by a staff of correspondents, who give probable yields according to conditions on August 11th, 1913.

Fall wheat: 646,533 acres will produce 15,835,814 bushels, or 24.5 per acre, as against 759,888 acres, 15,039,885 bushels, and 19.8 in 1912. The annual average for 31 years, 1882-1912, was 17,788,243 bushels, and 21.0.

Spring wheat: 116,581 acres, 2,012,984 bushels, or 17.3 per acre; as against 123,080 acres, 2,302,329 bushels, and 18.7 in 1912. Average, 16.0.

Barley: 623,658 acres, 17,295,811 bushels, or 27.7 per acre, as against 647,382 acres, 19,232,275 bushels, and 29.7 in 1912. Average 27.8.

Oats: 2,699,459 acres, 95,379,405 bushels, or 35.3 per acre, as against 2,601,735 acres, 98,444,807 bushels and 37.8 in 1912. Average, 35.6.

Rye: 118,429 acres, 2,017,965 bushels, or 17.0 per acre, as against 105,949 acres, 1,839,675 bushels, and 17.4 in 1912. Average, 16.4.

Peas: 177,303 acres, 3,190,613 bushels, or 18.0 per acre, as against 221,524 acres, 3,667,005 bushels, and 16.6 in 1912. Average, 19.2.

Beans: 66,639 acres, 1,201,005 bushels, or 18.0 per acre, as against 69,703 acres, 1,182,132 bushels, and 17.0 in 1912. Average, 17.2.

Hay and Clover (not including alfalfa): 3,261,139 acres, 3,543,957 tons, or 1.09 per acre, as against 3,177,410 acres, 4,760,502 tons, and 1.50 in 1912. Average, 1.46.

The acreages in other crops for which no estimates as to yield have been made at this date are as follows: buckwheat, 228,279, against 205,893 in 1912; corn for husking, 299,871 and 301,251; corn for silo, 388,138 and 377,982; potatoes, 159,661 and 158,888; mangel wurzels, 54,568 and 60,103; sugar beets, 19,083 and 21,054; carrots, 2,400 and 2,742; turnips, 97,572 and 101,529; mixed grains, 414,517 and 448,402; alfalfa, 167,707 and 189,959.

There are 3,120,146 acres of cleared land devoted to pasture; 268,487 in summer fallow; 306,746 in orchard; 24,360 in small fruits; 11,136 in vineyard; 55,029 in farm gardens; 41,063 in rape; 7,431 in flax; 12,137 in tobacco (Essex 6,490, Kent 4,573).

VALUE OF LIFE INSURANCE

XXVIII.

Risks of Delaying Insurance

BY C. A. HASTINGS.

I need not detail the importance of insuring early; everybody recognizes this, but very few people appreciate it. Of course, the best age to insure is the year one, and it is up to the parents and guardians to confer this very valuable boon on the child, and if the policy is chosen with care, there are many different advantages to be derived.

So many men express their appreciation of assuring early in life, and many of them assert that they intend to carry out their intentions forthwith, but they do not do so—thereby forcing a great risk on their dependants, to say nothing of increased premiums, if they are fortunate enough to get it later. Many a man has found himself in impaired health, and then blames every company that will not accept him, and if any company does so with a lien he blames that company also. This man evidently thinks he is the only policyholder, or that the company should accept his risk at the cost of the other policyholders, who have passed first class examinations.

Delay Never Receives Consideration.

Why any company should confer this blessing, for which he has none to blame but himself, passes all understanding. Nevertheless, delay never receives any consideration, and the man who hesitates is wasting more than time, for he is compelling his family to carry risks which he has no right to do—if he left them during his lifetime, the law would get after him. Is the crime any the less if he leaves them in want by early demise? Furthermore, in the event of him, at last, being able to make up what it pleases him to call his mind, his premium is not only higher, but he has lost interest on his capital as well.

Cost is Money Saved.

Many men will argue it does not matter because they have reached an age of forty or forty-five, but looking at a risk that has passed is not the right way to look at it. It is the present and the future that man must look to, but, home truths are not appreciated, and a man, by putting off insurance, compels his family to bear a risk which could be thrown, by insurance, upon institutions that are a refuge and a strength (if proper choice be made) to everyone who has sought their protection, while the "cost" of so doing is not money spent but money saved.

The first article in this series appeared March 1st, 1913.

NEW BRUNSWICK'S LUMBER INDUSTRY

(Special Correspondence.)

St. John, N.B., Sept. 3rd.

Premier Flemming says that of ten thousand four hundred square miles of timber limits controlled by the province, all but seven or eight hundred square miles have been or will be taken up under the new Crown Timber Lands Act, which he finds to be working out satisfactorily.

Because of a dispute about wages, all the saw mills at St. John, with one exception, have been idle since early in June. In the one that is now running, the men went back at the old rate of pay. There is still no indication of the others getting up steam. One result of the trouble has been that lime kilns which derived fuel from the waste of the saw mills are also idle, and St. John is now importing lime from the State of Maine. Enormous quantities of logs are stored, and even if the mills resumed operations at an early date, all of the logs could not be manufactured this year. Of course, there has been a great falling off in the export of lumber from this port. In all other parts of the province the mills have been running, and the lumber shipping trade active. There has been no trouble of any sort in connection with the shutting down of the mills at St. John, since all the men were able to secure other employment, because of the amount of building and general construction work in progress.

The Pokick Land and Water Company, Limited, is seeking incorporation with $90,000 capital to carry on at Dumfries, York county, extensive lumber operations. The company controls some eighteen thousand acres of valuable timber lands. Most of the members of the company are Americans from the State of Maine.—H.

EIGHTY-SIX MILLIONS OF INVESTMENTS

This is Saskatchewan's Record—Loan Companies Have Placed the Largest Amount

Over $86,000,000 represented the investments in Saskatchewan in 1912 of loan, trust and insurance companies, as the following table shows:—

Investments of Companies, 1912.	Amount Invested in Saskatchewan.
Loan	$47,133,318
Trust	14,324,771
Life insurance	22,773,060
Fire insurance	2,560,465
Accident and general insurance	41,896
	$86,833,510

Over half the amount has been invested by loan companies. No less than 68 of these companies are doing business in the province. They hail from all parts of Canada, the United States, Great Britain and Holland. Some of them, by the way, are not of the highest standing. The following table, compiled by *The Monetary Times*, shows the number in each class of company doing business in Saskatchewan.

Companies.	Number doing business in Saskatchewan.
Loan	68
Trust	28
Life insurance	27
Fire insurance	16
Accident and general insurance	3

Several Companies With Large Investments.

The loan companies which have invested over $4,000,000 are as follows:—

Company.	Amount Invested.
Canada Permanent Mortgage Corporation	$5,004,862
North of Scotland Canadian Mortgage Company	4,523,940
Mortgage Company of Canada	6,094,168
Trust and Loan Company of Canada	5,682,759

The trust and insurance companies which have invested over $2,000,000 are these:—

Company.	Amount Invested.
National Trust Company	$2,661,139
Royal Trust Company	3,063,445
Toronto General Trusts Corporation	2,105,889
Canada Life Assurance Company	3,363,303
Confederation Life Association	2,515,422
Great-West Life Assurance Company	3,995,155
Mutual Life Assurance Company of Canada	2,915,744
Manufacturers' Life Insurance Company	3,719,318
Law Union and Rock Insurance Company	2,123,656

The figures relating to the business of fire insurance companies doing business in Saskatchewan and licensed under the fire insurance act of the province, are as follows for 1912. Preliminary statistics were printed in *The Monetary Times* last week.

Gross amount written	$97,840,491
Premiums thereon	2,298,237
Net premium income	2,072,202
Net amount at risk, December 31, 1912	86,414,522
Fire losses	801,464

The hail insurance business in Saskatchewan is summarized as follows:—

Amount of risk	$19,016,628
Premiums (cash basis)	1,110,625
Losses paid	797,169

The amount of tornado insurance at risk in 1912 was $2,656,343, the premiums $13,394, and the losses only $80.

Heavy Premiums Collected.

The premiums collected by the various insurance companies in Saskatchewan in 1912, are summarized as follows in the report just issued by the registrar of joint stock companies and the superintendent of insurance for the province:—

Insurance premiums in Saskatchewan.	Amount, 1912.
Life	$1,570,949
Fire	2,124,020
Accident and guarantee	361,803
Hail	1,090,889
Live stock	30,133
Automobile	3,988
Tornado	2,656,343
	$7,848,025

Considering the number of automobiles in Saskatchewan, the premium income for automobile insurance is surprisingly small. On the other hand, in view of the good climate in Saskatchewan, the business written in tornado insurance is surprisingly large. This was due to the Regina cyclone. A disaster such as that will probably never happen again. The tornado insurance losses were only $80—two chimneys blown down.

The report containing the statistics noted above is a tribute to the increasing popularity of the progressive province of Saskatchewan as an investment field.

NEW AUTOMOBILE INSURANCE COMPANY

The Motor Union Insurance Company, a new company to insure automobiles for all risks is selling capital stock. Those behind it are Mr. Maclean Stinson, Toronto, and Mr. T. G. Parkinson, of England.

The following gentlemen have consented to act upon the permanent board of directors: Messrs. T. G. Wallace, M.P., Woodbridge; S. McNairn, president S. McNairn and Company, Limited, grain merchants and exporters, Toronto; W. J. Lovering, wholesale lumber, Toronto; F. E. Mutton, managing director J. J. Gibbons, Limited, Toronto, past president Ontario Motor League; and John A. Campbell, M.D., Blenheim, Ontario.

BELDING-PAUL PASSES DIVIDEND

Monetary Times Office,
Montreal, September 3rd.

The Belding-Paul Corticelli Company has passed the dividend on its preferred stock. The following item contains the notice to shareholders:

"Notice is hereby given that the directors of this company after carefully considering the auditors' report, for the first half of its fiscal year, which was submitted at a meeting held on August 29th, 1913, resolved to defer payment of dividend on the 7 per cent. cumulative preferred stock until further notice."

This is a somewhat disappointing climax to the early history of the Belding-Paul Corticelli Company. It may be recalled that this company was formed a couple of years ago—early in 1911—being an amalgamation of Belding-Paul and Company, the Corticelli Silk Company and the Cascade Narrow Fabric Company, which had been engaged in the silk business here for many years. The capitalization given the new company was as follows:—

	Authorized.	Issued.
Common	$1,250,000	$750,000
Pref. Cum. 7 per cent.	1,250,000	850,000
Debentures	1,000,000	750,000

The report for the year ended November 30th, 1912, showed a net profit for the year of $134,470. Out of this was paid $37,613, being interest on debentures; $59,808 being dividend on preferred stock; besides which $21,931 was provided for depreciation to plant and $8,750 for sinking fund. This made a total of $128,103, the balance of $6,366 being surplus for the year. There was at the debit of profit and loss account at the beginning of the year $2,552. This being deducted from the surplus of the year, left the amount of $3,814 to the credit of profit and loss at the end of the year.

Explaining the poor showing by the company, the president stated that the market for ribbons had been very poor on account of the fashion having changed. There was evidence of a change in this direction, however, which ought to benefit the company. The company had also suffered losses through changes in the management of its ribbon department, one of the difficulties being a strike.

Although the company has just been compelled to pass its dividend on its preferred stock, those who are informed concerning fashions state that ribbons will be more popular. Ribbon manufacturers will reap the benefit from this, and at least one department of the Belding-Paul Corticelli Company should show increases in earnings over last year.

Boards of trade of the Shuswap district, B.C., in the middle lower interior of British Columbia, have agreed to form a central association.

"I have seen thirty harvests in Western Canada, and this year's will be equal to any of them." Mr. G. H. Shaw, general traffic manager Canadian Northern Railway.

REVIEW OF THE MONTH

Canadian Flotations in London—Investment Offerings—New Stock Exchange Listings

SPECULATIVE AND INVESTMENT OFFERINGS

The following offering was among those made in Canada during July:—

Spanish River Pulp and Paper Company, which recently absorbed the Lake Superior Paper Company. $1,000,000 7 per cent. preference shares to shareholders.

NEW STOCK EXCHANGE LISTINGS

A block of £141,780 additional bonds of Price Bros. and Company, Limited, were listed on the Montreal Stock Exchange in August. The new listing comprises the bonds purchased a short time ago by the Royal Securities Corporation. The issue brings the total outstanding bonds of the company from $5,110,000 at the beginning of the year to $5,800,000, or within $200,000 of the authorized issue. Another bond listing on the Montreal Exchange was $3,500,000 Nova Scotia Steel and Coal Company bonds.

Nova Scotia Steel and Coal Company, Limited, listed the following bonds on the Montreal Stock Exchange. $3,500,000 currency and £513,680 sterling, these bonds are interchangeable. $3,000,000 debenture stock.

Ames Holden McCready, Limited, listed 35,000 shares common stock, 25,000 shares preferred stock. $475,500 and $140,000 (fractional certificates.) £103,600 interchangeable 6 per cent. thirty year first mortgage, sinking fund gold bonds, due 1st April, 1941, on the Montreal Stock Exchange.

The Canadian Car and Foundry Company have listed on the Montreal Stock Exchange $1,000,000 of 6 per cent. first mortgage gold bonds of which £57,540 and $39,400 have been issued.

Price Brothers and Company, Limited, listed bonds of the above company, to the amount of $708,900 on the Montreal Stock Exchange.

CANADIAN FLOTATIONS IN LONDON IN AUGUST

The following flotations of interest to Canadians were made in London during August:—

Grand Trunk Railway.—£500,000 5 per cent. 5-year notes at 98½.

Canadian Northern Railway.—£1,500,000 5-year 5 per cent. notes at 98.

North Vancouver, B.C.—£96,900 5 per cent. debentures at 95.

AUGUST DIVIDEND CHANGES

Belding Paul Corticelli, Limited, directors deferred the quarterly dividend on the preferred, usually declared about this time.

◆

ALBERTA'S GRAIN MARKETING FACILITIES.

(Special Correspondence).

Calgary, September 3.

Added grain marketing facilities for Alberta and that portion of Saskatchewan which may elect to use the Panama Canal route for transportation, are forecasted in the official announcement by Hon. Robt. Rogers that the third government interior terminal elevator will be erected at Calgary. Following this is the report of the provisional directorate of the Farmers' Elevator Company, which announces that forty-six line elevators will be ready to handle grain this fall. These latter are the outcome of the representations made to the provincial government last winter, when legislation was passed whereby the government provides 85 per cent. of the money necessary to build elevators, when the grain growers put up the balance.

As twenty locations were required before this legislation could become operative, the United Farmers of Alberta and the Grain Growers' Grain Companies, took hold of the proposition, with the result that the forty-six places have subscribed the necessary stock. Five per cent. interest on the loan, and repayment within twenty years, are the terms on which the government deals with the farmers' elevators.

The interior terminal elevator for Calgary will cost $1,500,000, and have an initial capacity of 3,500,000 bushels. So much was the city council impressed with the possibilities to be developed in the grain and milling business, by the construction of a terminal elevator here, that, before the official announcement, it had secured a large block of property adjacent to the proposed elevator site, ready for the time when milling companies will require the land.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report exchange rates as follows at closing:

	Between Banks.			
	Buyers.	Sellers.		Counter.

The new Canadian Northern Road from Toronto to Ottawa will be opened about October 15th. The line is one of the main connecting links of the Canadian Northern Ontario lines, and will open a straight connection from Northern Ontario and Toronto to Montreal and Quebec.

AMONG THE LIFE UNDERWRITERS

Mr. J. B. Morissette, President of the Dominion Association, to be Dined at Quebec

The Quebec province life underwriters' associations are naturally pleased with the honor bestowed upon one of their number, Mr. J. B. Morissette, by the Dominion Life Underwriters' Association, in electing him as president of the association. It was a graceful tribute to the energy which the French-Canadian underwriters and their colleagues in the province have for many years put into the association movement. The officers and members of the Quebec Association are tendering a banquet to Mr. Morissette at the Chateau Frontenac Hotel, Quebec, on Monday.

J. B. MORISSETTE, QUEBEC.
President, Dominion Life Underwriters' Association.

Presentation to Mr. Stanford.

One of the many pleasant events of the Life Underwriters' Convention at Ottawa was the presentation to the indefatigable secretary of a gold chain and pencil case.

G. J. ALEXANDER, RICHMOND, QUE.
Executive member, Dominion Life Underwriters' Association.

This took place at the executive committee's meeting and thanks were briefly tendered by Mr. Stanford who expressed himself as earnestly in sympathy with the work.

A full report of the convention appeared in *The Monetary Times* last week.

The officers of the Dominion association for the coming year are as follows:—

Honorary president—J. A. Tory, Toronto.

President—J. B. Morissette, Quebec.

Vice-presidents—J. A. Johnston, Calgary; A. J. Meiklejohn, Ottawa, and the president of the National Association of Life Underwriters.

Executive Committee—Brantford, John Burbank; British Columbia, W. J. Twiss; Brandon, E. Daw; Brockville, H. B. White; Central Ontario, Gordon Hall; Calgary, P. A. Wintemute; Cape Breton, A. R. McIsaac; Edmonton, Dunlop; Eastern Townships, G. J. Alexander; Grey and Bruce, R. W. McGregor; Guelph, F. B. Hilliard; Hamilton, W. H. Seymour; Huron, Thos. Jolliffe; Kingston, J. B. Cooke; London, V. Reeve; Montreal, G. E. Williams, H. H. Kay; Winnipeg, J. A. Wilson, R. S. Rowland; Moose Jaw, Houston; Niagara Falls, McEvoy; Nova Scotia, S. D. Freeman; New Glasgow, P. Macfarlane; Ottawa, W. M. Stevens, W. Lyle Reid; Prince Edward Island, J. O. Hyndman; Port Arthur, E. J. Seeley; Prince Albert, T. C. Sinclair; Quebec, J. F. Belleau; Quinte, S. Burrows; Regina, J. H. H. Young; St. John, F. S. Farris; Sault Ste. Marie, R. H. Carney; Toronto, Fred Chance, W. E. Nugent; Victoria, A. B. Fraser; Windsor, A. G. Roberts; Waterloo, W. M. Lockhead.

W. E. NUGENT, TORONTO.
Executive member, Dominion Life Underwriters' Association.

Auditors—Geo. Jenkins and T. Johnson.

Representatives to Executive Committee, National Association Life Underwriters—Chairman of Executive Committee, ex-officio, W. McBride, for one year; J. A. Tory, for three years.

The Toronto Life Underwriters' Association are planning some interesting meetings during the coming autumn and winter.

◆

EXPORTS OF MANUFACTURES

For the first four months of the present fiscal year ended July 31st last, Canada exported $16,051,000 worth of manufactured goods, compared with $12,659,000 worth for the corresponding period of 1912.

The exports of fish are rapidly increasing. For the first four months of the present fiscal year $5,032,000 worth of fish was exported, as against $3,748,000 worth for the first four months of the fiscal year of 1912. The products of the forests and mines show large increases in volume of export. Of minerals, Canada exported $17,180,000 worth, and of products of the forest $14,171,000 worth. These figures are considerably in excess of the exports for 1912 for the same period.

◆

When Sir Thomas Shaughnessy proceeds upon his tour of inspection he will pass over a system which is represented by, roughly, 12,000 miles of track. When he made his first inspection as president, the road was represented by something like 6,000 miles.

---

* Including loans to municipalities.

The above are the principal changes in the position of the chartered banks of Canada during July. The statement is one of the most interesting of recent years, being the first to be made under the new bank act and having thirteen new columns, as will be noted from the detailed statement printed on other pages. Mention has been made by some of our contemporaries regarding what has been called "the belated bank statement," it having been forgotten that the document was naturally later than in previous months for the reason that the Bank Act, which came into force on July 1st, gives the banks up to the 20th of the month in which to mail their statements, or five days later than previously.

Decreases occurred during July in deposits on demand, deposits after notice, call loans in Canada and call loans out of Canada. They were all comparatively small losses. Gains were made during the month in current loans, both at home and abroad, and in circulation.

Domestic Deposits Accounts.

The following table shows the course of the domestic deposits accounts for the past thirteen months:—

	On demand.	After notice.
1912—July	$372,012,494	$640,592,345
August	360,575,425	643,663,590
September	374,368,917	640,536,652
October	383,814,572	640,097,928
November	376,829,372	635,810,703
December	379,777,219	632,641,346
1913—January	354,518,964	635,000,056
February	349,661,830	630,467,518
March	357,756,659	630,434,708
April	365,340,002	631,160,280
May	364,159,642	630,755,608
June	362,769,928	622,928,969
July	356,585,196	621,347,388

Demand deposits are about $16,000,000 less than a year ago and $6,000,000 less than a month ago. The month's decrease is understood to be due chiefly to the withdrawal from deposits account of several millions by the Canadian Pacific Railway Company for the purpose of retiring in London, England, five per cent. bonds to the amount of thirty-five million dollars. These bonds were not due until July 1st, 1915, but the company, desiring to extinguish its bonded indebtedness, anticipated the payment of the principal, offering a premium of two per cent. to induce holders to present the bonds for redemption in July last. This transaction naturally produced a reduction in the deposits of the company with its Canadian bankers.

Other Reasons for Decline.

Other reasons for this decline were cited in an interview with Mr. D. M. Finnie, assistant manager of the Bank of Ottawa, who says: "There has been a general decline in the value of stocks and bonds followed by an increase in the rate of mortgages. While the financial market continues in the condition it has been for some time, there will continue to be a general falling off in deposits, for people with money will see better opportunities for investments with safety assured at a higher rate of interest than three per cent., as the banks pay. When there is a noticeable decline in one or more banks, then there may be some special reason. I assure you that we are not greatly concerned about that $6,000,000 decrease in July compared with June."

After notice deposits declined by a little more than $1,000,000 during the month, but show a decrease of about $18,000,000 compared with the July statement of last year.

Four Years' Deposits Record.

The deposits record for the past four years is given in the following table compiled by *The Monetary Times*:—

July.	On demand.	After notice.	Total.
1909	$222,555,749	$466,337,816	$688,893,565
1910	251,638,522	538,384,371	790,022,893
1911	316,973,780	570,789,435	887,763,215
1912	372,012,494	640,592,345	1,012,604,839
1913	356,585,196	621,347,388	977,932,584

The total deposits are still short of the billion dollar record, which was made and maintained for several months in 1912. Last month they totalled $977,932,584. After notice deposits have shown a steady increase until the present year. During the past few months they have declined, partly for reasons mentioned above. Demand deposits as stated are less than a year ago, but are over $100,000,000 greater than four years ago.

Canadian Loans for a Year.

The following table shows the trend of the Canadian loans accounts for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1912—July	$852,256,651	$70,407,734
August	852,045,624	75,194,735
September	859,341,193	72,205,261
October	879,676,655	73,959,866
November	874,721,593	70,668,521
December	881,331,981	70,655,661
1913—January	874,705,616	71,376,510
February	882,112,726	71,286,799
March	890,513,446	70,731,030
April	898,964,181	69,757,912
May	898,959,650	69,982,540
June	899,260,009	68,642,377
July	901,550,453	67,991,255

Compared with the returns of the banks for July, 1912, call loans in Canada show a decrease in the year of $2,416,479; current loans in Canada, an increase in the year of $49,293,802.

As to Municipal Loans.

In the matter of current loans in Canada, a separate column in the bank statement has been added for loans to cities, towns, municipalities and school districts. Such loans, according to the statement issued for July, amounted at the close of the month to $43,121,384, by which sum the statement of current loans in Canada must be increased for purposes of comparison with the corresponding statement in previous months when municipal loans were not shown separately. This would give for July a total of $901,550,453 in current loans, an increase of $2,290,444 over the current loans outstanding at the end of June.

Municipal loans, it was thought, would be considerably heavier than is shown in the bank statement. The amount, $43,000,000, is comparatively small, probably on account of the sales of municipal bonds which have been made. There is considerable activity in the municipal bond market, and an idea of this can be gathered from the fact that approxi-

(Continued on page 446).

T. C. BOVILLE,

Deputy Minister of Finance

JULY BANK STATEMENT

(Continued from page 443).

mately $7,000,000 Canadian municipal bonds were sold in the United States in August, $1,580,000 in Canada, and an issue of £96,900 in London.

Loans Record of Four Years.

The following table shows the expansion of loans at home and abroad, during the past four years:—

July.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1909 ..	$539,821,041	$32,753,385	$54,603,054	$114,685,537
1910 ..	653,008,336	40,267,390	60,081,256	103,436,037
1911 ..	723,765,358	32,870,114	65,339,288	104,009,030
1912 ..	852,256,651	35,741,998	70,407,734	117,961,437
1913 ..	901,550,453	42,960,513	67,991,255	89,266,235

Current loans in Canada have almost doubled since 1909 while current loans abroad have depreciated only $10,000,000. In the four years the former account has changed from $539,000,000 to $901,000,000, and the latter account from $32,000,000 to $42,000,000. Call loans in Canada are $2,000,000 less than a year ago but $6,000,000 greater than in July, 1909. Call loans abroad are nearly $30,000,000 less than a year ago.

New Form of Bank Statement.

The new form of bank statement requires more information than did the old form. Under the heading of Liabilities, two additional columns appear, "Bills Payable," and "Acceptances under Letters of Credit."

Considerable changes are made in the way the banks must report their assets month by month. Dominion notes, formerly reported in one column, are now divided—"In Canada" and "Elsewhere." The establishment of central gold reserves adds another column to the statement "Deposit in the Central Gold Reserves." Notes of and cheques on other banks previously lumped together, will be reported separately in future.

The two headings respecting call and short loans on stocks and bonds in Canada and elsewhere read as follows in the new statement:—"Call and short (not exceeding thirty days) loans in Canada on stocks, debentures and bonds," and "Call and short (not exceeding thirty days) loans elsewhere than in Canada."

The column in which the value of the banks' premises was reported, has hitherto been headed "bank premises." In future, the heading will be "Bank premises, at not more than cost, less amounts (if any) written off." Another new heading is "Liabilities of customers under letters of credit as per contra."

◆

TO SUPERVISE MUNICIPAL BORROWING

News that the convention of Alberta municipalities have adopted a resolution urging the provincial government to exercise supervision over city borrowing, analogous to that exercised by the British local government board, is regarded in London as a prudent step, says a Canadian Associated Press cable.

The London Financial Times says it is a welcome sign that Canadian local authorities are becoming alive to the danger of indiscriminate borrowing.

The raid of Canadian municipalities has been the feature of public borrowing in recent years, and it is about time a more sedate pace was adopted, continues that journal. Practically all colonial local borrowing is now done by Canada, and throughout the eight years of the decade in which the Dominion figures it accounts for more than 63 per cent. of all colonial loans raised here. If the sanction of the provinces had first been obtained for municipal works there would be some assurance that works were necessary, and this would undoubtedly add to the confidence of investors and raise the status of bonds. Alternatively, a department of the Federal Government might be created to scrutinize and authorize local loans if the formation of such a bureau were not an invasion of constitutional rights of the provinces.

The text of the resolution passed by the Union of Alberta Municipalities, referred to in the above comments, is as follows:—

"Resolved, that the executive members thereof, as may be deemed advisable, wait upon the Minister of Municipalities with a view of urging upon the department to give some authoritative standing to bonds issued for public works, where the department have investigated the need of the work, the engineering feasibility of the work, the ability of the municipality to pay for the work, etc., with a view of leading up in time to giving such assistance in financing their securities as is now given by the local government board in the United Kingdom."

LOANS ON LIFE INSURANCE POLICIES

One Holder in Every Four Has Borrowed—Danger of Mortgaging Policies

The tendency on the part of ordinary policyholders to make use of the loan privilege in their policies has grown to such an extent that at the present time about one policy in four having a loan value has been borrowed upon, says President Dryden, of the Prudential Insurance Company, in a letter to the company's representatives.

Members of the field staff have already noticed this tendency and its attending dangers, and it is both at their suggestion and because of a desire upon the part of the company to guard as far as possible the interests of its policyholders and their beneficiaries that we are writing you on this subject.

Experience in both the field and the home office has demonstrated that many loans are unnecessary or ill-advised, and it is unfortunately the case that loading down a policy with loans is not only the frequent cause of its ultimate lapse, but under such circumstances the policyholder becomes a ready prey to that pirate of the insurance business known as the "twister."

Borrowing from the Beneficiary.

Borrowing on a policy has been well described as "borrowing from the beneficiary," and the disappointment of beneficiaries on finding that the amount payable under a claim has been diminished on account of such loans is well known to many of you.

It is with all these conditions in mind that the co-operation of the staff along two definite lines of action, were asked:

First—Strive for a reduction in the number and amount of new loans. When soliciting insurance do not make a special feature of the loans privilege, as the casual mention of it should be sufficient in most cases. Again, when a policyholder applies for a loan, while you should remember that he is within his rights in so doing, you should, nevertheless, call his attention in a tactful and friendly way to the danger of mortgaging the policy and of thus reducing the protection and increasing the probability of eventual lapse.

Repayments and Reductions are Desirable.

If he finally decides to secure a loan, then show him the wisdom of applying for only such an amount as is absolutely necessary to meet his emergency.

Second—Strive for repayment or reduction of outstanding loans and collection of interest. As opportunity offers, policyholders should be urged to repay their loans in full, if possible, or at least by regular instalments of $5 or upwards. In any event, the interest when due should be collected whenever possible, thus avoiding any increase in the original loan.

Satisfactory results will be attained if at opportune times tactful influence is exerted upon the borrowing policyholder.

◆

TRUSTWORTHINESS OF PUBLIC ADJUSTERS

The New York insurance department has found difficulty in obtaining the required information as to the competency and trustworthiness of public adjusters who have applied for licenses. So far over 100 persons have made applications, accompanied by the $25 fee which is required by law. Although the insurance department has submitted the list of applicants to many companies and agents, as well as others who would know the qualification and trustworthiness of the adjusters applying for licenses, the information so far obtained has been meagre, and it is evident to the department that company officers are timid about stating what is their candid opinion about the requirements of those under consideration. A list of thirty who have been licensed is now being prepared and will probably be sent out this week. Many of the names are familiar in New York City, while others represent up-State adjusters. The insurance department evidently favors brokers taking out public adjusters' licenses, so that they may charge for adjusting their customers' losses. It is realized that reliable brokers can look after their customers' settlements in a satisfactory manner, and this turn of events has largely increased the number of applicants.

◆

On August 18th the Great-West Life Assurance Company attained its majority. Founded in 1892, with headquarters at Winnipeg, the company has had twenty-one years of success. It has business in force exceeding $92,000,000, protecting more than 44,000 policyholders.

BUSINESS AND BOOKKEEPING OF TRUST COMPANIES

I.

Synopsis of Activities—System of Accounting—Records and Books

The business of trust and loan companies embraces such varied transactions that it gives rise to great scope in the elaboration of accounting principles and systems. Of what, then, does the business of a trust and loan company consist?

The most widely known items prominent before the public at large are the banking department, the acting as executors or administrators of estates, and guardianships. But of far greater magnitude are the trusteeships of funds securing large bond issues, and also of sinking funds. In addition to these a trust company acts frequently in various capacities of agent, referee, receiver, liquidator or assignee for the handling of enterprises which may be active; or which may have become insolvent. Another feature is the transfer and registry work, in which case the company acts as agent for the registry and transfer of the stocks and bonds of corporations whose securities are traded in by the public.

However, the principal business of a trust and loan company is the loaning of funds upon first-class securities. Loans are made at the current rates of interest upon stocks or bonds and upon first mortgages upon improved real estate, said Mr. R. W. Lampmann, C.A., in a paper read to the Manitoba Chartered Accountants Society.

From the foregoing synopsis of activities it will readily become apparent that an accounting system which will embrace all of these points must of necessity present some complexities. It must be sufficiently elastic in the detail workings to cover all of the transactions arising, and at the same time present, in an easily accessible manner, concise statistics showing the progress of any of the departments. Upon the facility with which information is obtainable rests the value of the accounting system.

Deductive Analysis of Balance Sheet.

Probably a deductive analysis of the balance sheet will present the facts more lucidly than a constructive analysis. An explanation of the various assets and liabilities, in conjunction with the items of revenue and expenditure, will form a basis of discussion from which can be extended a series of supplementary details showing the routine features required to incorporate the transactions into a form as set forth in the balance sheet.

The most approved form of balance sheet for a trust and loan company divides the items into three distinctive groups usually styled (a) capital account. (b) guaranteed account, and (c) trust and agency account. There is an obvious advantage in this arrangement in that an observer of the balance sheet, presume, for example, a shareholder or a prospective investor, may see at a glance the exact status of the company as to the amount of funds actually constituting the capital moneys involved in the enterprise, which is not readily discernable where trust and other funds are shown in conjunction therewith.

The name capital account naturally admits of but one interpretation, viz.: items respecting the handling of the company's capital funds, including therein the reserves, contingency appropriations, and undivided profits.

The guaranteed account is so called from the plan under which the funds of the clients are held for investment.

The company guarantees to the investor a certain rate of interest for a definite period of time, and the repayment of the amount invested at the expiration of the term of investment, issuing to the investor a guaranteed investment receipt as security. Under the terms of the investment receipt the company is authorized to invest in such securities as it may deem advisable, within the restrictions of the charter under which it operates, and to retain for its own purposes any income by way of interest, or otherwise, over and above the amount guaranteed to the client.

Lastly, there is the trust and agency account. In contradistinction to the guaranteed plan of investment, certain clients prefer to invest in first mortgages upon real estate, paying the company a commission as remuneration for handling the investments. This method is commonly known as the trust or agency plan of investment. It has the advantage of obtaining for the client a higher rate of interest, but lacks the guarantee that the clients will receive the revenue, or principal, if desired, upon any particular date. Should the borrower default in his payments the client must await the collection thereof.

From the foregoing facts it will at once become apparent that the details of the accounting system must provide for the separate classification of transactions affecting the several sections of the balance sheet previously discussed.

Now, approaching the details of the respective sections hereinbefore mentioned, the usual items shown as assets held on capital account, in condensed form, are as follows:—

Amount invested in (1) real estate mortgages, (2) in bonds, debentures and stocks, (3) in real estate, including office premises, (4) amount loaned on collateral securities of bonds and stocks, (5) cash on hand and in banks. The liabilities on capital account as follows:—(1) capital stock, (2) reserve fund, (3) mortgage loans in process of completion, (4) amount appropriated for dividends, (5) balance at credit of profit and loss account.

The interest accrued due to the company for amounts loaned to borrowers is incorporated in the total amounts shown under the respective headings. Also, it must be noted that interest accrued due on loans made from guaranteed funds is an asset upon capital account, and is included in the same manner as interest accrued from investment of capital funds.

Under guaranteed account are shown the following assets:—Amount invested in (1) real estate mortgages, (2) in bonds and debentures, amount loaned on collateral security of bonds and stocks, cash on hand and in banks. And the following liabilities:—guaranteed funds for investment, guaranteed trust deposits.

The assets are quite clearly set forth, and the liabilities consist simply of amounts invested by various clients, distinguishing between the usual long-term investments and the amounts held on deposit subject to withdrawal—usually in a savings banking department.

Passing now to the trust and agency account, the assets consist of a heterogeneous list of terms composing the properties and investments of divers estates, assignments, trusteeships and agencies, consolidated for convenience, and shown usually as one gross asset.

The corresponding liability is shown simply as the same amount due to the respective estates, trusteeships and agencies.

Details of Accounting.

It should be observed in passing that the various sections, "capital," "guaranteed," and "trust and agency" balance separately, having assets and liabilities equal. This is not always the case where inferior accounting methods obtain, and the several plans of investment are indiscriminately handled with each other and the capital funds. To obtain the separate balancing of each section it is necessary to have accounts designating investments made from each respective section, and separate banking accounts. The experience of years and the evolution of different plans of investment have proved the value of subdividing in this manner.

(To be Concluded.)

◆

GRAND TRUNK'S RETURNS

Subject to audit, the accounts of the Grand Trunk Railway Company for the half-year to June 30th, 1913, show the following results:—

Gross receipts		£4,365,600
Working expenses		3,207,100
Net receipts		£1,158,500
Deduct debit balance on account of rentals, outside operations, and car mileage		77,000
Total net revenue		£1,081,500
Net revenue charges for the half-year, less credits.		531,800
Balance		£549,700
Deduct—		
Canada Atlantic deficiency for the half-year	£74,000	
Detroit Grand Haven and Milwaukee deficiency for the half-year	76,600	
		150,600
Surplus		£399,100

This surplus of £399,100, added to the balance of £12,800 from December, 1912, makes a total amount of £411,900 available for dividend, which will admit of the payment of the full dividend for the half-year on the 4 per cent. guaranteed stock and first and second preference stocks, leaving a balance of about £16,100 to be carried forward.

The accounts of the Grand Trunk Western Company for the year ending June 30, 1913, after providing for all fixed charges, including the debit balance of £16,144 brought forward from the previous year, show a deficit of £22,850, which amount is carried forward to the debit of the current half-year.

FORTY-FIVE NEW COMPANIES

Several Financial and Investment Concerns—Mining Companies

Forty-five new companies were incorporated in Quebec, Ontario, Manitoba, and British Columbia this week. The principal companies were:—

La Mine D'Or Huronia, Ottawa	$1,000,000
Pace, Harrison & Millar, Winnipeg	1,500,000
Koohinoor Gold Mines, Toronto	2,000,000
Yampa Consolidated, Toronto	10,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	Number of Companies.	Capitalization.
Quebec	11	$ 677,400
Ontario	19	14,170,000
Manitoba	5	1,620,000
British Columbia	10	1,364,000
	45	$17,831,400

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

New Westminster, B.C.—McAllister's, $250,000, (furniture).

Duncan, B.C.—Somenos Poultry and Produce Company, $30,000.

Cariboo, B.C.—Prince George Investment and Developing Company, $400,000.

Brantford, Ont.—H. M. Robertson, $40,000, (chemists). J. Ruddy, A. G. Olive, E. Sweet.

Prince Rupert, B.C.—Railway Employees' Investment & Industrial Association, $100,000.

Victoria, B.C.—Victoria Motor Country Club, $50,000. Rubidge Mining Company, $10,000.

Shoal Lake, Man.—Star Printing Company, $5,000. J. Menzies, C. Findlay, M. McFadyen.

Hamilton, Ont.—Dixon Brothers, $100,000, (jam manufacturers). W. Dixon, J. Dixon, R. A. Dixon.

Victoriaville, Que.—Arthabasca Motor Car Company, $19,900. F. Bastien, J. O. Bastien, A. Quesnel.

Brampton, Ont.—The Brampton Men's Club, (no share capital). C. S. McDonald, T. Thauburn, A. H. Milner.

Brandon, Man.—Waldron Cigar Company, $25,000. A. B. Evans, Brantford, Ont.; J. H. Waldron, Brandon; Mrs. M. A. Evans.

Windsor, Ont.—The Point Improvement Company, $40,000. R. F. Hurst, Mersea; W. Winter, Leamington; J. S. Austin, Windsor.

Saint Severin do Proulxville, Que.—Le Bon Marche Compagnie, $20,000. A. Brunelle, Three Rivers; A. Bordeleau, J. Bordeleau, both of Saint Severin.

Shawinigan Falls, Que.—La Compagnie Manufacturiere de Shawinigan Falls, $49,500. A. Brunelle, Three Rivers; G. Baril, J. Trepanier, both of Shawinigan Falls.

Vancouver, B.C.—Donaldson, McDonald Company, $10,000, (flour and feed). Griffith Bread Company, $10,000. London and Pacific Mortgage Company, $500,000. Richmond Arena, $4,000.

London, Ont.—Ideal Electric Manufacturing Company, $40,000. J. Sussex, R. J. Gracey. W. A. Cooper. Coilene Corset Company, $50,000. J. McK. McDermid, D. H. McDermid, W. A. Finch.

Winnipeg, Man.—Pace, Harrison and Millar, $1,500,000, (real estate). S. E. Richards, A. G. Kemp, D. McRiley. Industrial Builders' Association, $50,000. S. S. Pocock, H. J. Quinn, J. E. Sexton. Schumacher-Gray Company, $40,000, (electrical contractors). J. H. Schumacher, J. G. Brown, C. T. Kummen.

Ottawa, Ont.—Chats Falls Realty Company, $50,000. G. P. Spittal, T. A. Beament, A. H. Armstrong. Castings of Ottawa, $40,000. J. Oliver, W. Campbell, W. A. Oliver. Quinn Giles, $50,000, (chemists). G. A. Quinn, J. R. Giles, F. P. Quinn. La Mine D'Or Huronia, $1,000,000. C. Lafond, G. Morrisset, F. Giroux.

Montreal, Que.—Compagnie Nationale de Construction, $49,000. J. Brosseau, G. E. Lanthier, both of Montreal; J. A. Croteau, of Thetford Mines. Montreal East End Realty, $99,000. R. Chenevert, F. Callighan, J. E. Saucier. Le Credit Immoblier de Boucherville, $30,000. F. Turgeon, E. Cote, J. A. Turgeon. Montreal Home Land Investment Company, $10,000. R. E. Fraser, H. M. Cockburn, Miss E. Fraser. Oriental Rug Renovating Company, $50,000. J. R. Morton, N. F. McNeil, G. W. Stairs. Richer, Limitee, $50,000, (boots and shoes). J. Richer, J. A. Payette, J. A. Patry. Freeholders, $100,000. B. Lefebvre, J. Paradis, J. A. Guimond. Specialties, $200,000. E. R. Bouchard, D. R. Kennedy, J. R. Perreault.

Toronto, Ont.—Koohinoor Gold Mines, $2,000,000. S. King, A. Hayward, F. Watts. Greater Canadian Motion Picture Society, (no share capital). D. H. Thomas, G. Parker, M. D. Mack. Moffat-Irving Steel Works, $100,000. J. W. Moffat, T. C. Irving, Junior, T. R. Loudon. Hepburn & Disher, $150,000, (iron and steel manufacturers). J. T. Hepburn, C. T. Disher, C. Inrig. Ritchie and Allen, $40,000, (hardware). R. D. Moorhead, L. Macaulay, J. E. Anderson. Cluff Manufacturing Company, $300,000. A. W. Holmsted, C. J. F. Collier, D. J. McLean. Lake-Bourne Farms, $150,000. R. D. Moorhead, Toronto, J. G. Farmer, L. Lee, both of Hamilton. International Tailoring Company, $20,000. F. Steinberg, W. M. Muchnic, M. Link. Yampa Consolidated, $10,000,000, (stock brokers). A. McL. Macdonell, H. C. Fowler, M. L. Gordon.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Consort Village, Alta.—The council has been authorized to borrow $2,000.

Sovereign Village, Sask.—The council has been authorized to borrow $1,500.

Clarence Township, Ont.—This township has an issue of drainage bonds for sale.

Big Arm R.M., Sask.—The council has been authorized to borrow $15,000. C. S. Polin, secretary-treasurer, Stalwart.

Paradise Hill R.M., Sask.—The council has been authorized to borrow $5,000. J. F. Burns, secretary-treasurer, Merrin.

King George R.M., Sask.—The council has been authorized to borrow $5,000. J. D. Smith, secretary-treasurer, Glenurg.

Bethune Village, Sask.—The council has been authorized to borrow $1,500. Chas. McInnis, secretary-treasurer, Bethune.

Toronto, Ont.—Up to September 5th for $115,000 5 per cent. 20-year separate school debentures. J. L. Hand, Toronto.

Maymont Village, Sask.——The council has been authorized to borrow $1,500. P. E. Knowles, secretary-treasurer, Maymont.

Glenwood S.D., Man.—Up to September 15 for $30,000 6 per cent. debentures. J. Edmond, secretary-treasurer. (Official advertisement appears on another page).

County of Middlesex, Ont.—Up to October 10th for $25,000 5 per cent. debentures. A. M. McEvoy, county treasurer, London. (Official advertisement appears on another page).

Mayfield, Sask.—Tenders are required for $17,000 15-year 7 per cent. debentures. E. L. Anderson, secretary-treasurer. (Official advertisement appears on another page).

Battleford, Sask.—Up to September 19th for an issue of $40,000 5½ per cent. 10-year debentures. J. P. Marshall, secretary-treasurer, Battleford. (Official advertisement appears on another page).

Thibeault R.C. S.D., Alta.—Tenders are invited for $14,000 6 per cent. 20 instalment debentures. J. B. Dalphond, secretary-treasurer, Morinville. (Official advertisement appears on another page).

◆

At the annual meeting of the Chatham, Wallaceburg and Lake Erie Railroad according to expectations the majority of the members of the board were Canadian Northern Railway representatives. The names of the new members are: Messrs. D. B. Hanna, A. J. Mitchell, R. G. O. Thomson, Hon. H. F. Phippen, J. D Morton of Toronto, D. A. Gordon of Wallaceburg, and J. Kerr of Chatham.

DIVIDENDS AND NOTICES

THE HURON AND ERIE LOAN AND SAVINGS COMPANY

Quarterly Dividend and Bonus

Notice is hereby given that a Dividend of Two and Three-quarters per cent. for the quarter ending September 30th, 1913, being at the rate of Eleven per cent. per annum upon the paid-up capital stock of this Company, and a Bonus of One-quarter of One per cent. thereon, have been declared and will be payable at the Company's office in this city on and after Wednesday, October 1st, 1913, to shareholders of record at the close of business on September 15th, 1913.

By Order of the Board,

M. AYLSWORTH,
Secretary.

London, August 25th, 1913.

THE MONTREAL CITY AND DISTRICT SAVINGS BANK

Notice is hereby given that a Dividend of Two Dollars per Share on the Capital Stock of this Institution has been declared, and will be payable at its Head Office, in this City, on and after **Wednesday, the 1st of October next**, to Shareholders of record at the close of business on the 15th day of September next.

By order of the Board,

A. P. LESPERANCE,
Manager.

Montreal, August 29th, 1913.

THE SHERWIN-WILLIAMS COMPANY OF CANADA, LIMITED

Notice is hereby given that the ninth quarterly dividend of one and three-quarters per cent. (1¾%), being at the rate of seven per cent. (7%) per annum, upon the preferred stock of this Company, has been declared payable to shareholders of record the 15th day of September, 1913, and that cheques for the same will be duly mailed to them on the 1st day of October next.

Books not closed.

By order of the Board.

J. H. GORDON,
Secretary-Treasurer.

Montreal, September 2nd, 1913.

AMES HOLDEN McCREADY, LIMITED

Quarterly Dividend

Notice is hereby given that a Dividend of One and Three-quarters (1¾) per cent. upon the Preferred Capital Stock of the Company, now issued and outstanding, for the current quarter, to Shareholders of record on the Transfer Books of the Company on the 20th day of September, 1913, will be payable at the office of the Company in Montreal on and after the first day of October, 1913.

By Order of the Board,

W. A. MATLEY,
Secretary.

Montreal, September 6th, 1913.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Brandon, Man.—August 20—Mr. C. Scott's stable, 15 miles south of city. Loss $2,000. Cause, lightning.

Cobalt, Ont.—September 2—Frame building. Loss $5,000. Cause unknown. Two deaths.

Edmonton, Alta.—August 25—Adam's Express and Cartage Company's premises. Loss $10,000. Cause, lightning.

Fairbank, Ont.—August 29—Fairbank Hotel. Loss $12,000. Cause, supposed incendiary.

Fairfield, Ont.—August 27—Mr. W. Patterson's residence. Loss and cause unknown.

Frankford, Ont.—August 27—Mr. L. Sire's barn. Loss $4,000. Cause, dropped cigarette.

Netherby, Ont.—August 28.—Mr. S. Winger's barn. Loss $5,000. Cause, lightning.

Odessa, Ont.—September 2—Mr. A. Storm's barn. Loss and cause unknown.

Rawdon, Ont.—September 2—Mr. A. McGee's residence and barns. Loss unknown. Cause, lightning.

Red Deer, Alta.—August 25—Valley City Lumber Company's sawmill. Loss and cause unknown.

Stratford, Ont.—August 26—Messrs. Schmidt's Brothers plant. Loss $75. Cause, spontaneous combustion.

Thorold, Ont.—August 23—Mr. E. Manley's barn. Loss $600. Cause unknown.

Toronto, Ont.—August 29.—Ontario Cap Company's premises. Loss $7,500. Cause unknown.

Strathburn, Ont.—August 29.—Mr. E. Currie's barn. Loss $3,000. Insurance $1,200. Ekfrid Mutual Company. Cause, lightning.

Winnipeg, Man.—August 26—Messrs. D. A. Ritchie's barn, Dufferin Avenue and Salter Street. Loss $1,800. Cause unknown.

Belleville, Ont.—August 27—Barn and Mr. E. Mastin's auto. Loss $1,400. Cause, lightning.

September 2—Several buildings. Loss $15,000. Cause unknown.

Bankers' Burglar and Fireproof Safe for Sale at ½ Regular Price

A splendid bargain. In perfect condition. For full particulars and price, address The R. S. Williams & Sons Co., Limited, 145 Yonge Street, Toronto. Attention, Mr. Shelton.

Montreal, Que.—August 25—Mr. Skelly's auto. Loss unknown. Cause, lighted match.

August 29.—Windsor Star Theatre. Loss $1,000. Cause, picture film. 1992 Christopher Columbus Street. Loss unknown. Cause, supposed dropped cigar.

September 2—Messrs. Debenham's, 20 St. Helen Street, $150,000. The MacFarlane Lumber Company, Mr. H. Gallagher, Canadian Sheet Metal Company, Mr. E. Lemire, corner of St. James and Richmond Streets, $35,000. Cause unknown.

London, Ont.—August 29—Exhibition buildings. Loss $50,000. Insurance, British American, $8,000; Ætna, $8,000; Fidelity Phoenix, $2,000 Western Assurance, $4,000; Guardian Assurance, $4,000; Economical Mutual, $4,000; Atlas, $4,000; Sovereign, $2,000; London and Lancashire, $2,000; General American, $2,000; Liverpool and Manitoba, $4,000; Employers' Liability, $3,000; Commercial Union, $4,000; Mercantile Insurance, $8,000; Insurance Company of North America, $4,000; Scottish Union, $4,000; Royal, $8,000; Liverpool, London and Globe, $4,000; London Mutual, $4,000; British Crown, $1,500; Sun, $3,000. Cause, supposed incendiary.

* * *

The usual monthly figures compiled by the London Bankers' Magazine of the aggregate value of 387 securities dealt in on the London Stock Exchange show an increase for August of £31,187.000, or 1.0 per cent., which follows a decrease of £11,203,000, or 0.3 per cent. in July, and £88,234,000, or 2.5 per cent., in June. British funds show an increase of £5,865,000, or 0.9 per cent.; foreign government stocks have an increase of £10.004,000, or 1.3 per cent., and African an increase of £3,415,000, or 5.6 per cent. Home rails advanced £341.000, or 0.1 per cent., and American securities rose £4.220.000, or 1.2 per cent.

COAL MINED IN BRITISH COLUMBIA

How Use of Oil Fuel on Pacific Coast Affects Market Prices

The output of coal mined in British Columbia in 1912 (which includes the coal made into coke) was 3,025,709 tons (2,240 lb.) as compared with 2.297,718 tons in 1911 and 3,139,235 tons in 1910. Had it not been for labor troubles at the mines of the Canadian Collieries (Dunsmuir) Limited, during the last quarter of the year, a result of which was that the output of those mines was about 150,000 tons less than in 1911, there is little doubt that 1912 would have been the record year for production of coal in the province. However, the year's output was only 113,526 tons less than that of the record year—1910—so that with this single exception it was greatly in advance of that of any other year. The net output of coal, that is, after deduction of 396,905 tons made into coke, was 2,628,804 tons, as compared with 2,193,062 tons in 1911 and 2,800,046 tons in 1910. In the last mentioned year, though, the quantity made into coke was somewhat smaller—339,189 tons. The coke production for three years was: In 1912, 264,333 long tons; 1911, 66,005 tons; and 1910, 218,029 tons. Only in one other year has there been a larger production of coke than in 1912, namely, in 1905, when the output was 271,785 tons. It will be seen that while there was a net decrease in output of coal in 1912, as compared with 1910, of 171,242 tons, there was an increase in coke of 46,304 tons. The difference in value of coal and coke produced in 1912, as compared with 1910, was $321,523, the respective totals having been $10,786,812 in 1912, as against $11,108,335 in 1910.

The gross production of several collieries was as follows:

	Long Tons.	
Vancouver Island—		
Canadian Collieries (Dunsmuir) Ltd. ...	741,569	
Western Fuel Company	576,797	
Pacific Coast Coal Mines, Ltd.	151,589	
Vancouver-Nanaimo Coal Co., Ltd.	88,253	
		1,558,208
Queen Charlotte Islands—		
British Pacific Coal Co., Ltd.		32
Nicola Valley—		
Nicola Valley Coal & Coke Co., Ltd. ..	142,973	
Inland Coal and Coke Co., Ltd.	31,300	
Diamond Vale Collieries, Ltd.	3,310	
		177,583
Similkameen—		
Princeton Coal and Land Co., Ltd.	28,174	
United Empire Mining Co.	500	
		28,674
Crow's Nest—		
Crow's Nest Pass Coal Co., Ltd.	950,706	
Hosmer Mines, Ltd.	188,243	
Corbin Coal and Coke Co., Ltd.	122,263	
		1,261,212
Gross production of coal		3,025,709

Of the 264,333 tons of coke, the Crow's Nest Pass Coal Company produced 218,954 tons, and the Hosmer Mines, Ltd., 45,379 tons.

Markets and Prices for Coal.

The following extract from the report of Mr. W. Fleet Robinson the provincial mineralogist gives information as to the markets for the coal and coke produced, and prices ruling for the former:

"The coal fields of the province which are at present producing may be divided into main divisions—those of East Kootenay district and of the Coast district. These fields, from their geographic positions—the one at the extreme eastern boundary of the province, and the other at the extreme western edge—are in no way competitors in the market, their markets being quite separate and ruled by completely different conditions.

"The market of the East Kootenay field is provided primarily by the railways of the south-eastern part of the province and of the northern parts of the adjoining States of Montana and Washington, approximately two-thirds of the coal sold as such being exported to those states, while the other one-third goes to supply the demands of the south-eastern part of the province—its domestic needs, railways, steamboats, mines, and smelters. Coke, a product of the coal mines, is sold in the same markets, with the difference that the local consumption—chiefly by the smelters of Trail and the Boundary district—takes more than 80 per cent. of the product, while 20 per cent. is exported to the states mentioned. As regards the marketing conditions in this field, the East Kootenay collieries are, however, brought into direct competition with the collieries of Alberta just over the provincial boundary line, all these collieries being in the same coal field, with practically the same grade of coal and working under similar conditions. This competition has kept the price obtainable for coal from $2.25 to $2.50 a ton, with little probability of any material increase in price, owing to the facility with which new collieries can be opened and the very large reserve areas of coal in that district.

Use of Oil Fuel.

"The Coast district may be subdivided into two fields—the Nicola-Princeton and the Vancouver Island fields—in which the markets differ considerably. In the former field the consumption is chiefly by the local railways, while a small amount of coal finds its way to Vancouver, even under the handicap of what seems to be an excessively high freight charge. The Vancouver Island coal market is provided by the domestic and manufacturing requirements of the Coast cities, and of the ocean-going steamers calling at these ports. The demand for coal from the larger coasting steamers and from the railways has in the last two years diminished, as the Canadian Pacific Railway main line engines are nearly all burning California crude oil, and a large coasting steamer burning coal is now an exception. Notwithstanding the heavy consumption of crude oil, the coal sales have remained about constant, approximately 70 per cent. of the coal sold having been in use in British Columbia, 20 per cent. exported to the United States. and 10 per cent. to other countries, chiefly Mexico. In the Coast district the demand for export coal has been so great and constant, particularly on the seaboard, and the prices obtainable so satisfactory to the shippers, that it has permitted of the domestic price being kept at a figure so high as to admit of the importation from California of fuel oil as a competitive fuel, where conditions permit of its use. It would appear, therefore, that the present price of coal on the seaboard, of from $4 to $4.50 f.o.b., is not liable to decrease for some time."

◆

IS THE WESTERN FARMER DISCARDING TRACTION ENGINE?

That the western farmer is discarding traction power and is going back to horses is a statement being freely made. Writing on this subject, Hon. Mr. Motherwell, minister of agriculture for Saskatchewan, says: "For four or five years previous to last year there was a marked increase in the use of traction power on the farm. Many farmers were of the opinion that it was going to supersede horse power, particularly for heavy ploughing. The difficulty in obtaining competent engineers, however, together with the increasing cost of gasoline and oil, has been gradually bringing about a change of opinion regarding the profitableness of mechanical power on the field. At the present time, approximately 50 per cent. of the traction ploughing outfits that were in use last year are idle, and many farmers who are using them admit that they cannot plough as cheaply with gasoline or steam as they can with horses or oxen.

"Another objection to mechanical power on the field is that it is almost impossible to do as good work as with horses. Running heavy engines, particularly over our clay land, seems to pack the land under the wheels too tightly, which has a tendency to develop a grain crop lacking very much in uniformity, as the growth is frequently very tardy where the heavy wheels have passed.

"As a matter of fact, mechanical power as I have found it in my own farming experience and from observations throughout the province, falls down at nearly every stage of the game. It may have served a useful purpose some years ago, when fuel was cheaper and help more efficient, in bringing large areas of our prairie land under cultivation quickly and developing such lands for sale. To-day, however, it is expensive and inefficient; it tends to encourage undesirably large farms, which in turn tends to drive men off the farm. Indeed, it is the direct cause of more failures in Saskatchewan than probably any other. Unless engine power, engine implements and engine fuel can be made less expensive and more efficient in the field, traction power will, in my opinion, gradually disappear from the scene of field husbandry.

"Again, traction farming commits one still further to the policy of buying a commodity (power) that should be produced on the farm. And, as one step generally commits an individual to a second, so buying a tractor means buying fuel abroad instead of feeding oats grown at home.

"In theory, farm engines dispense with a very large proportion of the horse flesh that would otherwise be required. In practice, it doesn't work out that way, as almost as many horses are still required to perform certain classes of work for which a tractor is not suited. This leads to a power supply with suitable farm implements for each, and no farm in any country can stand such a heavy expenditure for equipment.

"From the above you can readily understand why the use of farm tractors on the land is on the decline in Saskatchewan."

INTERNATIONAL INSURANCE CONGRESS

This Will Be Held at San Francisco in 1915—Canadian Delegates Will Attend

The Panama-Pacific International Exposition, to be held in San Francisco in 1915, will be the first undertaking of the kind at which insurance is recognized as an important industry. An insurance commissioner, Mr. W. L. Hathaway, Pacific Coast manager of the Mutual Life Insurance Company, of New York, has been appointed by Mr. C. C. Moore to conduct the representation of insurance at the exposition. Commissioner Hathaway invited the insurance interests of the world to participate in an international insurance congress, to be held in San Francisco in 1915, and the responses thus far received give promise that this congress will be the most notable insurance gathering that has ever been held.

Canadian Delegates to Attend.

An invitation to attend was received by the Life Underwriters' Association of Canada at its recent convention. The Association will hold its conference at Calgary in 1915 and many of the delegates will afterwards go on to San Francisco to the international insurance congress and the exhibition.

One of the latest acceptances to participate in this congress has come from the International Bureau of Insurance, which, at its recent meeting in Paris, decided that in 1915 it would not hold the usual congress of insurance brokers and agents, but would attend the international insurance congress in San Francisco in that year instead.

As the International Bureau of Insurance is a clearing house, or central body, of all the insurance organizations of Europe, this action on its part is equivalent to general participation in the San Francisco congress of the insurance interests of the Old World.

Fire Protection at the Exhibition.

The exposition management extended an invitation to both the national and local insurance organizations to confer with the exposition officials on the subject of fire protection. A result of this invitation was the forming of an underwriters' advisory committee, composed of Messrs. George W. Booth, chief engineer, committee on fire prevention, National Board of Fire Underwriters; F. H. Porter, manager, Fire Underwriters' Inspection Bureau, and George M. Robertson, chief engineer, Board of Fire Underwriters of the Pacific.

As a result of conferences between this committee and the exposition officials, a general scheme of fire protection has been evolved, and to carry out its provisions, a separate department of the division of works of the exposition has been formed, with Mr. W. M. Johnson as its chief. The department is called the department of water supply and fire protection, and all matters pertaining to those subjects fall within its province. By this means, it is expected, the fire hazard will be reduced to the minimum, with a maximum fire protection.

The three most prominent features of the scheme are (1) the location of the buildings, (2) the installation of a high pressure water system, and (3) a thoroughly organized and well distributed fire department.

◆

HAZARD OF THE CELLULOID SCRAP.

In his report on the recent fire which occurred in the button factory at 141 West 20th Street, superintendent F. J. T. Stewart, of the New York Board of Fire Underwriters, says:—

"Extreme care should be exercised in the handling of lightly inflammable material such as celluloid scrap. This should be kept in standard metal cans with tight-fitting covers normally closed. The number of fires which have occurred just before the starting time in the morning suggests the advisability of employers and building owners using drastic measures to prevent lighted cigars or cigarettes being brought into factories. All elevator men or doorkeepers should have instructions not to allow and employee carrying a lighted cigar or cigarette to enter the factory. Fire escapes running in front of windows other than wired glass in substantial fireproof frames are dangerous.

◆

The Maritime Oil Fields, Limited, have struck another gas well in Albert county, N.B., with a yield of about four million cubic feet per day. A well is now being sunk at Sussex in the hope that gas may be struck in that town also, and thus be available within forty-five miles of St. John. The financial stringency is said to have been the cause of a cessation of the work of developing the oil shales in Albert county.

NATIONAL LAND AND APPLE SHOW

Attractive Exhibition to be Held at Winnipeg in October —Every Province Will Help

Winnipeg is to have a land and apple show and apples will probably take first place. Winnipeg knows something about apples, for the story runs that a Winnipeg man once paid $5.75 for a 75c. barrel of Ontario's fruit the question arising as to how the five dollars were divided.

There will be an "Ontario Day," a "British Columbia Day," a "Maritime Province Day," a "Prairie Province Day," etc., and on these days the problems involved in that question can be discussed, while it is intended to give away to visitors at the show souvenirs in the shape of a carton, the contents of which will be some product of the land. As this feature will be an advertisement for the particular province, district, society or grower, the management of the show expect the "carton souvenir" to be furnished by those directly benefiting by the advertisement. As a suggestion any district might contribute a potato carton, an apple carton, a vegetable carton, sample grain carton, etc. The land and apple show management are doing everything possible to co-operate with governments, railways, agricultural societies, fruit organizations, and individual exhibitors in making their exhibit attractive.

National in Scope.

That the land and apple show will be national in scope and purpose is shown by extracts taken from one of the booklets issued by the management, in which it gives the following reasons why:

Because in the first place Canada has never had an all-Canadian, Exhibition of the products of the farms of the Dominion big enough and broad enough to fit the greatness of the country. Second, the holding of Canada's land and apple show will demonstrate what Canada has done and is capable of doing, thus adding new strength and energy to every Canadian. And again, as it is pointed out, a definite invitation at a definite date, inviting people to see for themselves what Canadian farms can produce, will surely bring big results to exhibitors. Further, the Canada land and apple show will bring together what products Canada has to show, which will be put into a space where they will be presented in the best possible way. From a business standpoint the Prairie Provinces is the greatest market the fruit-growers of the older provinces have, and by its development it will advance the trade and commerce of all Canada. It is also certain that the Canada land and apple show will create and open up a home market for a great variety of our farm products that are now being imported into the Canadian West.

Rules and Regulations.

The regulations and conditions set forth in the official folder issued calls for the occupation of about 25,000 square feet of floor space, the total cost being sub-divided prorata among governments, railways, boards of trade and other exhibitors, and in the case of governments and railways does not exceed fifty cents per square foot, and that of boards of trade and agricultural societies twenty-five cents per square foot. Exhibits of governments, railways, boards of trade and agricultural societies remain the property of the exhibitors after the show, while on the other hand growers competing for the big cash prizes must comply with the rules and regulations in which it is intended that the Canada land and apple show pay all freight to Winnipeg on all exhibits for competition, arranging same in space provided free of cost to the grower and for which the exhibitor assigns to the Canada land and apple show their exhibit, the proceeds for sale of which is to go to the general prize and expense fund of the show.

◆

Between July 31st and November 30th of last year, which covered the active part of the crop-moving season, the amount of bank notes in circulation increased from $95,827,000 to $115,473,000, or by nearly twenty millions. There should be no inconvenience caused to any legitimate interest this year in providing a like or greater amount of credit for crop-moving, and the activity in other lines of trade which begins with the close of the summer holiday season. Incidentally, it is to be remembered also that in some departments of more or less legitimate business there has been a healthy decline during the past twelve months; and this, while it may have adversely affected individuals, has not in any way reduced the actual wealth-producing powers of the country. With their larger resources generally and their larger capital and larger reserves, the latter two fixing the basis of their circulation, the banks this year have a new privilege, that of issuing notes against their contributions to a central gold reserve, to be held by trustees.—Montreal Gazette.

DEBENTURES FOR SALE

TENDER FOR DEBENTURES

Tenders will be received up to twelve o'clock noon on Friday, the 19th day of September, A.D. 1913, for the purchase of an issue of $40,000 worth of debentures for the purpose of purchasing stock in the Laurentia Milk Company, of Saskatchewan, Limited, repayable at the end of a period of ten years, and bearing interest at the rate of 5½ per cent. per annum.

The highest or any tender not necessarily accepted.

J. P. MARSHALL,
Secretary-Treasurer,
Town of Battleford.

Battleford, Sask., 21st August, 1913.

DEBENTURES FOR SALE

Tenders will be received by the undersigned for the purchase of $14,000.00 6 per cent. debentures of Thibeault R.C. School District No. 35, repayable in 20 annual instalments.

J. B. DALPHOND,
Sec.-Treas.

Morinville, Alta.

DEBENTURES FOR SALE

The village of Maryfield, Sask., offer $1,700 15-year, 7 per cent. debentures.

E. L. ANDERSON,
Secretary-Treasurer.

Maryfield, Sask.

TENDERS FOR COUNTY OF MIDDLESEX DEBENTURES

The County of Middlesex offers for sale Twenty-five Debentures of the amount of one thousand dollars each, for which sealed tenders addressed to the undersigned and marked "Tender for Debentures" will be received by the undersigned up to **eleven o'clock a.m., the 10th day of October, 1913.** The County does not bind itself to accept the highest or any tender.

Each Debenture is dated the twenty-fourth day of July, 1913, and is payable on the tenth day of November, 1933, with interest thereon at five per cent., semi-annually on the tenth day of May and the tenth day of November in each year during the currency thereof, on presentation of the coupons to each of said Debentures attached at the office of the Treasurer of said County, but not elsewhere or otherwise.

A. M. McEVOY,
County Treasurer,
County Buildings,
London, Ont.

August 30th, 1913.

SCHOOL DEBENTURES FOR SALE

Tenders will be received up to noon, **Monday, September 15th, 1913,** for $30,000, 6 per cent. debentures, repayable annually on September 1st at Bank of Hamilton, Norwood, Man.

JOHN EDMOND,
Sec.-Treas.

Glenwood School District, No. 1537,
Grandvital, Man.

WINNIPEG PASSES MINNEAPOLIS

The following statement shows the total inspection in the Western grain inspection division for the crop year ending August 31, 1913, viz.:—

	Bushels.
Wheat	141,715,125
Oats	59,763,600
Barley	14,833,000
Flax seed	22,081,500
Rye	16,000
Total	238,409,225

The following statement showing receipts of grain at various points for the calendar year 1912:—

	Wheat (bush.)	Oats (bush.)	Barley (bush.)
Winnipeg	143,682,750	51,683,000	10,049,800
Minneapolis	113,635,280	15,804,530	24,599,630
Buffalo	108,225,504	10,580,150	12,176,925
Duluth	86,777,990	10,328,940	10,932,261
New York	45,976,100	24,152,650	7,070,864
Kansas City	43,719,600	6,682,700	186,200
Montreal	36,283,931	13,271,581	1,895,089
Chicago	35,914,000	118,491,300	20,355,200
St. Louis	30,541,767	21,152,650	7,070,864
Philadelphia	19,601,796	9,600,214	386,012
Omaha	16,868,800	12,903,000	1,192,800
Baltimore	12,488,385	17,481,271	579,588
Milwaukee	9,967,490	14,346,360	13,716,000
Cleveland	3,552,675	11,278,520	28,946

These figures rather preclude United States "explanations" to change the order of cities.

◆

The number of Pacific liners that are now burning oil fuel has created a necessity for more oil tankers. The Union Oil Company expects to have three new tankers of 10,000 tons capacity each on the Pacific coast shortly. Each of these tankers will hold 72,000 barrels of fuel oil and yet the vessels like the big Canadian-Australian liner "Niagara" will take 5,000 tons, or half of one of these tankers, for a single voyage.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

LESSONS FROM THE BINGHAMTON FIRE

Combustible Contents May Furnish Disastrous Fires Even in Fire-resistive Buildings

The National Fire Protection Association, through its committee on Safety to Life, of which Mr. H. W. Forster is chairman, has made a complete report on the recent fire in the plant of the Binghamton Clothing Company at Binghamton, New York. After describing the character of the risk, the origin and progress of the fire, the report submits the following lessons to be learned from the disaster:—

"That the ordinary brick building with wooden floors is highly combustible, and unfavorable conditions may make of it a fire flue or furnace.

"That combustible contents may furnish disastrous fires even in fire-resistive buildings, as was proven by the Triangle Waist Company fire of March 25, 1911.

"That twenty years in one factory building without a serious fire may lull the owner into an unwarranted feeling of security. Prompting to improve conditions must come from without.

Only One Stairway.

"That in this building there was but one stairway to the third and fourth stories, and this stairway was not enclosed by a fire-resistive partition. Ordinary open stairs permit the rapid upward spread of fire and are soon made impassable. Note.—It is recognized that enclosing wooden stairs by fire-resistive partitions may not afford absolute protection. The stairs themselves can burn, as in this case, or the doors may be open, and smoke and flames thereby get into the shaft. The so-called Philadelphia smoke-proof fire tower is the only safe type of vertical exit. A combination of enclosed stairways for ordinary use and of one or more fire towers for emergency exit purposes makes the ideal arrangement.

"That reliance for emergency exit from this building was placed upon one outside iron fire escape, a type of exit which, though allowed by the law, is condemned by the experience of many fires. Note.—To have any value at all in a building where many persons are employed, a fire escape must be ample as regards strength, have easy stairs and reasonably wide walkways, permanent stairs to the ground, or swinging counterbalanced stairs from the second floor to the ground, and either be located against a blank brick wall or have contiguous window openings protected by wired glass.

Fire Drills Not Enough.

"That fire drills alone do not insure safety of life in a fire trap. Note.—The one open stairway and iron fire escape which constituted the means of exit from the fourth floor where eighty persons were employed were together incapable of accommodating more than about forty persons, and this overcrowding or excessive occupancy on the top floor placed the employees there in constant danger.

"That fires when promptly discovered can frequently not be handled by the local people because of lack of equipment, lack of knowledge how to handle equipment, or because people lose their heads.

Use of Automatic Sprinklers.

"Long experience and continually repeated demonstration prove that the automatic sprinkler, where properly installed and in operating condition, is always ready, operates quickly, and either extinguishes fire or holds it in check, and is the most reliable means of safeguarding lives in the majority of existing manufacturing buildings. Enclosing stairs, building fire towers, properly constructing fire escapes, etc., are all means intended to permit of escape after the fire gets under way. The automatic sprinkler almost invariably prevents the fire from assuming serious proportions."

◆

"In remembering our responsibilities we should ever be mindful that we are citizens not only of this great Dominion, but of a still greater Empire, and that those from whose loins we have sprung made unstinted sacrifices, endured untold hardships, and wrought mighty deeds in the years gone by to the end that Canada might remain a part of the British Empire, and that the flag which we delight to honor might continue to float over this fair land. The memories which are thus recalled, the traditions which have thus descended to us, the charge thus committed to our keeping, must never be forgotten, when we are called upon to consider and to estimate the duties and obligations of our citizenship."—Premier Borden at Toronto.

MORE SLOPPY THAN IN TURKEY

Here is a London Man Who Has Much to Say About Canada's Business Methods

Mr. C. J. A. Dalziel, of London, in a letter to a representative in Lethbridge, Alta., criticizes the laxness of methods in the furtherance of Canadian loans as follows:—

"I am very grateful to you for the trouble which you have taken in looking up the title to the property I wrote about. You, as well as I, were considerably relieved, I am sure, to know that it eventually landed here a few days after the receipt of your last cable, and I know you will regret, as well as I do, the fact that this negligence on the part of the Land Titles office at Calgary has resulted in postponement, if not an actual withdrawal of a further important proposed investment in the Lethbridge district on behalf of some of these people.

Fails to Recognize Competition.

"I can add nothing to my previous letter on the results over here of such laxness, and were it not for the persistent efforts of private individuals like myself, to cover up and atone for the indifference of those who are paid for doing the work, Canada's reputation over here for business-like methods would have been such as to make it impossible, instead of merely difficult to interest private capital in Canadian investments. The average Canadian who has something to sell seems to fail utterly to realize that in offering his goods over here he is against competitors, but his system of offering must at least compare favorably with theirs if he is to win. Far from this being the case, I have seen more sloppy business come from Canada in the last two or three years than is sent over here by any other country excepting possibly Turkey.

Methods of Offering.

"Canadian concerns started out some years ago with a high standing in England, but owing principally to these lax and unbusiness-like methods, there are now several other countries whose offerings are more favorably received than are those of Canada. You, as a salesman, know that after the quality of the goods offered, the method of offering and of delivering are of paramount importance, and if Canadians wish to preserve their diminishing credit in the old country and keep an open market here for Canadian securities, they will certainly have to revise the methods of doing business and to eliminate from their transactions the gross carelessness which seems to be the ear-mark of so much of their dealings over here.

"As you know, and as I know, Canada is undoubtedly a fine, progressive country, and offers particularly favorable opportunities for investment of capital, but we must not forget that there are other countries which are making a big and successful bid for British capital, in competition with us, and I regret to say that instances of the kind which calls forth these remarks are frequently and promptly seized upon and used to our detriment by our competitors, and just so sure as this laxity and indifference is allowed to go on in Canadian business done over here so surely will those who handle these matters eventually decline to become interested in anything Canadian."

HARBOR FACILITIES AT ST. JOHN

(Special Correspondence.)

St. John, N.B., Sept. 3rd.

The question of increased harbor facilities is a live topic in St. John. Unless grain conveyers are constructed on two additional steamship berths before next winter—apparently there is little hope of getting the work done—there will be greater congestion at West St. John than there was last winter, when the steamship companies made a very vigorous protest against the conditions. There is the most urgent need for increased facilities at West St. John. On the eastern side of the harbor also the need of more accommodation was illustrated recently, when the Red Cross Line asked for a berth for a steamer to provide a weekly service between St. John and New York. The harbor authorities had no berth available, and the city council is now endeavoring to make some arrangement by which the New York steamer may share a berth with those of some other line. No terminal facilities are as yet under construction at Courtenay Bay for the traffic of the Grand Trunk Pacific, which, it has been announced, will be coming to the eastern seaboard within a year. This traffic will, therefore, be available before there are wharves at Courtenay Bay to handle it.—H.

EMPIRE LIFE COMPANY TO SELL STOCK

The Empire Life Insurance Company which will write sub-standard life insurance, will shortly commence selling stock. The cost of procuring subscriptions for stock will not exceed 7½ per cent. of the capital stock and the cost of incorporation of the company is placed at $6,000. "We have gone carefully into the matter of these costs and have found that these are inside figures and that it is impossible to carry it through for less," said Mr. G. Boyd Wickes, the company's general manager to *The Monetary Times*.

The company's president is the Hon. Thos. Crawford, M.P.P., late Speaker of the Ontario Legislative Assembly. The general manager is Mr. George Boyd Wickes, for some years with the Royal Insurance Company in this country organizing the agents of their life department both in the east and west. He has made a special study for some years of under-average business.

The actuary and secretary, Mr. R. W. Barton, A.I.A., was formerly head of the actuarial department of the Clerical Medical and General Life Assurance Society of London, England. This society has specialized in under-average business for nearly a century. Mr. Barton has been on several occasions a contributor on life assurance subjects to the columns of *The Monetary Times*.

Dr. T. F. McMahon is a well-known medical referee and examiner to several life companies in Toronto and is a valuable acquisition to the personnel of the company.

AUGUST MUNICIPAL BOND SALES

United States Firms Make Large Purchases—Domestic Sales Were Average

The municipal bond sales in Canada for August, as compiled by *The Monetary Times*, amounted to $1,580,000, compared with $1,591,924 for July, and $1,649,547 for the corresponding period last year, and making a total for the year of $14,593,941.

Seven provinces were in the market. The largest issue was made by Ottawa.

The following are the particulars by provinces:—

Ontario	$950,706
Quebec	385,000
Saskatchewan	114,000
Nova Scotia	60,000
Manitoba	45,000
British Columbia	13,300
New Brunswick	12,000
	$1,580,006

The following are the monthly totals during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
January	$ 881,838	$ 420,337	$ 2,133,531	$ 1,337,500
February	1,272,977	1,037,287	2,596,378	1,038,806
March	1,169,730	6,271,025	1,926,716	1,035,492
April	6,805,078	3,910,288	927,160	3,693,857
May	5,964,896	3,946,047	1,928,748	1,880,630
June	2,187,588	3,983,670	1,690,344	2,435,726
July	1,536,424	1,594,566	1,967,476	1,591,924
August	1,312,953	1,493,507	1,649,547	1,580,006
September	2,841,486	1,748,778	1,998,605	....
October	2,211,461	1,730,075	1,060,597	....
November	2,292,781	2,915,765	1,396,664	....
December	566,113	1,243,596	491,590	....
Total	$29,043,325	$30,295,838	$19,767,356	$14,593,941

The following are the details:—

Ontario.

Weston	$ 2,000		
Grey County	20,000		
Ottawa	928,706		
	$950,706		

Quebec.

Montreal East	$ 80,000	5

Saskatoon separate schools	60,000	5	1943
Rosthern	10,000		
Melville S.D.	20,000	6	1943
Eldersley R.M.	4,000	6½	1933
	$114,000		

Nova Scotia.

New Glasgow	$ 60,000	5	

Manitoba.

Brandon	$ 45,000

British Columbia.

Vancouver	$ 13,300

New Brunswick.

St. Stephen	$ 12,000	5

◆

OGILVIE COMPANY MAKES ISSUE

Monetary Times Office,
Montreal, September 3rd.

The Ogilvie Flour Mills Company is to make an additional bond issue of $600,000. A special general meeting of the shareholders of the company has been called for September 9, to consider the matter and to sanction it, if deemed advisable. The bonds will be known as series "C." They are being issued for the purpose of paying for the new mills erected at Medicine Hat, Alberta, and to pay for the erection of several additional elevators throughout the northwest. The letter calling the meeting states that the mills are now in operation and are a success.

MANY MUNICIPALS MARKETED IN STATES

Almost Eight Million Dollars' Worth Sold There Last Month

At the end of the year, it will probably be found that more Canadian municipal bonds have been sold in the United States than during any previous twelve months. Almost $8,000,000 worth were sold to United States financial houses in August, according to the records of *The Monetary Times*. Here are the details:—

Saskatoon	$918,000
Toronto (Hydro-Electric)	4,506,500
Calgary Schools	750,000
Brandon	316,000
Ottawa Schools	236,000
	$6,726,500

In addition, $1,500,000 of Toronto Harbor Commission bonds were sold to Messrs. Reid & Company New York.

Some Unfair Comment.

Commenting on this development, the London correspondent of the New York Times Annalist says:—

"The Canadian cities, Brandon and so on, that have been selling their securities in New York of late are rather late in the day to seek the benefits of the fashion of foreign investment. In so far as their recourse to New York needs explanation, it is not far to seek. London has been overloaded with Canadian municipal securities. The flood of short-term notes in particular which have issued thence has caused frequent and adverse comment. They have fallen into a certain disrepute, simply because there was too much of them, and people began to question the security of two shops and a shanty, born of a railway station. Even on the Canadian Pacific a railway station is not an immutable geographical fixture. So bankers and others have been shaking their heads to fresh proposals from the Canadian cities, and they have gone to the United States instead."

More Municipals for London.

That is obviously an exaggerated view, for no such small Canadian municipalities as indicated have sought funds in London. As a sarcastic simile even, it is unfair. The London market has been surfeited not only with Canadian municipal offerings, but with other Canadian issues and with offerings from many other countries. As soon as market conditions improve overseas, there will be offered several important Canadian municipal loans in London, and they will likely meet with a good response.

United States Houses Interested.

Financial houses of the United States are taking more of our securities every year. Messrs. N. W. Harris & Company, Boston, through their Canadian office, in charge of Mr. George Wills at Montreal, have purchased the following Canadian municipal issues during the past seven months: $5,526,000 City of Toronto 4's, $1,089,000 City of Vancouver 4's, $267,000 City of Hamilton 4½'s, and $336,000 City of Halifax 4½'s. In addition, this firm purchased in the same period $1,000,000 Dominion Power and Transmission Company 5's and Montreal Tramway 5's.

Other United States houses which have purchased or bid for Canadian municipals are:—

Messrs. Terry, Briggs & Slayton, Toledo; Messrs. Sidney Spitzer & Company, Toledo; Messrs. Spitzer, Rorick & Company, Toledo; Harris Trust Company, New York; L. N. Rosenbaum & Company, Seattle; E. H. Rollins & Company, Boston.

◆

OPPORTUNITY FOR INVESTMENT

A well-known and long established United States asphalt company are open to meet an investor with $7,000 to $10,000 capital. The company which is already doing a good business in Canada, is willing to hand over its sole rights for Canada to a Canadian company which is being formed for the purpose.

◆

"Canadian municipalities," says a London correspondent of the Wall Street Journal, "are making great play of the fact that certain New York financial institutions have recently been advancing them money. The Bank of Montreal and other concerns in close touch with the London market, have for some time past been restraining municipal outlay in Canada very severely. The old method of these municipalities was to commit themselves to expensive schemes and then come to the London market to finance them. Conditions have been against them, and the municipal bodies are angry with the banks in London. Quite an outburst of cabled messages follows every arrangement of a loan with a New York house, however, onerous the terms."

MUNICIPAL PROGRESS IN SASKATCHEWAN

The Saskatchewan government is making for itself an enviable record. Its ministers and officers seem to have arrived at an unwritten agreement not to issue stereotyped official reports, stodgy with statistics, fleshy with facts and dry as dust. Instead, the blue books which hail from Regina are informative, readable and, as the New Yorker would say, of "human interest." That element has been sadly lacking in our government documents. The annual report of the department of municipal affairs of Saskatchewan for 1912-13 is another example of how attractive an official report may be, without trimming its dignity. This department is presided over by Hon. George Langley, minister of municipal affairs, whom we rather suspect of some of this blue book originality, and by Mr. J. N. Bayne, a deputy who is responsible for an excellent report to the minister.

Mr. Bayne discusses the ever-present interest in municipal life and work in Saskatchewan, and incidentally notes that no village can borrow money by debenture until permission is granted by the minister of municipal affairs. It has been deemed advisable to withold such permission in more than one case or to reduce very materially the sum proposed to be borrowed.

The deputy minister expresses regret that in some Saskatchewan villages municipal life is at a low ebb, a condition of affairs not found in any other class of our municipal bodies. The raising of the minimum number of people for incorporation, he thinks, might have a beneficial effect.

On September 1st, 1905, when Saskatchewan first came into existence, 882 townships had municipal organization as allowed under the old local improvements act. Now, there are 3,545 townships with similar privileges. This is a striking indication of the growth of rural areas.

Amounts approximating $1,714,596 were spent last year by local council boards in Saskatchewan. Improved conditions in the organizations concerned testify to wise expenditure by self-governing bodies concerned. The experience gained by municipalities in expending public funds is doing much for the safety and convenience of those who travel the highways. If the people of a rural municipality so desire, it may borrow money by debenture and thus spread the repayment of the loan over a period not exceeding twenty years. No rash running into debt is allowed, for the loan must not exceed $3,000 per township. Thus the debenture must prove attractive to purchasers when it is known that 144 quarter sections of land becomes security for $3,000, when often each one of these quarter sections of one hundred and sixty acres each is easily worth the sum borrowed on the entire township.

The experience of the municipal department during the years of its existence has shown the necessity of its organization, says Mr. Bayne. The other provinces of the Dominion have watched Saskatchewan in this matter, with the result that several of their provincial municipal unions are urging their respective provincial governments to establish a department of municipal affairs in each province. The three prairie provinces are the only ones in Confederation, each of which has a department of this kind. On the whole, the municipal organizations of Saskatchewan are growing on safe, sensible lines. In some cases it has been necessary to remind a few municipal organizations that they are over optimistic and that the future should not be mortgaged too heavily. The legislation, however, under which each acts, is a safeguard and in its drafting the mistakes of older provinces were averted.

Concluding his report, Mr. Bayne says: "The financial year now closed has seen a marked and wonderful development in Saskatchewan along the lines of municipal growth. The evolution of our self-governing municipal bodies is, however, simply started; the labors of the future are of serious proportions and are of such a nature that continued self-sacrifice, public spiritedness and devotion to duty are necessary on the part of those who volunteer to assist in the onward march of municipal advancement." Thus does the Saskatchewan spirit enter even into legislative buildings.

GROUP INSURANCE

Just as group insurance, so-called, was making a bid for popularity, the American Life Convention the other week condemned the idea. The convention also declared against the insurance of large groups of employees without medical examination. A New York insurance paper says that this convention is "an association composed of the smaller and newer life insurance companies of the south and west."

According to an officer of the Equitable Life Insurance Society, the demand for the prohibition of the plan by law must be due either to ignorance of the fundamental principles upon which group insurance is written, or is based upon a desire for competitive reasons to prevent the extension of regular old line life insurance at low cost to working people.

He adds: "The death rate in any considerable group of employees actively engaged in a safe industry is much lower than the death rate among the large number of medically selected individuals in life insurance companies and consequently the cost is less and the risk to the insuring company is less. On the group plan one policy is issued to the employer covering all of his employees for the term of their employment only—on the yearly renewable plan—thus affecting great savings in cost.

"Employers hire only the physically fit. The employees must maintain this fitness to hold their jobs whereas it is well known that the value of medical examinations wears off in a few years. It is therefore self-evident that the mortality is lower and the element of risk is less in this group than it is among the great body of medically selected people who are insured for their entire lives.

"It needs no argument or scientific knowledge to understand this fundamental fact. It is simply a matter of common sense, confirmed by experience. The employees' families receive this insurance protection in most instances at no cost to them, for the employer usually pays the premiums as an efficiency measure. To prohibit this would be a great wrong.

"Any insurance is dangerous if not prudently selected. No sensible insurance officer would accept for insurance an undesirable group any more than he would an undesirable individual. The plan is not designed, nor should it be applied to the reinsurance of fraternal or similar societies. It must be applied to live, self-adjusting groups where the average mortality remains virtually level, and no company proposes to apply it otherwise so far as I know."

At the convention of the Canadian Life Underwriters at Montreal last year, Mr. J. A. De Boer expressed the opinion that there would be considerable development in corporation insurance, and that this form of underwriting had come to stay. He thought that a special form of policy, however, would have to be provided, and that the hazard of corporation insurance would have to be critically examined.

It seems quite likely that the extension of group insurance will lead to the creation of some problems which, however, should not prove insoluble and which should not prevent the development of this form of insurance. It would be interesting to know what Canadian actuaries think regarding medical examination in relation to group insurance.

WESTERN CANADA

Harvesting goes on apace in the West, and weather conditions have continued to be very satisfactory. The farmers' expectations that labor would be available at a reasonable wage have been realized, and the feeling now prevails throughout the country that this year's crop will prove to be one of the best paying crops which the farming community has ever had. While the farmer has been inconvenienced through his inability to borrow money at the bank during the summer, he will now perhaps receive the benefit of his enforced economy as he realizes on his grain.

It is naturally too soon to say that the whole speculative community is out of the woods. It is only reasonable to anticipate that the recovery to financial health will be marked by some commercial failures. It is evident that here and there throughout the country not only some real estate speculators but a few merchants have got themselves into a position from which recovery seems quite impossible. But these are phases of a rapidly improving situation.

UNION LIFE AFFAIRS

The proposed government investigation of the collapse of the Union Life affairs can do two things—make mourning wreaths for the British shareholders and put some people in jail. The proposed investigation, however, is likely to do only one thing.

SMALL CHANGE

But, after all, the Long Sault Dam is not the only one.

Six Salem, Ohio, girls sold 10,000 kisses at $1 each to aid the endowment of a hospital. In Canada, Sir Max Aitken would form a merger, giving a bonus of lip salve; the Montreal Stock Exchange would list Kiss common, and Toronto's medical health officer would insist on celluloid kiss guards.

* * * *

"A well-known professor of political economy in Canada produced off-hand an essay of 20,000 words to show that for once in the world an adverse trade balance was a blessing to the debtor nation, and offered it to the New York Times Annalist at a price which he supposed it would be only too glad to pay, seeing that it had ruined its circulation in Canada by attacking the country's credit, and might hope to restore it only by printing his explanation." Who does the cap fit?

FIRE CHIEFS AND ARSON

President Chief Wetmore read a paper on "Fire Insurance and Its Relation to Incendiarism" at the Fire Chiefs' Convention at Kingston, and pointed out that fires of an incendiary nature caused $250,000,000 damage yearly in Canada and the United States. Emphasis is laid on this cause of fire loss by the utterances of officials in Canada's largest cities.

"The time has come when steps should be taken to stop incendiaries' work in Montreal," declared Commissioner Latulippe immediately after evidence had been given in the case of a fire in that city.

"During August," said Commissioner Latulippe, "many cases have come before the fire commission to which we called the attention of the detectives, but no report has ever been made to us, and the men suspected are still at large. I am positive that in several instances fire has been set deliberately, and it seems as if nothing had been done to find the culprits."

Commissioner Latulippe explained that a special detective should be put under the control of the commission, so that every case might be thoroughly investigated. Every day a report would be made to the commission, which would act accordingly. And attention was drawn to the great increase in the number of fires in Montreal so far this year over the last year by Fire Chief Tremblay, of Montreal. The chief said that already there have been twenty-one hundred fires to which the brigade has responded to date against twenty-six hundred fires for the whole of last year. If the present rate keeps up there will be four thousand fires this year. The chief recommends the taking of extraordinary precautions against this evil and the building of more fire stations, etc., while at Toronto, Fire Chief Thompson made a report during August to the civic board of control, that at least 50 per cent. of the recent fires had been caused by incendiaries.

During August the firemen have had to deal with no less than 27 incendiary fires in and around that city. Besides that, they had calls to the outside points near the city, and one of these, the Fairbanks Hotel fire, is also thought to have been incendiary. Though the damage has not been very great, in most cases it was in the hundreds of dollars.

The Bank of British North America has opened a branch at Queen Street and Beach Avenue, Toronto, under the management of Mr. J. Cant.

HOW SASKATCHEWAN TREATS TAX ARREARS

The experience of municipalities in older provinces and countries bears out the fact that each year it appears to be necessary to compel some delinquents to pay taxes. Quite often only a start in the proceedings is necessary when he who is indebted sees that the municipal body concerned is in earnest, whereupon he becomes aware of the fact that, to avoid further costs and embarrassment, it is better to pay his assessments before additional expenses are added. Throughout Saskatchewan an equitable method is in force, whereby municipalities may compel the careless or stubborn delinquent to pay what taxes he may owe. If criticism were offered to the routine, it would doubtless be that the party owing the taxes is treated almost too leniently, but it is recognized that an opportunity should be given to every one to pay his assessments before he actually loses his land, for to take a man's property from him on account of certain indebtedness is a serious matter, and one which should not be proceeded with until it has received due consideration. However, under the system prevailing in rural municipalities, no land is forfeited until due notice has been sent by registered mail, more than sixty days before the sitting of the court, to every one shown to have an interest in the property, according to the tax enforcement return and the proper land titles office. Thus, the person or firm which may hold a mortgage against a quarter section, will be duly notified in every case of the proposed proceedings and the danger in which the land, against which taxes are owing, stands of being finally forfeited. Again, a period of twelve months after the sitting of the court for the confirmation of the return of arrears is allowed, during which time the delinquent may pay his taxes and costs. After the expiration of the said year, however, the rural municipality may apply for the title, and when this is secured, the land becomes the property of the municipality, and thus forms for it a substantial asset. The system mentioned in this paragraph will be general throughout all cities, towns, villages and rural municipalities commencing with the year 1914.

◆

The Saskatchewan farmers are making a bad start, however, by calling upon the Provincial Government to give them subsidies to enable them to organize co-operative societies. Co-operation is collective self-help, and if State aid is to be a factor, the movement is tolerably sure to come to grief.—Montreal Gazette.

PERSONAL NOTES

Sir William Young, a London director of the Grand Trunk Railway, is on his annual tour of the Dominion.

Mr. H. V. Meredith, general manager of the Bank of Montreal, has been visiting Western Canada and the Pacific coast.

Mr. J. A. Bell, general manager of the Saskatoon Industrial League, has resigned his position, and recommends as his successor Mr. J. W. Tyson, his assistant.

Mr. James Playfair has been elected a director of the National Landed and Investment Company to succeed his father, Mr. Joseph Playfair, who died last June.

Mr. R. L. Thompson Tinn, managing director of the Merchants Trust and Trading Company, Vancouver, called at *The Monetary Times* office this week. Mr. Tinn is on the way to Great Britain.

Mr. J. Cornwall, M.P., has completed a trip through the Mackenzie River basin, when he piloted three writers. Mr. Cornwall makes trips like these each year, the object being to have the north country made known.

Messrs. George A. Touche, M.P. for North Islington, England; A. W. Tait, chairman of the British Aluminum Association, and J. Bruce Anderson, chairman of the British Electrical Manufacturers' Association, were recent visitors to Victoria, B.C.

Mr. Warrington Laing, chairman of the New Zealand Loan and Mercantile Agency Company, Limited, and Mr. James Leigh Wood, C.M.G., of Messrs. Brown, Shipley & Company, have been elected directors of the Commercial Union Assurance Company, Limited.

Mr. E. Roger Owen, general manager of the Commercial Union Assurance Company, Limited, of London, England, and Mr. George Chappell, general manager of the Royal Insurance Company, Limited, of Liverpool, England, are on a visit to Canada and the United States.

Mr. D. J. Scott has been appointed superintendent of agencies for Ontario of the Manufacturers Life, succeeding Mr. J. F. Weston, who resigned to become general manager of the Imperial Life. Last year Mr. Scott was president of the Winnipeg Life Underwriters' Association, and vice-president of the Life Underwriters' Association of Canada.

Mr. E. Hugo Eristock Kommerzienrat, chamber of commerce, Dusseldorf, Germany, and his son visited Toronto exhibition. Mr. Eristock is a large manufacturer of chemical products in Germany, and is also interested in agriculture. He and his son have just returned from an extended tour of the west, taking in all the principal cities and looking over the agricultural section generally.

◆

CANADIAN MANUFACTURERS IN MARITIME PROVINCES

The annual convention of the Canadian Manufacturers' Association takes place at Halifax on September 16th, 17th and 18th, and it is understood that about 250 of the leading manufacturers of Canada will attend. Various entertainments are being provided. Some of the leading manufactories of Nova Scotia are providing centrepieces, descriptive of their manufacture, for the banquet, and other novelties are being prepared.

The Maritime Hardware Association will hold their convention at the same time.

◆

CALGARY FLOUR MILLS

Calgary Flour Mills, Limited, is the latest industrial venture. With a Dominion charter and a capitalization of $5,000,000, forty per cent. of which is to be offered immediately, this company enters the milling industry with the prospect of benefiting by the Panama Canal, and possibly also by the removal of the United States tariff on flour. Plans are prepared for a first unit of 6,000 barrel capacity daily. This city, with its terminal elevator at the gateway to the Pacific Coast, its proximity to the immense wheat fields, its cheap power and excellent transportation facilities, does appear to offer all those interested in this enterprise claim for it. Construction will be commenced in the early spring. The bulk of the stock is held by Minneapolis and Minnesota people, though a local board has good representation through its officers here. Messrs. O. G. Devenish, T. M. Fyshe, A. W. Pryce Jones, W. M. Connacher and O. S. Chapin constitute the local board

LESSONS FROM FIRES

Danger of Shingled Roofs—Use of Fire Doors and Shutters

The National Fire Prevention Association's recent report on fire losses drew attention to the following points, viz.,—

The protection of angle windows at fire sections is very important and frequently overlooked.

Fire occurred in a printing and book-binding establishment having ceilings of the double-beam construction with small space between. The fire worked into this space and the automatic sprinklers could not extinguish it.

Fires at the centre of narrow, deep buildings, inaccessible except at the ends, are of a type extremely difficult to extinguish. Skylights, which are usually found near the centre of such buildings, add to the unfavorable conditions by allowing a premature vent for the fire at the most inaccessible point. Such buildings when not equipped with automatic sprinklers might be made somewhat safer by the introduction of a fireproof partition across the building near the centre.

Shingle Roofs Are Dangerous.

Shingled roofs are a constant menace and should be abolished.

Unprotected steel construction has proved itself many times to be far inferior to average timber construction. Unless well protected in suitable manner to withstand the attack of fire, this type of construction invites disaster.

In every building two or more stairways, remotely located with respect to each other and enclosed in fireproof shafts, are essential for the escape of the occupants, as well as for the work of the fire department.

Elevators should be enclosed in brick or reinforced concrete shaft, walls to pierce all floors and extend at least three feet above roof. Approved automatic fire doors to be installed on one side of wall at all doorways to building.

Modern Methods of Prevention.

Properly installed hand-hose connections on sprinkler equipments in specially hazardous locations have proved very desirable, and frequently prevent an undue water loss by extinguishing the fire before the automatic sprinklers operate.

The use of standard shutters and fire-doors is one of the important adjuncts of good fire protection to-day.

Basement windows should be provided with permanently located heavy screens to guard against this ever-present hazard.

Fire very clearly indicated the necessity of confining all oily rags and waste in standard metal waste cans, for if they had been so kept in this case, the fire would in all probability have been confined to the metal can and would not have opened a sprinkler head.

Ventilating fans should be stopped at once upon an alarm of fire.

COPIES OF THE MONETARY TIMES WANTED

Copies of *The Monetary Times* of August 30th, are wanted. Will readers who do not file their copies send them to *The Monetary Times*, 62 Church Street, Toronto, and their subscription will be extended, gratis, one month.

◆

The Royal Commission on Agricultural Credits has been sitting in the Province of Saskatchewan to hear the complaints of the Canadian farmers, all of whom want cheaper credit and more of it, as farmers everywhere do. They complained that the banks had been withholding credit, when the question was asked: "Do farmers get more credit from the implement men than from the banks?" the answer came as with one voice, "Yes, two or three times." Nobody asked where the implement men got their credit. Because the farmer in this country and in Canada has not been able to borrow so easily and so cheaply at the banks as farmers are supposed to be able to do in Europe, in communities where tenancy is constant and twenty years is an imaginable time, it does not follow that he has been grudgingly provided with credit. He has, in fact, been well supplied with that commodity. If it has reached him from another source, that is a matter of detail, and if it has cost him more than farmers' loans cost in Europe that is partly because the risk is greater. The implement makers and the general store keepers of the country have carried the farmer on credit for so long that it is now a custom and his right. The implement men and the general store keepers may be carried by the banks. All the large implement corporations are constant borrowers at the banks. They have to give long credits.—New York Times Annalist.

CHARTERED ACCOUNTANTS MEET AT WINNIPEG

Nearly Four Hundred Members—Papers and Discussion —Admission of Women to Profession

(From a Correspondent).

The annual meeting of the Dominion Association of Chartered Accountants was held at Winnipeg from September 1st to 4th. The Dominion Association is the central body of the seven provincial institutes, the members of which are ipse facto members of the Dominion Association, and although this was only the eleventh meeting, most of the provincial institutes, notably that of Montreal and Toronto, can boast of a much longer existence.

Manitoba, being the home institute this year, naturally had the largest attendance of members, over 40 being present; Ontario came second with 12 delegates, and Saskatchewan next with 10 altogether, apart from ladies accompanying, the attendance totalled 85, the extreme points of Vancouver and Halifax being represented. Mr. H. M. Temple, of St. Paul, Minneapolis, represented the American Association of Public Accountants; Mr. T. Watson Sime, the Glasgow Institute of Chartered Accountants, and Mr. G. S. Craggs, the Illinois Society of Certified Public Accountants. Most of the delegates arrived in the city on Monday evening when a reception was held at the Royal Alexandra Hotel, the headquarters of the convention, by Mr. and Mrs. W. A. Henderson, Mr. Henderson being president for the year.

The proceedings opened on Tuesday by the president's address, dealing with the history of the profession during the past year. A total membership was reported of 379, an increase since 1910, the date of the present organization, of 124. These numbers cover members in Canada only, several institutes having members in Britain and elsewhere.

Uniformity of Standards.

Later there was the consideration of the report of committee on uniformity of standards amongst provincial institutes, the object being to have, as far as practicable, uniformity in method of qualification for the C.A. degree and reciprocity in interchange of membership so that a member going to practise in a province other than that in which he originally qualified might be accepted as a member by the institute of his new home without re-examination. It appeared from the the discussion that all institutes either had adopted this principle or were willing to do so—in two cases with modifications.

Delegates were entertained at luncheon by the Manitoba Chartered Accountants, re-assembling for an address by Mr. Vere Brown, western superintendent of the Canadian Bank of Commerce, on the "Banker and the Accountant." The speaker dealt with the shortcomings of the latter as seen through the spectacles of the former, and his remarks hereunder were received with humorous humility by his audience, and secondly, with the lecturer's view of what would be the duty of the auditors to be appointed under the new Bank Act If the audience did not get a heavy meal of mental food from this paper, it is always beneficial to "see ourselves as others see us," and few, if any, western bankers are better qualified than Mr. Vere Brown to express their views on these subjects. Throughout the convention the Winnipeg men lived fully up to the best traditions of Western hospitality in their treatment of the visiting accountants.

An interesting paper on "Municipal Accounting in the Prairie Provinces" was given by Mr. O. J. Godfrey, president of the Saskatchewan Institute. The discussion was very full and wide. Mr. A. K. Bunnell and Mr. B. Pontifex speaking for Ontario, Mr. J. G. Ross and Mr. F. W. Sharpe for Quebec, Mr. H. M. Cherry and Mr. F. C. S. Turner for Manitoba, Mr. E. Kaulbach for Nova Scotia, and Mr. Shaw and Mr. Hodges for British Columbia.

Franchise Companies and Public Commissions.

Later there was consideration of reports of committees and of the "Canadian Chartered Accountants," the professional journal now in its third year. The financial report was adopted and other purely business matters disposed of, and attention was then given to an address on the "Accounting of Franchise Companies to the Public Utility Commissions," by Judge Robson, Public Utilities Commissioner of Manitoba. In the discussion that followed the principal part was taken by Mr. Temple, president of the Minnesota Association of Public Accountants, who gave a supplementary address, dealing with the treatment of this question in his own state, and in the United States generally.

The annual banquet was held at the Royal Alexandra Hotel, with President Henderson in the chair, and Mr. A. E. Hoskin, K.C., also of Winnipeg, acting as toastmaster. During the evening Mr. G. U. Stiff, of Toronto, who has been honorary editor of the "Canadian Chartered Accountants" since its inception some three years ago, and who had announced his retirement at this meeting, was presented with a token of appreciation of his services of a beautiful silver cigar box and salver.

On the fourth day of the convention the subject dealt with was the finance and accounting of the "Timber Industries of British Columbia," the debate opening with a paper by Mr. W. E. Hodges, of the British Columbia Institute, on that subject. The closing afternoon session was given over to the practical work of the Association, notably the receiving of reports of the constituent institutes. Montreal, the senior institute, reported 62 members; Ontario 185, Manitoba 71, Nova Scotia 26, British Columbia 48, Saskatchewan 28, and Alberta 19, an aggregate membership of 439. The difference between this figure and the membership of the Dominion Association, 379, namely, 60, is due to some being members of more than one provincial institute, and to members of provincial institutes resident abroad, and therefore not qualified for membership in the central organization.

Admission of Women.

Discussion was also given on the question of concerted action in the matter of feasibility of granting the C.A. degree to women. The concensus of opinion of the speakers hereon was that although doubtless some could pass the theoretical qualification of examinations, there were obvious difficulties in the way of their obtaining the necessary practical experience as audit assistants, and that as for many years the dual qualification of both practical experience and theoretical knowledge had been insisted on, to now waive them would be to put back the clock. Rather than, however, to dismiss the matter without fully considering possible ways and means, the provincial councils were directed to go fully into the matter and report to the central body, it being pointed out that in the professional accounts bill now before the imperial parliament, the admission of women to the accountancy profession was provided for.

Halifax was chosen as the meeting place of the 1914 convention, and at a subsequent meeting of the council Mr. E. Kaulbach, of that city, was chosen as president, and Mr. A. Shaw, president of the British Columbia Institute, as vice-president, for the ensuing year. Appreciative votes of thanks to President Henderson, to Mr. Ronald, chairman of the committee on arrangements, and to Mr. A. E. Phillips, Mr. F. C. Gilbert, its secretaries, and to the Manitoba Institute as hosts, were carried.

Amongst the well-known practitioners attending the convention were the following:—Messrs. A. K. Bunnell, of Brantford, Ontario; George Edwards, of Toronto; A. K. Fisk, of Montreal; O. J. Godfrey, of Indian Head; C. V. Gladwell, of Regina; E. Gunn, of Toronto; W. E. Hodges, of Vancouver; Brian Pontifex, of Toronto; W. S. Ronald, of Winnipeg; J. W. Ross and F. W. Sharpe, of Montreal; O. Wade, of Toronto; and T. H. Webb, of Winnipeg.

WILL TALK AND WRITE CANADIAN PACIFIC RAILWAY

Mr. John M. Gibbon, formerly editor of the London illustrated "Black and White," and author of "Scots in Canada," has been appointed general publicity agent of the Canadian Pacific Railway Company. Mr. Gibbon's office will be at Montreal. This is not Mr. Gibbon's first experience with the Canadian Pacific Railway, as prior to the present appointment he held the position of advertising agent for the company in London.

Mr. Gibbon's position is probably one of the most important of its kind, and is by no means a sinecure.

Mr. Gibbon is the son of Sir William Duff Gibbon, and is a type of man who will soon add many Canadian friends to his already long list.

LIFE UNDERWRITERS' PRESIDENT HONORED

The Quebec Association of Life Underwriters tendered a banquet to Mr. J. B. Morissette, the newly-elected president of the Dominion Association at the Chateau Frontenac, Quebec. Mr. Morissette in his speech referred to the success of the Quebec Association. Said he: "The magnificent Vipond trophy, together with the forty dollar purse of gold, are genuine proofs of the success which has crowned the work of our association.

"May we cherish our association and its officers, being ever ready to lend a helping hand in upholding and maintaining the lofty position which we have so legitimately acquired," and in his first official message referred to the confidence reposed in him by the underwriters, adding:—

"Judging from the various reports which have already been received from the different centres of the Dominion, all of them of an enthusiastic character, we have every reason to look forward to a brilliant future. Halifax, which has been selected as the scene of the 1914 convention, is a popular city, and a number of members have expressed their intention of being present, all of them quite prepared to make of this 1914 convention an unprecedented success."

PACIFIC COAST AND ORIENTAL TRADE

Development of Saanich Peninsula—Grain Elevators and Trade

(Staff Correspondence.)

Vancouver, B.C., Sep. 8th.

Saanich Peninsula is well known to Victoria's citizens; its well-tilled farms delight the eye of the experienced agriculturist. Several large industries give a stability to the district which is directly tributary to the capital. At Sidney, a thriving little town at the northern end of the peninsula, is a large and active sawmill and two brick yards, while a rubber roofing plant is now erecting its buildings. At James Island, close at hand, three or four large industries are being established. Outside of Sidney is the $100,000 sanatorium hotel, erected by a syndicate headed by Dr. W. G. Cummings. On the western side of the peninsula, on Saanich Inlet, are the works of the Vancouver Portland Cement Company, while at Brentwood Bay, the British Columbia Electric has erected a large concrete power house. At this point, ideally situated, an English syndicate is building a big hotel. Dairying and fruit-growing are main industries, and there is a chicken-raising ranch. It extends over 52 acres of ground, and at present there are about 6,000 fowls on it, though the number usually runs much larger. Attention is not given so much to egg-production as to supplying milk-fed chickens to the Victoria market. The importance of this producing suburb of Victoria is recognized by the transportation companies, since the British Columbia Electric has only recently completed its line lengthwise through the district, and the Canadian Northern is also to have a line from Victoria north to a point which will receive the ferry from the mainland. The Victoria and Saanich line—practically the Great Northern—has adopted a gasoline car on its line, greatly improving the service.

Double the Export Trade.

It is stated that two firms will establish grain elevators in Vancouver to take care of trade that is offering. Last year three-quarters of a million bushels of grain were shipped through this port, and it is estimated that double that amount will be handled this year. The grain trade with the Orient is gradually increasing, so that all shipments will not be made to Europe. Since grain can be conveniently brought from the prairies to the Pacific coast, Japan particularly is buying. It shows that as trade avenues develop new markets are available.

Banks and Business.

Mr. John Aird, assistant general manager of the Canadian Bank of Commerce, who has been on the coast, declares that so far as his bank is concerned not a single legitimate application for money from business men, traders, manufacturers or others has been refused during the recent stringency; in fact, not only have credits been renewed, but increased in instances. Mr. Aird looks for easier money in the near future, though it will not be cheaper money. He is of the opinion that conditions in western municipalities will be much improved, and that improvements will not be made recklessly, since after the lesson of the past few months they will look where the money is to come from before making large outlays.

◆

GRAND TRUNK PACIFIC READY NEXT YEAR

The Grand Trunk Pacific Railway will be completed next year. Mr. E. J. Chamberlin, the president, who reached the end of the steel on his inspection trip the other day, says that, so far as men and money are concerned, there will be no delay in building operations while there is a mile of steel to lay or a fraction of a dump to construct between the eastern and western terminals of their railway.

Mr. A. W. Smithers, chairman of the road, who is now visiting Canada, being asked if the construction of the line down to Vancouver indicated any possible intention on the part of the company to make that point the railway's chief seaport on the Pacific, said: "We have every faith in Prince Rupert, and Prince Rupert will, of course, be our main Pacific port, as has always been intended. We however, will operate the line down to Vancouver, although it is not to be built by the company. Friendly interests are looking after the construction of the road, and we will lease and operate the railway as a much-needed branch. It passes through some very excellent country."

Mr. Smithers added that he will return to London well satisfied with conditions along the Grand Trunk, sharing the confidence of Canadian and English friends of the enterprise as to its future. He would not say what the plans of the Grand Trunk Pacific were in connection with the Atlantic and Pacific service. That, he said, will be developed at the proper time.

◆

The new million-bushel Grand Trunk elevator at Montreal will be in operation by November 15th.

GROWING PORT OF HALIFAX

Increased Shipping Tonnage Makes More Facilities Necessary—Industrial Progress

(Special Correspondence.

Halifax, Sept. 9th.

The announcement that the Cunard Line would make Halifax a port-of-call was received with satisfaction in that city. There will be six sailings a month to the port during the winter months—four of them from the Portland service and two from the New York service. Among these sailings will be the largest and finest of the Cunard fleet; with a direct Italian service and the Norwegian-American service also calling at this port, making three additional lines of steamers, consequently a large increase in the tonnage of the port is looked for. The season of 1912 was the greatest in this respect in the history of the port, and the increase of 635,000 tons the largest of any port in Canada.

On account of the expected increase in shipping, the transportation committee of the board of trade have applied to Mr. F. P. Gutelius, general manager of the Intercolonial Railway, to place temporary sheds, approaches, etc., on the new No. 2 Pier, now under construction, so that two additional berths will be available. Mr. Gutelius has agreed to this. About 370 feet of the 700 feet of the pier proper has been completed, and the sills and foundations of the freight sheds about completed; there is a bulkhead of 112 feet long by 235 feet wide of solid concrete and steel, and when completed it will be the largest concrete pile pier in Eastern Canada, and one of the largest in America. The whole structure will take about 70,000 tons of concrete; the pier has been designed to sustain a load of a thousand tons per square foot, and the whole pier will be capable of supporting 128,000 tons.

Railways and Terminals.

Work has commenced on grading for the new terminals at Fairview, and a large force of men are now employed. The amount of the contract for grading only is about $1,500,000.

The road to Dean's Settlement, a distance of forty-two miles, has been practically completed, and tracks laid on the greater portion of it. The work of building bridges, viaducts, etc., is progressing, and plans are being made for the station houses along the line; this road is to be conducted as a feeder of the Intercolonial Railway.

The new refinery at Woodside, owned by the Acadia Sugar Refining Company, who have also a plant at Richmond, is nearing completion, but it will be several months before actual refining is commenced. This plant, situated right on tide water, with rail facilities, is one of the best equipped and the largest in Canada. The output will be about one-third the total consumption of sugar in the Dominion.

Outputs and Outlook.

All collieries, with the exception of two of the smaller ones, report an increased output this year. Gold mining has revived to some extent, and the mines at Tangier and Petpeswick have been making reports; at the last clean-up of the latter mine 170 ounces of gold was obtained.

The board of trade has been reaching for new industries, and during the past months representatives of three different classes of manufacture visited this city for the purpose of looking over sites and making themselves acquainted with conditions. One of the parties obtained an option on a large piece of property situated at tide water. Other representatives were in connection with a mill for the manufacture of textiles, and made exhaustive inquiries with regard to the supply of help, etc.—E. A. S.

UNITED STATES FINANCIAL HOUSE INTERESTED IN CANADA

The investment list of Messrs. Peabody, Houghteling & Company, of Chicago, contains offerings of several Canadian bonds, including the following: William Pearson Company, Limited, British Columbia Sulphite Fibre Company, Limited, Southam Press, Limited, and the Canadian Towing and Wrecking Company, Limited. This Chicago investment company, during recent years, has become interested in a large number of Canadian concerns.

◆

A comprehensive bulletin under the title, "Milk Production in Canada," has been issued from the press and forms No. 72 of the regular series of bulletins of the Experimental Farms. Its author, Dr. J. H. Grisdale, director of Dominion Experimental Farms, has made milk production a subject of special study and experiment for many years, and has embodied in this bulletin the most valuable of the information obtained.

VALUE OF LIFE INSURANCE

XXIX.

A Generous Offer

BY C. A. HASTINGS.

If a friend offered to pay your estate, at your death, the sum of $5,000 cash (assuming your present age to be thirty) on condition you paid him annually for all time just 2 per cent., you would consider it an exceedingly splendid bargain. You would figure out that it would take you fifty years for your annual payments to equal $5,000, and then you would be eighty years of age. In fact, you would accept the offer, merely because your friend would be taking a speculative chance and you could not lose unless you lived to be over eighty years of age.

Offer Has Advantages.

Are you aware that life insurance companies make the offer every day to all individuals, and that there are these additional advantages which your friend could not include in his contract:—

(1) Insurance company can give you far better security.

(2) Money paid into insurance company is ear-marked for his own use.

(3) He can either secure a loan,

(4) Or, surrender policy for cash.

(5) Contract can be varied to suit his convenience.

Change Their Viewpoint.

If every individual, especially young men (who particularly regard life assurance as a nuisance), would look at a contract from a finance point of view, or call it real estate—anything you like but life insurance for the time being—they would then see it in its true light, and would not continue to regard—or, at least, would be less liable to regard—it as an undertaking too unfortunate to contemplate. I cannot repeat too often that life insurance is a saving. No one can spend money when he is depositing it in the bank. Why not deposit it in a life company? You are not spending money then—you are earning interest on it and getting protection, making each and every dollar do two things at the same time.

INSURANCE COMPANY LOCATES AT REGINA

Finding in Saskatchewan a wide field for employers' liability and accident insurance, the Western Hospital and Accident Insurance Company, which has been doing business in the prairie provinces and in British Columbia for some time past, has moved its head office from Edmonton to Regina, and its affairs will henceforth be administered from that city.

The company is capitalized at $500,000, and carries on an accident, health, guaranty and employers' liability insurance business. The solicitors are Messrs. Balfour, Martin, Casey and Blair, of Regina.

ALBERTA'S GRAIN ACREAGE

Reports received in Calgary this week indicate that the grain in the southern part of the province is practically all cut, states a correspondent to *The Monetary Times*.

Revised estimates give the grain acreage this year in Alberta as 2,809,300 acres, an increase of 420,000 over 1912. It seems altogether probable that the total yield will be over rather than under, 85,000,000 bushels. One million acres of this is spring wheat and a million and a quarter acres oats. Flax and winter wheat fell off almost one-half each from the previous year, due, in the case of the former, to the marked drop in price, though that has recovered somewhat again, and in the latter to the rather indifferent success attending this once popular cereal. With continued good weather flax may easily return as much this year from the lessened area as it did in 1912.

There appears to be no longer any reason to doubt the result of this season's work on the farms. The weather has, up to date, accomplished nearly all that weather could do, and, excepting the very few spots where for purely local reasons the return is small, the general harvest will undoubtedly exceed anything in the history of Alberta. Given a month of reasonably good weather, grain-growers, cattlemen and farmers will have had a season of banner production, and there is every reason to look for better times.

Forty-six new elevators, operated by the local farmers' organizations under the provisions of the provincial act of last session, whereby the 85 per cent. of the cost of construction is loaned by the province, will be in operation ready to assist in handling the crop. Labor conditions are favorable so far, threshing machines are reasonably numerous, the railways assert their ability to handle everything that comes their way, so that there is foundation for the optimism prevailing in financial and business circles.

SYSTEMATIC FIRE INSPECTION

It Will Help to Prevent Fires—Danger of Inflammable Liquids

Laxity in systematic inspection is responsible for a large percentage of fires. When it is remembered how many fires are due to defective conditions in existing buildings, to chimneys out of repair, to defective stovepipes, to flaws in electric wiring, to accumulations of inflammable rubbish in cellars and attics, it behooves each municipal body to delegate authority to some official to make a systematic inspection, as often as posible, of all premises both business and residential, comments Saskatchewan's fire commissioner, Mr. R. J. McLean. Such official may be the town or village overseer, the chief of police, the building inspector or the chief and members of the fire brigade. In the case of each city or town with a fire department, such inspection can be carried out with best advantage to all concerned by the members of the fire department. Such a system is an education to the fireman, inasmuch as it acquaints him with the structural arrangements of the different buildings.

Municipal Indifference is Surprising.

It must necessarily prove educative also to the public, as it will serve to keep constantly before them the need of attention to important details and to inform them as to proper safeguards against fire. It is to be regretted that municipal authorities have, with a few exceptions, proved so indifferent and apathetic in the matter of what is so simple, inexpensive and efficacious a method of minimising fire dangers.

Another matter which comes directly within the province and duty of each municipality is the enactment of regulations governing storage of gasoline and such highly inflammable and explosive liquids and also the storage and sale of gunpowder. It is not to the credit of our progressive province to have to state that only in very rare instances do any such regulations exist. Official statistics indicate an increasing number of fires resulting from the careless handling and storage of gasoline. Evidently most of our towns and cities are without interest in, or realization of, the enormous hazard created by gasoline. It may be of interest to readers to know that the explosive force of one gallon of gasoline, properly mixed with air and compressed, is equal to 83 2-3 pounds of dynamite. In view of this fact, it is past understanding that municipal authorities, responsible for the adequate protection of life and property in their jurisdictions, should suffer the absence of such controlling regulations.

Remove Inflammable Rubbish.

Finally, the idea of a fire prevention or clean-up day is one which should commend itself to every city, town and village council. The idea has been adopted in the United States of America with good results. Quite a few cities and towns in our own province entered into the campaign this year, and, it is hoped, that the number will be multiplied many times in 1914. One requires but little power of observation to realize the need of such a campaign to draw attention to one of our greatest needs. The piles of unsightly and inflammable material allowed to accumulate in lanes and alleys, beside wooden buildings, in basements and attics, convey their own message. The municipal authorities who prove themselves alive to the need of steps to remedy such conditions will have the satisfaction of a duty faithfully done.

CAUSES OF SASKATCHEWAN'S FIRES

In speaking of gasoline fires, Mr. R. J. McLean, fire commissioner for Saskatchewan, stated that in almost every case fires starting from gasoline were preventable, and he gave it as his opinion that in the near future drastic regulations would be taken by the government in regard to the handling of gasoline. Despite the fact that warnings are repeatedly sounded, the fires from this source are greatly on the increase.

One way in which Mr. McLean thinks the gasoline might be handled safely is by compelling the use of red cans for the handling of it, for often the gasoline being in ordinary cans is taken in mistake for coal oil or something else.

Up to the end of July, for the four months beginning the first of April, the fires in Saskatchewan amounted to about $866,000. During 1912, the loss was estimated at about $2,200,000, and up to date this year, Mr. McLean stated that there was an increase in the loss of from 25 to 30 per cent. In the four months above mentioned, he thought that there had been about $22,000 loss through fires caused by lightning, and this, too, was on the increase. The fires from this source in the country he considered to be about as four to one in comparison with those in the cities. This fact he explained by the bareness of the prairies and the tendency of the lightning to strike any outstanding feature on the plains. As a consequence, the ravages on houses and barns on the prairies was much more disastrous than in the city.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canada Cement Company.—The Canada Cement Company this year will probably produce and sell over eight million barrels of cement.

Canadian Locomotive Company.—The annual meeting of the Canadian Locomotive Company is to be held on September 17th. A favorable report is expected.

Dominion Coal Company.—The output of the Dominion Coal Company for August amounted to 425,635 tons, as compared with 409,125 tons for the same period in 1912. The highest previous output was in October last, when 422,343 tons were mined.

Canada Iron Corporation.—The Montreal Trust Company has been appointed provisional liquidator of the Canada Iron Corporation, succeeding Mr. F. F. White, named by the court on August 21 last. Mr. White was taken ill at the end of last week and compelled to abandon his work here and returned to New York.

Nova Scotia Steel and Coal Company.—The July output of the Nova Scotia Steel and Coal Company was as follows:—

	Tons.
Coal mined	72,360
Iron ore mined	54,654
Pig iron made	7,415
Steel ingots	6,618

Laurentide Company.—Of the 24,000 shares of Laurentide stock offered to shareholders, 23,771 were applied for, which called for a payment of $237,710. $498,940 was, however, paid in, which would seem to show that the shareholders in Laurentide have not been crippled by the serious decline in the stock, and furthermore that there is money available for investment when the terms offered are satisfactory.

Buffalo Mines Company.—The directors of the Buffalo Mines Company have declared the regular quarterly disbursement of 5 per cent. and an extra dividend of 15 per cent., payable on October 1 and another extra of 7 per cent., payable on November 15. This will bring the total for the year to that date up to 66 per cent., exclusive of the 23 per cent. paid on January 1 last, which was included in the 1912 dividends. Including these new payments, the company will have paid in all 254 per cent., or about two and a half times its capitalization.

Granby Consolidated Company, Limited.—The preliminary report of the Granby Consolidated Mining, Smelting and Power Company, Limited, for the fiscal year ended June 30 last, indicates that the profits from operation at Grand Forks and Phœnix amounted to $1,207,661, of which there was disbursed in dividends $449,955. These figures are subject to slight correction by the final statement which will be presented at the annual meeting of the company on October 7 next. The profit for July and August will show some shrinkage, due to the coincidence of a low price for the metal with somewhat smaller recoveries.

Canadian Pacific Railway.—Following an agreement between the Swiss Federal Railways and the Canadian Pacific Railway Company, the latter has extended the observation car service in Austria, which was inaugurated last year, to Switzerland, and the new service of cars has started. Hitherto these Canadian Pacific observation cars have been confined to the three Austrian services—viz., from Trieste to Salzburg, Vienna to Innsbruck and from Innsbruck to Buchs. The latter service now crosses the border between Austria and Switzerland at Buchs and runs through a delightfully picturesque district to Zurich and vice versa.

Marconi Wireless Telegraph Company.—The annual report of Marconi's Wireless Telegraph Company, presented to the shareholders at the annual meeting of the company in London, August 22, showed that the gross profit amounted to £537,243 4s. 11d., as compared with a sum of £214,407 1s. 4d. for the preceding year, and a net profit is carried to the balance sheet of £413,294 11s., as compared with £141,717 7s. 1d. for the year 1911. Out of the company's earnings the sum of £100,000 was appropriated for the purpose of creating a reserve account. Dividends of 17 per cent. on the preferred and 20 per cent. on the ordinary shares were paid during the year.

Nova Scotia Steel and Coal Company.—With regard to the recent removal of the company's debenture stock from the Montreal Stock Exchange official list, it should be explained that when negotiations were taken up with the Stock Exchange governing committee for the listing of the debenture stock, it was decided to list the whole issue. Subsequently the purchasers of the debenture stock desired to have a portion of the $2,000,000 issued in sterling, and list the same on the London Stock Exchange. For this reason it was decided to withdraw the whole amount from the Montreal exchange, until the purchasers had finally decided as to the amount to be issued in sterling and then to list only the balance on the Montreal exchange.

Twin City Railway Company.—On the basis of statements for the first seven months of the year, it is estimated that Twin City's net revenue and surplus for the year should amount to $4,308,799 and $2,523,182 respectively. There would then be available for the common stock 12.55 per cent. or more than twice the present dividend rate.

The conservative policy of the directors in withholding dividend increases and applying surplus fund to reserves has disappointed shareholders several times in the last few years. The considerable gains which are being consistently made in earnings and the strong position in respect to reserves give some reason, however, for expecting that an increase of at least 1 per cent, to 7 per cent. in the common stock dividend cannot be long deferred. The statement of earnings for the first seven months of the year and last is as follows:—

	1913.	1912.	P.C. Inc.
Gross	$5,004,031	$4,641,249	7.82
Net	2,448,273	2,237,411	9.42
Surplus	1,419,553	1,238,857	14.59

Ready's Breweries, Limited.—The gross earnings of Ready's Breweries, Limited, for the nine months ending July 31, were $131,843.26, or sufficient to pay all operating expenses, bond interest for six months, dividend on preferred and common and to carry forward a surplus of $10,815.43. The present earnings show over 30 per cent. on the common stock, on which an initial dividend of 1 per cent. was paid in June.

Since December a regular half-yearly dividend of 3½ per cent. has been paid on the preferred and the initial 1 per cent. dividend on the common.

At the end of June the books of the company gave the following standing:—

Assets.	
Property at cost	$482,000.00
Accounts receivable	35,153.10
Cash	3,750.67
Total	$520,903.77
Liabilities.	
Bonds	$250,000.00
Preferred stock	116,500.00
Common stock	116,000.00
Accounts payable	11,894.10
Surplus	26,509.67
Total	$520,903.77

Brazilian Traction, Light and Power Company, Limited.—The statement of combined earnings and expenses of the tramways, gas, electric lighting, power, and telephone services, operated by subsidiary companies controlled by this company, for the month of July, 1913, is as follows:—

	1913.	1912.	Increase.
Total gross earnings ..	$ 2,033,211	$ 1,748,039	$ 285,172
Operating expenses ...	950,655	824,711	125,944
Net earnings	1,082,556	923,328	159,228
Aggregate gross earnings from Jany. 1st.	13,586,098	11,690,678	1,895,420
Aggregate net earnings from Jany. 1st	7,230,347	6,270,257	960,090

The gross and net returns by months since the formation of the Brazilian Traction Company which is now nearing the end of its first year compare as follows:—

	Gross.	Net.
September	$1,691,298	$ 953,901
October	1,770,187	1,004,329
November	1,773,623	1,006,271
December	1,881,556	1,142,981
January	1,912,955	1,013,483
February	1,821,715	982,015
March	1,977,297	1,068,637
April	1,933,317	1,020,163
May	1,990,910	1,050,391
June	1,916,693	905,102
July	2,033,211	1,082,556

FIVE PROVINCES CONTRIBUTE FIFTY-EIGHT COMPANIES

Interest Shown in Construction and Building Materials—Some Natural Resources Development Companies

With a capitalization of over ten million dollars, fifty-eight new companies have been incorporated this week, the largest of them being:—

Amalgamated Motors, Toronto	$1,000,000
Perfection Stove Company, Sarnia	1,000,000
La Compagnie des Habitations Salubres de Quebec, Quebec	1,000,000
Orr Gold Mines, Toronto	2,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	Number of companies.	Capitalization.
New Brunswick	2	$ 73,950
Quebec	8	1,580,000
Ontario	21	5,930,000
Manitoba	13	1,192,000
Alberta	14	1,380,000
Total	58	$10,155,950

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Edson, Alta.—Edson Brick Company, $50,000.

Red Deer, Alta.—Aurora Cafe Company, $30,000.

Vulcan, Alta.—Vulcan Co-operative Company, $10,000

South Edmonton, Alta.—Strathcona Lumber Company, $25,000.

Medicine Hat, Alta.—Boston Cafe, $10,000. E. C. Metzner, $250,000.

Crediton, Ont.—Windsor Park, $100,000. S. Brown, F. Haist, H. W. Schweitzer, London.

Ottawa, Ont.—Hellard, $40,000 (departmental store). R. H. Parent, O. Leclair, G. E. Jewell.

Brantford, Ont.—Sandown Realty Company, $40,000. H. D. Petriem, S. L. Heaton, W. W. Currier.

Sarnia, Ont.—Perfection Stove Company, $1,000,000. R. V. LeSueur, A. I. McKinlay, N. L. LeSueur.

Ingersoll, Ont.—Ingersoll Hotel Company, $25,000. J. A. Coulter, T. R. Mayberry, R. J. Robertson.

Killarney, Man.—Southern Manitoba Realty Company, $5,000. T. H. Buck, A. M. High, W. J. Schnarr.

Treherne, Man.—Treherne Farmers' Elevator Company, $7,000. J. H. Robertson, J. Howe, W. V. Carroll.

Saint Lambert, Que.—Ideal Concrete Products Company, $20,000. E. S. Hicks, J. W. Newman, J. C. Terrill.

Peterborough, Ont.—Bradburns, $400,000. T. E. Bradburn, W. H. Bradburn; R. H. Bradburn, Los Angeles.

Virden, Man.—B. McCormick, $30,000 (lumber, fuel and live stock dealers). J. Coulter, J. E. McCormick, P. J. Proctor.

Edmonton, Alta.—Joe's Tailoring Company, $10,000. Pioneer Black Fox Company, $100,000. McBride Trading Company, $10,000.

Quebec, Que.—Gaspe Steamship Company, $100,000. E. Bouchard, F. Bouchard, J. A. Bouchard. La Compagnie des Habitations Salubres de Quebec, $1,000,000. J. G. Garneau, J. T. Ross, D. O. L'Esperance.

Hamilton, Ont.—Wentworth Preserving Company, $40,000. J. Chisholm, W. A. Logie, T. B. McQuesten. Kent, Garven and Company, $100,000 (hardware, etc.). H. A. Burbidge, P. J. Knox, A. H. Robertson.

Calgary, Alta.—Canadian Laundry and Machinery Company, $25,000. Black Diamond Oil Fields, $750,000. M. and E. Lumber Company, $10,000. King Edward Hotel of Strathmore, $50,000. FiReCo Stove Company, $25,000.

Moncton, N.B.—Little River Silver Black Fox Company, $49,000. S. S. Ryan, Coverdale; L. Colpitts, Little River; L. W. McAnn, Moncton. Mapleton Fox and Fur Company, $24,950. W. K. Gross, F. C. Robinson, F. C. Jones.

Windsor, Ont.—Maxwell Motor Company, of Canada, $10,000. E. Flanders, W. M. Antony, E. E. von Rosen. Renchard-Elmes Shirt and Tie Company, $25,000. B. L. Elmes, G. H. Bennett, W. G. Bartlet. White Laundry Company, $40,000. I. O. Sauberon, G. M. Drouillard, A. B. Drake.

Montreal, Que.—Alert Clothing Company, $100,000. A. R. Hall. G. C. Papineau-Couture, L. Fitch. Durbin Train Pipe Connector Company, $300,000. R. W. Hart. A. Chenier, C. McNaughton. Emery L'Esperance Limitee, $20,000. A. Beaulieu, E. L'Esperance, O. Magnan. Central Investment Company, $20,000. J. C. B. Walsh, P. S. Conry, R. H. Teare. Danville Realty, $20,000. R. Chenevert, F. Callaghan, J. E. Saucier.

Toronto, Ont.—Burnham Engineering Company, $40,000. J. H. Ronan, B. Folliot, E. Hayes. American Club, of Toronto (no share capital). A. E. Dean, A. H. McNeal, P. C. Brooks. Dominion Brick and Tile Company, $200,000. F. J. Foley, E. N. Heather, V. W. Price. Flavelle Mining Company, $250,000. T. Browning, T. Cruse, T. I. Cooke. Amalgamated Motors, $1,000,000. J. F. Selby, W. H. Smith, T. O. Pardoe. Quarterly Publications, $40,000. F. H. Richardson, W. H. Moore, F. W. McGill. T. S. Hare, $40,000 (general dealers). J. M. Langstaff, E. W. Wright, J. F. Urien. Orr Gold Mines, $2,000,000. J. A. Campbell, G. P. McHugh, W. H. Clipsham. John A. Hendricks Company, $40,000. H. Riley, J. F. MacGregor, W. H. Walter. Consolidated Construction Company, $500,000. H. E. Larkin, A. E. Sangster (both of St. Catharines), T. R. Hinds, Toronto.

Winnipeg, Man.—Poncelet Tube Beading Company, $20,000. A. J. Poncelet, Ernfeld; H. P. Blackwood, N. Bernier, both of Winnipeg. North-West Loan Corporation, $100,000. H. B. Buckworth, G. E. Wiggins, C. H. Weagant. Dunmore Tractor and Implement Company, $200,000. H. Prince, W. J. Donovan, A. M. Doyle. Canada Bond Corporation, $300,000. A. Bernstein, W. Wray, A. Levinson. Butler & Earhart, $20,000 (grain mills and elevators). C. G. Earhart, F. S. Butler, both of Minnesota, U.S.A.; E. A. Woodward, Winnipeg. Cosmopolitan Investment Corporation, $120,000. L. Verhoeven, H. Beliveau, B. E. Chaffey. Manitobite Stone Works, $250,000. S. W. Smith, M. W. Deed, W. Isles. Winnipeg and Fort Garry Properties, $100,000. J. W. Woolfe, R. A. Duff, R. A. Atkinson. W. P. Wallace Construction Company, $20,000. E. A. Conde, J. A. Ptolemy, A. B. Rutherford. Stanley Garage Company, $20,000. W. Perrins, H. M. Bertram, T. Beath.

◆

SOVEREIGN FIRE GOES TO PHŒNIX OF HARTFORD

The Canadian business of the Sovereign Fire Insurance Company has been taken over by the Phœnix Fire Insurance Company of Hartford Conn., and the policies sold by the company in the United States will be taken over by a New York company.

The Sovereign Fire Assurance Company had an authorized capital of $2,000,000, and a paid-up capital of over half a million. The officers of the company were: Cyrus A. Birge, Hamilton, president; Thomas Baker, London, first vice-president; H. S. Wilson, Toronto, second vice-president and managing director; A. F. Webster, Toronto, treasurer; James Dixon, Hamilton; John H. Adams, Toronto; C. H. Enderton, Winnipeg; Samuel Screaton, London; Hon. Colin H. Campbell, K.C., Winnipeg, and John Leslie, Winnipeg, directors.

The company suffered heavy losses in its United States business.

◆

QUEBEC RAILWAY ANNUAL MEETING

At the annual meeting of the Quebec and Saguenay Railway, Mr. Edwin Hanson inquired as to the status of the bonds issued by the Quebec Railway against the property of the new road. Mr. J. N. Greenshields, K.C., stated that the original $10,000,000 bond issue of the Quebec Railway proper was secured by all the assets of the company, exclusive of those of the Quebec and Saguenay enterprise, while the ones issued against the latter have had set apart for them the stock, bonds and other properties of the new line.

The annual report of the company for the year ended June 30th last showed that the gross earnings from operation for the year were $1,524,200, as compared with $1,415,825 in 1912, an increase of $108,375, which, after adding miscellaneous income of $236,881, makes a total revenue from all sources of $1,761,082, an increase of $150,672.

The operating and maintenance expenses were $895,180.61, as against $734,925.35, an increase of $160,255. Fixed charges and taxes of all kinds amounted to $792,100, leaving a net surplus of $73,881, which, added to last year's figures, leaves a total surplus to date of $147,341.

To Cancel Bonds.

The sum of $27,641.60 was received from the Dominion of Canada on account of subsidies. This sum has been applied to the cancellation of $30,000 bonds, according to the trust agreement. Sir Rodolphe Forget stated that the sum of $91,500 had been expended on maintenance during the year.

A revision of the by-laws was authorized, reducing the number of directors to six, the new board consisting of Sir Rodolphe Forget, M.P., president; Hon. Robert Mackay and Messrs. J. N. Greenshields, K.C., Lorne C. Webster, Paul Galibert and D. O. Lesperance, M.P. The retired directors are: Hon. J. P. B. Casgrain and Messrs. L. C. Marcoux and O. B. D'Aoust.

At the meeting of the Quebec Railway board after the shareholders' meeting Sir Rodolphe Forget was re-elected president and Mr. Lorne C. Webster vice-president.

CAPITAL OF MANUFACTURING CONCERNS

Manufacturers and Bank Loans—Underlying Principles—Classes of Borrowers

In every period of monetary stringency a number of the manufacturers find the question of bank loans troublesome or irritating. Rates of interest payable thereon have a tendency to rise; and the cost of manufacture may thus be sensibly increased. Again, the banker in such a period is apt to be more exacting as regards the security backing his advances; he is more particular about discounting weak paper, and he may press for reduction of loans when his customer is making arrangements to expand his business. Then, as a rule, the manufacturer attaches a greater value to the capital which he himself owns; the bank loans do not appear quite so valuable or desirable in his eyes.

Perhaps it can be said that friction is most likely to occur in those cases wherein the manufacturer has been tempted to apply the proceeds of bank loans towards the acquisition of equipment or of an enlarged plant. When such a disposition has been made of the proceeds, the loan granted by the bank is likely to be characterized by permanency.

When money is easy and the various banking institutions are competing hotly for discount accounts, there may be no vigorous objection raised against the long-standing loan.

Underlying Principle of Bank Act.

But just as soon as conditions change, it is probable that the head office of the bank will begin to press the question of reduction of liabilities. This change of front may occur at an awkward season for the borrower. He may have to re-shape entirely or reconstruct his plans; and such reconstruction may prove very costly, suggests Mr. H. M. P. Eckardt in Industrial Canada.

That being the case, the manufacturer usually finds it advisable to give timely attention to the question of his relations with bankers. Up to what point should reliance be placed on his own capital; and to what extent is it safe and profitable to depend on bank loans?

It should be said at the outset that the chief reason why bank loans represented by plant and equipment often give trouble is that they are not founded on sound principles. One of the cardinal rules governing the banking business is that all loans or advances shall be represented by assets realizable in a short time. Loans based on saleable merchandise or securities, collectable accounts, notes, and bills, conform to this banking rule. Loans based on immovable property, such as land and buildings, and loans on machinery, when in use, as factory equipment, are obviously in contravention of the rule. This principle or rule underlies the whole of the Canadian Bank Act, and the experience of the past shows that it usually pays both the bankers and their borrowers to keep it respectfully in mind.

Perhaps it would conduce to pleasant and profitable relations between the manufacturer and his banker if it were remembered on all occasions that the bank is, so to speak, a little off its natural grounds when making direct loans to a customer. In discounting good trade bills for solvent customers the bank is in its natural element; and when the manufacturer's liability account consists entirely of good trade bills, which are paid in due course, there is scarcely any occasion for friction or disagreement. When, however, the bank is requested to make direct loans the openings for differences of opinion or disagreements tend to increase. The question of security, of disposition of the proceeds, and of the term or currency of loan all have to be settled.

In the practice of manufacturers as regards the use of bank credits, there are wide variations. In some cases the manufacturer depends so largely on his own capital that he does not even require to discount his bills receivable. They are passed through the bank on collection; and trade bills are discounted only when some exceptionally large payments exhaust temporarily the funds carried in current account. This condition of affairs may also exist in the case of an industrial corporation which has supplied itself with an ample amount of working capital through the issue of bonds or preferred stock.

Divide Into Two Sections.

In other cases the manufacturer will perhaps be able to finance himself altogether through discounting his receivables. This usually means that he will have a reserve of undiscounted bills on hand during a part of the year, and that all available paper will be under discount in the season of heaviest demand for funds. This class of manufacturers, again, will be divided into two sections. In the first section would be the parties who financed themselves solely through discounting trade bills and who had practically no liabilities apart from the line at the bank. The second section would be comprised of parties who perhaps acquired their raw materials on credit, and discounted trade bills to meet the weekly wage sheet and to retire maturing bills drawn by the outside creditors. Other things being equal, a less investment of their own capital would be required on the part of manufacturers comprised in the second section.

Next we come to the manufacturers who depend on direct loans made by their bankers. It should be said, here, that when the bank makes a direct loan on the manufacturer's bills receivable lodged as collateral, the transaction is essentially the same as if the receivables were discounted. The bank may advance only a certain percentage on the face value of bills hypothecated. In effect, it is discounting trade paper up to that percentage.

So far as direct loans, apart from loans on bills receivable lodged as collateral, are concerned, they are of various classes. Thus it is of common occurrence for the manufacturer to secure loans from his bank to pay cash for raw material—said raw material being a staple article with broad and steady market. This loan may perhaps be secured by endorsement of individual partners or of directors; it may also be secured by pledge of the raw material. Afterwards, further loans may be granted by the bank for the purpose of paying wages and other expenses. Then, in the ordinary course, the loans are retired through discounting trade paper. In that case the manufacturer has no liabilities of consequence excepting that represented by his line at the bank.

Circumstances Will Rule.

The banking transactions so far considered are all perfectly legitimate. When granted to capable and trustworthy parties such credits should cause no great trouble to borrowers or lenders.

Now let us see what is implied as regards the capital investment of the borrowers. The manufacturer's banking transactions could not well proceed as here outlined unless he himself provided the capital represented by the mill or factory, the land on which it stands, and the machinery and equipment. That represents practically the minimum investment by which it is possible to carry on the bank account without risk of friction and trouble. Then it would be almost impossible to work the account through merely discounting trade bills, unless a further investment to represent working capital is made.

When the manufacturer provides his building and its equipment with his own funds, and when he has a reasonably ample supply of working capital, he is thoroughly independent; and he can frame his policy to suit his circumstances. If he looks to the bank for only a moderate part of his working capital, he may still retain his independence in large measure. But if he asks the bank for the greater part of his working capital and for funds to buy machinery and build extensions, he is placing himself largely at the mercy of circumstances. One might guess that the manufacturers who have been experiencing trouble with their bankers during the recent stringency are mostly in this condition. And one arrives at the conclusion that in the long run it is advantageous for the manufacturer to provide his own capital up to the point of acquiring that building and equipment and a part at least of the working capital. When he does that he has the best chance to prosecute his industry successfully and independently. In the larger cities there are a number of manufacturers occupying leased premises. While they are in this position they are relieved from the necessity of providing expensive buildings of their own, and the requirement for capital investment is consequently less. But recent developments have shown that unless the rented premises occupied by them are large enough to give room for expansion, and unless they can also count upon having possession of the premises for a long term of years, it is usually advisable to be forehanded in providing funds which can be used to acquire buildings of their own.

Cramping His Working Capital.

For the bankers state that every little while some manufacturing customer who has been in leased premises wakes up to find that the building has been sold over his head, or that he has entirely outgrown it, and he is compelled to go to the bank and ask for a large building loan. As previously remarked, a building loan, represented as it is by fixed or unmovable assets, contravenes the best banking principles. And the bank will agree to make such a loan, even to one of its best customers, only with great reluctance. When he is obliged to use his credit for that purpose the customer may be seriously cramping himself for working capital. But if the manufacturer, with this eventuality in mind, begins to prepare for it several years beforehand, he may be able to provide premises of his own, when it becomes necessary or advisable to do so, without unduly stretching his credit at the bank.

While it is the case that the banks expect their manufacturing customers to buy their machinery and equipment with their own funds, in actual practice it often happens that the manufacturer uses his bank credit for the purpose; and this can be done in a perfectly legitimate manner. Thus an order is given for some new machines. They arrive and are installed. After the test is made and the machines are finally accepted by the purchaser, the draft for same comes along, is accepted, comes due, and is charged up to the manufacturers' account at the bank. If he covers it through discounting trade papers, the matter is closed and the bank does not lend money for acquisition of equipment. If, on the other hand, the manufacturer takes up the machinery drafts through increasing his direct loans, the transaction may nevertheless be entirely free from objection from the bank's point of view, providing that the manufacurer's line of credit does not exceed the security held nor the amount authorized, and providing that the borrower's line is cleared off at the usual clearing-up season for this industry.

Buying by Means of Bank Loans.

It would, however, be open to objection, and perhaps it would eventually lead to trouble, if when the manufacturer's security or collateral was exhausted, and he was supposed to have cleaned up his direct loans, there remained an unpaid balance representing the purchase price of the new machinery. That would mean that the manufacturer, instead of buying his new machinery out of current profits, was buying it by means of bank loans. His next season's credit would begin with the deficiency referred to, and if more machinery were bought next year and the buildings extended, it might devolve that the unpaid balance at the end of the season, after the collateral was exhausted, would have reached much larger proportions. In that case it would seem that the manufacturer was perhaps heading straight for a troublesome experience.

◆

CANADIAN RAILWAY JULY EARNINGS

The gross earnings of Canadian Pacific Railway for July were $11,993,062, a decrease of $59,336, while net profits were $4,116,793, a decrease of $331,383.

The gross decrease is the first monthly one shown since the reaction set in, but the net decrease is the fourth and largest, the net decrease for April having been $170,674, May $176,485, and June $218,848.

The business of the company in July a year ago was at high-water mark, so that the fact has to be borne in mind in making comparisons.

The July figures in the two years compare as follows:—

	1913.	1912.	Dec.
Gross	$11,993,062	$12,052,398	$ 59,336
Exp.	7,876,269	7,604,221	*272,048
Net	$ 4,116,793	$ 4,448,176	$331,383

* Increase.

The Grand Trunk Railway's July statement shows profits as follows:—

Grand Trunk proper, increase, £27,700 sterling.
Canada Atlantic, decrease, £5,050.
Grand Trunk Western, increase, £1,900.
Grand Haven, increase, £11,000.
Whole system, increase, £35,550.

The Canadian Northern Railway's statement for July, opening the new fiscal year for the company, shows gross earnings of $1,928,800, an increase of $99,100, while net amounted to $514,300, an increase of $19,700. A preliminary statement of the company's year 1912-13 indicates that the net profit for the year was $922,000, an increase of about $500,000 over the previous year. The ratio of operating expenses to gross earnings was the highest in the history of the company, 71 per cent.

THE SITUATION IN BRIEF

Western crop prospects excellent.
Eastern crop prospects good.
Apple crop poor.
Building operations slack.
Bank clearings declining.
Railroad earnings fair.
Money tight.
Western collections slow.
Bond market improving.
Stock market dull.
London market more receptive.
Municipal finance position easier.
Life insurance premium income good.
Factory output, staple lines, normal.
Factory output, other lines, smaller.
Municipal improvement work not active.
General financial and business position, fair.

NOTED BANKER ON ELECTRICAL FINANCING

Frank A. Vanderlip Shows How Much the Industry Can Absorb

Mr. Frank A. Vanderlip, president of the National City Bank, in an address at Association Island recently, before a meeting of representatives of the electrical industry of the United States said "$400,000,000 a year or $8,000,000 a week of fresh capital can profitably be used in the development of the electrical industry of the United States in the next five years. What the calls for new capital may reasonably be expected to reach after five years no one can predict with accuracy, but I believe it a conservative estimate to say that the intelligent development as a whole will readily absorb $400,000,000 a year for the next five years if that amount of capital is available for the purpose."

Investment in Public Utilities.

After discussing electrical statistics of the United States and the size of the possible investment fund of the world and general investment conditions, Mr. Vanderlip continued:—"The time has come, in my opinion, when no man with capital to invest in corporation securities, if he has a desire for a return that is any larger than Government obligations will pay, can longer hold back from a study of public utility investments. The experimental stage is past. The business now has a background that has become wide enough so that one can make valuable comparisons and sound deductions. It has ceased to be a business of only small units and the tendency is markedly in the direction of great capital issues which at all times shall have a broad market.

"The holding company theory, I believe, is admirable. It scatters the risk; it affords intelligent supervision and engineering; it makes possible the cheaper purchasing of supplies; its gives a broader market and a lower cost of capital—but the relation of total capital to total income involves principles that a holding company can no more transgress with impunity than can the original corporation."

Declining Cost of Current.

Mr. Vanderlip noted that in seven years, while the cost of living has increased 37 per cent., the average cost of electric current has gone down 17 per cent. Much of the credit for this was given to centralized control, and the speaker said that while elsewhere in business there was a tendency on the part of the public to break up large organizations, in the electrical field the monopolistic nature was recognized, and there was in it the strongest tendency toward consolidation. In Illinois, forty-nine central stations have been replaced by four that are doing the work better, and it is estimated that in New York state four hundred central stations might better give way to forty, or even less.

"An interesting feature of statistics of the electric industry," said Mr. Vanderlip, "is that a far more rapid increase in gross earnings is shown by the electric generating companies than is shown by the railroads of the country, great as that increase has been. What is still better, in the face of the rapidly decreasing price at which the current is sold, net earnings show a greater percentage of increase than gross, while the tendency of railroads is distinctly in the opposite direction."

Question of Public Treatment.

After reviewing the great progress being made in the application of electric power in the various industries, Mr. Vanderlip said:—"I can see that with a little more time for investors to become convinced that a public service corporation is not another name for a target against which to level unfair state and municipal enactments, we may have four out of five investors buying such securities, rather than refraining from doing so. In the mind of the investor, the outlook for fair public treatment of public service corporations is the most important single factor in directing investment of capital toward or away from the electrical field. I firmly believe that this matter of fair public treatment lies largely in your own hands. If you will do as well with that as you are doing with the technical side of the business, the $400,000,000 a year of fresh capital which you need will be forthcoming."

◆

A convention of Alberta municipalities has been held at which there has been proposed a resolution urging the provincial Government to supervise municipal financing, and thus to give an authoritative status to public works bonds. Such a scheme, it is further stated, would be merely a preliminary step towards giving later assistance in a manner similar to that rendered in the United Kingdom by the Local Government Board. This information confirms the impression of those interested in our great overseas Dominion that nothing will be left undone to ensure the maintenance of the credit of Canada and of its municipalities.—London Statist.

BUSINESS AND BOOKKEEPING OF TRUST COMPANIES

II.

(Concluded)

Examination of Transactions and Methods of Recording Them

Having, therefore, consideration for the foregoing facts and conditions, represented in the balance sheet, it is now possible to proceed with a more minute examination of the nature of the transactions arising and the methods of recording the details of the same, as well as the assembling into the form as depicted in a composite balance sheet, suggests Mr. R. W. Lampmann.

In a large trust and loan company the volume of business is so great as to necessitate the creation of departments to facilitate the handling of routine and prevent congestion or confusion. In general, it has been found convenient to divide the work in the following departments: estates department, real estate department and savings bank department, while the general business and investments come under a general department, which can be termed the accounting department.

Records for Each.

By the use of separate records and books of account for each department a large amount of detail work is diverted from the general accounting system.

In the "estates department" a synoptic system is very convenient, as all items are easily classified under estates corpus or capital—estates revenue, a bank account, and provision for sundries. The accounts are recorded in a client's ledger, which is divided into capital and revenue accounts for each estate, this ledger being subsidiary to a simple form of general ledger for the department.

The "real estate department" also conveniently uses a simple synoptic form. The transactions consist principally of the sale of properties and the collection of rents. Clients' and tenants' ledgers subsidiary to a simple general ledger are sufficient to fulfil the requirements of this department. The nature of the transactions is so simple as to obviate the necessity of further explanation.

The company's remuneration for services in the estates and real estate departments is usually in the form of a commission or fee, and the amount of the same is conveniently charged to the client by issuing a cheque in favor of the company, charging same against the account of the client for whom the service is performed, and transferring the amount to a commissions account in the accounting department as an earning of the company.

The assets and liabilities under these departments are shown in bulk, as previously intimated, under the "trust and agency" section of the balance sheet, at the end of the fiscal year.

In the "savings bank department" the system is also comparatively simple, owing to the fact that all items are exclusively cash items, and necessitate only a cash book system to record deposits and withdrawals upon the accounts of the depositors. The total deposits and withdrawals are abstracted at the end of each month and journalized into the general accounting department, into an account for savings depositors, which is treated as if the net amount on hand stood at the credit of a single client. Inasmuch as the funds derived from this source are allowed interest at a certain definite rate, the company treats the same as "guaranteed," and the accounts recording investments or balances on hand for savings depositors appear in the "guaranteed accounts" section of the balance sheet.

Therefore, by a process of elimination, the whole accounting situation is much simplified, and there remains only the general accounting department to be considered, which is necessarily the largest and most intricate of all.

Three Distinct Phases.

The first point to be observed in approaching this subject is that the transactions group themselves into three distinct phases. The relationships existing between the clients who provide the funds for investment, and the borrowers to whom the loans are made, together with the company's position in the management of the investments, present a threefold aspect which must at all times be taken into consideration in the records and any adjustments thereof. Around the interworkings of these three aspects certain complexities arise owing to the fact that in many instances two journal entries are made necessary for a complete adjustment of a transaction. A single journal entry may effect a change in the position of the records of any two of the three groups, but, since there can be only one debit, and one credit item to offset the same, it is necessary to bring the remaining group into adjustment by a supplementary entry.

In the natural order of events the company loans money, for example, upon first mortgages upon real estate; sundry clients place funds in the hands of the company for investment. The company then desires to invest the funds of the client in the mortgages already taken. For convenience the mortgages are taken in the name of the company and transferred to the clients by a process known as "allocation." This method consits of transferring the items upon the books of account in such a manner that certain specific loans are set aside and held as the distinct property of a particular client.

According to Rules.

Assuming, then, for example, that the company has loaned five thousand dollars out of its capital funds; and the loan stands on the record as a "loan upon capital account." The company also finds on hand guaranteed funds available for investment and decides to allocate the above mentioned loan. A journal entry charging "loans upon guaranteed account" and crediting "loans upon capital account" will accomplish this transfer. But in addition to this, in order to show the exact position of the client's account it becomes necessary to create another entry charging the "client's account" and crediting "guaranteed investments account."

These entries are presented in the above form simply to show what actually transpires according to the rules governing the journalizing of accounts. In actual practice it has been found more convenient to cover part of the transfer by issuing cheques in the company's own name for transferring items through the cash books; and in connection therewith a supplementary journal entry to complete the adjustment.

A purely trust investment is recorded in the same manner, having another group of corresponding controlling accounts in the general ledger.

In the case of the company acting as agent' only, for the collection of agreements of sale and items of a similar nature, the details are recorded in a subsidiary ledger, and any sums collected are passed to the credit of the client into a client's ledger, and from thence disbursed in the manner directed by the client, less any commission or fees retained by the company as remuneration for its services.

Form of Required Books.

It is well now to consider the general form of the books of account required. The principal books of account are a cash receipts book, a cash disbursements book, and a general journal. By the use of special columnar books in each case, it is possible to reduce the detail work to a minimum and greatly facilitate the construction and workings of the numerous controlling accounts required.

In the cash receipts book provision is made for the total cash received and for amounts deposited under the several classifications, "capital," "guaranteed," or "trust" bank accounts. The distribution columns provide for the application of moneys in repayment of loans, distinguishing as to principal repayments, borrowers' charges—such as taxes or insurance, which have been paid by the company and charged to the borrower— and also for the payments in respect of interest due from the borrowers.

In addition to these, columns are provided to cover items affecting the general ledger and the several clients' ledgers, as well as the more active accounts affecting the company's revenue for commissions, rents derived from company's premises, etc.

The cash disbursements book records the withdrawals made from the different bank accounts; and the distribution provides for amounts of principal loaned to borrowers and for any charges for insurance, taxes, etc., paid by the company and debited to the borrowers. In addition to these, columns are provided similarly to those in the cash receipts book for the transactions affecting the general ledger and the several clients' ledgers. Further, provision is made for the more active accounts governing the distribution of general expenses.

The general journal, ruled in synoptic form, with columns to cover the controlling accounts of the various ledgers, the several investments accounts, and a few active interest accounts, has been found to meet the requirements most admirably.

A separate interest book or docket is kept in which are recorded the details of interest charged to borrowers, distinguishing through the medium of individual columns between "capital," "guaranteed" and "trust" interest.

Items Affecting Profit and Loss.

In conclusion, a reference to the items constituting earnings and charges affecting the profit and loss account will be appropriate.

The earnings consist largely of the following items:— Interest earned from the loaning operations of the company's capital and guaranteed funds. Commission and fees as remuneration for handling investments or management of estates, trusteeships, etc. Rentals received from leasing company's office space and safe deposit vaults. The charges consist principally of the following items:—Expenses of management, including salaries, etc. Interest paid on guaranteed investments and deposits. Expense of operating company's office buildings, including fuel, taxes, repairs, etc. Commissions paid to agents for obtaining investments. Costs of inspection of properties mortgaged to the company as security for loans.

ONE WAY THE EAST IS INTERESTED IN THE WEST

"The east, particularly the province of Ontario, is more heavily interested than the Pacific province in the growth and steady development of the western prairies," said Mr. Alex. Smith, of Ottawa, in an interview at Winnipeg, "for it would appear that the people of the prairie provinces owe to the implement companies and for loans from loan and other companies, private individuals and the banks the sum of at least four hundred million dollars ($400,000,000). The average rate of interest is about 10 per cent., so that out of this year's crop and earnings the prairie people have to pay forty million dollars ($40.000,000) for interest alone. It is, therefore, not surprising that there is a strenuous demand for larger markets, lower freight rates, a more elastic money or banking system, and the construction of railways by the date of promise.

"A few days ago," said Mr. Smith, "the Saskatchewan government issued a statement showing the loans made in 1912 by companies over which it exercises some regulation. These loans amounted to $86,833,510.66. The loans this year will increase this amount by about $8,000,000, and in these statements no account is taken of numerous issues of debentures or of money to be paid on insurance premiums. This leads to the conclusion that the money owed by the three prairie provinces is in excess of the amount above stated: and the voice of the West is in consequence a mighty voice now."

DEFENSE OF LIFE POLICY LOANS

Actuary Says If the Companies Hamper Facilities, Both Policyholders and Companies Will Suffer

BY R. W. BARTON, A.I.A.

The somewhat rapid increase in the volume of loans on life insurance policies appears, judging from recent articles on the subject, to be creating consternation in the insurance newspaper world. So much so that certain would-be protectors of the public morals are telling us that the life assurance companies should stop it, or, at any rate, make it difficult for policyholders to borrow. Neither course would be beneficial to either side. The facts are briefly these. In the effort to popularize life assurance—a boon that only a dense public so long has failed to realize—various attractions have been, from time to time, put forth by the life insurance companies. Amongst these were guaranteed surrender and loan values, to be realized immediately upon proof of title being furnished by a policyholder. That this great benefit has taken so many years to be fully appreciated by the policyholder is only in accordance with the general slow appreciation of public benefactors.

Preparations are Made.

The administration of the great life offices knew what they were offering and knew to a large extent the period they would have to vary their investments to meet the public demand for this increased benefit. The subject has for many years been discussed in the leading actuarial institutions and full preparations made. Prior to the guaranteeing of surrender and loan values by the companies, banks and more especially private moneylenders reaped a rich harvest by lending upon these policies at a higher rate of interest than the companies ever charged. If the companies withdraw or hamper the facilities they now offer, the loans will not be materially reduced, but both policyholders and companies will suffer.

In other articles in *The Monetary Times*, I have shown the price to the company and the possible price to the policyholder of an unusual strain in this respect upon the funds of a company. This strain is known by the companies, however, to be more theoretical than practical. Few policies have a clear title and to clear a title is the province of the lawyers of the policyowners. We may safely say, therefore, that any possible strain upon the companies will not be while the policyholders wait at the office door. The question of the "clear title" is one that might well engage the attention of both offices and policyholders instead of this loan question—but as Kipling says "that is another question." From the point of view of the offices, loans on policies no doubt produce some "lapses," but the volume of business produced by the argument that savings invested in life assurance can be readily borrowed upon in times of emergency far outweigh these.

Faddists Allowed Too Much.

"How oft the means to do ill deeds makes deeds ill done" no doubt explains some proportion of the loans upon policies, but the man who assures his life is, a priori, a careful one and may be safely left to protect his own interests. The faddists who would legislate us into righteousness have already been allowed too much latitude. By all means educate the policyholder not to borrow except in an emergency—life offices have to educate both policyholders and those who should be policyholders, on many other points as well as this, but to take away or hamper the privilege given with so much foresight must not be thought of. The American experience in the financial panic of 1907 when millions of dollars were lent by the companies in a week and our own experience in the Dominion during the present stringency is an object lesson to all business men of the value of the modern life policy. In meeting the situations as they did the companies truly filled their noblest function—the trustees of the people.

CANADA AND NEW ZEALAND MARKET

The Canadian Trade Commissioner to New Zealand, Mr. W. A. Beddoe, would like to see Canadians applying for space at the Auckland Exposition, which opens December 1st. He adds:—

"While it may be true that the home demand is so great at present in consequence of the tremendous immigration to Canada, which provides a market for manufactured articles, absorbing the supply, this condition may only be temporary and the time is not far distant when Canadian exporters will look for foreign markets, and now is the time to build the foundations for same."

MARKETING CANADA'S GRAIN

VII.

SELLING BY SAMPLES

Commissioners Suggest Time is Ripe for Markets

Hence, it is claimed, that before sample markets are established the terminal elevators should be taken over by the state; if this is done the objectors will welcome sample markets. The objection, therefore, is not to sample trading itself, but sample trading carried on under a system of privately-owned terminal elevators.

The state has gone already, to some extent, into the terminal elevator business, and the condition is so far forth fulfilled. And if the state provides terminal elevators at inland points for the Hudson Bay and Panama canal routes, the condition will be still further carried out. The producers have also gone into the terminal elevator business, so that already terminal conditions demanded by these objectors have been to some extent arranged. It is also worth noting that if this objection be sound, the existing terminal companies do not lower each grade to its minimum, else they could not lower the grades still further by mixing. But the strength of the objection lies in the statement that while the terminal companies would make larger profits by mixing, they would have such a monopoly that the larger profits would be made by themselves only and not be shared by the producers.

This forgets that the producers themselves are now amongst the largest grain dealers, that they are amongst the largest owners of country elevators, and that they are now operating one terminal, and may in future operate several. It forgets that all large western milling companies with their interior and terminal elevators will still be in the field, and that eastern and British millers may also compete for such lots of grain as may be worth competing for.

Effects of Sample Trading.

It is argued that sample trading has lowered the grades of the United States grain. Doubtless the huge milling industries of the United States buy the grain that best suits, and doubtless also the different grading systems of the different states have tended to injure the uniformity and the reputation of the United States grades. But in Canada there is one grading system throughout, and there is less difficulty in maintaining the uniformity of the grades.

So far as state ownership of the lake terminals is concerned this would of itself neither wholly prevent nor greatly assist trading by sample. If the state owned the terminals, and if sample markets were establihed, mixing could not be done in the state terminals. No manager of a state elevator could mix grain to the satisfaction of the dealers. The treatment, therefore, if carried on at all would be carried on in private elevators other than terminals, in which the owner of the grain would treat it according to his judgment.

The grain so treated would then be shipped through the public terminals. This would render sample trading possible, but it would put an additional tax upon the grain to the amount invested in the private houses and in the additional handling necessary.

Will Delay Cars.

The second objection is very different from the first. The railway men who advance it do not ask for state operated terminals, as a preliminary condition, and do not take the ground that if that condition be fulfilled they will welcome sample trading. They are opposed to sample markets no matter who owns the terminals, because they say, sample trading will make transportation more difficult and will require larger yards at the points where the sample markets exist, and will delay the cars at these points so much that the greatest blockade Canada ever saw will be brought about. They point to the fact that the Exchange closes earlier on Saturday, and keeps closed on Sunday, and Monday, too, if at any time Monday is a legal holiday, and they contend that this fact alone would bring about a weekly blockade.

The transportation side of sample trading is being investigated by the railway commissioners; it is not in the hands of the grain commissioners. But it is open to the grain commission to point out that sample trading exists in every grain market in the United States without such a weekly blockade, and that by having sample markets both at Winnipeg and Fort William, the cars need not be detained all that time in Winnipeg. It is also open to the Grain Board to point out that it would not follow that all the cars would be held back at either Winnipeg or Fort William: that if the samples were taken at western points like Saskatoon, Moose Jaw or Regina these samples would be sent forward by express, inspected and sold, before the cars reached Winnipeg.

It is wholly wrong to imagine that a car of grain in, say Alberta, is picked up by an engine and rushed straight through to the terminal point without even an hour's wait in Winnipeg for sampling purposes. The journey of the grain cars to the terminals is slower than that even at the quickest, and if the average time spent by the cars between the shipping point and the terminals were taken there appears to be time for such sampling at western points and for selling by sample at Winnipeg for most of the grain.

Further, there is no reason why, if sample markets were established in Winnipeg, there could not be rules and regulations to the effect that samples exhibited a certain length of time must be withdrawn and the cars they represent sent forward; samples and cars inspected at a certain hour in the morning would all be disposed of by a certain hour in the afternoon.

It need not be denied that sample trading might tend to delay the transportation of some of the cars but the question is whether that delay would nullify the advantages of sample trading. This side of the matter, however, is in the hands of a body much more conversant with transportation conditions.

Preparation for Sample Markets.

Accommodation is arranged for by Winnipeg and Fort William for sample markets to handle this season's crop. At Calgary conditions are not ready for sample trading.

There will be also in operation the Dominion Elevator, an elevator operated by the Grain Growers' Grain Company, the other Canadian Pacific elevators, all as public elevators. There will be several other public elevators, and there is no difficulty in arranging for some private elevators.

The office for registration and cancellation is already working successfully.

Exchange rules concern the safeguarding of deliveries on receipts issued by private terminals; and have been provided for.

The board of grain commissioners consider that there should be two sets of samples taken—one by the trade for the sample market, and one by the inspection officers for purpose of inspection. There is an advantage in having two sets of samples. At present there is only one, and producers and traders alike are sometimes dissatisfied.

There is no difficulty in securing the services of a sampling bureau, and there is no difficulty, unless the railway companies make one, in arranging to have samples taken at points west of Winnipeg.

It is the opinion of the grain commissioners conditions are as ripe for the establishment of sample trading in Canada now as they ever will be, and that there is no sufficient reason for not establishing sample markets at Winnipeg and Fort William for the next crop.

Representatives of some of the railways have asked that the establishment of a sample market be deferred until September, 1914, and offer then to co-operate if this concession is granted. This proposal, however, has not been put in writing by any of the railway companies up to date. If it were put in writing and the commissioners assured of the co-operation of the railways, it might be considered by them.

(Conclusion of Series.)

CARELESSNESS CAUSED MONTREAL FIRES

That the insurance companies should refuse to insure some people who fail to take enough precaution against the possibilities of fire, was declared by Commissioner Latulippe while inquiring into the case of a Jewish grocer, A. Gladstein, 1212 St. Lawrence Boulevard, at the Fire Commission. The fire broke out in a wooden box full of matches, beside which was a tank of coal oil. D. Rees, a tailor, whose shop at 17 Bleury Street, suffered damage by fire last Monday, was blamed by Commissioner Latulippe for having left his shop open when he knew that vagrants used to come and rest there at night.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt station for the week ended September 5th, 1913: Cobalt Comet, 86,080; Tretheway, 95,430; Coniagas, 406,365; Cobalt Lake, 63,650; La Rose, 87,820; McKinley-Darragh, 121,760; total, 861,105. The total shipments since January 1st are now 27,142,615 pounds, or 13,571 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

MARKETS OFFERED BY WESTERN CANADA

Agriculture is Greatest Source of Wealth—Purchasing Power and Possibilities

The western Canadian provinces beyond the Great Lakes, which are attracting thousands of settlers annually, offer, perhaps, the greatest market in the world for manufactured goods of nearly every description.

During the customs fiscal year ended March 31st, 1913, Canada imported from the United States goods valued at $441,155,855. During the same period the value of imports received from Great Britain was $138,659,429.

Accurate provincial figures of the imports from different countries are not really obtainable, but it may be taken as correct that the provinces of Manitoba, Saskatchewan and Alberta are receiving annually over 75 per cent. of manufactured goods which are made elsewhere.

The greatest source of wealth in Western Canada is agriculture. Probably there has never been a more striking instance of the power of agriculture to create a great and prosperous community than Western Canada. Here is a country, where no more than forty years ago there were about 12,000 people, mostly half-breeds and Indians, but which has now a population of 1,500,000 and is adding to that number in the spring and summer months each year at the rate of over a thousand a day. The soil of Western Canada is rich and fertile, and produces quality crops year after year. Wheat produces twenty to sixty bushels to the acre; oats from fifty to one hundred bushels, and barley from thirty to sixty bushels.

Measured By Size of Crops.

The area of the three provinces is 479,162,438 acres. Of this it is estimated that, exclusive of the territory recently added to Manitoba, some 200,000,000 acres are arable. In 1900 the acreage under crop—wheat, oats and barley—was 3,491,413; in 1906 it had increased to 7,894,666; in 1911, 14,626,234, and in 1912, 17,329,000. In addition to this 1,110,000 acres of flax were sown in 1912. The money value of last year's grain crop alone is conservatively estimated at $250,000,000.

That these facts and figures are only records of the beginning of progress and development in the prairie provinces and that the future holds tremendous possibilities for this wonderfully productive country may be judged by the fact that only eight per cent. of the available land is under cultivation. Commerce is measured by the power of land to maintain population, and cities and towns can grow to the limit of the crop resources which directly or indirectly support them. The future of the cities and towns of Western Canada will be measured by the size of the crops of the three prairie provinces—Manitoba, Saskatchewan and Alberta.

The greater part of the annual crop is handled at Winnipeg. Indeed, as a handler of grain, Winnipeg has surpassed the famous markets of Chicago and Minneapolis. In 1911, 101,326,250 bushels of wheat were handled at Winnipeg, as against 96,647,850 bushels at Minneapolis and 42,629,751 bushels at Chicago. Last year 143,682,750 bushels of grain were handled at Winnipeg, which is now the largest primary grain market in the world.

Winnipeg is one Example.

On the basis of local trade figures it is conservatively estimated that Winnipeg alone is annually, at the present time, selling, throughout the extensive area for which that city is the economic distributing centre, manufactured goods to the value of $175,000,000. The purchasing power of the Western Canada market, based on actual value of last year's crops—about $250,000,000—and the other developed resources of forests, fisheries and mines, is calculated to be in the neighborhood of $300,000,000.

Now when hydro-electric power is becoming an important factor in industry, it is of interest to note that in the western provinces there are vast possibilities in this regard. In Manitoba there is water power which would produce 7,000,000 horsepower, and only 78,000 horsepower is being utilized at Winnipeg.

The needs of the west for manufactured goods are many and varied. It is true that some cities of this section have made progress along certain lines of manufacture, but the demand is insistent and growing, that there is no hope that the west will be able to supply it for some years at least. It must be true, too, that western Canada, filled with people that it readily will support, will always be a good customer for the manufacture of other parts.

◆

To the long list of foolish questions must be added the question directed to Sir Augustus Thomas Fitzgeorge, who is in Canada after an absence of 45 years: "Do you observe many changes?"—Toronto Mail and Empire.

VALUABLE LUMBER IN MANITOBA

Many Varieties in Added Territory—What Investigations Showed

The wealth of a nation may be in the character, the ability, the energy, the resources of its people, but the material basis of wealth is found in the natural resources of the country. Without such a material basis the ability of the people has but little on which to exercise itself and indeed the character of the people is demonstrated to a large degree by their use or misuse of the natural resources. An enquiry into the extent and condition of the natural resources of the province of Manitoba is therefore one of great interest, is the remark of Mr. R. H. Campbell, director of forestry.

Manitoba as the first producer of No. 1 hard wheat reaped a great harvest, not only of wheat, but of reputation as an agricultural province, a reputation which is thoroughly justified. The level prairies which formed the bed of the glacial Lake Agassiz and the western and northern shores stretching to Brandon and Dauphin districts form an extent of 20,000,000 acres of as good agricultural land as is to be found anywhere in the world and which last year on a cultivated area of 4,646,200 acres produced crops of $66,274,700 value.

Flora of Forests is Varied.

The quantity of grain produced was 128,844,000 bushels, of which 52,874,000 bushels was wheat. It is unnecessary for me to attempt to predict the future of agriculture in this province or give any advice in regard to it. That is properly in the hands of the agricultural authorities who are investigating and directing its development.

Manitoba has not been looked on as a forest country, but it has always had a considerable area of forest and, since the boundaries have recently been extended, a large territory has been added which is almost entirely forest land. The forest flora of this province is varied. At the southeastern corner the red pine of Ontario intrudes intermingled with spruce, jackpine, tamarack, birch and poplar. Along the valley of the Red and Assiniboine Rivers was a mixed forest of elm, ash, oak, basswood and ash-leaved maple, where trees were found ranging to 24 inches in diameter.

Value of Hardwoods.

Rising like islands from the agricultural plains, tracts like the Turtle, Riding, Duck and Porcupine Mountains, bore forests of oak, ash and poplar in the Turtle Mountains, and of spruce, jackpine, oak, elm, ash, poplar and ash-leaved maple in the others. The character of the virgin forest may be seen from the following extract from a report of explorations made by Professor Hind on the 8th November, 1858:—"I beg to subjoin the circumference, five feet from the ground, of a few trees within 50 yards of our camp on the Riding Mountain:—Aspen, 4 feet 6 inches, 4 feet 6 inches, 4 feet 1 inch, 5 feet; white spruce, 7 feet 3 inches, 5 feet 6 inches, 6 feet 6 inches, 6 feet; birch, 3 feet 6 inches, 3 feet; poplar, 4 feet 9 inches, 4 feet 6 inches. These trees represent, as far as observations permitted, the general character of the forest on the summit plateau of the Riding Mountain."

Spruce, tamarack, jackpine and poplar are useful for lumber and for pulp. The hardwoods may be the foundation for industries of great value.

◆

EACH DAY'S GARNERING WORTH FOURTEEN MILLIONS

Dean Rutherford, of the Agricultural College, estimates that 1,000,000 acres of wheat are being cut daily. Taking the average yield at 20 bushels to the acre, which Hon. W. C. Sutherland states is very conservative, it would seem that 20,000,000 bushels of grain is being cut each day. Basing the price paid to the farmer at 70 cents per bushel, it will be seen that $14,000,000 worth of grain is being safely garnered in each day. The prospects are for good weather, so that there seems little doubt but that by far the greater percentage of the grain will be safely cut before the cold nights set in.

◆

"On the surface of things there is much to suggest that we may be on the eve of some great decline in the value of money," says a London authority. As a result, however, of many conversations with prominent bankers, he does not find these confident views about extreme ease in money very generally held. There are abundant indications of active trade. Many bankers are of the opinion that there is likely to be further commercial activity during the next few months, while the commencement of the autumn is expected to see the recurrence of foreign borrowing on a large scale. Under these circumstances it is thought that any real and lasting fall in the value of money is scarcely likely at the present time."

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Coburg, Ont.—August 31—Mr. W. Laing's barns. Loss unknown. Cause, lightning.

Vercheres, Que.—August 28—Government yacht "Fast." Loss $15,000. Cause unknown.

St. Andrews, N.B.—September 4—Lady Tilley's barn. Loss unknown. Cause, lightning.

St. George, N.B.—September 2—Mr. C. Woodbury's residence. Loss and cause unknown.

Brantford, Ont.—September 8—Mrs. Acrett's barn. Loss unknown. Cause, supposed tramps.

Bridgewater, N.S.—September 8.—Forest fires in this district, caused by boy starting fire.

Trenton, Ont.—September 8—Mr. O. Martin's two residences. Loss and cause unknown.

Kincardine, Ont.—September 5—Mr. J. W. Rea's grist mill. Loss $12,000. Insurance $6,500.

King Township, Ont.—September 5—Mr. E. Seton's barns. Loss unknown. Cause, lightning.

Timmins, Ont.—September 8—Ottawa Hotel, etc. Loss $20,000. Cause unknown. One death.

London, Ont.—September 4—Mr. Seff's junk sheds, William Street. Loss and cause unknown.

Saskatoon, Sask.—September 1—Eastern Manufacturers', Limited. Loss $35,000. Cause unknown.

Jarvis, Ont.—September 7—Pere Marquette box car. Loss unknown. Cause, spontaneous combustion.

Heidelberg, Ont.—September 3—Mr. L. M. Bowman's lumber mills. Loss $4,000, partially insured.

Belleville, Ont.—September 4—Victoria Hotel stables. Loss unknown. Cause, supposed incendiary.

Crowland Township, Ont.—August 30—Messrs. Orr Brothers' barn. Loss $2,000. Insurance $1,000.

Haileybury, Ont.—September 4—King George boarding house. Loss slight. Cause, fumigating rooms.

St. George, Ont.—Dr. Baugh's farm buildings, of Hamilton. Loss $8,000, partially insured. Cause unknown.

Ingersoll, Ont.—September 7—Mr. J. D. Buchanan's residence, McKeana Street. Loss unknown. Cause, sparks.

Brockville, Ont.—September 9.—Eighteen boat houses, 16 skiffs, 5 motor boats, etc. Loss $12,000. Cause, dropped match.

Listowel, Ont.—September 6—Mr. A. E. Wakeford's residence. Loss, building, $300; contents, $300. Cause, supposed incendiary.

St. John, N.B.—September 7—Messrs. Robertson, Foster and Smith's hardware store. Loss $70,000. Cause, supposed incendiary.

Kildonan, Man.—September 6—Messrs. Golfand's two residences, Hartford Avenue, West, Kildonan. Loss $8,000. Insurance $5,500. Cause unknown.

Stratford, Ont.—September 4—Mr. Warren Walter's barn, etc. Loss and cause unknown. Mr. J. Steven's house. Loss unknown. Cause, sparks from other fire.

Glace Bay, N.S.—September 2—King George Hotel, owned by Mr. A. McAskill, and occupied by J. Cavers. Loss, building, $2,000; contents, $3,000. Cause unknown.

Strathclair, Man.—September 3—Patterson's drug store, Union Bank, postoffice, Finch Withers' Lumber Company, Plain Talk printing office, and Glover's blacksmith shop. Loss estimate, $75,000. Cause unknown.

Hamilton, Ont.—September 2—McLarens', Limited's, premises. Loss slight. Cause, spontaneous combustion.

September 8—Mr. H. Brown's stables, Macnab Street. Two horses burned. Loss $1,000. Cause unknown.

Innisfail, Alta.—September 3—Crown Lumber Company. Loss, building and stock, $12,000. Twin Livery Company. Loss, building, $3,000. Methodist church and parsonage. Loss $4,000. Dr. Diver, office. Loss $1,000. Crown Lumber Company and Methodist church partially covered by insurance. Cause. dropped match.

Montreal, Que.—September 4—Shed at rear 28 Torrance Street; Mr. H. Segare's shed, Phillips square; shed rear 135 Lusigan Street; stable rear 742 St. Urbain Street. Losses unknown. Cause, supposed incendiary. 98-104 King Street, occupied by S. H. Ewing and Sons. Loss $5,000. Cause unknown.

September 5—Messrs. F. Tremblay and Company's sash and door factory. Loss $5,000. Cause unknown.

September 8—Convent of the Sisters of Providence, St. Vincent de Paul. Loss and cause unknown.

Ottawa, Ont.—September 3—68-70 Rideau Street. Loss $33,300. Loss to building, $7,000. Damage to stock: J. B. Duford, $25,000. Insurance, $20,000. Chinese Restaurant, belonging to Hum Kee, 64 Rideau Street, $1,200; G. S. May & Sons, loss about $100. Cause, supposed spontaneous combustion.

September 7—Mr. J. R. Booth's lumber mill. Loss $75,000. Cause unknown.

Quebec, Que.—September 4—Harbor Commissioners' launch "Gossoon." Loss $20,000. Cause, gasoline tank caught fire.

Toronto, Ont.—August 28—10-12 Hagerman Street. N. Sigel. Loss $8,000. Insurance $6,000. Ross and Wright, adjusters for the assured, Toronto. Mr. Breslin. Loss $1,500. Insured. Ontario Cap Company. Loss $3,000. Insurance, Fireman's, British Crown and Company.

August 31—263-273 King Street West. Building owned by Canadian Pacific Railway. Loss $8,000. Cause, supposed incendiary.

September 4—Empty house on Mission Street. Loss $25. 76 Albert Street. Loss $300. Pile of lumber near Teraulay Street. Loss $50.

September 5—Mr. F. Partridge, 118 Earlscourt Avenue. Loss $300. Insurance, Royal, $600. Ross and Wright, Toronto, adjusters for the assured. Mr. G. W. Hatt, 120-122 Earlscourt Avenue. Loss, building, $1,500. Insurance, Quebec and Equity Companies, $1,000. Furniture, $500. Insurance, $400. Ross and Wright, adjusters for the assured. 124 Earlscourt Avenue. Loss $200. Canadian Carpet and Comforter Company, Dufferin Street. Loss $2,500. Cause unknown.

September 6—Toronto Pottery Company's premises. Loss $15,000. Cause unknown.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Weyburn, Sask.—August 8—Mr. W. H. Farrell's store. Loss on stock, $1,500. Insurance, $2,000. Cause unknown.

Moose Jaw, Sask.—Mr. W. J. Chantler's store. Insurance, stock, North British and Mercantile, $5,000; St. Paul, $3,000; British Northwestern, $4,000; American Central, $5,000; General Accident, $5,000; Fidelity Underwriters, $5,000; National Fire, $2,000; Law, Union and Rock, $2,000; London Assurance, $4,000; Northern Assurance, $4,000; Mercantile, $2,000; Scottish Union and National, $2,000; total, $43,000. Insurance on furniture and fixtures, $3,500. Loss, stock, $18,000; fixtures, $2,000.

Saskatoon, Sask.—August 11—Mr. F. M. Hewgill's residence, 226 7th Street. Loss, slight. Cause, chimney fire.

August 27—Hay at rear of Temperance Hotel, owned by Mr. A. T. Bailey. Loss, unknown. Cause, cigarettes.

August 28—Mr. J. Herd's residence, 921 Avenue K. North. Loss, slight. Cause, gasoline explosion.

August 29—Messrs. Cooper and Son's store, 215 2nd Avenue North, owned by Hon. N. W. Elphinstone. Loss, $1,700. Insured with Washington Providence, $2,300. Cause, electric wire.. Mr. A. W. Hutchinson's stable, 219 Sask Crescent. Loss, slight. Cause unknown.

The following fires were adjusted by J. S. Rankin, Vancouver:—

North Vancouver, B.C.—Mrs. M. R. Nelson's tent factory. Loss, building, $700; contents, $4,000. Cause, probably electric wiring. Insurance, building, $450, Springfield Fire and Marine; contents, $1,000, St. Paul Fire and Marine; $1,050, Springfield Fire and Marine. Mr. Anthony Farro's grocery store and dwelling. Name of occupant, Mr. Pasino Bartu. Loss on building, $230; on contents, $700. Cause of fire, cigarette stub. Insurance, contents, Phoenix of London, $2,700; building, Liverpool and London and Globe, $1,800.

Vancouver, B.C.—July 31—Mr. Severe Petre's Temperance hotel. Occupied by Mr. S. Goranson. Loss on building $716. On contents $375. Cause of fire, hot water heater in basement. Insurance, building, St. Paul Fire and Marine, $5,000; contents, Commercial Union, $2,000.

August 8—Mr. C. S. Snowdon's oil warehouse. Loss on contents, $1,675. Cause of fire, burning rubbish in basement next door. Insurance on contents, Northern, $500; London and Lancashire, $2,000. Belville Cider and Vinegar Company's warehouse. Loss on contents, $456. Cause of fire, supposed burning rubbish in basement. Insurance, contents, Northern Assurance Company, $700. Sherwin Williams Company's warehouses. Loss on contents, $700. Cause of fire, unknown, in building adjoining. Insurance on contents, Liverpool and London and Globe, $6,500; Phoenix of London, $13,000.

August 10—Mr. Percy W. Charleson's cigar store. Loss in building, $450. Cause of fire, electric wiring. Insurance, building, Commercial Union Fire Insurance Company, New York, $15,000.

August 11—Mary A. Dickerson's rooming house. Loss on building, $500; on contents, $750. Cause of fire unknown. Insurance, contents, Ottawa Fire Insurance Company, $1,000.

August 14—Mr. Thomas Rogers' cigar and candy store. Loss on building, $100; on contents, $190. Cause of fire, lamp exploded. Insurance, Germania Fire Insurance Company, building, $125; contents, $125.

August 22—Bowen Brothers' stores. Occupied by William Eve, (dry goods). Loss on building, $2,500; on contents, $695. Cause of fire, supposed electric wiring. Insurance, contents, German Alliance Insurance Company, $1,500; building, Rochester-German, $2,000; New Zealand, $1,500.

South Vancouver, B.C.—August 4—Mr. P. H. Davies' barber shop. Loss on building, $150; on contents, $125. Cause of fire, spark from stove. Insurance, contents, Ontario Fire Insurance Company, $700.

Oyama, B.C.—May 20—James Lowe's dwelling. Loss on building, $400; on contents, $275. Cause of fire, smoking. Insurance, St. Paul Fire and Marine, building, $200; contents, $300.

Revelstoke, B.C.—Earl Barraclough's steam laundry. Loss on building, $2,500; on contents, $4,500. Cause of fire, supposed spark from boiler room. Insurance, Liverpool and London and Globe, building, $500; contents, $1,270. Phoenix of London, building, $600; contents, $400. British and Canadian Underwriters, building, $700; contents, $1,300. Insurance Company of North America, contents, $500.

Grand Forks, B.C.—June 23—Granby Consolidated Mining, Smelting and Power Company's transformer. Loss on contents, transformer, $800. Cause of fire, lightning. Insurance, Phoenix of London, Queen, National of Hartford, Phoenix of Hartford, Michigan Commercial, $5,000, under general schedule.

The following losses were adjusted by H. T. Hughes, Toronto:—

Port McNicholl.—August 4—Loss, lumber, $160. Insurance, $1,000, Dominion.

Frankford, Ont.—August 8—Mr. S. Curry's 2 stores. Value $5,800. Insurance, $3,300. Loss, total.

Victoria Harbor, Ont.—August 4—Mr. Farron. Loss, $400. Insured with Dominion and Sun.

Brantford, Ont.—August 4—128 Alfred Street. Loss, $160. Insurance, $1,600, London and Lancashire.

Dundas, Ont.—August 6—Mr. Ridpath's premises. Insurance, $100, Mercantile. Loss, $10. Cause, natural gas explosion.

Milverton, Ont.—August—Trustees Milverton Public School. Struck by lightning. Insured with Anglo American. Loss, $49.

Huntingdon Township, Ont.—August 8—D. Thompson's barn. Value $600. Insurance, Montreal Canada, $300. Total loss. Cause, children and matches.

Niagara Falls, Ont.—August 6—Mrs. McAvay, Kitchen Street. Insurance, building, $1,050; furniture, $450, Norwich Union. Loss, building, $883; furniture, $1,690.

Hensall, Ont.—August 4—Mr. W. Bell's block of stores. Insurance, $5,000, Wellington, Mutual and Anglo America. Loss, $4,066. Mr. G. Scott. Loss, $77. Insurance, $2,000, Dominion and Anglo America.

Toronto, Ont.—August 1st—Spruce, 99 Sherbourne Street. Loss, $54. Insurance, Royal, $1,000.

August 5—Dr. Mabee's premises, 419 Bloor West. Loss, clothing, etc., $700. Insurance, London, Liverpool and Globe, $2,000. Cause, electric iron.

August 4—Higgins Manufacturing Company, McCaul Street. Insurance, Liverpool, London and Globe, machinery and stock, $6,500. Loss, $14. E. Hirons, 167-8 DeGrasse Street. Insurance, Commercial Union, $1,100. Loss, $137.74.

August 6—Corner Sark and Queen Street West. Insurance, $1,500. Loss, $30. Norwich Union. Cause, struck by lightning. F. Crawford, Balmuto Street. Insurance, $1,000. Loss, $25. London, Liverpool and Globe. I. R. Bradley, 38, 40 and 42 Charles Street West. Insurance, Royal, $7,500. Loss, $138. Jno. Mallon Estate, Dundas Street. Insurance, Royal. Garage. Insurance, Royal, $300. Auto, $500. Loss, total.

August 7—Sanderson, 45 Vernon Avenue. Insurance, Royal, $1,600. Loss, $425. Cause, electric wires.

August 8—Benedict, 116 Glenora Street, Ottawa. Building. Insurance, Anglo-American, $1,000. Loss, $611. Cause, burning building next door. Thos. Price, Price's Dairy. Auto. Insurance, Queen, $3,000. Loss, $77. Cause, backfiring. Mr. Harrison, 225-79 Parliament Street. Insurance, London and Lancashire and Royal Insurance, $1,000. Loss, $395. 37 Henry Street stable. Insurance, Employer's Liability and London, Liverpool and Globe. Building. Insurance, $1,990.

August 2—I.X.L. Laundry Company, McCaul Street. Insurance, Royal. Building, $8,100; horses and vehicles, $3,000. Loss, buildings, $1,969; horses and vehicles, $1,874. Cause unknown. Caplin, 682 College Street. Insurance, Royal. Goods, $300. Loss, $140. Cause, electric iron. W. J. Bassett, 76 Pembroke Street. Insurance, Royal. Building, $5,000. Cause, gas and curtain. Loss, $20. McKillop, 185 Strachan Avenue. Buildings, Commercial Union, Insurance, $1,000. Loss, $77. Cause unknown.

August 11—Exhibition. Loss. poultry house, Caterers. Insurance, Royal. Restaurants. Mary Gallyer, $1,000; Mr. Steel, $600; Mr. Judge, $600; Mr. Brown, $600; total, $2,800. Loss, $4,875.

Vancouver, B.C.,
Sept. 2nd, 1913.

The Manager,
The Monetary Times,
62 Church St.,
Toronto, Ont.

Dear Sir,

Enclosed please find my cheque to pay for one copy of Manual of Canadian Banking.

I have just finished reading part of the book, and I can certainly say that I never spent $2.50 to better advantage in my life. All bank clerks should own a copy.

Thanking you for your prompt and courteous attention, I am,

Yours truly,
(Sgd.) N. R. W.
No. Vancouver, B.C.

G-V Electric Trucks

FOR

Bakers, Butchers, Grocers, Distributors, Brewers and Bottlers, Hardware Merchants

Paving Contractors, Coal Dealers, Lime and Sand Dealers, etc.

We have a truck for every requirement
ranging from 750 lb., 1000 lb., 1 ton, 2 ton, 3½ ton, 5 ton, 6 ton.

Made by The General Vehicle Co. of Long Island
Makers of 7000 of the 12000 electric trucks in use in America.

MANITOBA ELECTRIC MOTOR CAR CO., Limited
Sales Room and Office:
Leslie Bldg., Assiniboine Ave.
WINNIPEG

ACCOUNTING OF PUBLIC UTILITIES

Public Commissions and Their Powers—Independent Supervision of Accounts

No matter, whether publicly or privately owned or operated, those indispensable adjuncts to modern industrial, commercial and domestic life are "public utilities," and generally speaking, subject to the same control and regulation. Laws providing such control and regulation and establishing public utility commissions to apply the same, are being gradually extended throughout the United States. In Canada, the idea has taken root and will grow. To select for control and regulation this class of private corporation as distinguished from other mercantile institutions is quite logical when it is considered that a public franchise usually granted for a long term, perhaps in perpetuity, and almost invariably gratis or on favorable terms, is the foundation on which the undertaking rests. Such a franchise may mean the right to use the most valuable thoroughfares of a large city for tramway purposes, the right to dig up streets and install conduits and pipes, or to encumber highways with lines of poles and wires for purposes of communication, or for the conveyng and distribution of a dangerous force. It has been said that such a franchise is but a part of the power or privilege of sovereignty allotted to a private person for the benefit of all, and only incidentally given for private emoluments, stated Judge Robson, public utility commissioner in an address before the Dominion Chartered Accountants' Association at Winnipeg. This delegation of sovereignty is even more conspicuous when the right of expropriation of private property is given as to many utilities, and always to through railroads is indispensable. Such is the unquestionable justification of the control and regulation of franchise corporations.

Jurisdiction of the Commission.

And when questions are put, why should any private corporation be required to render accounts to a public authority? Why should the private corporation be required to follow a system prescribed by such authority? the palpable answer is that the sovereign people are entitled to demand that it shall be disclosed to authority, established for the purpose, what benefits are resulting from the delegation of the public franchise to private interests.

In advanced jurisdictions public utility corporations are subjected to a special tribunal—namely, the commission whose jurisdiction enables it to control rates, to exact extended or improved service and to decide questions on all matters arising between the utility and a municipality or private citizen, and of equal or paramount importance to impose a system of accounting and periodical report of financial results.

For practical purposes there are a variety of reasons for such accounting. Many of the provisions of public utility acts are passed in the interests of shareholders, bondholders and mortgagees, in whose interest it is that there shall be supervision of accounts, and particularly that there be a due regard to depreciation, and by providing for depreciation funds or reserves ensure that capital is not impaired to make up dividends. The prominent instance of reference to such accounts is in rate questions to see if present traffic and the resulting revenues are such that reduction of rates may be ordered and still leave a fair return on the investment. The right to increase rates will conversely depend on the accounts showing that present traffic and rates do not produce such fair return. Improvements of service and extensions of plant and distribution equipment are frequently demanded. Here the financial capacity of the utility is a consideration and an inquiry thereupon is an essential proceeding.

Salient Purposes of Accounting.

Properly-kept accounts duly reported to a commission answer the question at once. In highly profitable franchises where rate reduction for some reason may not be possible, as in the case of fixed rates of street car fare, there is the alternative course frequently even more satisfactory, of requiring extended or improved service. All this is done in a spirit of the utmost fairness to the corporation. Proper accounting by such utilities is necessary in their own interests. Without a reliable system by which at any moment they can exhibit their financial burdens and gains they cannot meet attacks that may be made with only apparent justification. "One of the chief benefits to be derived from the standardizing of accounts is the possibility of comparing conditions in different places." Incidentally may be mentioned the power of a commission to require at any time an independent valuation or appraisal of a utility plant. This valuation provision is necessary in settling rate problems, the actual value of the plant and equipment, with cost of operation, being the true basis of rates. The valuation and accounting provisions are indispensable towards the supervision by the commission of the issue by a utility of new stocks and bonds for which the consent of the commission is required. Such in a few words are the salient purposes of accounting in the case of private franchise corporations.

Self-Supporting Utilities are Desirable.

What about the like accounting by publicly-owned utilities, by which are meant municipal undertakings? Does the necessity for public accounting exist? It does, for some of the reasons mentioned, but also for others. It is necessary to consider for a moment the special nature of such enterprises. The end to be gained by the pledging of the public credit for the installation of public utility plants is not always the same. Water service now naturally falls in this country to municipal authorities. That cannot yet be said regarding electric or gas plants, telephones, telegraphs, railways or tramways. There are increasing instances of publicly owned and operated electric and gas plants, telephones and street railways. These may be instituted from different motives. It may be that the field is new and private enterprise not at hand, or that reduced price of service is sought to be secured by means of public competition, or that existing private undertakings do not cover the field, and public action is imperative or is thought to be beneficial to the community.

It seems to be the intention in this country that these publicly-owned plants shall not be expected to do much of anything in the way of making profits. This is so that the consumer may get service at cost. But equally well founded is the determination that such plants shall, when well-going, be made to pay their way and cast no burden on general taxation. Both private and public utility enterprises have their early periods of operating loss, while attaching business. Consideration must be given to this. In some municipal cases this loss may continue till the community increases in population, in which increase the very existence of the utility service in the community may be a factor. But allowing for all this the desired financial end is that the utility shall be self-supporting.

Independent Supervision of Accounting.

A municipal plant run at a loss means that taxpayers who do not use it, though they may remotely benefit from the fact that the plant is there, are paying for the service provided to their neighbor and not to them. In public plants there are no shareholders to be concerned. Bondholders have the whole assessable property to fall back on and so may not feel much interested in the finances of the plant. Questions of rate reductions are not likely to arise. So that the reasons for requiring accounting in public plants are not identical with those in private ones. Yet it is all important that there be independent supervision of the accounting of publicly-owned utilities and the enforcement of adherence to proper principles, and that this be likewise made the means of acquainting the taxpayers with what is being done with their money, and with the funds raised on the security of their property, and whether the administration is successful, and the financial result of the undertaking satisfactory. Every taxpayer is under a guarantee limited by the value of the property he owns, for the debts of the municipal utility. He is entitled to know reliably the extent to which such guarantee is, by reason of deficits, converted into direct liability, and to know what the taxpayers in the municipality are paying for the privilege of having the utility. In municipal cases depreciation reserves are of the highest importance, else the present may be consuming the plant at the expense of the future. In cases where there is competition between a public plant and a private one, it is but just that the same rules of accounting should apply to both.

ATLAS GLASS WORKS IN LIQUIDATION

An order for the winding-up of the Atlas Glass Works, Limited, has been granted and the Quebec Savings and Trust Company appointed provisional liquidators. The company has an indebtedness of $146,000 over its bonded indebtedness.

The company was capitalized at $1,500,000 (7,500 shares of $100 each and $750,000 bonds). Of the $750,000 bonds authorized, $350,000 were issued at 6 per cent. The bonds issued are secured by a first and specific mortgage of the company's real and immovable property, plant and machinery and a floating charge on all other assets; $400,000 were retained in the treasury and could only have been issued for 75 per cent. of the cost of additional property acquired or extensions made to plant. The company's property consists of about 700,000 square feet of land situated in the town of St. Pierre, formerly Blue Bonnets, Quebec province.

A branch of the Bank of British North America has been opened at 150-Mile House, B.C., under the charge of Mr. A. de C. Smith as acting manager.

CONSERVATION OF PUBLIC HEALTH

Practical Suggestions for the Life Insurance Men—Scope for Better Work of Health Boards

The conservation of public health is discussed in an interesting paper prepared by Mr. W. G. Bell, of Guelph, for the convention of the Life Underwriters' Association at Ottawa. Any steps taken to bring about increased longevity, he said, would be profitable to the insurance company, the insurant and the agent alike. With the object of educating the people whom they have insured along lines likely to increase their lives and general welfare, certain companies have already distributed instructive literature. But the number of such companies has been limited and the information imparted has, generally speaking, been meagre and technical, with the notable exceptions of the two large United States industrial life insurance companies which are doing business in Canada, the Metropolitan and the Prudential.

Industrial and Ordinary.

It may be argued, said Mr. Bell, that the ordinary life companies cannot go as extensively into a campaign of this character as can those which conduct an industrial business, for the reason that the latter by their system of collecting weekly, through their agents, come regularly and frequently into direct personal touch with their hosts of insurants to whom they are in a position to give advice of a personal nature as well as to whom they can distribute the instructive pamphlets issued by their companies which suggest not only preventive measures, but in many cases give good sound advice as to the proper mode of procedure when illness is present.

The representative of an ordinary life insurance company has not the advantage of the personal touch to the extent that the industrial agent has but both he and his company are in a position to do much towards conducting an educational campaign. And it would appear but reasonable that they should do every thing possible in that direction.

It would be a simple matter for an agent to enclose with each premium notice and every letter which he sends a copy of any pamphlet which his company may see fit to publish, and if thus each agent during his whole career is able to save but one single life or obtain for his company one extra premium, the saving to the mortality fund will be apparent.

Question of Life Preservation.

One of the reasons which the managers of the regular companies may advance why this work should fall mainly upon the shoulders of the industrial companies is that the insurants of the latter are more in need of information than those of the former. While, as a class, the industrial insurants may not be as well educated upon general lines as are the others, when it comes to knowledge of life preservation, Mr. Bell thought there is little to choose between them.

Mr. Bell suggested that it would be well for the executive committee of the Life Underwriters' Association to suggest to each of the local associations the advisability of putting itself in touch with the medical health officer of its district with a view to obtaining by combined action an increased municipal grant for the health board, so that more efficient work could be performed and the risk to health and life lessened. Every community, through its health board should do its utmost to reduce the number of preventable deaths which occur annually, and this can and doubtless will be done if sufficient funds are supplied.

◆

CANADIAN MUNICIPALITIES CAN PAY DEBTS

Mr. A. W. Smithers, chairman of the Grand Trunk Railway, being asked at Montreal, what he thought of the claim that Canada, and especially Canadian municipalities, are over-borrowed in the British money market, said: "I do not think there is anything to such a claim, and I do not imagine that there are many people at home to-day who really consider this country over-borrowed. In fact, there is not in my mind any municipality in Canada unable to pay its indebtedness. Canada and many other countries have no doubt been spoiled in the past by the fact that they got their money too cheaply. In future, however, you will have to pay considerably more than in the past, and, while you will get all the money you require for any good project, the fact remains that you will have to pay a higher rate in the British market."

◆

Mr. J. E. Ray, acting Canadian trade commissioner, Glasgow, Scotland, has cabled to the department of trade and commerce, Ottawa, the information that there is a great shortage of pears in Scotland and England. He has received many inquiries, and would be glad if Canadians in a position to do an export business would forward offers to his office giving quotations c.i.f. Glasgow, Liverpool and Bristol ports.

AVOID SMALL FIRES

Loss Occasioned by Forest Fires is Large—Carelessness is Often Cause

Avoid small fires, is advice that needs constant reiteration throughout Canada. During the past month the losses from fire totalled $3,034,775. In addition to this there was much destruction of the forest wealth of the Dominion, and the losses for the year will reach large proportions.

List of Forest Fires.

Some of the forest fires were as follows:—

August 1—Lower Valdez Island, B.C. Timber destroyed, Sparrow Lake, Ont. Fires covered twenty miles.

August 2—Quyon, Que. Great loss of timber.

August 4—Lac Tremblant, Que. Burned cottage, etc. Cavendish and Anstruther Townships, Ont., Lake St. Joseph, Ont., several acres of pine, spruce and maple damaged.

August 6—Quyon, Que. Bush fire again broke out. Swept three-mile area.

August 8—Galt, Ont. Fire in underbrush.

August 11—Lynn Creek Valley, B.C. About fifty acres burned over.

August 13—Moira Township. Caused by children playing with matches.

August 14—Jellimore Settlement, N.S. Two big forest fires.

August 16—Sidney, Ont. Fire area was mile in width.

August 19—Townships of Digby, Lutterworth, Longford and Anson, in Haliburton County, Ont. Many fires and considerable damage.

Mahone Bay, N.S. Much damage.

August 20—Hastings, Ont. Loss over $1,000.

Eardley, Ont. Loss over $2,000.

Carlsbad Springs, Ont., and district.

Halifax district, N.S. Loss estimate, $100,000.

August 22—Forest fires throughout Yarmouth, N.S., district.

Fenelon Falls, Ont., 500 acres swept by fire.

Much Loss is Irreparable.

Grass fires were reported from Burford Road, Brantford, Ont.; Stratford, Ont.; Victoria, B.C.; Galt, Ont.; Ingersoll, Ont.; Belleville, Ont.; Kingston and other points.

In addition to the loss of timber, natural beauty is destroyed and summer resorts are spoiled, private property is consumed, and human lives are lost, often through the neglect of the careless camper, hunter, tourist and settler.

Observe Every Precaution.

The regulations relating to the preservation of Dominion forest reserves adopted by the government in 1908 have been rescinded, and very stringent rules framed on the advice of the officials of the forestry branch of the Department of the Interior have been authorized by the Minister. In regard to the lighting of fires, it is provided that every person who makes or starts a fire in the open air for cooking or camping purposes shall:—

(a) Select a bare rock whereon to kindle such a fire wherever possible, and if there be no bare rock in the neighborhood, then a site on which there is the smallest quantity of vegetable matter, dead trees, branches, brushwood, dry leaves or resinous trees. (b) Clear the place in which he is about to light the fire by removing all vegetable matter, etc., from the soil within a radius of ten feet from the fire. (c) Exercise and observe every possible precaution to prevent such fire from spreading, and carefully extinguish the same before quitting the place. Severe penalties are provided for neglect of proper observation of these regulations.

◆

Canada is still a young country, and any difficulties through which she may have to pass from time to time in connection with her financial and commercial development might be aptly described, perhaps, as "growing pains." Her natural resources, still untouched, provide totals which are little short of staggering. It is for this very reason that a watchful eye must be kept constantly on the ways and means of developments. New flotations must be carefully scrutinized and indiscriminate borrowing regulated with no uncertain hand. In these circumstances, the Dominion is fortunate in having the benefit of counsel from such a conservative banker as Sir Edmund Walker, who in so many words tells his countrymen that they are foolish to imagine that no further restrictions are necessary. "No railroad, manufacturer, municipality or government," he says, "should go into operations demanding money unless they first know how and where they can get it, for this is the only manner of keeping indiscriminate borrowing within bounds." Let our friends in Canada remember that the United States passed safely through a similar critical period in their history, and take heart from the well-meant advice of careful bankers.—New York Financier.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required and name of secretary-treasurer:—

Alberta.

Meighen, No. 1906, $4,000. I. E. Pritchard, Viking.
White Ash, No. 2938, $1,150. J. A. Ross, Taber.
Funnell, No. 2638, $300. W. B. Smith, Keystone.
Penhold, No. 214, $6,500. A. W. Walker, Penhold.
Sparta, No. 2740, $600. O. E. Putnam, Carrot Creek.
Schaffer, No. 2975, $1,200. H. Pitman, Claresholm.
Berryfield, No. 2993, $1,600. J. R. Whitney, Consort.
Pleasant Home, No. 2997, $1,600. D. I. Powell, Goddart.
Orlando, No. 2384, $1,600. J. A. Boral, Dowling Lake.
Blood Indian, No. 2831, $1,500. C. F. Anderson, Delano.
Coronation, No. 2335, $7,000. W. D. Guthrie, Coronation.
Heart Lake, No. 2764, $1,600. G. M. Laraway, Hartshorn.
Grassmere, No. 2999; $1,200. J. H. Woodward, Lac Ste. Anne.
Thibeault Roman Catholic public, No. 35, $14,000. J. B. Dalphond, Morinville.
St. Louis Roman Catholic separate, No. 21, $15,000. M. C. Lynch, Medicine Hat.

Saskatchewan.

Parry, No. 3020, $2,000. H. Ashton, Parry.
Heidelberg, No. 3008, $1,500. I. A. Ens, Hague.
Sunflower, No. 1383, $800. J. J. H. Berg, Ernfold.
Norge, No. 1011, $1,400. H. H. Johnson, Overland.
Deer Creek, No. 1275, $1,600. F. D. Paley, Shelho.
West Hazel, No. 1337, $1,400. H. Buarman, Mervin.
D'Arcy, No. 3016, $6,500. D. N. Buntain, D'Arcy.
Britton, No. 2888, $2,400. H. Hickerson, Goldberg.
Bickleigh, No. 3035, $1,800. R. J. Glover, Bickleigh.
Excelsis, No. 2994, $2,000. J. C. Mitchell, Dahinda.
Easter Lily, No. 3029, $1,900. H. J. Veal, Marchwell.
Canora, No. 1152, $30,000. H. M. Sutherland, Canora.
Bond City, No. 1375, $2,000. H. L. Johnson, Michellton.
Horsehill, No. 2978, $1,600. H. W. B. Macdonell, Edam.
Jack Creek, No. 2875, $1,800. G. Hughes, Pinto Creek.
Red Pheasant, No. 2995, $1,200. S. H. Williams, Willowmoor.
Turvin, No. 3032; $1,700. W. R. Decker, Box 213 Kindersley.

◆

Mr. A. W. Sord, of the Great West Textile Company, has been visiting various Saskatchewan cities and the establishment of a factory for the manufacture of linen and other flax products may be the outcome of the visit.

COMPANIES WILL INCREASE STOCK.

The capital stock of the City Investments, Limited, has been increased from $100,000 to $500,000, by the creation of 400 new shares of $100 each, of which 250 are preferred shares. The number of directors has been increased from three to five.

The capital stock of the Allan Munro Color Company has been increased from $50,000 to $80,000, the increase consisting of 300 shares of $100 each.

The capital stock of the National Loan and Investment Corporation has been increased from $100,000 to $500,000 by the issue of 400 shares of new stock at $100 each.

The capital stock of the Dominion Lumber and Fuel Company, Limited, has been increased from $40,000 to $200,000 by the issue of 1,600 new shares of $100 each.

The capital stock of the Holden Company, Limited, has been increased from $45,000 to $250,000, such increase consisting of 250 shares of $100 each.

The capital stock of John S. Metcalf Company, Limited, has been increased from $25,000 to $250,000, such increase consisting of 2,250 shares of $100 each.

The capital stock of the following companies in Alberta has been increased:—The Alberta Foundry and Machine Company, Limited, from $50,000 to $100,000 by the creation of 500 shares of $100 each; J. A. Lockerbie, Limited, from $25,000 to $100,000 by the creation of 75,000 shares of $1 each; the Opera Cafeteria, Limited, from $10,000 to $25,000 by the creation and issue of 15,000 shares of $1 each; Sovereign Securities, Limited, from $50,000 to $500,000 by the creation of 4,500 shares of $100 each.

The capital stock of the Prospect Silver Fox Company has been increased from $60,000 to $195,000, divided into 1,950 shares of $100 each.

The Murray Harbor Black and Silver Fox Ranching Company will make application to increase their capital stock from $50,000 to $150,000 and to increase the number of shares at par value of $100 from 500 to 1,500.

◆

A first-class credit is the most valuable kind of property. Having no corporeal existence, it has no weight and takes no room. It can easily be transferred, often without any formality whatever. It is movable at will from place to place by a simple order with nothing but the cost of a letter or a telegram. It can be immediately used to supply any material want, and it can be guarded against destruction and theft at little expense. It is the most easily handled of all forms of property, and is one of the most permanent. It lives with the debtor and shares his fortunes, and when he dies it passes to the heirs of his estate. As long as the estate exists the obligation continues, and under favorable circumstances and in a healthy state of commerce there seems to be no reason why it should ever suffer deterioration.—A. Mitchell Innes.

DEBENTURES FOR SALE

TENDERS FOR COUNTY OF MIDDLESEX DEBENTURES

The County of Middlesex offers for sale Twenty-five Debentures of the amount of one thousand dollars each, for which sealed tenders addressed to the undersigned and marked "Tender for Debentures" will be received by the undersigned up to **eleven o'clock a.m., the 10th day of October, 1913.** The County does not bind itself to accept the highest or any tender.

Each Debenture is dated the twenty-fourth day of July, 1913, and is payable on the tenth day of November, 1933, with interest thereon at five per cent., semi-annually on the tenth day of May and the tenth day of November in each year during the currency thereof, on presentation of the coupons to each of said Debentures attached at the office of the Treasurer of said County, but not elsewhere or otherwise.

A. M. McEVOY,
County Treasurer,
County Buildings,
London, Ont.

August 30th, 1913.

DEBENTURES FOR SALE

The village of Maryfield, Sask., offer $1,700 15-year, 7 per cent. debentures.

E. L. ANDERSON,
Secretary-Treasurer.

Maryfield, Sask.

TENDER FOR DEBENTURES

Tenders will be received up to twelve o'clock noon on Friday, the 19th day of September, A.D. 1913, for the purchase of an issue of $40,000 worth of debentures for the purpose of purchasing stock in the Laurentia Milk Company, of Saskatchewan, Limited, repayable at the end of a period of ten years, and bearing interest at the rate of 5½ per cent. per annum.

The highest or any tender not necessarily accepted.

J. P. MARSHALL,
Secretary-Treasurer,
Town of Battleford.

Battleford, Sask., 21st August, 1913.

DEBENTURES FOR SALE

Tenders will be received by the undersigned for the purchase of $14,000.00 6 per cent. debentures of Thibeault R.C. School District No. 35, repayable in 20 annual instalments.

J. B. DALPHOND,
Sec.-Treas.

Morinville, Alta.

COURSES IN BANKING

Our courses in practical banking have been compiled to meet the need of CANADIAN BANK OFFICERS, and are the product of years of deep study and ripe experience of our staff of

6 WELL-KNOWN AUTHORITIES

These courses include instruction in

Commercial Arithmetic

The company H. Gagnier, Limited, has been authorized to do business in Quebec. Its head office will be at Montreal.

UNION LIFE COMPANY TO BE PROBED

The Minister of Finance has requested Mr. G. T. Clarkson, the liquidator of the Union Life Assurance Company, to examine by his counsel, Mr. Masten, the officers and directors of the company as to the conduct of the business since the date of the insurance investigation in 1906, when the affairs of the company were under review by the commission.

This enquiry will ascertain in what manner the resources of the company were dissipated, whether through unsound investments, wasteful management or otherwise, and particularly what disposition was made of the capital and premium, amounting to more than six hundred thousand dollars, contributed by British shareholders.

◆

COMPANIES WILL CHANGE NAME.

The West Coast Trust Company will make application to change their name to Pioneer Trust Company.

Ricketts and Stow, Limited, will make application to change their name to Duker and Creighton, Limited.

Bogardus Wickens and Begg, Limited, will make application to change their name to Bogardus Wickens, Limited.

O. E. Hood Company (Retail), Limited, will make application to change their name to Hood's, Limited.

The name of Narrow Fabric, Limited, has been changed to Narrow Fabric Weaving and Dyeing, Limited.

The name of the National Advertograph Company, Limited has been changed to the Old Advertograph Company, Limited.

The Saint Michel Driving Club Company has been authorized to change its name to the Dorval Jockey Club Company, Limited.

Lane's Dominion Stores. Limited, will make application to change its name to Lane's 5, 10, 15, 20 and 25c. Stores, Limited.

The Daily News Publishing Company, Limited, will make application to change its name to the Edmonton News Publishing Company, Limited.

Smith and Whitney will make application to change its name to Whitney and Company, Limited.

CANADA'S COMMERCIAL RELATIONS WITH THE UNITED STATES.

This Dominion is a Large Purchaser from the Republic But Its Sales are Increasing—Growing Interest in Securities.

Much has been recently written about Canada's extraordinary adverse trade balance, which has been growing rapidly larger and reached the huge total of $287,130,040 in the twelve months ended April 30, 1913, states the editor of the New York Times Analist in an introduction to the following article by Mr. De Forest Hicks. It means, of course, that Canada has been exporting credit and importing goods. That is, she has been buying heavily on credit. Her principal source of capital is England. What the writer shows in the following article is that Canada has been spending her borrowed capital largely in the United States. In 1870, 32.43 per cent. or her total imports came from the United States; in 1912, 63.37 per cent. Regularly we sell to Canada more than we buy from her, so that 45 per cent. of our total favorable trade balance now comes from our trade with Canada. Under the circumstances it may seem to ill become the United States to criticize the extent of Canada's foreign borrowing.

Mr. Hicks Says: "To one making a study of the foreign trade of the United States several facts stand out prominently. First: That while the total of exports and imports has advanced without serious setbacks from 1886 to date, the balance of trade, that is excess of exports over imports, has been subject to wide fluctuations. The magnitude of these fluctuations is shown by the fact that in 1893 the United States owed other countries in respect of its foreign trade for that year $18,000,000, whereas in 1908 other countries owed the United States $666,000,000. The result of our foreign trade for year ended June 30, 1913, approximates this banner year with a figure of $653,000,000. An analysis of the official figures brings out the surprising fact that of our favorable trade balance for the year ended June 30, 1913, $294,688,869, or over 45 per cent. of the total, resulted from our trade with the Dominion of Canada, which, added to our trade with the United Kingdom, constituted a total of $596,274,236, or over 91 per cent. of our total trade balance. If we added to these figures the balances with British colonies throughout the world the percentage would be even higher.

United States Trade Balances

"Following are trade balances of the United States for the past fiscal year with the principal countries of the world:

In favor of United States, arriving from—	
Great Britain and Ireland	$301,585,367
Canada	294,688,869
Germany	142,721,141
Netherlands	87,728,895
Balance of Europe	44,952,011
Australia, New Zealand, and balance of Oceania	37,184,859
France	9,222,211
Philippine Islands	4,374,545
Africa	2,663,573
Against United States, arriving with—	
Mexico	$22,972,258
South America, Central America, Cuba, West Indies and balance of North America	87,847,550
Japan, China and balance of Asia	161,395,748

"The fact must not be overlooked in considering the above figures that our trade with other countries in a majority of cases shows a satisfactory growth.

Canada and United States Trade

"The following table shows in round figures the favorable trade balances of the United States arising from trade with Canada and with the balance of the world from 1894 to 1913:

	Trade with Canada.	Trade with Balance of World.
1894	$25,000,000	$211,000,000
1895	16,000,000	59,000,000
1896	18,000,000	84,000,000
1897	24,000,000	261,000,000
1898	51,000,000	563,000,000
1899	56,000,000	473,000,000
1900	55,000,000	488,000,000
1901	63,000,000	601,000,000
1902	61,000,000	416,000,000
1903	68,000,000	325,000,000
1904	79,000,000	390,000,000
1905	78,000,000	322,000,000
1906	88,000,000	428,000,000
1907	109,000,000	336,000,000
1908	91,000,000	574,000,000
1909	84,000,000	266,000,000
1910	120,000,000	67,000,000
1911	168,000,000	353,000,000
1912	220,000,000	330,000,000
1913	294,000,000	358,000,000

"These figures emphasize the wide fluctuations in the United States trade balance with the world exclusive of Canada, and that United States excess of exports to Canada over imports from that country have in the main shown a substantial and steady growth from year to year. The United States total trade balance with the world increased in the period under discussion 175 per cent., while our balance with Canada grew from $25,000,000 to $294,000,000, or over 1,076 per cent., in the same twenty years.

"So much for the balance of trade which the United States enjoys in her commercial relations with the Dominion.

Aggregate Value of Canadian Purchases

"Let us now consider the aggregate value of goods shipped to Canada as compared with our shipments to other countries.

"In the past fiscal year we shipped to:

	Goods Valued at
The United Kingdom	$597,150,307
Canada	415,260,049
Germany	331,684,212
South America	146,147,993
France	146,100,201
The Netherlands	125,909,862
Cuba	70,581,154
Japan	57,741,815
All of China	22,439,594

"Canada being part of the British Empire, we might naturally assume that the bulk of her imports, particularly manufactures, would come from England. This, however, is not the case, as a study of the figures extending over a period of years points out that in 1894 Canadian imports from the United States were $61,000,000, as compared with $59,000,000 from the rest of the world, and that in each year thereafter Canada purchased more in the United States than in the rest of the world combined.

"In 1870 Canada made less than one-third of her foreign purchases in the United States. In 1912 she purchased nearly two-thirds here. This growth in the percentage which purchases in the United States bear to Canada's total purchases is shown by the following figures: Percentage of Canadian imports coming from the United States: 1870, 32.43 per cent.; 1880, 40.33 per cent.; 1890, 45.99 per cent.; 1900, 59.17 per cent.; 1910, 58.81 per cent.; 1911, 60.84 per cent.; 1912, 63.37 per cent.

"These figures are of added interest when taken in conjunction with similar figures relating to foreign purchases of other important countries: Percentages of imports coming from the United States, year 1911: Canada, 63.4 per cent.; Mexico, 53.9 per cent.; Cuba, 52.5 per cent.; Venezuela, 30.6 per cent.; Colombia, 28.8 per cent.; Ecuador, 28.1 per cent.; Peru, 19.6 per cent.; United Kingdom, 18.0 per cent.; Japan, 15.8 per cent.; Argentina, 14.3 per cent.; Netherlands, 14.3 per cent.; Spain, 13.0 per cent.; Chile, 12.4 per cent.; Italy, 12.3 per cent.; Brazil, 11.2 per cent.; France, 10.3 per cent.; Russia, 8.8 per cent.; Switzerland, 4.2 per cent.

Republic Buys Dominion's Goods

"While the closeness of our markets accounts largely for the proportion of Canada's trade which we enjoy, the fact that Canada makes nearly two-thirds of her foreign purchases in the United States emphasizes the close relations between the two countries in a commercial way.

"It is natural that Canada should buy from United States more than she sells to that country, as the markets of the United States offer a larger variety of products than do those of Canada, and the requirements of the Dominion are in addition abnormally large at this time of extensive development in the building of railways and in the housing of the large influx of population. It is, however, gratifying to find that the growth of trade between the two countries has not been one-sided, and that our purchases of Canadian products for the year 1913 were nearly four times what they were in 1894, and reached in the past fiscal year the very large total of $120,000,000. This figure is exceeded only by United States imports from the United Kingdom, Germany, France, and Cuba.

"From another standpoint, it is interesting to find that of Canada's total exports in the year 1912 (the latest figures available), 36.7 per cent. were purchased by the United States, and that this percentage has not materially changed since 1893. In other words, Canada's sales to the United States have increased in approximately the same rapid ratio that her total export business has increased during the twenty-year period. Canada's purchases in the United States for the past fiscal year amounted to 17 per cent. of our total exports.

"Segregating United States trade with the Dominion from her trade with the balance of the world, another interesting fact is developed, namely, that in each year from 1893 to 1912, inclusive, Canada's trade with the balance of the world has resulted in a favorable trade balance for the Dominion.

United States Acquiring Canadian Securities

"Canada's trade with United States has resulted in an adverse trade balance, to provide for which she has pledged her credit through the sale of provincial, municipal, railroad, and industrial bonds abroad. In a rapidly growing country this is inevitable.

"While Canadian securities have in the past been purchased largely in England, Scotland, and on the Continent, it is gratifying to know that they are becoming more and more widely distributed throughout this country, and that the United States is doing an increasing share of Canadian financing. In view of the growth of our commercial relations, this is not only natural but proper.

"The importance of Canada to the United States as a customer, and the large figures which the business represents, should amply warrant a careful study of the general conditions existing in the Dominion, which will show the sound basis which she offers for the credit which must be extended to her by the financial markets of the world during the present period of development.

◆

CAPITAL INVESTED IN TRADE PAPERS

The Federation of Trade Press Associations in the United States was organized at Niagara Falls on September 18th, 1906. At the start it concerned itself chiefly with discussions of the postal question, but in later years more consideration has been given to ways and means for promoting the best interests of the trade press in many other directions.

The second annual convention was held in Washington, and subsequent annual meetings have been held in Chicago, Boston, New York and Niagara Falls.

The federation conventions and banquets have been addressed by many prominent men, among them being several postmasters-general, assistant postmasters-general, chiefs of government bureaus, the president of the chamber of commerce of the United States of America, and many of the leading publishers, advertising and professional men in the country.

The federation represents a movement which seeks to better the conditions of trade paper publishing, to raise the standards of trade journalism and secure an efficiency in advertising which will enhance the power and usefulness of trade papers to manufacturers and advertising men.

The eighth annual convention of the federation will be held at the Hotel Astor, New York, September 18th to 20th, 1913.

Those interested in the idea of business promotion through trade press efficiency, which is to be featured at this meeting, are invited to attend any or all sessions. There will be papers and addresses of interest to all these. This convention will be a practical demonstration of the power and dignity of the organized trade press movement.

The capital invested in trade papers in the United States has been estimated at not less than $50,000,000. The federation papers represent a capital investment of not less than $35,000,000.

The number of employees on the federation papers is about 5,900; the estimated yearly expense for labor is $12,272,000; and, aside from labor, the estimated gross annual expenditures for rent, materials and general expense are $15,000,000.

The president of the federation is Mr. H. M. Swetland, The Automobile, 239 West 39th Street, New York; vice-president, Mr. Elmer C. Hole, American Lumberman, 431 South Dearborn Street, Chicago; secretary and treasurer, Mr. Edwin C. Johnston, American Exporter, 135 William Street, New York.

NEW COMPANY AT OUTLOOK

The firm of J. P. Kennedy & Company has been incorporated and the name changed to the Universal Securities Corporation, Limited. This firm has opened a private bank in the offices which they recently purchased from the McElhinney Company, Limited, at Outlook. Mr. J. P. Kennedy, who is managing director of the new corporation, was formerly associated with the Canadian Bank of Commerce.

◆

Contracts for the two interior elevators to be erected by the Dominion Government at Saskatoon and Moose Jaw have been awarded to the Barnet-McQueen Company, of Minneapolis, contractors for the new elevator nearing completion at Port Arthur. The contract price is slightly under a million dollars for each elevator. The capacity will be three million bushels each, but the construction will be such as to permit additional units being built at any time in order to treble the storage requirements.

FORT WILLIAM AND CROP TRANSPORTATION

Existing Facilities Must be Increased as Production Grows—Shipping

(Special Correspondence.)

Fort William, September 9th.

Mr. G. O. Callaghan, managing director of the Steel Company of Canada, when inspecting the plant of his company now under construction, stated that under ordinary favorable conditions the Fort William plant would be ready to begin operations on April 1. Messrs. Prack and Perrine, the contractors in charge of the building operations, have a large staff of men at work. It is intended to have the building closed in before real winter sets in, so that there will be no delay in the construction work until the completed structure is turned over to the owners.

The Fort William board of trade is to be represented at the annual convention of the Western Canadian associated boards of trade to be held in Winnipeg, September 11, 12 and 13. A resolution from the Fort William board entitled "Terminal elevators at the head of the Lakes," will be one of the important matters to be discussed. The petition deals with the grain handling and grain treating here. It sets forth that the grain production must continue to grow with the increase in population and the settling up of the west until the production of grain has increased to at least ten times its present size, and that there are not adequate facilities for handling the present season's crop. This question will undoubtedly create an interesting discussion, being more or less of vital interest to the entire west.

Preparations for Crop Handling.

Fort William is getting in readiness to receive the crop. Each week sees the big terminal elevators being depleted more and more of the storage grain; outward lake shipments continue to be brisk, while the remnants of last year's crops continue to filter in. According to the government grain office statistics for the week ending August 28, there were 3,172,295 bushels of grain in store at the twin cities; 850,000 bushels were received from the west and 1,750,000 bushels shipped out.

The government-owned elevator at the head of the lakes is nearing completion and the machinery is now being installed. The opening of the grain sample market, which was to have been established in Fort William on September 1, has been postponed until December 15. Chairman Magill and members of the Dominion grain commission of Fort William have been in Ottawa the past few days conferring with the government on the question and it is understood that the above arrangement has been arrived at by the delay to the construction of the government elevator here. It is fully expected, however, that the elevator will be completed by December 15, when the grain sample market will be established.

Lake Shippers' Clearance Association.

At the annual meeting of the Lake Shippers' Clearance Association, held in Winnipeg, Mr. Capil Tilt was re-elected president. In an address to the members the president made the interesting statement that 1,326 cargoes had been handled by the association at the head of the lakes and 155,336,891 bushels of the 1912 crop of grain had been shipped out through the association. The excellent work accomplished by the Lake Shippers' Association in the prompt loading of vessels is worthy of note and greatly assists the commerce and trade of the great lakes.

A notice is given in the Canadian Gazette of recent date that there has been deposited in the department of public works a plan and description of the site of the proposed dock which the Superior Rolling Mills propose to have erected in this city. The site of the plant is in the Wayland Addition and fronts on the Kaministiquia River.

WORK OF THE METROPOLITAN LIFE INSURANCE COMPANY

Speaking at a banquet at Montreal to the agents and officers of the Metropolitan Life Insurance Company, Major G. W. Stevens, discussing the conservation of life, said: "The Metropolitan Life Insurance Company has not only taken a unique place among the commercial forces of the world, but has pointed the way to other corporations, to government, to cities, whereby this life may be made happier, better and richer. To have done this is to have done something towards lifting the world's work out of the slough of mere selfishness and greed and to have placed it upon the pedestal of human nobility, where it belongs. To have done this, is to have earned a dividend of gratitude, sympathy and respect, and stored it where the breath of selfishness may not tarnish it, where the claw of the vulture may not reach it, nor thieves break in and steal, nor rust destroy."

DIVIDENDS AND NOTICES

THE SHERWIN-WILLIAMS COMPANY OF CANADA, LIMITED

Notice is hereby given that the ninth quarterly dividend of one and three-quarters per cent. (1¾%), being at the rate of seven per cent. (7%) per annum, upon the preferred stock of this Company, **has been declared** payable to shareholders of record the 15th day of September, 1913, and that cheques for the same will be duly mailed to them on the 1st day of October next.

Books not closed.

By order of the Board.

J. H. GORDON,
Secretary-Treasurer.

Montreal, September 2nd, 1913.

CROWN-RESERVE MINING COMPANY, LIMITED

DIVIDEND No. 44

Notice is hereby given that a dividend of 2 per cent. has been declared for the month of September, payable **15th October, 1913,** to shareholders of record the 30th September.

Transfer books will not be closed.

Dividend cheques will be mailed on the 14th October by our transfer agents, "The Crown Trust Company," and shareholders are requested to advise them of any change of address.

By order of the Board.

JAMES COOPER,
Secretary-Treasurer.

Montreal, September 8th, 1913.

DIVIDEND NOTICE

DOMINION TRUST COMPANY

HEAD OFFICE—VANCOUVER, B.C.

DIVIDEND No. 15

Notice is hereby given that an interim dividend at the rate of 8 per cent. per annum upon the paid-up capital stock of this Company will be paid on **1st October, 1913,** for the quarter ending 30th September, 1913, to Shareholders of record of 13th September, 1913.

Holders of Share-warrants will receive dividends on presentation of Coupon No. 4 at any of the offices of the Company.

The Transfer Books will be closed September 15th.

By order of the Board,

A. H. BAIN,
Secretary.

Vancouver, B.C., 29th August, 1913.

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND No. 106

Notice is hereby given that a dividend of two and one-quarter per cent. (being at the rate of nine per cent. per annum) on the amount paid up on the capital stock of this Company, has been declared for the quarter-year to the thirtieth day of September, 1913, and that the same will be payable at the office of the Company, 23 Toronto Street, Toronto, on and after the **first day of October, 1913,** to Shareholders of record at the close of business on the sixteenth day of September, 1913.

By order of the Board,

EDWARD SAUNDERS,
Managing Director.

Toronto, 3rd September, 1913.

AMES HOLDEN McCREADY, LIMITED

Quarterly Dividend

Notice is hereby given that a Dividend of One and Three-quarters (1¾) per cent. upon the Preferred Capital Stock of the Company, now issued and outstanding, for the current quarter, to Shareholders of record on the Transfer Books of the Company on the 20th day of September, 1913, will be payable at the office of the Company in Montreal on and after the first day of October, 1913.

By Order of the Board,

W. A. MATLEY,
Secretary.

Montreal, September 6th, 1913.

THE MONTREAL CITY AND DISTRICT SAVINGS BANK

Notice is hereby given that a Dividend of Two Dollars per Share on the Capital Stock of this Institution has been declared, and will be payable at its Head Office, in this City, on and after **Wednesday, the 1st of October next,** to Shareholders of record at the close of business on the 15th day of September next.

By order of the Board,

A. P. LESPERANCE,
Manager.

Montreal, August 29th, 1913.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

AGRICULTURAL CREDITS

Organization is a Necessity to Farmers—Preliminary Report of Investigation

Mr. G. Jones, of Denver, has presented to the house of governors, Colorado, a preliminary report of the investigation of rural credits and agricultural co-operation conducted by the American commission in fourteen European countries. The statement was presented in the absence of Senator Fletcher, of Florida, chairman of the commission. It says:—

"It seems quite well established that economic evolution has made organization a necessity to farmers. Co-operation is suggested as a form of organization which would secure for them at once the highest business efficiency and the greatest social strength. Co-operative organizations should be formed with a view, first, to improving their credit facilities, secondly, to increasing their control over the marketing of crops and to strengthening their position as buyers and sellers, and thirdly, to establishing a channel whereby educational propaganda and work for the improvement of country life conditions may be effectively brought to the individual and his co-operation and participation in that work secured.

"Organization along co-operative lines has been demonstrated to be of great value to the farmers in European countries and well-directed work of that kind ought not to be delayed or meet with difference in the United States. Our rural population needs a financial plan or system separate and distinct from a commercial banking system, to meet their requirements. They should have facilities for short time cash accommodations at reasonable rates which can be had by co-operative institutions and they should have a plan or means for obtaining long-time loans at low rates of interest with sinking fund or amortization feature."

Systems of Short Time Credit.

Senator Fletcher said that the most highly-developed systems of short-time agricultural credit were found in Germany. "They are," he said, "in the form of a pyramid composed of local co-operative credit societies, central societies operating generally over a promise or administrative district and a main central society, as the apex, at Berlin.

"Every farmer joining a local society assumes liability for its debts. In other words, he signs over his credit to the society and with this collective liabilty or credit as security the society contracts loans and solicit saving deposits. There may also be a cash capital subscribed or a cash reserve built up to serve as security in addition to the collective liability, but it is the liability which forms the chief security. The funds thus secured, are loaned by the society to its members. A rate of interest is charged members on such loans sufficiently above the rate paid by the society to creditors, so that the margin will cover the expenses of the bank and leave enough over for reserves or other purposes.

"In their operation it is necessary to insure two things, first, that creditors shall be protected in their loan, and second, that members shall be protected against the losses to which their liability subjects them.

Repayment of Loans.

"The members are protected by placing every possible safeguard about the loans to ensure their repayment. This is done, first, by admitting to the society only persons of good standing. Then it is provided that loans shall be made only for productive purposes the borrower being required to state for what purpose he desires a loan. Further, the territory of operations for each society is limited to an area wherein every member knows every other member and is in position to find out whether the borrower is living up to the promises he has made to the society.

"The liability assumed by members is depended upon to keep them watchful of the affairs of other borrowers and in a rural community this check is extremely effective. Also, profits are either prohibitive or so strictly limited that there is no incentive to speculation as a means to swell the income of a society. The officers of the society are so chosen that one set or board keeps check on the other. The liability of all officers insures their watchfulness. The general management of the affairs of the society are left in the hands of the general assembly of all members.

"No matter what stock membership a member may have he is entitled to only one vote. His stock ownership is generally limited to a small amount. In this way these societies are insured a conservative management and maintain a surveillance over all loans made to members far closer than that maintained by the average commercial bank.

Central Bank Principle.

"All such local societies within a certain territory are combined to form a central society. A central bank is established which has, first, a small cash capital subscribed by the local societies, and secondly, the collective liability of its constituent banks as capital. These central banks receive as deposits the surplus funds of local societies and loan them in turn to other local societies. In other words they equalize supply and demand between the local banks. They are hardly more than paper institutions. Their management is undertaken through officers chosen by the local societies through a representative system.

"The main central banks act as equalizers for the central banks above mentioned. The effect of this pyramiding of the societies is to concentrate all of the borrowing and investing for a system in one big institution. The deposits, of course, are taken in by the local societies and as the societies develop these form the bulk of the system's resources. In Germany, such deposits have at times formed over 90 per cent. of all funds required for loans by an entire system."

Four Canadian provinces were represented on the commission.

INDUSTRIAL MOOSE JAW

The locating of several industries and the establishment of an industrial centre at the present time, are problems which must engage the serious attention of the citizens of Moose Jaw, as much of the future development depends on the spirit exhibited at the present time, is the remark of Mr. B. C. Crichton, president of the Moose Jaw board of trade, in his annual address.

The progress made by this growing city is shown in the following paragraphs:—

The new industries which located in Moose Jaw during 1912 were: Dominion Electric Company; Directoyou Company, Limited; Moose Jaw mattress factory; Princess sash and door factory; Kasow Electric Company, Limited; Western Canada Brush and Broom Manufacturing Company, Limited; Moose Jaw Tile and Pottery Company; Canadian Standard Auto and Tractor Company.

The following will locate during 1913:—

Railway Accessories Company, manufacturers of rail joints and electric railway supplies. When completed, this company will employ 50 men to start; when in full operation, 125.

Chemical Soap Company, manufacturers of soap, also chemicals. When completed, this plant will employ 40 men to start and within two years 250.

Incandescent Gas Light and Stove Company, manufacturers of gasoline gas manufacturing machines. They will employ 40 people to start and 90 when in full operation.

The International Linseed Company are to erect a twenty-four press linseed oil mill. This will employ at the start, 75 hands.

Negotiating for Future Factories.

The city is now negotiating with the following class of factories: Gasoline tractor factory, oatmeal mill, threshing machine factory, gas engine plant, paint works, binder twine factory, stove works, Pneumatic tool company, biscuit factory and cooperage.

Moose Jaw's electric power plant is municipally owned, and power is distributed to the manufacturer at the lowest cost. The electric power is generated by coal brought from Alberta, and is supplied to the manufacturer at 1¼ to 2 cents per kilowatt.

The board of trade has approached the railway commission to have a track laid to the coal fields, some twenty miles south of the city, where there is an abundant supply of lignite coal. When this source of power is developed it will greatly decrease the cost of electricity, which is at present manufactured from coal costing $7.00 per ton.

With low tax rates and its other existing facilities, Moose Jaw offers the manufacturer an opportunity, full particulars of which Mr. C. E. Brown, Industrial Commissioner, will supply.

CENTRAL RAILWAY'S FRENCH BONDS

In consequence of the uneasiness that is being displayed on this side of the water, says a despatch from London, regarding the position of the French bondholders of the Central Railway of Canada, the London representative, on behalf of the president of the company, says that there appears to be no doubt that all coupons of French bonds have been duly paid except the last, and that the delay which has arisen is entirely due to the voluntary liquidation of La Banque Alsacienne de Paris. It is, however, definitely stated that this coupon, which fell due in July, will be paid on or about the 15th of this month.

◆

Ronuk, Limited, has also been authorized to do business in Quebec and its chief place of business will be at Montreal.

The capital stock of the Guarantee Realty Company, Limited, has been decreased from the sum of $5,000,000 to $2,000,000, the decrease consisting of 30,000 unissued shares of $100 each.

CROPS IN NOVA SCOTIA

The hay crop in Nova Scotia will be the largest for some years, and, notwithstanding the long spell of dry weather, it is thought the root crop will also be a satisfactory one this season, writes a correspondent to *The Monetary Times*. There will be a decrease in the apple crop, and shipments will probably not exceed 500,000 barrels, in comparison with 1,400,000 barrels a year ago. An excellent quality of fruit is looked for, however, and on account of the decreased crop, good figures are being obtained.

◆

The following Canadian issues have been listed in London: Canadian Pacific £1,745,481 cumulative preference fours, £1,766,153 perpetual debenture fours.

HULL'S FIRE RECORD

According to the report of the Hull fire department for 1912-1913, the damage by fire for the first eight months totalled $10,211, as compared with $23,569 during the corresponding period last year. The number of alarms was 118, 49 more than in the previous year, and the fires number 33, an increase of 11. The amount of insurance was $55,150, an increase of $8,457, and the amount paid by the insurance companies was $18,690, a decrease of $11,426. The damage without insurance had decreased by $1,932.

◆

The Bank of Nova Scotia has closed its branches at Norton, N.B., Clarke's Harbor, N.S., Hantsport, N.S., the latter having been made a sub-office to Windsor, N.S.

MUNICIPAL WORK IN PRAIRIE PROVINCES

Interesting Contrast in Methods—Ways of Taxation

Saskatchewan is well advanced in having uniform methods of bookkeeping for municipalities, and it is only a matter of time when such modifications will take place as will bring the record used in accord with the ideas of practical accountants, while still retaining their uniformity. This opinion was expressed by Mr. O. J. Godfrey, of the Saskatchewan Institute of Chartered Accountants at the annual meeting of the Dominion Association of Chartered Accountants, held at Winnipeg. Mr. Godfrey discussed municipal accounting in the prairie provinces. Municipal work there, he said, offers an interesting contrast in methods, in many ways. In Saskatchewan and Alberta there is a minister of municipal affairs, who holds a place in the cabinet, but in Manitoba, the head of the municipal department is a commissioner, without a place in the cabinet, directly responsible to the government. In each province great power is vested in the head of the municipal department, and possibly the commissioner in Manitoba is the most powerful of the three.

Legislation of Provinces.

Contrasting the legislation, in Manitoba the various classes of municipalities are brought under one act, called the municipal act. In Saskatchewan there are six acts—viz., the city act, the town act, the village act, the rural municipal act, the local improvement district act, and the municipal ordinance of 1898. This latter is the original municipal act, which would have passed into entire disuse but for two rural municipalities which claimed rights acquired thereunder when the municipal acts of the province were remodelled in 1908, and which were exempted from the provisions of the new rural municipal act. One of these two municipalities has since voluntarily surrendered its rights in this respect and fallen into line with the general scheme of the government. The Alberta legislation is similar to that of Saskatchewan, but of more recent date.

To come to the work of the municipal departments as it affects the chartered acountant, and taking Manitoba first, said Mr. Godfrey, under the municipal audit act the commissioner appoints salaried municipal auditors, who are entrusted with the work of audit throughout all classes of municipalities in the province with the exception of the cities. Their duties are plainly set out in the act, and their powers appear to me to be fairly wide.

Call in Chartered Accountants.

In some cases the municipal commissioner has called in chartered accountants to make special audits in municipalities where everything was not apparently as it should have been. The system adopted for audit in Manitoba has much to recommend it, and vice versa. The cost of audit in Manitoba is levied annually proportionately on all municipalities by the municipal department.

The system of bookkeeping prescribed in Manitoba is largely synoptic—apart from the tax-roll—and the skeleton systems issued by the department are easily understood by anyone having even the most elementary knowledge of bookkeeping.

A feature of the financing of municipalities in Manitoba as set out in section 436 of the municipal act, greatly appeals to me. The Saskatchewan act requires all borrowings on current account to be repaid during the current year, irrespective of the amount of unpaid taxes. The Manitoba act, in allowing renewals for borrowings against unpaid taxes, is preferable in this respect, inasmuch as it is not logical to expect 100 per cent. of the taxes to be collected during each year, as apparently the Saskatchewan act does—or to expect a council to break municipal tradition by levying more than is required for the current year.

Taxation in the Provinces.

Manitoba differs from her sister provinces respecting taxation in many ways—e.g., personal property is assessed in Manitoba, but not in Alberta or Saskatchewan. A discount is allowed for prepayment of taxes in Manitoba and not in the other provinces.

Tax sales are still in force in Manitoba and Alberta, but in future will not be legal in Saskatchewan, where lands are to be forfeited to the municipality when the tax enforcement return has been confirmed by a judge.

A fixed or flat rate of assessment may be made in rural municipalities in Manitoba on the council obtaining the consent of the ratepayers. For four years this method of taxation has been obligatory in Saskatchewan, but has been found not to be suitable, or popular and legislation has recently been enacted reverting to the old system of taxation on valuation.

"I see nothing in the Manitoba act," said Mr Godfrey, "with a trend towards single tax, similar to the legislation of Alberta and Saskatchewan which rather encourage this form of taxation."

MONTREAL WILL FLOAT LOAN

If Market Conditions Improve—Western Canadian School Issues

The treasury officials of Montreal have instructed the city's financial agents in London to float the city's loan of $11,400,000 at a favorable moment. The money is required to meet expenditures on permanent works of the present year. The loan may be floated at a price between 95 and 98, and the city will have to pay 4½ to 4⅞ per cent., perhaps more.

The city of Montreal's flotations in London since January, 1905, have been as follows:—

Year.	Amount issued, £	Rate of interest, %	Issue price.
1908, April 27	1,000	4	99
1909, January 1 ..	400,000	4	103
1910, February 16 .	123,200	4½	109
1910, October 1 ...	1,000,000	4	101½
1913, March 3	1,438,300	4½	100
1913, May 17	1,430,600	4½	100

In addition, Westmount in September, 1909, issued £435,000 4 per cents.; Maisonneuve, in March, 1910, £143,800, 4½ per cents., at 106; Westmount, January, 1911, $500,000, 4 per cents., at 101¼; Maisonneuve, in February, 1911, £87,900, 4½ per cents., at 102½; and Maisonneuve, in April, 1913, £187,600, 5 per cents., at 100.

Regina School Bonds.

The Regina School Board has for sale $500,000 worth of public school debentures. A Toledo firm had accepted this issue but could not dispose of more than $100,000. An option was given Messrs. A. E. Ames and Company, of Toronto, on the $400,000, until September 9th. This option was subsequently extended until to-day. The Bank of Montreal has advanced a temporary loan of $100,000 to the school board.

Calgary's School Bonds.

The question of having school bonds sold through the city was discussed at a meeting of Calgary's city council. It was felt that the recent sale of school bonds at a low price was injurious to the city's interests and that it would be advisable to have the city handle both securities. Accordingly a motion was passed to invite the finance committee of the school board to meet the finance committee of the council to discuss the advisability of formulating a plan whereby the city handle all sales.

DEBENTURES AWARDED

Brighton, Ont.—$60,000.

Brandon, Man.—$5,000 40-year, to Hadley Estate, Brandon.

Windsor, Ont.—$76,000 to Messrs. W. A. Mackenzie and Company, Toronto.

Sarnia, Ont.—$270,000, to Messrs. W. A. Mackenzie and Company, Toronto.

Haileybury, Ont.—$8,968, 5 20-instalment, to Messrs. Stimson and Company, Toronto.

Rosetown, Sask.—$13,500 7 per cent. 20 years, to Messrs. W. L. McKinnon and Company, Toronto.

Brampton, Ont.—$42,523 5½ per cent. 20 years, to Messrs. C. H. Burgess and Company, Toronto.

Berlin, Ont.—$154,347 5½ and 6 per cent. 10, 20 and 30 years, to Messrs. C. H. Burgess and Company, Toronto.

County of Lambton, Ont.—$20,000 5 per cent. ten instalments, to Messrs. W. A. Mackenzie and Company, Toronto.

COMPANIES REGISTERED IN BRITISH COLUMBIA.

The following companies have been registered to do business in British Columbia:—The General Fire Extinguisher Company, Providence, Rhode Id., U.S.A., provincial office, Vancouver, capital, $5,000,000; Eaton, Crane and Pike Company, Portland, Maine, U.S.A., provincial office, Vancouver, capital, $500,000; American Encaustic Tiling Company (Limited), New York, U.S.A., provincial office, Victoria, capital, $1,800,000; Seattle Cap Manufacturing Company, Inc., Seattle, Washington, U.S.A., provincial office, Vancouver, capital, $25,000.

The following companies have been registered to do business in Alberta:—The National Improvement and Investment Company, Limited, Winnipeg, capital, $500,000; Allan, Killam and McKay, Winnipeg, $30,000; Northern Improvement and Investment Company, Limited, Winnipeg, $500,000; Standard Land and Security Corporation, Limited, Toronto, $40,000; Maison Canadienne de Finances et D'Immeubles, Limitee, Quebec, $100,000; Pace Harrison and Millar, Winnipeg, $50,000.

WINNIPEG AS A GRAIN MARKET

If there is any grain market on the continent of America which surpasses Winnipeg in statistical and other importance, Western Canada generally and Mr. C. N. Bell particularly, would like to hear of it. Mr. Bell is the secretary of the Winnipeg grain exchange, and for several years has kept a watchful eye on Minneapolis and the other on the Winnipeg exchange. He has just completed statistics covering the movement of grain into Winnipeg during the crop year ended August 31st, 1913. His statement shows total inspections of 238,409,225 bushels in the western grain inspection division for that year, divided as follows:—

Crop.	Bushels.
Wheat	141,715,125
Oats	59,763,600
Barley	14,833,000
Flax-seed	22,081,500
Rye	16,000
Total	238,409,225

It appears that three years ago Winnipeg, for the first time, passed all competitors on this continent as the leading grain market. Since 1910 it has continued to progress and now out-distances all competitors.

Minneapolis, naturally, has taken pride in its grain importance and when three years ago, the Winnipeg statement was extensively published in the United States, certain United States newspapers and several members of the Minneapolis chamber of commerce took exception to the comparison of the figures as to dates, claiming that the Winnipeg figures were for the crop year ended August 31st, while the Minneapolis figures were for the previous calendar year.

Mr. Bell, in order to prevent similar objections on this occasion, has prepared a statement showing the receipts of grain at various points on the American continent during the calendar year 1912. "This statement," says Mr. Bell tenderly, "shows that Minneapolis is hopelessly left behind in the race for supremacy, while old-time markets like Chicago and New York, as grain markets, exist almost only in history." Here are the figures:—

	Wheat. Bushels.	Oats. Bushels.	Barley. Bushels.
Winnipeg	143,682,750	51,683,000	10,049,800
Minneapolis	113,635,280	15,804,530	24,599,630
Buffalo	108,225,504	10,580,150	12,176,925
Duluth	86,777,990	10,328,940	10,932,261
New York	45,976,100	24,152,650	7,070,864
Kansas City	43,719,600	6,682,700	186,200
Montreal	36,283,931	13,271,581	1,895,089
Chicago	35,914,000	118,491,300	20,355,200
St. Louis	30,541,767	21,152,650	7,070,864
Philadelphia	19,601,796	9,600,214	386,012
Omaha	16,868,800	12,903,000	1,192,800
Baltimore	12,488,385	17,481,271	579,588
Milwaukee	9,967,490	14,346,360	13,716,000
Cleveland	3,552,675	11,278,520	28,946

Duluth has also held its head high for many years as the world's greatest flax seed market, but the province of Saskatchewan, which grows most of Canada's flax, has apparently won the title for Winnipeg. Duluth's receipts for the calendar year 1912, were 14,570,125, while Winnipeg's receipts for the crop year 1912-13 were 19,394,550.

These facts and figures are another illustration of the oft-repeated statement that Canada is traversing the road of progress similar to that travelled by the United States during the past century.

ACCOUNTS AND THE TIMBER INDUSTRY

One of the most important, indeed the staple industry of British Columbia, is the timber industry. It has been the source of much wealth and has witnessed the formation of many companies. Many of them, honestly and well managed, have pleased the shareholders. Others, badly managed and overshadowed by sharp practices, have caused heavy losses to investors. Reorganizations of several timber companies have been effected during recent years and several concerns had to go out of business entirely. The industry is sufficiently important to justify the improvement of financial methods in connection with it.

According to a report issued by the Vancouver board of trade, the total output of manufactured lumber in the province of British Columbia during the year 1912 was 1,262,000,000 feet. Of this, 902,000,000 feet was sawn by the coast mills, and 360,000,000 feet by the mountain mills in the interior. This, at an average price of $18 per 1,000, which may be taken as a fair average, produced $22,716,000.

Of the total output 394,000,000 feet was sold locally on the coast, 817,000,000 was sold in Alberta, Saskatchewan and Manitoba, and 51,000,000 was exported to foreign countries. It will, therefore, be seen that the settlement of the prairie provinces has been of great benefit to the industry.

In addition to the lumber produced in the province, it is estimated that the mills in the United States sold 300,000,000 feet in our territory.

The competition from the United States has been strongly objected to by the manufacturers, and on several occasions steps have been taken to induce the government to impose a duty, but with no success. At the present time manufactured lumber in the rough comes into this country free of duty, but dressed lumber is subject to a duty varying from 17½ per cent. to 25 per cent.

A valuable paper on the timber industries of British Columbia in their relation particularly with accounting, was presented at the recent chartered accountants' convention at Winnipeg by Mr. W. E. Hodges, of the British Columbia Chartered Accountants' Institute. It is printed in part on another page and should be read not only by those promoting legitimate timber companies, but also by investors interested, or likely to be, in timber companies' bonds or other securities.

Mr. Hodges thinks that it is permissible to capitalize a proportion of the annual charges and outlays in connection with carrying timber limits. The principal expenses in this connection are annual rentals paid to the government, and annual charges enacted for fire protection purposes. The stronger companies in the province carry large areas of standing timber, sufficient to last them for 50 or 75 years at the present rate of manufacture, and as only a small portion of the limits carried are being logged, and the capital value of the remaining stumpage increases year by year, it would be inequitable to charge all the cost of providing for the future to the annual operations.

In support of this argument, Mr. Hodges made the following comparison between two companies. We will suppose that one owns a large area of standing timber, and the other carries practically none. The former would have a large annual charge to its profit and loss account, and the latter, having no assets in the shape of standing timber, will have no such expenditure to be charged, except perhaps indirectly, in the shape of stumpage charges included in the price of logs purchased. Presume, for the sake of argument, that the plants of both concerns are shut down. Provided the rentals were charged to profit and loss, a big debit would result to the company owning the timber, where no actual loss had been made; the other company would have no charge to make, consequently no debit. Discussion has occurred as to whether the natural growth is not sufficient to compensate the expenditure referred to above, but, in arguing this point, it must not be forgotten that in some cases the natural decay may be as much as the natural growth. Mr. Hodges thinks that the correct way to treat these annual outlays is to capitalize them by charging them to the timber limits account and at the end of each year to credit this account with a fixed rate per 1,000 feet for stumpage on the timber cut. The auditor should satisfy himself, after an examination of the cruiser's report, and any other information obtainable, that the rate fixed for stumpage should be sufficient to eliminate the timber limits account from the books when all the standing timber has been cut.

In the case of a company having a bond issue, there should be, and there is usually, a clause in the trust deed providing for the creation of a sinking fund for the redemption of the debentures. It should be provided that a specified sum per 1,000 feet on all lumber cut shall be set aside and handed to the trustee until all the debentures are redeemed. Where this is done the following entries in the books are usually made. The profit and loss account is charged and the trustee for the debenture holders is credited with the amount to be set aside. When the money is paid over to the trustee, and provided the bonds have been redeemed by him out of the proceeds, another entry should be made in the books debiting the bond issue account and crediting the timber limits with the nominal amount of bonds purchased. These remarks deal with a company having a bond issue carrying a charge on their timber limits. Whether the amount provided in the trust deed to be credited as stumpage is sufficiently large depends upon the circumstances of each particular case.

In the case of a company having no bond issue, the timber limits account should be credited with an amount sufficient to eliminate the capital account from the books when the timber is all cut, and, in arriving at this amount, allowances must be made for reasonable additions to capital in future years. It might be legitimate, and it could be argued that a certain charge for interest on the original cost of the timber limits might be capitalized; but Mr. Hodges does not advocate this.

As the annual charge to the government for carrying a square mile of coast timber is $146.40, and presuming this mile to contain 20,000 feet to the acre (which is a fair average), or a total of 12,800,000 feet, the cost of carrying this timber slightly exceeds 1 cent per 1,000 feet per annum.

While the timber industries are money makers, the value of the chartered accountant in relation to those industries is prominent. The investor must wade out of generalities into specific details before he will be safe in this class of investment. The timber man and the chartered accountant can help with those details.

BANKING PROBLEMS IN TWO COUNTRIES

That the Glass-Owen currency bill of the United States is a poor imitation of the Canadian Bank Act was the opinion expressed by Professor Joseph French Johnson to *The Monetary Times* the other week. This gentleman is dean of the New York University School of Commerce and Finance. He added that the United States have tried every financial and banking experiment except the one proposed. Professor Johnson is somewhat of an admirer of the Canadian banking system. He examined it on behalf of the national monetary commission of the United States and his opinions probably differ from many of those expressed in a democratic report on the bill being discussed in the United States house of representatives. This report states, according to a Washington dispatch, that Canada with her 27 banks and thousands of branch banks, represents a distinctly different type of banking from that which is exemplified by the national banking system with its 7,473 independent banks, none of which possesses a single branch, formed under the National Banking Act.

The report continues: "The successful introduction of the branch system would almost necessarily have meant the abandonment of the idea of free banking. While it would not necessarily have been requisite to abandon free banking in theory, in order to introduce the Canadian principle, it would have been practically true that the power of establishing branch banks, if widely exercised by large national institutions, would have entailed the contracting of the number of independent banks in the United States and a corresponding limitation of the perfect freedom of competition which exists to-day.

"Certainly it would not have been possible to introduce the principles of the Canadian system into American banking without a very extensive and vital modification of banking legislation and conditions in the United States. That the country was prepared for so profound a modification, not to say transformation of the basic ideas upon which the national banking system has been developed, the committee did not believe and it was therefore led to the abandonment of all thought of attempting a plan of banking reform based upon the conception of large privately managed institutions operating unrestrictedly and with great numbers of branches.

"This conclusion did not, of course, imply any belief that the adoption of other features of the Canadian system which seemed applicable and could be easily grafted upon our own system was undesirable. It was a conclusion relating simply to one of the general ideas underlying the structure of Canadian banking."

Professor Johnson has no great admiration for the proposed currency bill of the United States. To *The Monetary Times* he said: "The bill is akin to a man in a vehicle, representing the federal currency board holding the reins of twelve horses but each with a jockey, representing the proposed twelve local boards. All the jockeys will be pulling a different way against the chief driver or the federal board, with what result one can imagine."

While speaking of branch banks, it is interesting to note the statement of Mr. H. V. Meredith, vice-president of the Bank of Montreal, who has just returned from a trip through western Canada, that he did not think there was any complaint on the score of banking accommodation in the west, especially when one sees six or seven branch banks in a place of three thousand people. Every sensible man in the cities of the west, he thought, would be grateful to the banks for the manner in which they had handled the situation during the past few months.

BONDS OVER THE COUNTER

A number of cities and towns have tried the experiment of selling their debentures "over the counter" or to local investors. This has been done on account of the money stringency. Bond brokers, in view of market conditions, have offered low prices for debentures, and their figures in many instances have been far from acceptable to municipal authorities. In the case of some of the smaller municipalities, no bids whatever have been received for bond offerings. So, as stated, an appeal for funds has been made to the local citizens. It has been generally unsuccessful.

The suggestion was made the other day that Calgary should sell city debentures locally. Mayor Sinnott, wisely, is opposed to the scheme on the ground that it would cost too much, that it would be more trouble than the results would justify, and that the amount realized would not warrant the experiment. "It might cost," he said, "as much as 10 per cent., and I do not see how it could be done for less than 7 per cent. Then the amount obtained would not be large. Even $100,000 would not be of very much use, and it is very doubtful if that much could be secured." The mayor of Calgary does not think, and *The Monetary Times* is inclined to agree, that there are a great number of small would-be investors in the city, people with a $100 or more who would be anxious to invest that amount in some place where more interest than a bank gives would be paid.

The experiment is being tried in Vancouver. That city is selling an issue of $153,000 local improvement bonds at 90, bearing 4½ per cent. interest, payable half-yearly, maturing in June, 1923. About $40,000 worth of the issue has been sold. Even if the entire issue is sold, it will be but a small proportion of the city's requirements.

The city of Chatham last month was arranging to sell about $40,000 local improvement debentures to Chatham investors. In May and June Kingsville, Ont., sold to local parties $10,000 5 per cent. ten-year bonds for $5,985 and accrued interest and $4,906.31 of similar bonds for $4,702.71 and accrued interest, or at the rate of 95.85 for the two issues. This was a good price, but the amount sold was small. Guelph, Edmonton, and other cities have discussed similar schemes, but either were discouraged with preliminary enquiries or by the first results of the experiment.

It is natural that municipalities should endeavor to sell their debentures in this way, but it is questionable whether the credit of the towns adopting the principle is helped. The hawking of bonds in small lots is, we think, unwise. There is another important consideration—every ten thousand dollars borrowed by a city locally is ten thousand dollars (or the market equivalent) less in Canada, as compared with the advance of the money by British or other investors.

SMALL CHANGE

Western Canada has the crop smile that won't come off.

Canada will bulk large at the Panama Exhibition in 1915, leaving the Canal question to take care of itself.

* * * *

After all these investigations by British, United States and other financial experts Canada will probably be declared sane.

Mr. E. Hugo Eristock Kommerzienrat visited the Toronto exhibition—whether in two, three or four passenger coaches is not stated.

* * * *

We hear of a young man worth $100,000 who got his money by perseverance, hard work, ambition, and a legacy of $99,999 from an uncle.

* * * *

A distinguished English visitor says Canadians are in such a hurry to do big things—evidently thinking of Alderman Tommy Church, of Toronto.

* * * *

Sir Oliver Lodge says spelling seems to him to be a matter of providence. That is apparently the opinion of many people who spell Monetary Times.

* * * *

The Toronto Globe is taking a peculiar attitude on the subject of the gold reserve of Canada at a time when a free reserve of gold is so essential to the maintenance of our international credit.

* * * *

The famous young lady across the way says she saw in the paper that Sir Edward Grey's foreign policy was considered perfectly safe, but she should think a man in his position would prefer to patronize one of the good British companies, though, come to think of it, he probably took out his insurance before he got into public life.

The late Lord Goschen published in 1865 an essay on 7 per cent., designed to show that money was likely to become permanently dear. Three years later he wrote a sister essay on 4 per cent., explaining why money had become permanently cheap. The two essays side by side may be taken as a warning by those who are explaining things these days.

* * * *

According to a Welland dispatch, two adjusters made reports on the court house fire. These reports not being acceptable, one of the adjusters withdrew his report. Two other adjusters were appointed and a third one by the county judge, but their report has been refused by the insurance companies. Which only shows that adjustment requires much adjusting.

* * * *

In British Columbia there is a progressive real estate man selling chicken farms. His faith in the homely old hen and the giddy young rooster is apparently invincible. He says that a net income of $100 a month is a very conservative estimate of what one can earn on a small poultry farm. Here is the figuring: "250 hens, each hen laying on an average 150 eggs a year, will bring you an income of $1,200, even assuming the eggs are sold at several cents a dozen less than has been the average for the last few years. By the sale of chickens, roosters, worn-out hens, etc., you can earn another $1,500, making your total income $2,700." One's first thoughts are admiration for man's trust in the hen's egg-laying proclivities and sympathy for the fellow who has to eat the worn-out hen.

ANALYSIS OF LIFE INSURANCE STOCK AS AN INVESTMENT

(Written for *The Monetary Times* by a Life Insurance Expert)

The investor who believes in distributing his investments would no doubt include an investment in life insurance stock in his list of desirable investments. It is one of the safest and most remunerative of investments, and yet there would seem to be a dearth of general information on the subject of life insurance stock values. We accordingly purpose to deal with some of the more important points affecting the value of life insurance stock as an investment, and to consider the return yielded to the original, as well as the permanent investor in life insurance company's shares. We will examine more particularly three typical companies, the oldest company in Canada, one fairly representing the middle period, and one comparatively youthful.

It would be well in the first place to note the comparatively small paid-up capital stock of our Canadian life assurance companies. On referring to the table which follows, it will immediately be noted that the paid-up capital is comparatively small—exceedingly small—when compared with the total funds of the institutions. The Canada Life, with its paid-up capital of $1,000,000, is but an apparent exception, for, as will be explained later, its great business was built up on a capital of $125,000, of which a large amount was paid up from bonuses or profits derived from the company's business.

The successful record of our great life offices, therefore, is proof that a large paid-up capital is not necessary for the successful establishment of a life office. Capital is needed at the commencement of a life company's career to provide the $50,000 deposit required by the government and a sufficient amount to tide the company over its establishment expenses. It would seem, therefore, reasonably clear, that provided a new life company possesses the elements of success, a large subscribed capital is not needed and the actual capital provided soon ceases to play an important part in the company's operations. A risk, which, in practice has proved nominal, is, however, run by the shareholders who subscribe for capital at the commencement and these shareholders are undoubtedly, entitled to the position of security and profit which usually attaches to the shares of a life assurance company.

The factors that govern an investor seeking for an investment are security, interest or return on his investment, and probably future appreciation in value thereof.

A certain risk in respect of the uncalled capital is run until the company becomes established. In actual practice, however, this risk proves to be slight, for the reason that the obligations of a life company do not mature for many years, whilst the premiums are receivable in advance right from the commencement. A life assurance policy is a contract to pay a specified sum at death, and it may be a contract which will run for seventy years or more, whilst the premiums are payable annually in advance, and based as they are on scientific principles, with a margin added for safety, the company's obligations are not only entirely provided out of premiums received, but in addition, a reserve or surplus is built up and retained in hand. This surplus results from a charge made to cover contingencies upon the persons insured, over and above the actual cost of insuring their lives. Further, upon examination of the early records of a life assurance company, the mortality claims are very small in number. The reason for this is at once apparent. The early policyholders have been recently subject to a medical examination and it is unlikely, therefore, that many claims will mature in the early years. It may be taken as an axiom, therefore, that the capital advanced is safe, because the premiums are amply sufficient to provide the obligations, and claims are slight owing to an early favorable mortality. This is the position at the commencement of a company's career. Once, however, the business becomes established, the position of security is undoubted, and the security of a well-established life assurance company is rightly reckoned as being stronger than that of any other commercial institution in the world.

The business having become established, paradoxical as it may appear, the uncalled liability has in practice frequently proved an asset. For the reason we have given, it has not been found necessary to make calls on capital account. The company's position strengthens from year to year and in practice it has been found that further capital has not been needed in the company's business. Where a call has been made, in general, a bonus or dividend has been declared at the same time, and the liability has been reduced from profits. In the case of the Canada Life, an exceptional call of 87½ per cent. was made payable over a period of three years. These calls were made at a date forty years after the company was founded, during which period very substantial dividends had been declared. The business had become well established and the shareholders were glad to pay such calls and invest their money in an established and flourishing business, as by so doing, it was made possible for their invested moneys to obtain a sure and substantial rate of interest.

Interest or Dividends on Investment.

A glance at the under-mentioned table, which refers to such companies as are now paying dividends on their capital stock, shows how excellent the return is to the investor from the majority of companies. The return, however, is really very much better than appears on the surface, particularly in so far as the original investor is concerned, as in many instances a large part of the paid-up capital has been paid up out of bonuses or profits. A clear example of what has been done in this way may be instanced from what took place in the case of the Confederation Life. The following is an extract from the Royal Commission on Life Insurance, page 33:—"This Association was incorporated by Act of the Parliament of Canada in 1871, 54 Vic., cap. 54, with an authorized capital stock of $500,000 and power to increase the same up to $1,000,000. Ten per cent., or $50,000, of the authorized capital was required to be, and was, paid up. In 1881 the stock was increased to $1,000,000 and 10 per cent. upon the increased capital was called up and paid out of profits or bonus, 6 per cent. or $30,000 in 1881, and 4 per cent. or $20,000 in 1886."

Other Facts and Figures.

The Confederation Life has to-day a paid-up capital of $100,000, but as will be noticed from the report of the Royal Commission on Life Insurance, one-half of their present capital was paid entirely out of profits or bonus. The effect of this is, of course, to exactly double the return to the original investor, and the $20,000 per annum now paid to their shareholders represents a return of 40 per cent. per annum to the original investor.

A perusal of the following table compiled from the last report of the Superintendent of Insurance issued 1912 in respect of year ending December, 1911, which refers to such companies as are now paying dividends on their capital stock, will show the amount of dividends paid per cent. on the paid-up capital:—

	Paid-up Capital	Total Income	Amn't of Divid'ds paid	% of paid-up Capital	Total Assets
Canada Life	$1,000,000	$6,543,201	$80,000	8	$44,257 341
Confederation Life	100,000	2,825,489	20,000	20	16,337 908
Continental Life	200.000	300 555	11,467	6	1,292,212
Crown Life	100,055	276 329	11.173	11	990.546
Dominion Life	100,000	528,333	11,000	11	2,530.402
Excelsior Life	75,000	599 506	5,990	8	2,469,476
Federal Life	130 000	1,034,436	13,000	10	4,446.969
Great-West Life	548 500	2,764,159	76,618	14	10,453,071
Imperial Life	450,000	1,546.172	45,000	10	7,095,443
London Life	50 000	959,194	4,000	8	3,589,798
Manufacturers' Life ..	1,300,000	3,267,421	24.000	8	14.601.668
Nat. Life of Canada ..	225,000	507.837	20,250	9	1,740,702
North America	60,000	2,295,176	6,000	10	12,313,108
Northern Life	459,781	363.190	30,143	6	1,622,102
Sovereign Life	209.995	162.343	12,600	6	863,546
Sun Life	250,000	10,589,133	37,500	15	43,900,886

Excellent as these dividends are from the point of view of the present investor, the return to the investor who originally subscribed for the stock is much greater. For example, as we have seen, the return yielded to a Confederation Life shareholder is 20 per cent., but on examination of the company's past record, as furnished by the Royal Commission, the actual return to the original investor is 40 per cent. per annum, instead of 20 per cent. Moreover, when considered relatively in proportion to the total income of the companies, the dividends are really very small. The percentage is, in fact, on the whole very reasonable, bearing in mind the important part played by capital at the commencement of a life assurance company's career.

When Company is Established.

Generally, it may be said that once a company has become well established, there is no difficulty in paying a substantial return to the stockholder without it affecting the policyholders' interest to any appreciable extent. The case of each company could be cited in detail. But the same principle would seem to have generally obtained in the case of most of the well-established and successful companies.

Once a dividend has been declared, the tendency has always been for such dividend to be maintained and up to a point the rate of interest shows a sure and steady increase. The practice has generally been, however, when once a substantial return has been secured, to declare no further increase. The policy of many life insurance directors apparently having been to consider that the rate of interest is so handsome that a further increase is unnecessary. For example, as pointed out in *The Monetary Times*' Annual Review of 1913, in the case of the Confederation Life, the shareholders' proportion of surplus $38,148 has been magnanimously excluded from the shareholders' account and credited into the policyholders' surplus fund. From this it will be seen that a well-established life insurance company can, without difficulty, pay the most substantial returns to their stockholders. In fact it will be noted that without affecting the policyholders interest to any appreciable degree, the various companies can readily provide annual dividends amounting from $30,000 to $80,000 per annum.

And this is the case, not only with the older life companies, but it will be seen that the companies of fairly recent date are now paying out large amounts in dividends. The Great West Life, which started business in 1894, only 20 years ago, paid out $82,618 in dividends in the year 1911. The success of this company in the short space of twenty years is proof of the great earning power of a life company's stock. The result has been achieved by the company successfully building up a large volume of business. The first issue of stock cost the original investor $25 per share. A further issue was made in 1903 at a cost of $50 per share to the then stockholder, and $85 per share to the public (page 79 of the report of the Royal Commission on Life Insurance). In ten years the stock had begun to greatly appreciate in value.

Purchased the Rights.

This was indicated (say the Royal Commissioners) by the fact that certain shareholders, including the managing director, purchased the shareholders' rights to the new issue of stock at a premium higher than that at which it was issued. In January, 1904, the managing director bought additional shares at 187 (page 80, Royal Commission Report). The policy of the directors of this company in regard to declaration of dividends would seem to differ from that of the older companies. The Royal Commissioners themselves say:—"It is difficult to deny, however, to the capital actually adventured, the position of security and profit which its adventure has earned." (Page 168, Royal Commission Report.) The Great West Life directors evidently consider that the stockholders are entitled to the profit this adventure has earned and on reference to the last blue book issued (1912) by the Superintendent of Insurance, it will be seen that there was carried to the credit of the shareholders' account in the year 1911 interest on shareholders' funds—$39,074, and shareholders' proportion of profits $158,612, or a total of $197,686 for the year 1911. As a result the price of Great West Life stock for the past few years has averaged over $300 per share on the Winnipeg stock market. It has now 63½ per cent. paid up on capital account.

In	
1893 it cost	$25 per share.
1903 " "	$50 to $85 per share.
1904 it was bought at	$187 per share.
1911-1913 it was bought at	$275 to $320 per share.

It will readily be appreciated that the stock of this company has proved a remunerative investment to the original stockholders, and it may be noted that in addition to the profits mentioned above, there is a note in the last blue book issued 1912, that the surplus from the company's non-participating business is kept in a separate account and held to be ultimately used as may be decided by the Directors.

These facts go far to show that whether in the initial stage or at maturity of a company, life assurance stock, but in a well-managed company, goes far to meet the ideal of an investor.

MANUFACTURERS AND ONTARIO WORKMEN'S COMPENSATION

The Canadian Manufacturers' Association committee on workmen's compensation report that the greater part of their work last year consisted "in offsetting the efforts of the liability insurance companies to discredit the proposals of the association and to induce the Ontario Commissioner, Sir W. R. Meredith, to adopt an act of the English type," which would open up a much larger field for private liability insurance in the province.

The draft measure of the Commissioner embodied many provisions from the draft act of the association, says the manufacturers' report, but combined with that provisions adapted from the English act, which is based on a principle entirely different from and incompatible with that underlying the proposal of the Manufacturers' Association. Without attempting any description of this measure, it was pointed out that in the opinion of the committee it was quite unworkable. The schedule of benefits was altogether too high, being 25 per cent. higher than the minimum proposed by the association. "No government could, we are convinced, consider seriously the adoption of the Commissioner's schedule or his draft act in its present form." The Transportation and Railway Committee, in the course of an exhaustive report, referred to the proposed introduction of the parcel post system in Canada, commending the proposal, but disapproving of the intention to restrict or limit the service to certain zones, as is the case in the United States. To be effective, the service should not be limited.

WESTERN BOARDS OF TRADE FAVOR BONUSING

Important Topics Discussed at Winnipeg—Need of Good Roads

The need for legislative restrictions to the bonusing of industries in western Canada was the pith of a resolution moved by Mr. D. T. Leslie, of Swift Current, which was defeated at the meeting of the Associated Boards of Trade of Western Canada, held recently at Winnipeg. Mr. Leslie said that the practice was a serious question, and that it was jeopardizing the future of the cities and towns concerned. He told of many abuses in the way manufacturers applied for cash and site bonuses, and declared that when manufacturers who intended to employ ten men came along and asked $20,000 bonus, it was getting time to stop.

Strong Opposition Shown.

Opposition to the resolution came from Fort William, Medicine Hat and Prince Albert, whose representatives endeavoured to show that the system could be made a sound and paying investment. Mr. W. B. Wilcox showed that Medicine Hat had granted in concessions to industries during the last eighteen months 137 acres of land, which, with all other concessions, had cost $150,000. These industries, when completed, and in full running order, in accordance with the contracts signed with the city, would employ 1,850 men. Experience had shown them that in the natural gas department of Medicine Hat that in selling their natural gas for domestic purposes at 13½ cents per thousand and at 5 cents for manufacturing purposes, the city realizes a net revenue of $5 per annum for each head of population, and this increase, due to the coming of the industries spoken of, meant $50,000 per annum, or that the total cost to the city would be paid back in gas revenue alone every three years.

"Are you going to deprive us of taking advantage of our natural resources by passing a resolution to the effect that the bonusing of industries will be illegal, just because we have had the foresight to make provision for these things —and you haven't?" asked Mr. W. E. Gunn, of Prince Albert.

"The entire system of progress has been based upon the bonusing system from the Canadian Pacific Railway down," he continued, "and it would be ruinous to attempt to put a stop to it. Furthermore, there is no law that can prohibit the system because a city can sell its land for 10 cents per acre if it wants to."

Benefits of Good Roads.

A resolution which dealt with the important question of good roads was introduced by Mr. D. J. Campbell, Calgary, who stated that the Dominion and provincial governments enter into some scheme whereby a direct national highway be constructed in western Canada without delay, and that roads from this highway connect up all important commercial centres and well-settled farming districts be planned and constructed. Mr. Campbell gave many interesting statistics to show the value of good roads. He deprecated the present system of road making, and said that good roads would mean an immense saving in hauling of grain out to railways and of provisions into the farm. Basing his remarks on the crop figures of 1911 he said that the crop that year amounted to 4,378,131 tons of wheat, 927,967 oats, 215,700 flax, 151,228 barley and 1,176 rye. Adding one-sixth for root crops there was a total of 6,622,238 tons at $2 a ton, making a cost of $13,244,476 for haulage that year. It might be computed that 60 per cent. was saved by having good roads, along the lines of less depreciation, less wear on horses. In cash the saving would amount to $7,846,682 on the 1911 crop. Then they had to consider the increase in value of farm lands due to good roads and the improvement in social intercourse. The roads were feeders to the railways and the importance of good roads must be recognized along with that of the railways. The resolution was carried unanimously.

Reduction of Duties.

A resolution asking for a reduction of the import duty on automobiles to 17½ per cent. and that on motor trucks and farm tractors to 10 per cent. was introduced by Mr. F. McClure Sclanders, Saskatoon, who said that the automobile was now getting to be a general necessity and farm tractors ought to be more accessible to the farmer. Mr. D. Y. Leslie, Humboldt, strongly opposed the motion. He thought it would kill the possibility of securing more manufacturing industries in these lines. American manufacturing firms came to this country to escape the duty, and Canada wanted these industries as largely as possible.

Mr. G. C. Thomson, Swift Current, thought the matter ought not to be put before them and bring out a discussion between conflicting claims of farming and manufacturing interests. Ultimately the resolution was lost.

PROMINENT AUSTRALIAN LIFE COMPANY IN CANADA

Mutual Life and Citizens Assurance Company Has Obtained Dominion License

Another important life insurance company is writing business in Canada, the Mutual Life and Citizens' Assurance Company, Limited, having obtained a Dominion license for the transaction of business in the Dominion. The company is writing new business in the Quebec province, and will be in Ontario shortly.

Until this year, the company has been operating only in Australia, New Zealand and the United Kingdom, but it has for some time, been placing some of its investments in Canada, and the satisfactory experience in this direction may have had some influence in the decision to write new business here.

Founded in Eighty-Seven.

The company, which is known familiarly as the M.L.C., was founded in 1887, to transact the business of industrial life assurance in Australia, where this class of life business had previously been practically unknown. In 1888 it wrote its first ordinary policy, and since that time the progress of the company has been marked. The following table showing the income and the funds for quinquennial periods will give an idea of the company's development:—

Year.	Income.	Funds (including Capital).
1887	$ 74,870	$ 135,175
1892	626,635	754,020
1897	1,110,115	1,699,945
1902	1,930,560	4,811,745
1907	2,551,990	10,385,945
1912	7,145,385	41,040,765

Both branches of the company's business have reached large dimensions, but the ordinary branch is transacting more business than the industrial, the premium income of the former being $3,917,564, and of the latter $1,183,516. The new business of the ordinary branch written for 1912 exceeded $12,500,000.

Low Expense Rate.

The company has experienced a low expense rate in obtaining business, this being 12.15 per cent. of the premiums in the ordinary and 42.95 per cent. in the industrial branch. The company's mortality experience has been favorable throughout its career, this being due in part, perhaps, to the low rate of mortality prevailing in Australia. It has paid in claims to policyholders or their beneficiaries a sum exceeding $19,000,000. The total business in force comprises about 380,000 policies assuring a sum of over $150,000,000. The latest valuation report shows that the surplus for the year 1912 was $1,126,430, after special increases of $260,000 had been made in the reserves. In the ordinary branch profits are distributed annually in the shape of reversionary bonuses. The industrial branch is non-participating. Here is a table showing the cash value of five years' reversionary bonuses declared from 1908 to 1912, taking a whole life policy for $1,000, as a standard:—

Age at entry.	Year of issue of policy. 1908.	1903.	1898.	1893.	1888.
25	$25.00	$40.67	$ 56.83	$ 64.04	$ 71.83
35	31.25	51.25	71.83	80.54	89.71
45	39.50	64.46	89.70	98.83	108.00
55	49.33	79.08	108.00	116.42	123.46

By comparing these with the first period, second period, third period, fourth and fifth period, ordinary life quinquennial dividends of other companies an idea may be obtained of the profit-earning power of the Mutual Life Citizen's Company.

Companies Canadian Branch.

The company has a reputation for good management, economical administration and large bonuses. Nearly half its assets, or 45 per cent., are invested in Australian, English and Canadian securities (government, municipal, etc.), and its policy liabilities are valued on a stringent basis.

Mr. W. J. Bloomfield, B.A., LL.B., the secretary of the company is in Canada in connection with the opening of the branch. Mr. J. P. Moore, A.I.A., will be Canadian secretary, and will hold a power of attorney enabling him to issue policies in Canada, so that this company will be able to give prompt attention to its policyholders. It has a strong directorate and trustee board in Australia, among these being the chancellor of Sydney University, the Hon. Sir Normand MacLaurin, M.D., M.L.C., chairman of the board, Hon. Sir C. K. Mackellar, M.D., M.L.C., the Hon. James Ashton, M.L.C., Sir W. P. Manning, Hon Henry Gullett, M.L.C., Rev. Alexander Marshall, Hon. W. J. Trickett, M.L.C., ex-senator Simon Fraser, a native of Canada, by the way, and the managing director, John J. Garvan.

NEW WESTMINSTER AND THE PANAMA CANAL

Citizens Anticipate Greater Activity When Grain Comes that Way

Writing of the rapid growth of New Westminster, Mr. C. H. Stuart Wade says that the subject of industrial development is one that is occupying the attention of the city authorities, as well as the local board of trade, for it is considered that whilst the entire district is one which commends itself to the average man, it is necessary that the pay-roll should be enlarged as much as possible.

To-day the pay-roll is about $2,200,000, with a yearly output of seven or eight millions, which places New Westminster in rank industrially immediately after Winnipeg and Vancouver. The industrial population is between 2,500 and 3,000 out of a total of 20,000 residents. There are about eighty industries.

Has Good Natural Harbor.

Situated a dozen miles from salt water, New Westminster possesses one of the finest natural harbors on the Pacific Coast. Its wharves have from 30 to 40 feet of water, whilst three railway companies traverse the greater part of the water front, thus providing the best of facilities for transportation to any part of this continent.

Land values are not inflated unduly, and there are available hundreds of acres of land suitable for the establishment of industrial or manufacturing plants, with available power, water and shipping requirements between the city and the ocean itself.

Many River Improvements.

The Dominion Government is spending a million in river improvements which will enable the largest ocean vessels to enter or leave the harbor at any time. There is no necessity here for stone or concrete piers and wharves as elsewhere, for the teredos—that dread marine borer—cannot live in the cold fresh water of the Fraser; thus the piles, which at every other point are destroyed in two or three years, are sound after even twenty or thirty years of submersion. This is a matter of vital import to the capitalist, as well as to the man who is investing his few thousand dollars in some factory or enterprise requiring water facilities.

Completion of the Panama Canal.

The transportation of grain from the interior provinces of Alberta and Saskatchewan must inevitably come by the Pacific Coast route, and New Westminster harbor can offer advantages for its transportation that cannot be excelled elsewhere in all probability. Safe anchorage, sandy bottom, ample room for car storage, sites for elevators or warehouses, competing railway lines, and harbor accommodation for a vast number of large vessels are its special features.

The citizens, realizing this, recently voted $500,000 for an extension of existing facilities, and work will be begun within the next few weeks on plans which will admit of two or three additional railways traversing the city-owned harbor frontage. The Canadian Pacific Railway, Great Northern Railway and British Columbia Electric are long established hereon, and the new Canadian Northern transcontinental is now establishing itself in position to compete, after expending about $3,000,000 in land purchases.

◆

FIRST AND SECOND WIVES AND LIFE INSURANCE

Whether a second wife is entitled to receive the insurance moneys due on the death of her husband, when the first wife had been specifically mentioned as the beneficiary, at the time the policy was issued, was the point raised in an action in the appellate division at Osgoode Hall, Toronto, this week. The court answered the question in the affirmative, and says, "The insurance contract must be read as creating a trust on one-half the amount, in favor of the wife of the assured only, such wife being, by the force of the statutory definition, the wife living at the maturity of the contract, notwithstanding that the first wife was designated by name."

Mr. Justice Hodgins who wrote the judgment pointed out that this reading of the statute was in strict consonance with the spirit of the provincial insurance legislation.

The plaintiff in the action was Mrs. Alice Lloyd, the second wife of the late James L. Lloyd, of Walkerton, who carried a policy of life insurance for $2,000, with the Ancient Order United Workmen. The beneficiaries named in the policy were his first wife Sarah Ann Lloyd, since dead, and his daughter, Mary Eliza, now Mrs. Birtch, of Toronto. On the death of Lloyd, the daughter claimed the whole of the insurance, as her mother was dead, and had not made a will. The insurance company paid her $1,000, and paid the other $1,000 into court. At the first trial Mr. Justice Middleton gave judgment in favor of the daughter, saying he had no other option under the statutes. The appeal court reversed that decision, but ordered each party to pay their own costs.

MANCHESTER AND GLASGOW MAY BUY BONDS

Opening for Canadian Municipals—London Conditions Improving

Manchester and Glasgow are likely to become the financial Mecca of Canadian municipalities and industries seeking capital, says a cable to the Montreal Star.

Following the rather favorable reports of influential delegations just returned, the idea is to deal direct and save the London commission, using the funds now hoarded in Northern banks by wealthy industrial kings. The result of the visit of delegates is to declare that Western municipalities are not big risks, as suggested recently by London financiers and financial press, which found only two questionable cases.

It is understood that negotiations are proceeding to handle the Winnipeg waterworks issue between Manchester and Glasgow, but who are unready for such a large amount until January. By then it is also regarded that London will be ready to take care of some municipal and industrial issues, as practical confirmation has been received of the report that European countries are arranging the recent war and mobilization loans of 4,500,000,000 francs in Paris, which is less than was estimated, and which London fully expected to have to bear the brunt.

Financial telegrams from the Continent are optimistic of the particularly good feeling between Austria and Russia, so with war chances and even crisis abroad eliminated, the British money market will be soon ready to again assist in legitimate Canadian financial affairs.

◆

NOTABLE WRITER OF LIFE INSURANCE

There are many notable writers of life insurance in Canada, but Mr. A. E. Donovan, M.P.P., has the reputation for being probably the largest personal producer of life insurance in the Dominion. His success is due largely to his executive ability and attractive personality. The business here of the Mutual Life Insurance Company of New York, of which he is the Ontario manager, has more than doubled under his supervision. The present has been one of the most satisfactory years the company ever had in this country. Mr. Donovan has one of the best agency organizations in Ontario, consisting of 168 men. The Mutual Life's Ontario business this year will probably show an increase of thirty per cent. over last year's.

A. E. Donovan, M.P.P.

Mr. Donovan, who represents Brockville in the Ontario legislature, is a noted after dinner speaker. He was approached recently with a view to considering the acceptance of the city treasurership of Toronto. Mr. Donovan is a recognized authority on finance and was spoken of favorably in connection with the provincial treasurership of Ontario, which was recently vacant.

◆

Mr. James B. Griffith, secretary-treasurer of the Edmonton Portland Cement Company, of which Lieutenant-Governor Bulyea, of Alberta, is chairman of the directorate, states that the company's 1,500 barrel plant at Marlboro, Alta., is now in operation.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Guelph and Puslinch Townships, Ont.—September 11—Bush fires.

Winnipeg, Man.—September 12—Iroquois Hotel. Loss and cause unknown.

Halkirk, Alta.—September 6—Mr. G. Dorielson's barn. Loss and cause unknown.

Woodstock, Ont.—September 7—Mr. J. Buchanan's residence. Loss and cause unknown.

Deux Rivieres, Ont.—September 9—Twelve buildings burned. Loss and cause unknown.

Cranbrook, B.C.—September 5—Mr. Ross Carr's store. Loss, $300. Cause, defective wiring.

McKay's Corner, Nr. Sydney, N.S.—September 10—Four dwellings. Loss and cause unknown.

Stouffville, Ont.—September 17—Mr. Ballinger's residence. Loss, $300. Cause unknown.

Yorkton, Sask.—September 10—Mr. J. T. Spice's premises. Loss, $1,000. Cause unknown.

Aylmer, Ont.—September 12—Capt. Light's brickyard. Loss, $800. Cause, supposed spark.

Lunenburg, N.S.—September 8—Mr. R. C. S. Kaubach's barn. Loss, $1,500. Cause, lightning.

Cobourg, Ont.—September 12—Mr. D. McMillar's barns. Loss unknown. Cause, supposed spark.

Essex, Ont.—September 9—Messrs. Johnson and Roger's planing mill . Loss and cause unknown.

Ottawa, Ont.—September 8—Mr. H. H. Sugarman's bottling works. Loss, $200. Cause unknown.

Zelandia, Sask.—September 6—Goose Lake Grain Company's elevator. Loss and cause unknown.

Perth, Ont.—September 11—House of Industry. Loss, $3,000. Insurance, $1,000. Cause unknown.

Brantford, Ont.—Sptember 15—Ball ground, grand stand. Loss, $150. Cause, dropped matches.

Three Brooks, N.B.—September 14—Mr. J. D. Laughlin's saw mill. Loss, $9,000. Cause unknown.

Fort William, Ont.—September 11—Canadian Iron Corporation's plant. Loss, $500. Cause unknown.

Folden's Corners, Ont.—September 2—Mr. J. A. Alma's residence. Loss, $150. Cause, supposed sparks.

Welland, Ont.—September 9—Mr. L. Thompson's barns. Loss, $400. Portially insured. Cause unknown.

Hull, Ont.—September 8—Mr. E. Cadieux's residence. Loss, $300. Cause, children playing with matches.

East Williams, Ont.—September 15—Mr. F. Harrison's residence near Ailsa Craig. Loss and cause unknown.

Campbellton, N.B.—September 9—McLennan Foundry and Machine Works, Limited. Loss and cause unknown.

Digby, N.S.—September 9—Mr. G. W. Eldridges' barn, Sandy Cove, Digby Neck. Loss unknown. Cause, lightning.

Prince Albert, Sask.—September 10—Mr. J. Crookall's residence, Nineteenth Street. Loss, $5,000. Cause unknown.

Port Arthur, Ont.—September 6—Two residences on Winnipeg Avenue. Loss unknown. Cause, over-heated stovepipe.

Comber, Ont.—September 14—Messrs. J. S. Ainslie and Company's store and hoop sheds, etc. Loss, $10,000. Cause, supposed spark.

Leamington, Ont.—September 14—H. J. Heinz Company's factory, engine room damaged. Loss and cause unknown.

Shelburne, N.S.—September 12—County Institution for the Poor. Loss, $7,000. Insurance, $4,500. Cause, defective flue.

Sault Ste. Marie, Ont.—September 11—Sims Lumber Company's lumber mill. Loss, $15,000. Cause, supposed dropped match.

Listowel, Ont.—September 11—Mr. E. Wakeford's residence, Palace and Elm Streets. Loss, $1,200. Insurance, $400. Cause unknown.

Liverpool, N.S.—September 12—McClearn's building, occupied by Cleveland Motor Company and R. Harnish. Loss, $8,000. Cause unknown

Vancouver, B.C.—September 5—Scott, Goldie Quarry Company's launch "Quarry Queen." Loss unknown. Cause, supposed gasoline ignited.

Sudbury, Ont.—September 12—Mr. C. E. Lauzon's stable, Elm Street East; Mr. W. Tanner's residence, Beech Lane. Loss and cause unknown.

Quebec, Que.—September 10—Mr. Cyr Parent's residence, 4th Avenue and La Canardiere Limorlou. Loss, $5,000. Insurance, $2,500. Cause unknown.

Lousanna, Alta.—September 7—Messrs. Slock Brothers' store. Loss, total. Insurance, Yorkshire, $1,850. Cause unknown. E. A. Lilly, Adjustment Agency, Calgary.

Regina, Sask.—September 6—Peart Block, corner South Railway and Rose Street. Loss and cause unknown.

September 15—Savoy Cafe. Loss, $600. Cause unknown.

Moncton, N.B.—September 13—Messrs. J. and C. Harris' warehouse, occupied by Messrs. Baird and Peters and B. Toombs and Son. Loss, $7,000. Insured. Cause unknown.

Thornton's Corners, Ont.—September 15—Mr. W. Jones' premises, Mr. A. Farewell's barn and Mr. H. Kingland's barns. Two miles east of Whitby. Loss, $5,000. Cause unknown.

New Westminster, B.C.—September 1—Mr. W. J. Smith's residence, 533 14th Street. Loss, slight. Cause, chimney.

September 6—Mr. Isaacion's automobile. Loss, $300. Cause, car upset.

Durham, Ont.—September 17—Messrs. Black's hardware store, containing stock valued at $15,000. Messrs. McFarlane and Company, lost two buildings, as well as a large stock, estimated at $10,000. Cause unknown.

Melville, Sask.—September 2—Mr. Thresher's residence, 2nd Avenue. Fire in flat. Loss, $25. Cause, coal oil stove.

September 5—Rooms over P.O., occupied by M. A. H. Zirgler. Loss, slight. Cause, coal oil stove, two persons badly burnt.

Edmonton, Alta.—September 9—Edmonton Country Club. Loss, $12,000. Insurance, building, Law Union and Rock, $4,000; Union Assurance, $6,000; contents, $2,000. Cause unknown. Adjusted by E. A. Lilly, Adjustment Agency, Calgary.

Bobcaygeon, Ont.—September 15—Masonic hall; J. Broad, restaurant; Bank of British North America; E. J. Wollard, druggist; J. Bardeau, barber; Russell Thurston, harness shop and two empty stores owned by J. Capstick. Loss, total, $20,000, partially insured. Cause unknown.

Belleville, Ont.—September 4—Victoria Hall stables. Loss unknown. Cause, supposed incendiary.

September 8—Mr. J. B. Flint's residence. Loss and cause unknown.

September 15—Rubbish near McIntosh Brothers' store. Loss, slight. Cause, cigar stub.

Trenton, Ont.—September 14—Dr. Jacques' residence. Loss and cause unknown; residence on Martin Terrace. Loss and cause unknown.

September 15—Skating Rink. Loss, $7,000; Mr. Pringle's residence. Loss, $1,300; Canadian Northern Railway station damaged. Loss and cause unknown.

Saskatoon, Sask.—September 1—Mr. B. King's store, 130 20th Street East. Loss, $50. Cause unknown. Owned by Mr. B. S. Reid.

September 5—Saskatoon Fire Repair Company's store. Loss, building, $100; contents, $790. Insurance, $3,600 on contents in St. Paul, Northwest National and North Empire companies. Building owned by Judge McCoy. Cause, dropped cigar.

Montreal, Que.—September 5—Mr. Oveland's residence. Loss, $100. Cause, lamp explosion.

September 9—House on First Avenue, Verdun, belonging to Mr. Gerard Masse, 451 Lasalle Road. Loss, $2,000. Cause, supposed dropped match.

September 11—Two Canadian Pacific Railway cars, of hay, at Atwater Avenue. Loss, $1,000. Cause unknown; Store used by Ekers Brewery, Sherbrooke and St. Dominique Streets. Loss, $4,000. Cause unknown; Mr. J. W. Adair's store, 1499 West Notre Dame Street. Loss and cause unknown; 135A Manufacturers Street. Loss unknown. Cause, oil lamp explosion; shed rear of Castle Blend Tea Company's store, 547 St. Catherine Street. Loss and cause unknown.

September 13—Cosmópolitan Cafe, 526 St. Catherine Street. Loss, $5,000. Cause unknown.

Toronto, Ont.—September 9—Toronto Comb and Novelty Company's premises, 167 Portland Street. Loss, $700. Cause, comb fell on stove.

September 13—Toronto Ferry Company's offices, foot Bay Street. Loss, $2,000. Cause, supposed defective wiring; 90 Berkeley Street. Loss, $200. Cause unknown; automobile rear 195 Yonge Street. Loss, $50. Cause, gasoline; 7 McCaul Street. Loss, $500. Cause unknown; 2 Bond Street. Loss, $600. Cause unknown.

September 14—7 John Street. Loss, $1,000. Cause unknown; 58 Walton Street. Loss unknown. Cause, sparks; 139 Queen Street East. Loss, $10. Cause, dropped match; 81 Admiral Road. Loss, $25. Cause, sparks.

September 16—Berg Brick Machinery Company, corner of Niagara and Bathurst Streets. Loss, $8,000. Cause, sparks.

September 17—Northern Forwarding Company's garage, Duchess Street. Loss, $4,000. Cause unknown.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Belleville, Ont.—September 1—J. Owen's livery stable. Loss, $2,500; Mr. D. Phillip's store, owned by J. Mackie. Loss unknown; R. Adam's temperance hotel. Loss, $5,000; Queen's Hotel stables. Cause, supposed incendiary.

Saskatoon, Sask.—September 1—Eastern Manufacturer's warehouse, Wall and 24th Streets. Loss, stock, $30,000; buildings, $1,175. Insurance, stock, $12.800; building, $3,000 with Providence, Washington, Sovereign, Fire, Yorkshire, and St. Paul, American companies. Cause, mice eating matches.

The following fires were adjusted by the E. A. Lilly Adjustment Agency, Calgary:—

Eunice, Alta.—August 16—S. S. Smith, pool room and barber shop. Loss, $1,350. Insurance, Dominion Fire, $1,000.

Strathcona, Alta.—August 29th—Royal Hotel. Loss on building, $2,500; loss on contents, $475. Insurance, Firemen's Fund, $1,500; Hartford, $3,000; Fidelity Phœnix, $3,000; Aetna, $3,000; North America, $3,000; Northern, $1,500; Home, $1,500.

Innisfail, Alta.—September 3—David Arnell, livery barn totally destroyed. Insurance, General, $1,500; Crown Lumber Company, Innisfail, Alta. Yards destroyed. Loss not yet adjusted. Fully insured. Companies interested:—Pacific Insurance Company of New York; Underwriters at London Lloyds; Excess Insurance Company, of London, England.

Edmonton, Alta.—August 23—Adam's storage warehouse. Struck by lightning and resulting in the following losses:—Building owned by W. H. Gardiner. Loss, $1,000. Insured in Liverpool Manitoba, $1,500; Edmonton Journal, newspaper stock and printing press. Loss, $2,000. Insurance, Home Insurance Company, $2,000; C. W. Hagen, household furniture. Loss, $800. North British and Mercantile, $200; W. H. Adams, household furniture, etc. Loss, $750. Insurance, Employers' Liability, $1,300; Paragon Office Supply Company, Edmonton. Loss, $218. Anglo-American, $500; A. H. Esch Company, Limited. Loss, $330. Insurance, American, $1,000; Crumb Sign Works. Loss, $642. California, $400; Duquesne, $800.

◆

MINERAL PRODUCTION OF QUEBEC

The total mineral production of Quebec province for 1912 was valued at $11,187,110, an increase of $2,507,432, or 28.9 per cent. over the previous year. In 1910 metallic minerals represented only 2.16 per cent. of the total production; in 1911 the proportion increased to 3.17 per cent. and in 1912 to 6.09 per cent. In Ontario, the metallics make up 74 per cent. of the total mineral productions. The most important minerals in Quebec are asbestos, valued at $3,059,084; cement, valued at $3,098,354; limestone, at $1,363,355, and bricks, at $1,284,232. The following table shows the value of mineral production in 1911 and 1912:—

Mineral.	Value 1912.	Value 1911.
Asbestos, tons	$3,059,084	$3,026,306
Asbestic, tons	23,358	19,802
Copper and sulphur ore, tons	631,963	240,079
Gold, ounces	19,924	11,800
Silver, ounces	14,591	11,500
Bog iron ore, tons	......	4,041
Ochre, tons	32,010	28,174
Chromite, tons	......	2,469
Mica, pounds	99,463	76,428
Phosphate, tons	1,640	5,832
Graphite, pounds	50,680	33,613
Mineral water, gallons	39,854	65,648
Titaniferous ores, tons	4,024	5,684
Slate, squares	8,939	8,248
Cement, barrels	3,098,350	1,931,183
Magnesite, tons	9,645	6,416
Marble	252,041	143,457
Flagstone	600	500
Granite	658,749	308,545
Lime, bushels	455,570	284,433
Limestone	1,363,555	1,128,402
Brick, M.	1,284,232	1,129,480
Tiles, drain and sewer pipe, pottery, etc.	203,100	142,223
Quartz	......	1.125
Kaolin	520	......
Feldspar	2,200	600
Peat	2.000	700
Sand	170,600	62,000
Glass sand	......	1,179
Phonolith, tons	418	......
Totals	$11.187.110	$8.679.786

PERSONAL NOTES

Messrs. Chaplin and Young, accountants, Winnipeg, have transferred their offices from 25 Empress Building to 545 Somerset Building.

Mr. R. Loney, of Messrs. Loney and Company, of Moose Jaw, has been elected president of the Associated Boards of Trade of Western Canada.

Mr. Albert J. Ralston is spending a few weeks in the Western Provinces in connection with the business of the National Life Assurance Company.

Mr. James Playfair has been elected a director of the National Landed and Investment Company to succeed his father, Mr. John S. Playfair, who died last June.

Mr. James Reid Wilson has been appointed to the directorate of the Montreal Trust Company, to fill the vacancy caused by the death of the late Mr. F. W. Thompson.

Mr. C. H. Emerson, industrial commissioner at Brantford, has resigned his position. He is now on a tour through New York and other states securing industries for Brantford.

Mr. J. Stuart, one of the founders of the Bank of Hamilton, and a director of the Canada Life Assurance, Canada Landed and National Investment Companies, died at his residence, Toronto, on Monday.

Mr. J. A. Mackenzie, of the London and Lancashire Assurance Company, Limited, has been appointed agency manager and Mr. G. W. Clark has been appointed as the company's branch manager for northern Saskatchewan.

Mr. J. Knight, secretary of the Canadian Bankers' Association, will continue his association with the Montreal Clearing House and the Bankers' Journal, but has made a suggestion to the association that the secretaryship be filled by an official who will be able to devote a considerable time to travelling.

Mr. Henry E. Rawlings, managing director of the Guarantee Company of North America, left Montreal on Monday for six weeks, to attend the meetings of the company's local boards at New York and Chicago, and to make a tour of inspection of its many branches and appoint additional agencies and correspondents throughout the Canadian west and border states.

Mr. Charles B. Gordon, elected president of the Canadian Manufacturers' Association this week, was born in Montreal in 1868. He is a son of the late John Gordon, merchant. In 1904 he inaugurated the Dominion Textile Company. Mr. Gordon is president of that company, president of the Hillcrest Collieries; vice-president of Penmans', Limited; vice-president of C. Meredith and Company, Limited; a director in the Bank of Montreal; director in the Royal Trust Company; director in the Dominion Bridge Company; director in the Montreal Cotton Company; director Ritz-Carlton Hotel, and numerous other corporations in the Dominion of Canada, and is a governor of McGill University.

◆

The contract for the construction of the workshops at St. Malo, has been signed, the cost of same being $1,500,000.

A branch of the Canadian Bank of Commerce has been opened at Shaunovan, Sask., under the management of Mr. W. A. T. Hunter temporarily.

That sprightly little journal of the Sterling Bank staff, "The Teller," has reached Volume 2, Number one, and is eagerly awaited each month by Canada's bank managers-to-be, who should appreciate Mr. Patterson's admirable articles on practical banking topics, as well as the other contents. All interested should forward twenty-five cents for twelve issues to Mr. R. D. Little, care of Sterling Bank, Toronto.

Sir Boverton Redwood, the British Admiralty's adviser on petroleum matters, denies the announcement emanating from Montreal that a member of his staff is investigating the shale fields of Newfoundland and Nova Scotia. Regarding the truth of the statement that Newfoundland alone contains three billion tons of oil shale, or sufficient to supply England and Canada for 500 years, Sir Boverton said it was altogether too premature to say anything on the matter.

The Nipissing Mines Company has decided hereafter to ship its silver bullion from Cobalt, Ont., to New York, instead of from Cobalt to London direct, as heretofore. This decision is the result of the recent advance in express charges on silver bullion from Cobalt to the British capital of $2.50 per 100 pounds, making the flat rate between the two points $7 per 100 pounds. The company has made several trial shipments of bullion to New York upon such favorable terms that it has been decided to ship all of its bullion to New York.

AUDITORS AND BANKERS

Canada's Banking System—What Well Organized Managements Require

"The amendment of the Bank Act in this particular matter, as you are doubtless aware, has not been viewed with altogether unqualified approval by bankers, for the reason that they fear it may operate to give the public a misleading sense of security," was the suggestion of Mr. Vere C. Brown, superintendent of western branches of the Bank of Commerce, when speaking on the subject of auditors for the chartered banks.

"I have the best of reasons for believing that if bankers felt that all bank audits would be made on uniform, thorough and broadly intelligent lines, most of them would welcome the measure heartily. But what will the condition be if some audits are made with a high degree of intelligence as regards matters of vital importance, while others are made with a microscopic attention to small detail, but perfunctorily as to real essentials?

"Those auditors who are engaged to audit the most highly organized and efficiently managed of our banks, will have no serious difficulty in satisfying themselves of the quality of the assets and the thorough soundness of the business; while in the case of any institution quite lacking in organization and system, the auditors would find themselves with little, if any basis, on which to form an intelligent opinion as to the value of the loans and discounts, which comprise the largest portion of the assets of a bank.

"As to our best-managed banks, I venture to express the opinion that their auditors will find an organization so highly developed and efficiently controlled as to cause them some astonishment, the fact being that we have one of the most highly developed commercial banking systems in the world."

Banks System of Inspection.

After describing the regulations which are usually found in a well-organized bank, relating to the establishment of lines of credit for their borrowing customers, framed with a view to maintain an effective control over the loans and discounts, Mr. Brown stated:—"There is, however, in each large Canadian bank a separate organization performing essentially the office of a critic—the department of inspection and audit. The auditing branch of the department involves confirmation of the existence of the cash, securities and tangible assets of each branch, balancing the books and generally verifying the correctness of the accounts and the balance sheet. The investigation of the quality of the loans, discounts and investments is made by the chief inspector and his staff of inspectors and assistant inspectors. In connection with this investigation the branches are required to prepare a full return of all their customer's liablities to the bank as at a given date, embracing a copy of the customer's balance sheet and profit and loss statement, and full reports on the realizable value of securities held, the means and standing of indirect obligants, etc. Taking this as his basis the inspectors are charged with the duty of probing each account on the books of the branches and satisfying themselves that the manager's grasp of each customer's affairs is as complete as it should be, and that the latter's statement of facts respecting each account has been based on a thorough and painstaking investigation. If it should subsequently appear that there had been an unrevealed rotton spot in some important account at a branch, the question would naturally arise as to how the inspector failed to discover it. The outcome of this situation is that the inspector's report upon the assets of a branch would tend to err, if anything, on the severe side. Each inspection return contains the inspector's classification of the business of the branch under several headings, each account being rated under a class indicating its degree of desirability or undesirability, and all accounts in which the inspector sees a possibility of loss are shown separately. For these reasons where a bank's system of inspection is thoroughly organized, in the annual inspection returns of the various branches will be found a trustworthy analysis of the assets by a trained banking official whose reports would in the nature of things reflect an independent opinion.

Bad and Doubtful Debts.

"Supplementing the complete analysis afforded by the inspection liability returns is the annual bad and doubtful debts statement from each branch called for by the general manager. In order that it may not be left wholly to the branch manager to say which of his accounts should be classed as 'doubtful' or 'bad,' he is called upon to show in this statement not only all debts in connection with which he admits the possibility of at least a marginal loss, but also all accounts of a dragging nature, with full reports on the means and standing of the debtors and on the realizable value of the securities held. On the basis of the information afforded in this statement as well as the information obtainable from the inspection return of the branch, the general management make an appropriation for each item in connection with which a loss might reasonably be feared, and it is needless to say that this appropriation is usually an outside amount.

"These are the conditions and these the records which will be met by those chartered accountants who are fortunate enough to be selected to audit the affairs of our many well-managed banking institutions.

"But there may possibly be some exceptions, and in order to make audits really effective, it would be desirable that the knowledge and experience gained by the auditors of the best-administered banks should be available to the auditors of other institutions. How this could be brought about is a question on which it would be premature to offer any opinion. It is only to be hoped that in due course some plan will be evolved under which the amendment to the Bank Act in this connection will be made to effectively fulfil the purpose intended.

"As far as the object aimed at is concerned, I should like to make it clear that the movement has the best wishes of bankers generally."

VALUE OF LIFE INSURANCE

XXX.

Life Policies and Creditors

BY C. A. HASTINGS

There are many special advantages attached by law to life policies, and they are very valuable. The almost invariable rule is that a man takes out a life policy for the protection of his wife and family, but it is quite evident that this policy fails as such if it can be seized by one's creditors. The man in business has only got himself to blame if he forces his wife and family to share his risks in business.

The law recognizes that life insurance is beneficial to the state and to the community at large, and it is provided that a policy effected in favor of the wife is for her separate use, though the husband pays the premiums.

Thus the policy becomes the absolute property of the wife and cannot be dealt with even by the husband. Of course, if the beneficiary is the husband's estate, the policy belongs to the husband, and it is not creditor-proof in consequence. Yet again, the beneficiary may be the children, for their sole use, or in favor of the wife if she survives her husband.

Create Separate Estates.

Most men possess the ordinary sentiments of duty and affection for his family, so perhaps it is unnecessary to go into all the details; but these men do experience much more anxiety on their account than on their own, and the only thing for them to do is to create separate estates for their families by life insurance.

It is true that there are many houses of business that are so firmly established that nothing could shake them, but the unexpected always does take place sometime or other, and it is a fact that the hard-working and honest man has been ruined before now by the dishonest practices of a partner or of an employee. Yet again, a man in prolonged bad health may be shelved by the intrigues and falsehoods of an underling.

Only One Excuse.

In spite of all this, many men do not take advantage of the law on the grounds of bankruptcy, but surely that objection could and would be quashed by the wife who has the power to cash the policy and thus enable her to give her husband a fresh start.

Any objection of this nature is too absurd—it is merely the fact that man delights in arguing, and is really absolutely at a loss for a bona-fide excuse, and when it comes down to arguing as to why a man should not increase his protection there is only one real excuse, and that is—that he is an impaired life.

The Bank of Toronto has opened a branch at Richdale, Alta.

"In a country as rich in its agricultural resources as Canada, the canning industry must inevitably assume important proportions," is the opening prophecy of a booklet issued by Messrs. J. Stark and Company, Toronto, bearing the caption "Industry Building" and dealing with the operations, markets and finances of Dominion Canners, Limited.

MILLIONS LOANED IN SASKATCHEWAN

Trust and Loan Companies of Many Lands Invest Their Money There

Sixty-eight loan companies last year invested over $47,000,000 in Saskatchewan. This money came chiefly from Great Britain, the United States, eastern Canada, Holland and France. The following table indicates the loan companies which helped to finance the progressive province:—

Company.	Amount.
Anglo-Canadian Mortgage Investment	$ 36,945.00
Bordering State Bank	51,200.00
British Canadian Securities	33,258.00
British Columbia Permanent Loan	509,934.62
Colonial Investment and Loan	829,645.70
Canadian Mortgage Corporation	2,615,235.46
Canadian Landed and National Investment	709,935.95
Canada Permanent Mortgage	5,004,802.00
Colonial Investment of Winnipeg	53,949.33
Canadian Mortgage Investment	340,187.11
Consolidated Investors	56,000.00
Canadian Loan and Security	2,950.00
Credit Foncier Franco-Canadien	2,867,101.99
Canadian Home Investment	29,000.00
City and Provincial Loan	43,446.52
Canadian Northwestern Investment	84,011.25
Canadian Bond and Mortgage	15,687.50
Dominion Permanent Loan	17,851.58
North of Scotland Canadian Mortgage	4,523,940.00
Eastern Investment	14,000.00
Empire Loan	368,282.95
Edinburgh Canadian Mortgage	241,130.95
Great West Permanent Loan	476,800.00
Guelph and Ontario Investment and Savings	1,447,847.47
Home Investment and Savings	1,043,000.00
Huron and Erie Loan and Savings	2,184,436.78

Dutch loans companies have been a prominent factor in western Canada during recent years. There are now nine of them operating in the prairie provinces. Twelve individual companies loaned more than $1,000,000 each in Saskatchewan in 1913.

The trust companies are also heavy lenders in that province. Last year, they invested over $14,000,000 there, as the following table shows:—

Company.	Amount.
Anglo-American Trust	$ 161,972.96
Alliance Trust	289,070.34
Canadian and American Mortgage and Trust	243,929.50
Commercial Trust	48,000.00
Dominion Trust Company, Limited	29,950.00
Executors and Administrators Trust	53,000.00
Fidelity Trust	94,090.00
Imperial Canadian Trust	75,000.00
Mercantile Trust	85,481.40
Montreal Trust	18,601.40
National Trust	2,601,139.44
Northern Trusts	566,027.56
Osler and Hammond Trust	137,657.99
Occidental Trust	2,600.00
Prudential Trust	4,000.00
Royal Trust	3,663,445.65
Saskatchewan Investment and Trust	303,900.00
Scottish Canadian Trust	80,821.71

Saskatchewan General Trusts	108,655.19
Canada Trust	584,722.84
Total	$14,324,770.65

The prospects are for still heavier investments during the present year.

◆

TORONTO MAY CHANGE TAX COLLECTION SYSTEM

Reforms in the method of tax collection in Toronto are suggested by the city auditor in a recent report. His recommendations are as follows:—That one collector be appointed for the city, who will be solely responsible for the entire collection of taxes and will have complete supervision of the work; that he be an official attached to the treasurer's department, his permanent assistants to be his own appointees, subject to approval by the board of control, and under his sole jurisdiction.

That the city council fix by by-law the date for the return of the tax-rolls, such rate not to permit of more than two rolls being in the collectors' hands at any one time, and that this date remain invariable from year to year.

That the taxes be payable yearly in two instalments, and that no discounts be allowed on tax bills; that the dates for the payment of instalments be fixed and permanent from year to year.

That any differences which may arise between the city treasurer and the collector be referable to the board of control.

◆

WIVES AND LIFE INSURANCE

Wives are often to blame that their husbands' houses are in disorder so far as life insurance is concerned. The price of a hat for the wife of a man in moderate circumstances may equal the quarterly premium of three or four thousand dollars' worth of old line life insurance, while it would pay the annual premium on that amount of the fraternal kind.

Considerations of delicacy often hold back a wife from bringing up the subject of life insurance to her husband. She does not like to think that he may die; and she does not like him to think that she is planning to derive a money benefit from his death. In sober fact, such squeamishness is nonsensical. Life insurance is not a benefit but a compensation, always inadequate no matter how large, assuming that a husband is worth anything at all. A wife should never stand in the way of that life insurance which is her only protection from privation and poverty. On the contrary, she should demand it. She should insist that it be regarded not as an extravagance, nor as an investment, but as a necessity. It must come before luxuries, such as supermillinered bonnets for the wife and cigars or beer for the husband. It should come before a savings bank account. In fact, it should arrive with the wedding presents. A husband who cannot afford to put a policy of insurance upon his life in the hands of his bride is too poor to buy a marriage license or to pay a wedding fee.—P. C. Macfarlane, in Collier's Weekly.

All the issues we would float in London, even in a normal year, would not be a drop in the bucket to the English investor.—George W. Perkins, at Boston.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Glass Company.—Directors of the Dominion Glass Company have declared the first quarterly dividend of 1¾ per cent. on the preferred stock. It will be paid on October 1st to shareholders of record September 15th. The company has been in operation for three months now, under the reorganization effected early in the summer and the results, so far shown, are stated to be very satisfactory. The first quarterly dividend declared under the new regime will be paid on $2,600,000 of preferred stock.

La Rose Consolidated Mines Company.—The board of directors of La Rose Consolidated have declared the usual quarterly dividend of 2½ per cent., payable October 20.

The August statement shows:—

Production of silver, 226,267 ounces; value, $133,497, plus sundry income, $3,790, $137,287. Less, marketing, concentration and operating expenses, $57,142; net profit for August, 1913, $80,145.

The cash surplus as of August 31, amounts to $1,780,124, made up as follows:—Cash surplus, $1,500,148; outstanding shipments and ore on hand ready for shipment, $306,055, $1,808,203; less current liabilities, $26,079; total, $1,780,124.

Phœnix Bridge and Iron Works, Limited.—The quarterly report for the period ended July 31st, shows sales amounting to $194,479, an increase of $14,009 over the corresponding period of 1912. The increase in sales for the month of July amounts to $11,446.

During the month the amount of contracts taken amounted to $54,650, making the approximate total on hand, $370,000. At the directors' meeting it was stated that the company had started working overtime three nights a week, and had sufficient work ahead for the next six months; 275 men were being employed, as against 222 last year. The new shops were practically now completed, and all the new machinery had been shipped and should arrive within the next ten days.

Mexico Tramways Company.—The statement of earnings and expenses from traffic only of the Mexico Tramways Company, as advised by cable, for the month of August, 1913, in Mexican currency, is as follows:—

	1913.	Increase over 1912.
Total gross earnings	$ 635,445	+ $ 56,787
Operating expenses	284,309	+ 17,962
Net earnings	$ 351,136	+ $ 38,825
Aggregate gross earnings from January 1st	$4,511,587	+ $ 90,889
Aggregate operating expenses from January 1st	2,097,554	— 10,211
Aggregate net earnings from January 1st	$2,414,033	+ $101,100

The Mexican Light and Power Company, Limited.—The statement of combined earnings and expenses of the electric light and power services owned or controlled by the company, as advised by cable, for the month of August, 1913, in Mexican currency, is as follows:—

	1913.	Increase over 1912
Gross earnings:		
The Mexican Light and Power Company, Limited	$ 696,078	$ 76,800
Pachuca Light and Power Company	139,690	22,906
Total	$ 835,768	$ 99,706
Net earnings:		
The Mexican Light and Power Company, Limited	$ 542,723	$ 69,104
Pachuca Light and Power Company	70,720	3,228
Total	$ 613,443	$ 72,332
Aggregate gross earnings from January 1st:		
The Mexican Light and Power Company, Limited	$5,158,780	$280,750
Pachuca Light and Power Company	1,052,430	142,669
Total	$6,211,210	$423,419
Aggregate net earnings from January 1st:		
The Mexican Light and Power Company, Limited	$3,065,646	$352,374
Pachuca Light and Power Company	586,469	55,877
Total	$4,552,115	$408,251

RURAL BANKING SYSTEM

Designed to Meet Financial Requirements of Farmers —Land Recognized as Most Available Asset

The first legislative results of the recent European investigations of rural credits by the American Commission (on which four Canadian provinces were represented) have been seen in the United States senate. Senator Fletcher, of Florida, chairman of the commission and president of the Southern Commercial Congress, has introduced a comprehensive bill in the senate for the establishment, operation, management, and control of a national rural banking system.

The Fletcher bill formulates a plan for a complete system of rural banks to be organized under Federal charter especially designed to meet the financial requirements of the farmer. It recognizes the need, first, of a credit arrangement whereby the farmer can acquire lands and a home, and sufficient capital for the permanent improvement of his farm. The national rural banking system proposed in the Fletcher bill is to be operated independently of the national banking system. It is to be supervised by a board composed of the secretaries of the treasury, labor, and agriculture.

The need of special facilities to enable the farmer to secure temporary banking accommodation annually is recognized also, and amply provided for in the measure. A provision to encourage the farmers to apply business methods to their industry, thereby enabling them to render comprehensive statements to the banks, is contained in the bill.

Three Classes of Institutions

As a means of supplying the means which the bill recognizes as important to the farmers, provision is made for establishment of three separate classes of institutions, as follows: Local national rural banks, with a minimum capital of $2,000, confined in their operations to a small district, and owned and operated by local farmers; State national rural banks, whose stock is to be owned and controlled by the local banks of the state, and whose net earnings shall be used to create a surplus and pay dividends to the local banks as its stockholders, and the national rural bank of the United States, located at Washington, whose stock shall be owned by the local national and state national banks.

The national rural bank of the United States shall be controlled by nine directors—five being selected by the stockholders to serve eight years, and four being selected by the president of the United States, subject to senate confirmation, to serve during good behavior. The net earnings of the national rural bank of the United States shall be used to pay a fixed dividend to the local and state national rural banks, owning its stock, and to create a surplus.

A distinguishing feature of the whole rural credits system is the power given to each and all of the banks in the system to use their credit, as well as their cash assets, to aid in meeting the demands of the farmers.

Land, Only, or Most Available Asset

The bill recognizes land as the only, or the most available asset which the farmers have, and provides a plan whereby the farmers may obtain capital by offering as security long-term mortgage bonds, repayable in small annual or amortization payments, so that the bond can be paid off out of profits derived from the improvements made to the farm with the money obtained on the loan.

The bill provides for guarantee by local national rural banks of long-term bonds, or notes, secured by liens on farm lands at not exceeding 6 per cent. of the taxable value of the land after being so guaranteed. The bond can be guaranteed, also, by the state national rural bank, having a much larger capital and surplus and then, in turn, guaranteed, also, by the national rural bank of the United States, with a capital and surplus exceeding $100,000,000.

The measure contemplates that the local national rural banks will serve to collect together the neighborhood funds in the shape of deposits, and make them available to be loaned to meet temporary or annually recurring banking requirements of the same farming community.

* * *

Twin City Rapid Transit Company.—The earnings of the Twin City Rapid Transit Company for the first week of September were $218,422, a gain over the corresponding period of last year of $10,329, or 4.96 per cent.

Minneapolis, St. Paul and Sault Ste. Marie Railroad.—The gross earnings of the Minneapolis, St. Paul and Sault Ste. Marie Railroad for the year ending June 20, 1910, were $21,410,672, according to a report submitted at the annual meeting of the stockholders of the road to-day. For the year previous the earnings were approximately $17,000,000.

All the directors of the road were re-elected and Mr. Edmund Pennington was re-elected president by the directors.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report exchange rates as follows at closing:—

INDUSTRIAL CAPTAIN SPEAKS OF OUTLOOK

Mr. R. S. Gourlay, reviewing the business situation at the Halifax convention of the Canadian Manufacturers' Association, said: "Generally speaking, business throughout the year has been good. There has been a noticeable falling-off in building permits, especially in the West, a fact which accounts for the dullness which some trades have experienced. Over-speculation in real estate, too, has been followed by a depression that has restricted spending power in many quarters. The steady continuance of railway construction work and municipal improvements, however, has more than made up for any losses due to the causes mentioned. Last year there was a fair average crop, which provided the farmers with money sufficient to absorb a normal output of manufactured goods; this year the assurances of a more bountiful harvest encourage the hope that business will improve. Other indications, too, are propitious. The war clouds have been dissipated, money is becoming somewhat easier, and once more it is beginning to find its way to Canada.

"I am not, and never was, one of those inclined to view the situation with alarm, or even anxiety. Under Providence nothing can stop the progress of the wonderful country we boast as our heritage. Extraordinary causes may for a time check its growth, but such checks will be temporary only, for, with its illimitable resources of forest, field, sea and mine, it must eventually come into its own. But we all needed the lesson of caution that the past year has administered so effectively, yet with so light a touch. We have grown so accustomed to increases of from 10 to 50 per cent. in our businesses that when we simply mark time for a year we grow impatient and delude ourselves into thinking that we have lost ground. A maxim in the old school books used to teach us that slow but sure will often win the day against speed and spasmodic action. I do not, of course, accuse the business men of Canada of spasmodic action, but many of them, I fear, fail to appreciate fully the virtues of the slow-but-sure method."

La Fonderie de Plessisville, incorporated 1882, has been authorized to continue to carry on business under the new companies act, of Quebec, and to divide its capital stock of $150,000 into shares of $25 each, instead of shares of $100 each.

LONDON APPROVES CANADA'S GOLD POLICY

Will Affect London Advantageously by Lessening Autumnal Strain Upon That Market for Special Financing

A London cable to Financial America says:—It is noteworthy that at a time when some of the London joint stock banks have adopted what is judged in some quarters to be the mistaken policy of accumulating individual gold reserves, instead of building up their balances with the Bank of England, the Canadian banks have initiated a precisely opposite policy. Much attention has been given in this centre to the news that the Canadian banks have definitely adopted the policy of the establishment of a central gold reserve, and this decision is thought to mark a new and important phase in the development of Canadian banking, particularly as it reacts upon London. One cable received in London states:—

Contribution to Central Reserve.

"It is understood that each bank will make an immediate contribution to the central reserve. It is believed that experience will demonstrate the advisability of amending the Bank Act, so as to allow the deposit of properly stamped bullion, but for the present gold coin must be presented in bags of £1,000 or $5,000, Canadian or United States gold coin. Instead of paying 5 per cent. for paper issued in excess of their paid-up capital, in order to get additional money for the crop moving period, the banks may now issue notes against the gold reserve. It is thought that the disposition of the banks will be to build up a general reserve and retain only a small quantity of metal in their own vaults.

"A large visible stock of gold always inspires confidence, since it is apparent security for the immediate redeemability of credit instruments. Gradually the Canadian system is developing the best features of European banking, while avoiding some of the disadvantages of a central banking organization. Eventually, the Canadian banks may be allowed under certain conditions to deposit with trustees not only gold but securities as well, and issue circulation against them, this being one form of rediscount such as is allowed under the proposed legislation in the United States."

Important to London Bankers.

The development thus outlined is of importance to London bankers not only because of the healthy energy in Canadian banking circles, which it illustrates, but for more immediate and material reasons. If the idea of the establishment of a large visible gold reserve in Toronto grows, it will affect London in two ways. In conjunction with the expected adoption of some similar currency expedient in the United States it will tend to yet further lessen the recurrent autumn strain, which has up to the present displayed itself in a more or less severe form in the European—and especially in the London—money market every autumn, as the movement of the United States and Canadian crops has called for special financing, but in the second place London is wondering where in the first place most of the gold, which is to constitute the reserve is going to be gathered. If it is going to be mainly collected through the medium of London, it is of course going to temporarily accentuate the international scramble for gold here.

ORANGES AND LEMONS FROM AUSTRALIA

Advices have been received by the Minister of Trade and Commerce at Ottawa showing that large trial shipments of Australian oranges and lemons have arrived in Victoria, B.C., and are reported by the inspector of fruit as excellent in color, quality and general condition as any shipments he has heretofore inspected. The fruit was not stored in a refrigerating room, but in ordinary cargo space. It arrived in excellent condition and was sold for cash as soon as offered. It would seem that Australia ought to be a source of supply, especially for western consumers of citrous fruits, which have heretofore been largely imported from the United States.

It is satisfactory also to learn that several large shipments of British Columbia potatoes and onions have gone out on the new steamer Marama to Fiji and New South Wales, and the inspector's reports with reference to the potatoes is very encouraging. One firm in British Columbia expects to ship forty tons of onions to Australasia by the next steamer, to be accompanied and followed by apples in large lots. It is to be remembered that apples and some other early fruits have exactly different seasons in British Columbia and Australasia, and there is no reason why a very large trade should not be developed in these between the two countries.

The Molsons Bank has opened a branch at Delhi, Ont.

CANADIAN LOCOMOTIVE COMPANY'S YEAR

Report Shows Profit and Loss Account Equal to Ten Per Cent. of Capital Stock

The manufacturing profits of the Canadian Locomotive Company for the year ended June 30th, 1913, amount to $377,043 as compared with $294,323 for 1912, being an increase of $82,720. The income from investment bonds was $19,842. The manufacturing profits and income from investments totals $396,886, which has been disposed as follows:—

Bond interest	$ 90,000.00
Preferred stock dividend	105,000.00
Adjustment of sundry accounts and loss on investment bonds sold	12,623.82
Transferred to reserve for depreciation	50,000.00
Transferred to reserve for special replacements	25,000.00
Balance to credit of profit and loss	114,262.20
	$396,886.02

Payment of Bond Interest.

The company held its annual meeting this week. As noted above, the 6 per cent. interest on the company's first mortgage sinking fund gold bonds was the first charge on the earnings, and this amounted to $90,000. Thus the bond interest was earned about four and one-half times over. The 7 per cent. preferred dividend was the next charge, and the net income was sufficient to pay this three times over after paying interest on bonds. The surplus, after deducting bond interest and preferred dividend, was $201,886.02, or 10 per cent. on the common stock. Of this the directors transferred $50,000 to reserve for depreciation and $25,000 to special replacement account and allowed for the adjustment of sundry accounts, after which there still remained a balance of $114,262.20. This was added to $96,148.30, already at the credit of profit and loss account, making a total now in that account of $210,410.50, equal to about 10½ per cent. on the common stock..

The reserve of $100,000, together with the $210,410.50 in profit and loss account, showed that the company had in two years of operation accumulated surplus profits of $310,410.50.

Extensions to Company's Plant.

The cost of the extensions to the company's plant has been met for the most part out of the sale of municipal debentures owned by the company as investments, the balance coming out of surplus earnings. The company, therefore, has not increased either its interest or fixed charges. The company has found difficulty in maintaining a maximum production while building operations were going on practically overhead. Greater efficiency will be obtained when the extensions are completed. During the year a block of workmen's houses was built which has to a great extent overcome the difficulty which existed of housing comfortably the company's employees.

The capacity of the plant is twelve locomotives per month, double the capacity of the plant two years ago. By the end of the present fiscal year, the capacity probably will have been raised to eighteen locomotives per month.

The directors and executive officers of the company are: Messrs. Æmilius Jarvis, Toronto, president; A. W. Wheatley, Kingston, vice-president; R. Hobson, Hamilton; James Redmond, Montreal; Warren Y. Soper, Ottawa; Frank G. Wallace, Pittsburg; and James L. Whiting, Kingston. Executive officers: A. W. Wheatley, Kingston, general manager; J. J. Harty, Kingston, secretary, and J. H. Birkett, Kingston, treasurer.

Much of the progress of the company is due to the energetic directorate, and especially to the work of the progressive general manager, Mr. A. W. Wheatley.

◆

EXPENSE RESTRICTION OF LIABILITY BUSINESS

Superintendent of Insurance William T. Emmet, of New York, has issued a letter to all companies writing liability insurance in that State, more clearly defining the points raised in connection with his directions as to the limitation of expense and the proper methods of rating.

The Superintendent's letter adheres strictly to the directions contained in the original letter, but more clearly defines the department's position on some of the questions raised. He clearly states that all expense in connection with the production of business both in this State and throughout the entire country must be limited to 20 per cent. of the premiums, and that on classes of business where the total acquisition expense is under 20 per cent. the difference cannot be used in the production of other classes which already reach a 20 per cent. cost. As regards the regulation of the underwriting and rate making methods the Superintendent does not attempt to extend the regulation outside of the New York State business.

MINERAL PRODUCTION IN ONTARIO

Nickel Ore Outside Older Field—Production of Pig Iron Increasing

Ontario continues to maintain its reputation as a mineral producer. According to returns made to the Ontario Bureau of Mines, the production of the metalliferous mines and works of the province for the first six months of 1913 was as follows:—

	Quantity.	Value.	Increase over corresponding period 1912.
Gold, ounces	106,091	$2,171,147	$1,935,949
Silver, ounces	13,890,692	7,693,713	* 242,887
Copper, tons	5,873	832,645	96,176
Nickel, tons	12,104	2,514,414	347,519
Iron ore, tons	62,627	141,324	108,264
Pig iron, tons	369,450	5,051,840	1,109,202
Cobalt ore, tons	79	7,374	* 5,726
Cobalt oxide Nickel oxide	404,060	186,347	

---

* Decrease.

Most of the gold came from Porcupine, the chief producers being the Hollinger and Dome mines, both of which have been steadily at work. Porcupine Crown and McIntyre Porcupine also contributed. The other gold camps yielded about $150,000, including Swastika and Lucky Cross at Swastika, Cordova in Hastings county, Canadian Exploration at Long Lake, Northern Gold Reefs at Sturgeon Lake, Goldfields, Limited, at Larder Lake, and Tough-Oakes at Kirkland Lake. The narrow veins in the last-named camp are proving to contain rich ore.

Treatment of Silver Ore.

The most productive mines for the half-year were the Nipissing, Coniagas, La Rose, Kerr Lake, McKinley-Darragh-Savage, Buffalo and Crown Reserve, all mines which have held a leading place for years. Cobalt Townsite, Casey-Cobalt, and Seneca Superior are coming into prominence as producers, while some properties, formerly in the first rank, are producing less. Shipments of ore were 3,216 tons, of concentrates 8,253 tons, and of bullion produced at the mines 2,792,311 ounces. The corresponding figures for the first six months of 1912 were: ore, 6,860 tons; concentrates, 4,806 tons, and bullion, 2,448,689 ounces, showing the progress being made towards complete treatment of the ore on the spot. Three mines in Gowganda and South Lorrain yielded 407,103 ounces.

Production of Pig Iron.

The production of pig iron in Ontario is growing rapidly. In 1902 it amounted to 112,687 tons; in 1907, 286,216 tons; in 1912 to 589,583 tons, and at the present rate of production, if maintained for the remainder of the present year, the output will be 738,900 tons. All the blast furnaces except the one at Port Arthur were in blast during the six months.

◆

FARMERS BANK SILVER MINE.

The cutting of another high-grade vein, six inches in width, is reported from the Keeley prospect in the Cobalt district. This is the property in which the defunct Farmers Bank was interested.

The prospecting operations so far carried out by the British company, which, on Dr. J. M. Bell's technical advice, re-opened the property under a working option this year, have been attended with successful results, says the Cobalt Nugget. Two months after commencing operations a 2½-inch high-grade vein was cut in a cross-cut projected north-east from the 61 foot level of No. 1 shaft. Drifting on this shoot was proceeding when the new and comparatively wide high-grade cross-vein was intersected. The grade of ore appears to be similar to that obtained from the 2½-inch vein which had a silver-content of 6,467 ounces per ton. In the cross-vein, which is strong and well-defined, high-grade ore up to 10 inches in width has been exposed. The enclosing-rock is keewatin, and the geology of the neighborhood is similar to that in the vicinity of the Timiskaming mine.

The British company holding the option is the Associated Gold Mines of Western Australia, Limited, (London, England), on behalf of which Dr. Bell has control in Canada, Mr. N. J. Evered, formerly one of the managers of the Waihi Gold Mines (New Zealand), is general manager at the Keeley, Mr. P. Clarke being attorney.

The Keeley is the pioneer property of the South Lorrain district. It was discovered by a group of three Haileybury men, and it was being actively worked some time before the Wettlaufer was opened up. It has an extremely good surface equipment, but little underground work was done.

FIRE INSURANCE IN SASKATCHEWAN

Eighty-Three Companies Are Writing Business—Heavy Amount at Risk

Eighty-three insurance companies were writing business in Saskatchewan in 1912. These companies hail from Great Britain, the United States and France, while there are naturally a large number of Canadian companies also writing risks. The principal figures regarding the business last year are summarized in the following table:—

Gross amount written	$97,840,491
Premiums thereon	2,298,237
Net premium income	2,072,202
Net amount at risk	86,414,522
Fire losses	801,464

With regard to the business of each company, here are the statistics. All the companies named are licensed under the Saskatchewan Fire Insurance Act. Cents are omitted:—

Company	Gross Amount Written	Premiums Thereon	Net Premium Income	Net Amount at Risk, Dec. 31, 1912	Fire Losses
	$	$	$	$	$

One Million Dollars and Over.

The companies which wrote more than one million dollars worth of business in Saskatchewan during 1912 were the Aetna, British America, Canadian Fire, Canadian Phœnix, Central Canada, Canada National, Fidelity Phœnix, Factories Insurance, General Fire, Hudson Bay, London and Lancashire, London Mutual, Law Union and Rock, Liverpool and London and Globe, Mercantile Fire, Liverpool Manitoba, National Fire of Hartford, North British and Mercantile, North Empire, Norwich Union, Nova Scotia, Occidental, Pacific Coast, Quebec, Queen, Royal Exchange, Royal Saskatchewan, St. Paul, Springfield, Sun and Weston.

The Liverpool and London and Globe wrote the largest amount—$5,673,740, the Canadian Fire coming second with $5,422,257 and the National Fire of Hartford third with $5,232,174. The net premium income returns place the London Assurance Corporation first with $177,757. The National Fire of Hartford had the largest amount of risk in Saskatchewan in 1912—viz., $5,962,417, the Royal had $5,435,912 and the Springfield Fire $5,398,689. Another company with more than five millions at risk was the Canadian Fire which had $5,808,647. The Royal had the heaviest losses, $52,430, but its very large amount at risk must be considered in this regard. The General Assurance Company of Paris had only $10 losses, its net amount at risk at the end of the year was $657,928.

Companies' Investments in Saskatchewan.

The fire insurance companies have not invested very heavily in Saskatchewan, sixteen of them having invested $2,560,465, the Law Union and Rock being responsible for $2,123,656. Here is a detailed statement of the investments:

Company.	Amount invested in Saskatchewan in 1912.
Alberta-Canadian	$ 15,966.69
British America	4,200.00
Caledonian	4,050.00
Canada National	142,740.01
Central Canada	35,219.67
Continental (Winnipeg)	5,568.41
General Accident Fire and Life	102,638.92
Law Union and Rock	2,123,656.19
London Mutual	4,704.40
Miniota Farmers' Mutual	5,700.00
North British and Mercantile	33,000.00
North Empire	33,446.90
Royal Exchange	12,600.00
Security National	23,200.00
Saskatchewan	11,566.67
Winnipeg	2,147.50
Total	$2,560,465.42

With so many licensed companies in Saskatchewan there is no need for the public to patronize unlicensed fire insurance.

The superintendent of insurance for Saskatchewan is Mr. Arthur E. Fisher and the fire commissioner is Mr. Maclean.

◆

PAGEANT OF MELFORT'S PROGRESS

In what is termed "a treatise upon a long neglected district of rich resources where agricultural effort was first made in Western Canada, in the year 1754, and an account of events leading up to a first farming fete to be celebrated at Melfort, Sask., in August, 1914. A glimpse at early history of a territory that is the base of the route to the Hudson Bay, and the present opportunities that will soon enrich the whole Dominion."

Mr. Arthur S. Bennett has given glimpses of the past and an idea of Melfort's resources. He says: "The position that the town of Melfort, Sask., occupies in the present period of western development is a unique and enviable one. With its select location, and with the great variety of resources contributed by the surrounding rich areas, there is not the remotest possibility of a slump or set-back. It will continue in the substantial growth already attained, only in a greatly accelerated degree. These community resources are just what the west needs—they are just what the bankers and the economic experts are to-day telling us the west must have to maintain true, permanent prosperity. The government of the province is strongly advocating intensive farming, and is offering assistance to the husbandman who will engage in it. The west has been wheat crazy for long enough, and the time has come when those districts in any wise adapted for the industry must turn their attention to mixed farming.

"An experimental farm will shortly be established at Melfort by the Dominion government, and this, with all conditions of the most favorable character to draw upon, will soon result in a tremendous stimulation of the latent resources.

"Add to this the effect the opening up of the Hudson Bay route will bring to bear, and several banks will have to arrange for a greatly increased volume of business.

"Melfort will celebrate the 160th anniversary of the advent of agriculture into Western Canada in August, 1914. The celebration will be held, according to present plans, at an auspicious season of the year—the first week in August, between haying and harvest—and will cover a period of three days."

CANADIAN MANUFACTURERS AND TARIFFS

Woolen, Iron and Steel Industries Are Not What They Should Be

"It should be made clear and emphatic," he said, "that we are unalterably opposed to any general lowering of the tariff on goods of a class or kind made or produced in Canada," commented Mr. R. S. Gourlay in his presidential address at the convention of the Canadian Manufacturers Association at Halifax. He said:

"The general revisions of our Canadian tariff synchronized fairly closely with the general revisions of the United States tariff, which was juggled; one set of items would be carried under a high duty one year and low the next, while another set would be raised from a revenue basis to a prohibitive basis.

"For the resultant unsettling of business, which inevitably followed, we find no counterpart in Canada," said the president. "In expressing the hope that this may long continue to be our policy, I do not wish to be understood as of the opinion that the Canadian tariff is not in need of change. Our tariff in the main has been a beneficial one. But it is by no means perfect.

"The woolen schedule is not what it should be, otherwise an industry that should be indigenous to an agricultural country like Canada would not have languished as it has. Neither is the iron and steel schedule satisfactory. As at present constituted it is to some extent encouraging the establishment and expansion of what might be called 'secondary industries,' but it is far from adequate in the protection it affords to certain of the more basic branches of the iron and steel trade, where the investment in plant must necessarily be heavy and where volume of output counts for so much. I cite only these two cases to support my contention that the tariff needs revision and needs it badly.

Stand by Enunciated Principles.

"We do not ask nor do we want higher duties all along the line. I am aware that such desires are attributed to us, and will probably continue to be, despite anything we may profess to the contrary. If it will serve any useful purpose, let me here and now, place our association on record once more as being satisfied with the present general level of our tariff, subject to the adjustment of certain defects, such as those I have mentioned.

"We will stand firmly by the principle we enunciated in this city eleven years ago—namely, that our tariff should be so framed and consistently maintained as to transfer to the workshops of our Dominion the manufacture of many of the goods we now import from other countries."

Mr. Gourlay asserted that the United States tariff revision confirmed him on the belief that Canada made no mistake in rejecting the reciprocity agreement of 1911.

Rates Will Approximate Canada's.

And continuing said:—"Cattle, swine, pulp, paper worth up to 2½ cents a pound, dressed lumber, staves and coke will all enter the United States duty free, subject to favorable interpretation, fish, coal and wheat will also be free; even under the most unfavorable interpretation of which the foodstuff schedule is capable, wheat will be subject to a duty of 10 cents only, as against 25 cents at present, while on fruits there will be material reductions

"There are many lines of common manufacture on which the United States duties are still higher than our general tariff, and even more disproportionate in relation to our preferential tariff. The most that can be said of her new average rate of duty is that it will now approximate Canada's."

◆

BUILDING VESSELS IN CANADA

"The feasibility of building in Canada all or any of our vessels that shall constitute our contribution to the defence of the Empire is a matter which should be left for experts to decide," said Mr. R. S. Gourlay, in his presidential address to the Canadian Manufacturers' Association. "That we could build them goes without saying," he added, "were the question of cost to be left out of consideration. Certain it is, too, that we will never have in Canada naval shipyards worthy of the name unless we sometime make a beginning, and I am sure I am right in crediting you all with a desire to see our country possessed of such equipment at the earliest practicable date. In those industries with which I am familiar, however, the safe and logical development is usually from smaller to greater things, and for this reason I am constrained to believe that Canada would be wise to content itself with the building of smaller vessels and other work incident thereto as a commencement, leaving to the naval yards of England for the time being the task of providing the ships that shall proclaim us a nation."

FOX FARMING FINANCE

Prince Edward Island Absorbed in Making the Black Fox Sniff Dividends

A return prepared by Mr. J. E. B. McCready, of Charlottetown, shows that the total capitalizations of the fox companies incorporated by special acts of the Prince Edward Island legislature and by letters patent amounts to $8,405,900.

Two other companies, the Silver Fox Ranching Company, of Alberton, and the Tuplin Company, are not included in that amount, one being incorporated in Massachusetts and the other in Nova Scotia. Their added capital would be $600,000, making a total capitalization of the companies chartered down to August 12, to be $9,000,000. Besides these companies there are over 120 ranches not owned by chartered companies.

What Government Figures Show.

Statistics in process of compilation by the provincial government and not yet made public show the following results:

Total number of fox ranches in Prince Edward Island	233
Total number of foxes in captivity	2,480
Old silver blacks	642
Young silver blacks	683
Total	1,325
Old patches	220
Young patches	223
Total	443
Old reds	337
Young reds	244
Total	581
Old cross	14
Young cross	18
Total	32
Old unclassed	99

The sworn valuation of the young foxes this year is $3,635,575. This valuation when complete will probably reach $3,700,000, or something over $1,000 for every day in the year.

Foxes in Captivity.

An estimated valuation of all the foxes in captivity would be, at a moderate price:—

642 old silver blacks at $7,500 each	$4,715,000
683 young silver blacks at $6,000 each	4,098,000
1,155 other grades at $1,000 each	1,155,000
Total	$9,968,000

Add the value of ranches and the total value of the industry is easily over $10,000,000.

◆

DISPOSITION TO PAY DEBTS

"The Canadian West has given us the best wheat crop the Dominion has ever seen, and there is a general disposition amongst all classes of people to pay their debts," said Sir Edmund Walker in an interview at Montreal.

"The wheat crop, together with a splendid yield of other cereals throughout the West, will act as a saving clause to the financial situation. The country certainly over-borrowed, but that is a matter about which the people do not like to be told, yet the fact remains that if we had not done an over amount of borrowing we would have been spared the quite recent financial depression all over the Dominion."

◆

WESTERN TOWN PAID HIGH FOR FUNDS

The financial straits due to dear money is illustrated by the recent experience of a recognized western municipality, which, to pay off expiring loans, could, ordinarily, have done so by easily borrowing at 4½ per cent. It delayed doing this, hoping the market would improve, says a Windermere cable.

The municipality in question is now compelled to issue one-year five per cent. notes at 92, repaying them at 100 in one year's time. The accommodation thus cost 13 per cent.

Some Canadian concerns have successfully appealed to British supporters to agree to delay the payment of interest until the times mend permanently.

CANADIAN PROVINCIAL SECURITIES AND THE BRITISH TRUSTEE LIST

A Brief Record of the Position of the Provinces and Their Securities, the Obstacles To Their Inclusion in the Trustee List, the Efforts Made To Achieve the Desired Object, and the Strong Claims Advanced On Behalf of the Provinces.

By FRED. W. FIELD

A conference of the premiers of Canada's nine provinces will be held at Ottawa in October, 1913. It has been suggested by *The Monetary Times* that the question of the inclusion of Canadian provincial securities in the British Trustee List should be considered at that conference. That the provinces should participate in this privilege, now enjoyed by other British possessions, is a reasonable desire. Their exclusion is most unjust, and a reflection upon their financial position and credit. What are the obstacles:—

A memorandum recently compiled respecting this subject, sets them forth clearly. Under the provisions of Section 2 of the Colonial Stock Act of 1900 any colonial stock which forms part of the public debt of any colony may become available as an investment for trustees in the United Kingdom on the following terms:—

> (a) It must comply with the regulations as to form laid down by the Colonial Stock Acts, 1877 to 1900, and must be registered in accordance with the provisions of those Acts.
>
> (b) Subject to certain restrictions as to price mentioned in Section 2, Sub-section 2, of the Trustee Act, 1893.
>
> (c) It must comply with the condition laid down by the Treasury by order promulgated in the London Gazette. This Treasury order referred to, is dated 6th December, 1900, and is as follows:—
>
> "The Lords Commissioners of Her Majesty's Treasury, in virtue of the power bestowed upon them by Section 2 of the Colonial Stock Act, 1900 (63 and 64 Vict., c. 62), are pleased to prescribe the following conditions under that section.
>
> ### Conditions
>
> "1. The colony shall provide by legislation for the payment out of the revenues of the colony of any sums which may become payable to stockholders under any judgment, decree, rule or order of a court in the United Kingdom.
>
> "2. The colony shall satisfy the Treasury that adequate funds (as and when required) will be made available in the United Kingdom to meet any such judgment, decree, rule or order.
>
> "3. The Colonial Government shall place on record a formal expression of their opinion, that any colonial legislation which appears to the Imperial Government to alter any of the provisions affecting the stock to the injury of the stockholder, or to involve a departure from the original contract in regard to the stock, would properly be disallowed."

Canadian Government Securities

Canadian Government securities may, for the purpose of this article, be divided into four classes:—

> 1. Securities issued by the Government of Canada which form part of the public debt of the Dominion of Canada.
>
> 2. Securities issued by any of the provinces of Canada which form part of the public debt of the issuing province.
>
> 3. Securities, payment of which, both as to principal and interest, is guaranteed by the Dominion of Canada, but which are not included in its public debt.
>
> 4. Securities, payment of which, both as to principal and interest, is guaranteed by any one of the provinces of Canada, but are not included in the public debt of the guaranteeing province.

No difficulty is found in complying with the necessary requirements in the case of securities issued by the Dominion of Canada (Class 1). The Dominion Government has complied with the conditions under heading (c), and its securities, subject to the provisions of (a) and (b), are available for Trustee investments.

In the case of Class 2 no difficulty arises except in complying with Clause 3 of the Treasury Order. As the legislation of the provinces of Canada is, by the provisions of the British North America Act, not subject to ratification by the Imperial Government, and as the Treasury order must be held to have been promulgated with a knowledge of the provisions of that Act, the provinces of Canada are held to be precluded from the possibility of complying effectually with this clause of the order.

Classes 3 and 4, namely, securities guaranteed by the Dominion or by any of the provinces of Canada are excluded from coming under the provisions of the Colonial Stock Acts because they do not form part of the public debt of any colony.

Enlargement of Trustee List

Dealing with other obstacles, a prominent financier in London writes the editor of *The Monetary Times* as follows: "One of the objections, no doubt, would be that the Imperial government, and possibly the Canadian government also, having a large amount of securities to issue themselves which are taken almost entirely for the investment of trust funds, would naturally not be very anxious to have the list extended in the large way which the admission of provincial securities would involve. . . . It would certainly add greatly to the saleability and price of both guaranteed bonds and provincial issues if they were added to the Trustee List."

Another objection raised is that the inclusion of Canadian provincial securities would have a tendency to lower the price of Consols. Discussing this point, the London journal, *Canada*, said in December, 1911: "The question has been frequently raised in *Canada*, and also in the columns of our contemporary, *The Monetary Times*, and other Canadian journals. Let us state the position quite frankly. If inclusion of provincial issues in the trustee list were a matter of intrinsic merit only, their exclusion could not possibly be defended, as it must be apparent to the most casual observer, or even the prejudiced, that the obligations of Ontario, British Columbia, or Quebec, are as sound as those of Newfoundland or the Straits Settlements—two of the colonies whose securities are included in the list.

Price of Consols a Factor

"We are afraid, however, that there is little chance of provincial government securities being added to the trustee list, for one simple reason, viz., because one of the most important factors in the deposition of Consols from their position of pre-eminence was the extension of the trustee list a few years ago and the inclusion of oversea government securities. However powerful may be the arguments in favor of the inclusion of provincial government securities in the trustee list, it is highly improbable that the Imperial Government will lend a kindly ear to a proposal which would still further increase the already inflated aggregate of competitive securities. Persistent agitation, however, will break down opposition, and, as we are strongly of the opinion that provincial government securities deserve on their merits to be accorded the hall mark of the financial world, we would suggest that representations should be addressed to Ottawa by the various provincial authorities in order that the new Minister of Finance may approach the Imperial Government upon the subject. At the same time we repeat that Mr. Lloyd George and his colleagues are hardly likely to be in a complacent mood with the British premier security but little above the lowest price on record."

The argument has been advanced that the extension of the Trustee List has already affected the price of Consols. It is scarcely fair to attribute the decline of Consols solely to the recent enlargement of the list. As financial students know, there are several other factors helping to account for the downward tendency of Consols. These include the permanent desire of the conservative investor for a higher interest yield on securities.

United Appeal is Necessary

Briefly, then, these are the obstacles. In view of the unanimous desire of the provinces, the probable willingness of the Dominion government to co-operate, and the not unfriendly attitude, we feel sure, of the Imperial authorities, are those obstacles insurmountable? It is hoped they are not. Possibly, one of the weaknesses of Canada's case has been its lack of an unanimous appeal. Much has been done by individual cabinet ministers and others, but the Dominion and the provinces collectively have not yet approached the Imperial authorities, so far as the writer knows, although several of the provinces did so in 1907.

Most of the provinces have taken steps to comply with the Treasury order as far as possible, and it is safe to say they are all willing to do everything that is further possible to obtain the desired inclusion.

Some Individual Efforts

The provincial treasurers are all willing to co-operate in the matter. The late provincial treasurer of Ontario, Hon. Colonel Matheson, on several occasions brought the subject to the notice of people interested in Great Britain. The matter was also taken up by the British Columbia government with the Imperial authorities, but without success. Many years ago, Hon. G. H. Murray, premier of Nova Scotia, pressed for such changes in the British Trustee Act as would give the Canadian provinces the advantage now held by other portions of the Empire. Hon. Walter Scott, premier of Saskatchewan, has taken considerable interest in the question for several years past, and on one occasion, in company with Mr. T. P. O'Connor, M.P., and a number of other British members of parliament, Mr. Scott interviewed some of the authorities in London. Lord Strathcona, High Commissioner for Canada, in London, has been approached from several quarters in regard to the matter. Hon. W. S. Fielding, when minister of finance, discussed the subject repeatedly with the London officials, and the late Hon. Mr. Tatlow, when finance minister of British Columbia, also took action. The subject, some time ago, was placed by *The Monetary Times* before the Dominion Minister of Finance, Hon. W. T. White, who promised to give it consideration in due course.

Provinces are in Anomalous Position

The provincial treasurer of Quebec, Hon. P. S. G. MacKenzie, dealt at length with this matter in his budget speech, 1911-1912. He pointed out that the provinces of Canada were placed in an anomalous position in consequence of the present situation. They were excluded from trustee investments when colonies of far less importance were admitted thereto, such as Newfoundland, Trinidad, the states of the commonwealth of Australia, all of which enjoyed the privilege, and the great provinces of Ontario, Quebec, Nova Scotia, New Brunswick, Manitoba, Saskatchewan and British Columbia, all of them of equal, if not greater importance, were excluded. That their stocks were thus excluded from the extensive market of trustee investments in Great Britain was clearly unjust and a serious damage to their credit. In this connection Mr. MacKenzie quoted the words of a high financial authority in Great Britain: "It is regrettable that our provincial stocks are not trustee securities; if they were, it would at once make a difference of several points in their price. Even as it is, Ontario and Quebec stocks are on the same par with Newfoundland, although the last mentioned is on the Trustee List."

Other Opportunities Presented

Mr. MacKenzie further pointed out that, in addition to the trustee investments, there was also the possibility of a still more extended field for investment opened up to provincial securities under the provisions of the Acts of the Imperial Parliament, known as the Irish Land Act, 1909, and the National Insurance Act, 1911, which was at present closed to them.

Since the passage of the Insurance Act, consideration had been given to the subject of the character of the investments which would be accepted by the insurance commissioners, who would have direction over the investment each year, of what promises to become enormous sums, running from £10,000,000 to £15,000,000 per annum. The Act requires that the Government and the approved societies shall have power to invest in any securities in which trustees are, for the time being, by law empowered to invest trust funds; but it adds: "or in any other securities for the time being approved by the insurance commissioners." There was every reason to presume that the approved societies would desire more freedom than the Trustee Act allowed, and it seemed only reasonable in this connection that the securities of the Provinces of Canada should become eligible, thus at once throwing open to them a valuable market from which they were debarred at present, and thus sustaining the price of their issues, which at present were, and unjustly so, classed on the same footing as the issues of the cities of Canada, their prices depreciating or rising with them.

Under the provisions of the Irish Land Act, 1909, trustees had been appointed with power to invest the purchase money in the manner therein provided, and from which provincial securities, such as ours, were now debarred. This would also create enormous funds, which must seek investment.

British Columbia's Plea

As far back as February, 1905, the British Columbia government passed a strong resolution with reference to the inclusion of provincial securities in the list of those in which trustees may invest, as did, we believe, other provinces. The British Columbia resolution is printed in detail below:—

Extract from the Votes and Proceedings of the British Columbia Legislature, February 13th, 1905:—

The House resumed the adjourned debate on the motion of the Hon. the Minister of Finance of the 10th inst. as follows:—

Whereas under the provisions of the Colonial Stock Act, 1879 and 1892, as amended in 1900 (Imperial) the powers of trustees in the United Kingdom have been extended, and provision has been made for the investment of trust funds in colonial securities, under regulations to be made by the Lords Commissioners of the Treasury;

And whereas the regulations in question were in due course promulgated by the Treasury in the London

Gazette, stipulating that colonies desirous of obtaining the benefits of said Act must observe the following conditions:—

(1) Provide by legislation for the payment of any sums which might become payable to stockholders under any judgment in the United Kingdom;

(2) Satisfy the Treasury that adequate funds (as and when required) will be made available in the United Kingdom to meet such judgment; and

(3) Place on record a formal expression of their opinion that any of their legislation "which appears to the Imperial Government to alter any of the provisions affecting the stock, to the injury of the stockholder, or to involve a departure from the original contract in regard to the stock, would probably be disallowed";

And whereas all, or nearly all, the self-governing colonies, and most of the Crown colonies, have taken advantage of the Act, and have passed the necessary legislation, and have given the assurances that are required under the Treasury regulations; and

Whereas the financial position of the colonies which have come under the provisions of the Act has been much improved in the United Kingdom, and their securities have obtained a wider market; and

The Dominion of Canada

Whereas the provinces of Canada, by their union, have formed the Dominion of Canada, which is justly regarded as one of the most important portions of the British Empire; and

Whereas the said provinces of Canada have so far been unable to avail themselves of the advantages that would be applicable to their securities, provided a compliance to the provisions of the Colonial Stock Act could be fully observed, and in consequence their interests are adversely and seriously affected; and

Whereas the States of the Commonwealth of Australia enjoy the privileges which the provinces of Canada seek to obtain, and the securities of those States are generally available for the investment of trust funds in the United Kingdom; and

Whereas the securities of the provinces of Canada are eligible for registration under the Colonial Stock Act, and the necessary legislation can readily be passed to comply with the first two of the regulations that have been issued by the Treasury under the Colonial Stock Act (Amendment Act) of 1900; and whereas the chief difficulty in the way of extending the benefits of the Act of 1900 to the provinces of Canada is found in the provisions of the third of the said regulations; and

Whereas it is stated to be held by the Imperial authorities that they have no direct right of disallowance, so far as the legislation of the provinces of Canada is concerned, and that the position in that respect is, therefore, different to that obtaining in the case of the colonies to which the provisions of the Act of 1900 have been applied; and

Government is Willing

Whereas under the British North America Act the power of disallowance in relation to the legislation of the provinces is reserved to the Governor-General-in-Council; the Government of British Columbia is, therefore, in a position to place on record with the Dominion Government, to be transmitted to His Majesty's Government, a formal expression of its opinion, "that any of its legislation which appears to the Imperial Government to alter any of the provisions affecting the stock to the injury of the stockholders, or to involve a departure from the original contract in regard to the stock, would properly be disallowed by the Governor-General-in-Council"; and

Whereas if such assurance is not sufficient, the province of British Columbia will be prepared to give favorable consideration to any suggestion that may be made by His Majesty's Government to the Dominion Government, so that the Colonial Stock Act of 1900 may be extended to the securities it may have already issued, or which may be issued in the future; and

Whereas the province of British Columbia cannot but believe that there is every disposition on the part of His Majesty's Government to extend to the securities of the provinces of Canada the benefits of the Act of 1900, if necessary and proper assurances are given in the spirit of the said Act, and of the regulations that have been promulgated under the provisions;

Be it, therefore, resolved, that, in the opinion of this House, an humble address be presented to His Honor the Lieutenant-Governor, asking him to submit this resolution to the Dominion Government, in order that the matter may be brought formally to the notice of the Secretary of State for the Colonies, for the consideration of the Government of His Majesty, with the view to the regulations that have been made under the Colonial Stock Act of 1900 being applied, or, if necessary, modified or extended to meet the circumstances, and permit of their being made applicable to the provinces of the Dominion of Canada.

The motion was agreed to.

Status of Canadian Provinces

Nearly $100,000,000 of British money is invested in the securities of the provincial governments of Canada and more than twenty provincial government issues are quoted on the London Stock Exchange. Anything done to define more clearly in the minds of the British public the standing and position of the Canadian provinces is desirable. It is difficult to imagine that the British investor really contemplates possibility of default of a loan by any of our provinces. On this point, Sir Frederick Taylor, manager of the Bank of Montreal in London, writing in *The Monetary Times* of January 6th, 1912, said:—

"It seems curious—indeed, anomalous—to all Canadians that the provinces cannot borrow on better terms than the principal cities of the Dominion, but the fact remains that Canadian Provincial Government and the more important municipal securities are classed by the London market alike as to intrinsic merit—otherwise price. The explanation lies in part in the fact that the term "Province" in Great Britain is a vague term; i.e., when reference is made to "The Provinces" in England it means the district or territory outside of London other than Wales.

Strengthened, Not Weakened

"The fact seems to be ignored, or at least unappreciated, that prior to 1867 the various provinces of Canada were self-governing entities, and that their position was strengthened, not weakened, by Confederation. With the exception of Prince Edward Island, all the provinces of Canada have borrowed in the London market, but in only one, viz., Ontario, is there a fair market. The loans of some of the others were placed some years ago, or are small in amount, and seldom come on the market; therefore, the prices thereof do not closely indicate their realizable value. Taking, then, Ontario as the standard of provincial credit, we find that since their 4 per cent. loan was floated in 1909, there has been a fall of only 1½ points, although they have borrowed again meanwhile. This is an excellent showing under the circumstances, and largely due to sound methods of finance, which includes recognition of London requirements and avoidance of the tender system. New Brunswick and Manitoba have wisely followed the example of Ontario in issuing stock, not bonds, and free of stamp duty to the holders. The other provinces should do likewise when the time comes. It is regrettable that the provincial stocks are not trustee securities. If they were, it would at once make a difference of several points in their price. As it is, Ontario and Newfoundland are about on a par, although the latter is on the trustee list."

(To be concluded.)

HAIL AND TORNADO INSURANCE BUSINESS TRANSACTED IN CANADA LAST YEAR

Ten companies were writing hail insurance in Saskatchewan last year, and the number has been increased this year. The details are given in the following table:—

Name of company.	Amount of risk.	Premiums (cash basis).	Losses paid.
Saskatchewan	$3,610,448	$179,090	$131,288
Alberta-Canadian	2,403,606	118,983	94,796
Central Canada	4,492,777	222,309	184,039
Canada National	2,853,382	171,203	141,207
Hudson Bay	3,110,149	186,663	94,375
Western Canada Fire	611,384	36,683	26,561
Canada Weather	461,994	23,138	16,581
Canadian Indemnity	(a)	38,552	24,567
British Crown	1,472,888	88,018	49,365
British Empire	(a)	45,986	34,390
Totals	$19,016,628	$1,110,625	$797,169

(a) Not reported.

As stated in a recent issue of *The Monetary Times*, the hail insurance business in Saskatchewan is an interesting study. This year an order-in-council was passed regulating it. It required Canadian companies to deposit $5,000 and foreign companies $10,000 with the provincial department of insurance, Dominion licensed companies being excepted. It also required that foreign companies, those whose capital is outside Canada, should make weekly reports of business written and of losses. As additional protection, 50 per cent. of the premium income reported by these foreign companies must be deposited in trust with the provincial treasurer, should he deem it necessary, this amount being available, if needed, for the payment of losses.

Saskatchewan's Municipal Hail Act.

The provincial municipal hail act has to some extent affected the stock companies, as the amount of risk written per acre in districts where the municipal hail by-law has been adopted, averages $5 per acre, the farmer being automatically insured for a further $5 under the act. This brings his insurance up to the old standard of $10 per acre. But, as stated, the company insures for only $5 of that sum. On the other hand, the companies' liability is considerably more scattered. The majority of the companies are writing business on a cash basis. Owing to the money stringency, the business this year is not quite as large as it would have been under more favorable financial conditions.

The superintendent of insurance for Saskatchewan has nothing whatever to do with the operation of the municipal hail insurance act. This rests entirely with the municipal hail commission, two of the members of which are elected by the reeves and one by the provincial government.

Only one company, with a Dominion license, wrote hail insurance in Canada last year. This was the Hudson Bay, whose premiums for the year were $249,261; the number of policies, new and renewed, 4,044; the amount of policies, new and renewed, $3,888,718; the losses incurred during the year, $117,449; and the claims paid, $117,449.

The International Agricultural Institute has complete reports of different systems of hail insurance in Continental Europe. Hail insurance seems to be as common a thing in Europe as fire insurance is in America, and indeed, the same reasons that make fire insurance a necessary precaution here in America make hail insurance necessary in Europe. The culture is so intensive that the damage from hail, where it occurs, is necessarily very great. The observations of the weather bureau are extensive enough to enable commercial companies to offer insurance at a moderate premium. The greater part, however, of the hail insurance companies are mutual and co-operative.

The concentration of fruit growing in certain centres, especially in British Columbia, Ontario and Nova Scotia, makes these districts particularly liable to heavy losses from hailstorms, though these may not be very frequent. At present it is not uncommon for an individual to lose three-quarters of his crop in case a hailstorm visits the neighborhood, and the results, of course, are exceedingly inconvenient. Several growers in Niagara District last year suffered heavy individual losses as the results of hailstorms, and will be crippled for capital for several years to come. With a proper system of hail insurance upon a co-operative basis, a very slight premium from each grower would render such disasters comparatively harmless. Hailstorms are not numerous enough in Canada to form a serious menace to the fruit-growing industry, but they are numerous enough to suggest the wisdom of hail insurance companies in districts where fruit-growing forms the chief occupation of the people.

Practically No Tornado Losses.

The following table shows the amount of tornado insurance written in Saskatchewan last year:—

Name of company.	Amount of risk.	Premiums.	Losses.
Canada National	$ 13,000	$ 97	....
Canada Weather	56,100	315	....
Fidelity-Phœnix	1,221,250	6,112	....
Firemen's, of Newark	76,516	317	....
National Union, of Pittsburg	218,725	1,039	$80
Northwestern National	178,810	909	....
Springfield Fire and Marine	843,942	4,440	....
St. Paul Fire and Marine	48,000	165	....
Totals	$2,656,343	$13,394	$80

Nine Companies Doing Business.

Since the cyclone in Regina there has been considerable activity in tornada insurance. The losses paid, in Saskatchewan, were less than $100. Climatic conditions in Saskatchewan are sufficiently good to keep tornado losses down to a minimum.

The following table shows that nine companies were writing tornado insurance under the supervision of the Dominion insurance department last year:—

	Premiums of the year.	Number of policies, new and renewed.	Amount of policies, new and renewed.	Number of policies in force-in Canada at date.	Net amount in force at date.	Losses incurred during the year.	Claims paid.
Fidelity-Phœnix	$6,895	......	$1,702,850	......	$1,454,300	$710	$710
Hartford Fire	3,191	......	624,602	......	635,802	none	none
Home Insurance Company	322	40	82,900	55	107,300	none	none
National Fire	2,229	......	407,477	......	386,144	none	none
National Union Fire	1,566	......	373,225	......	354,225	80	80
Northwestern National	666	......	192,510	......	178,810	none	none
Scottish Union and National	116	4	22,600	4	22,600	none	none
Springfield Fire and Marine	6,007	......	1,223,300	......	1,187,140	none	none
St. Paul Fire and Marine	925	81	231,800	83	240,800	20	none
Totals	$22,007	......	$4,861,264	......	$4,567,121	$810	$790

PURCHASE OF KLONDIKE PROPERTIES

The Canadian Yukon is brought prominently before the public in London by the publication of a prospectus of the Northwest Corporation, with a capital of $7,500,000, which has been formed to acquire the Treadgold properties in the Klondike, consisting of 75 miles of pay channels, says a Windermere cable.

No part of the purchase price is paid in cash, the prospectus being issued for public information only.

Messrs. Orr Ewing, of the Dominion Mining Company; Trask, of the Sulphur Mining Company; and Treadgold, are the only directors.

BRITISH NORTH AMERICA BANK PROFITS

The profits of the Bank of British North America for the half-year ended May 31st, including £19,201 brought forward, amounted to £93,088. The directors recommended an interim dividend of 40s. per share, payable, less tax, on October 6th, leaving £47,807 to be carried forward. The following appropriations from the profit and loss account have been made for the benefit of the staff, namely:—To the officers' widows' and orphans' fund, £769; life insurance fund £200; pension fund, £4,312.

For the corresponding period the profits, including £19,319 brought forward, amounted to £79,031. The dividend was at the same rate.

MARKETING OF FRUIT AND VEGETABLES

New York is More Efficiently Served from California Than is Toronto from Niagara

In an interesting paper regarding the role of the middleman, prepared for the Political Science Association's convention at Ottawa, Mr. R. H. Coats discussed at length the marketing of fruit and vegetables, a question which has been prominent of late. Market organization and rapid handling, he said, were of very first importance. The primary marketing of our Canadian small fruits is done on an individual basis. The grower out in the country ships to a commission house in one or other of the large consuming centres. In Ontario, where the largest business of the kind is done, the farmers of a district may occasionally arrange among themselves as to the obtaining of a car, but that is about as far as any joint action goes. In British Columbia organization among small fruit-growers has advanced a little further: about half the small fruit is shipped through an association, which looks after the supply of cars, oversees loading operations, and distributes the proceeds. If the grower is close to a large city, he will probably sell to a retailer direct. This, however, makes up only a small fraction of the trade. Here, then, at the outset, is room for doubt as to the efficiency of our methods, continued Mr. Coats, for the keenest individualist will admit that to ship two carloads of a product that will spoil within three days to a point where only one is needed is wasteful, and that the isolated producer is not in the best position to observe and influence the general trade movement.

Grower Can Be Tricked.

Arrived in the commission merchant's hands, the fruit is disposed of to brokers or the retail trade direct, either by private sale or by auction. Custom varies as to the extent to which these methods are employed. In Ottawa, for example, about half the fruit is auctioned. On the face of it, there is nothing much to complain of in the commission merchant's methods. They would seem to ensure competition between growers in the first instance, and between retailers in the second. On a slight examination, however, they can be proved vulnerable. To begin with, the promiscuous forwarding of a perishable product, by making market demoralization a constant menace, places an undue power in the hands of an unscrupulous consignee. To a telegram stating that the shipment came to hand in bad order or on a bad market and requesting instructions, what is a producer to do but believe, and ask the merchant to do the best he can for him. Then, too, in the actual conducting of the sales all sorts of tricks, one is told, are possible. Even an auctioneer can "stand in" with a broker or retailer. He can, for instance, keep back a choice lot of fruit, and bring it up when only Italians are scrambling for the left-overs, to be knocked down to a broker, who has always a retailer or two in hand on the outlook for a fancy article. So unsatisfactory has the general auction proved that the St. Catharines Co-operative Association has taken its own men to Winnipeg, and established there its own sales and audit system.

Loose Marketing Machinery.

Turning to the apple trade, something of the same sort, though not quite the same, prevails. The history of the Canadian apple trade is an illuminating tract on the evils of loose marketing machinery. Originating in the planting of orchards for the personal needs of the settler and of the local markets, by 1865 the industry had outgrown these primitive needs, and the export trade began. The apple dealer was born of the necessity for uniform packing and grading and the handling of large lots which this new trade created. At first, exporting was very profitable, but over-planting had by the nineties reproduced the conditions of the sixties, and in some Ontario orchards the axe was actually laid at the root of the trees. But it is with the methods of the middleman apple buyer we are here concerned. The advantages he offers the farmer are apparent. He picks, packs and pays a stated price for the fruit. The grower is relieved of all anxiety as to the labor supply and the monetary return.

But the disadvantages are scarcely less apparent. Trees are roughly handled. From year to year the farmer is uncertain of his man, not to speak of his price. Moreover, unless the orchard is a large one and confined to keeping varieties, the dealer will have none of it. The old-fashioned small orchard, planted with the view to securing a succession of early, fall and winter varieties, has no attractions for the apple buyer, who obviously finds it expensive to move his men around and to collect a number of small lots. Frankly, he has spelled demoralization in many a Canadian apple section.

Last autumn I happened to be in a small Ontario town, said Mr. Coats, the centre of an excellent apple district, about the time the Winnipeg story was going the rounds. Immediately adjoining the railway station was a large orchard, young and well cared for, which a dealer had bought at $1.50 per barrel. This was the top price of the neighborhood; only one other grower within ten miles got it, the usual price being 75 cents to $1.00. The local grocers were asking $2.50 a barrel for No. 1 winter varieties. But the perplexing fact was that within a radius of a few miles of this place, while apples were selling at over $5.00 a barrel in Winnipeg, there were orchards in which the fruit was hanging unpicked and frozen on the trees. A large fruit-buying and orchard-renting concern had canvassed the district early in spring; subsequently it repudiated its contracts. Meanwhile the smaller buyers had avoided the neighborhood, and the farmers were left with the fruit on their hands. At the point in question $2.00 was considered a fair f.o.b. price, namely, $1.20 to the grower, 45 cents for the barrel, 17 cents for picking, and 19 cents for buyer's commission. The freight to Winnipeg is about 80 cents, and surely another dollar and a quarter, which would bring the total to $4.00, should have given the commission house and retailer enough.

Farmers Should Not Rent.

The remedy, it seems to me, in this case is plain. The farmers should not be renting their orchards; they should be managing their own business themselves. They cannot do this on an individual basis, but they can collectively. Co-operative fruit marketing is the simplest possible device. The growers of a district organize. They establish a central packing-house. They arrange for uniform methods of packing and shipping each variety at its best. They buy supplies in large lots, and, therefore, economically. They can estimate their output, and they can find out all that is to be known about the state of the market, giving over this commercial part to a competent employee and themselves concentrating on the problem of getting out a good product. They can solve the labor question, which in recent years has been the toughest nut of all to crack in the fruit business, because they can promise work on a scale that no individual can. The Annapolis Valley picked its apples last year with an ease that would open the eyes of growers, who have seen profits of a year vanish almost in a day, because hands could not be hired to gather the crop. Finally, they can secure a square deal from the middleman.

Co-operative Farming.

But, it may be asked, will not the gains of co-operative marketing go into the pockets of the grower, leaving the consumer where he is? The answer is, no, and for business reasons. In the first place, an association of men leagued co-operatively is prima facie less liable to be up to tricks than an individual. Then, it is to the grower's interest to get fruit to the consumer cheaply and regularly, so as to increase demand. Finally, every intelligent fruit-grower knows that the business can be overdone. Last year California was visited by a disastrous frost. So well, however, have the co-operative orange growers learned their lesson that they resolutely set their face against enhancement of prices to the famine basis, remembering, even in these exceptional circumstances, to guard against over-stimulation of production. Fortunately, the Canadian apple-grower is awakening. Nova Scotia has 32 co-operative fruit associations, Prince Edward Island 1, Quebec 8, Ontario 55, and British Columbia 10, the Nova Scotia and Ontario associations having formed central bodies. But considerable territories still remain outside. That it should be possible to say that New York is more efficiently served with fruit from California than is Toronto from the Niagara peninsula is a matter we should lose no time in investigating and curing.

◆

BUSINESS IN CALGARY

(Special Correspondence.)

Sept. 17th.

Application is to be made at the next session of the legislature for incorporation of the Calgary Stock Exchange.

The city has arranged with the Bank of Montreal for a loan of $500,000, and the proposal to accept the offer of Stimson & Company of one million dollars at 6¾ per cent. will not now be entertained.

Four thousand men are in the municipal employ carrying forward the programme of improvements as planned at the beginning of the year.

New wheat and oats coming to market grade much higher than in former years. The whole grain crop of Alberta is conservatively estimated at 74,000,000 bushels, an increase of approximately 10,000,000 bushels. There are some good wheat, barley and oat crops in the viciniy of Calgary.

◆

A by-law calling for a temporary loan of $33,000 from the Royal Bank of Canada, and also the Burnaby debenture further hypothecation by-law, 1913, received their first and second reading at Burnaby.

An issue of stock of the Canadian Autobus Company has been made and almost the entire issue in England has been subscribed by the General and the Daimler Companies, two of the directors of the former, one of whom is president of the Daimler Company, being on the English board of the Canadian company.

INVESTMENTS IN BRITISH COLUMBIA'S TIMBER

How Lands Are Held—United States and British Capital—Bond Issues

The timber industry may be properly defined as the staple industry of British Columbia, and, with the exception of mining for placer gold, is one of the oldest, remarked Mr. W. E. Hodges in a paper read to the Dominion Association of Chartered Accountants at Winnipeg.

Here are definitions of one or two of the principal terms used in connection with the industry:—

(1) Board Foot.—The unit of measurement is by the board foot, and quantities both of standing timber and manufactured lumber are usually spoken of by the thousand feet. A board foot is a piece of lumber 1 foot long by 1 foot wide by 1 inch thick.

(2) Cruiser.—A cruiser is a man who makes an examination of timber lands, and gives an estimate of the amount of standing merchantable timber on the property. This is usually referred to as "Stumpage."

His estimate states the number of board feet a tract contains, and he usually reports upon the accessibility of the timber and other material points, including the general topography of the country, his estimate as to the cost of logging and transporting the logs to the mill. Upon this report an intending purchaser usually bases his opinion as to whether the purchase is desirable or otherwise. Cruises are frequently made in great detail, and I have known as much as $20,000 to be spent upon a single cruise; but this covered over 200 miles of lumber, and in this case each 40 acres section was reported upon separately, and a rough map was prepared showing the location and stand of the timber.

How Timber Lands Are Held.

Timber lands in the province are being held in the following manner:—

1. Under Crown Grant.—The holders are entitled to the timber on the land, and also hold the land in fee simple after the timber is removed. This land is subject to a tax of 2 per cent. on the assessed valuation instead of paying the annual rentals as provided under the Land Act for special licenses.

2. Leaseholds Granted by Special Act of Parliament.—These are not very numerous, and were usually granted by the government in order to promote some industry—for example, the manufacture of pulp, or the tanning industry. Timber held in this way is subject to very little in the way of annual rentals, but there is usually an obligation imposed by the act to operate either a mill or plant of some description.

3. Timber coming within the railway belt, i.e., being within 20 miles north or south of the main line of the Canadian Pacific Railway.

At the time British Columbia entered Confederation, in 1871, this territory was ceded to the Dominion government. Therefore, the timber in that area belongs to the Dominion government, and is subject only to a rental of $5.00 per square mile per annum, plus a small charge for fire protection.

4. Timber held under special license as defined by the Land Act.—More than four-fifths of the alienated timber in this country is held in this manner, and, provided the conditions imposed by the Land Act are carried out (which are not very onerous), the timber land may be held as long as there is merchantable timber on it, subject to the payment of the ordinary rentals, which are $140 per square mile per annum for timber west of the Cascade Range, known as coast timber, and $115 per square mile per annum for timber east of the Cascade Range, known as mountain timber; in addition to which a royalty of 50 cents per thousand has to be paid to the government when the timber is cut. There is also a small tax of 1 cent per acre per annum levied for fire protection purposes. These are charges at present in force, but there is guarantee that they will not be raised at any time.

Cost of Production.

The cost of producing lumber is divided under two distinct heads: 1. Logging. 2. Sawmilling, including planing mill, dry-kiln, etc., in addition to which there are the office and other overhead expenses.

As a rule, the larger companies prosecute their logging on a very large scale, and at times substantial capital expenditures are made before any logs are brought to the mill, the usual items for capital expenditure being: 1. Purchase of equipment, donkey engines, etc. 2. Construction of logging railway. 3. Improvements in order to render a river or creek navigable for driving logs.

The chief expenditure for producing may, therefore, be divided in a general way as follows: 1. Camp expenditures and wages. 2. Superintendent's salary and expenses. 3. Proportion of general office expenses. 4. Depreciation on logging and camp equipment. 5. Depreciation on river and creek improvements. 6. Depreciation on logging railway. 7. Royalties paid to the government. 8. Stumpage charges for depreciation of timber limits.

The money invested in the timber industry may be divided into two classes, namely, investments in holding companies, who do not operate a mill, or who only do so in order to earn sufficient money to pay the carrying charges on their holdings, and investments in operating companies, whose object is to earn sufficient money from actual operations to pay dividends to their shareholders. Practically the whole of the money invested in holding companies originally came from the United States, with perhaps a small amount from Eastern Canada.

The shareholders in these companies do not receive, neither do they expect, regular returns on their investment. One large American concern in their prospectus stated that subscribers were not to expect either regular or immediate returns. In addition to the original purchase price, those companies who do not operate have to take care of the annual charges and expense of carrying their timber, and it is, therefore, necessary for the shareholders to contribute yearly until a sale is effected of the whole or a part of their holdings.

Some of these companies have made enormous profits on their investment, particularly those whose directors had the foresight to anticipate the general rise in timber values.

Prior to the year 1905 the amount of money invested in purely operating companies was not large. After that date legislation was introduced providing for more permanency in timber holdings, but even then the holders of special licenses could only obtain a lease to their timber rights for twenty-one years. In 1910, however, it was enacted that special timber licenses could be held as long as there was merchantable timber on them, which gave the holders a lease in perpetuity if they so desired.

British Capital Was Attracted.

It was at this period that British capital became interested, and several flotations of large bond issues were made in London and other financial centres, in some cases for more than the property under the most favorable circumstances could hope to return to the investor. For various reasons the majority of the companies floated in Europe came to grief and defaulted upon their interest. Only one or two public companies in British Columbia who have floated a bond issue in Europe have not made default in paying interest on their debentures; some of them did so without even paying a single coupon. These disasters were not altogether the fault of the industry; they were largely the fault of over-capitalization or bad management.

The issues were made not upon the records of the profits earned in the past, but on an estimate of the profits to be earned in the future, and I do not know a single instance in which the actual profits earned have been anywhere near the prophecies made in the prospectus.

Provision in Trust Deeds.

Some companies have made bond issues upon their properties to the extent of a large part of their market value. This policy is detrimental both to the debenture holder and to the company itself. The former will not receive the interest he anticipates, and the company will not be in a position to pay it and will be in financial difficulties in a short time. As the creation of a bond issue imposes an obligation to provide for fixed annual charges for interest and sinking fund, I am of the opinion that the extent of the bond issue should be determined by the profits the plant is capable of earning by operating and not by the value of the timber holdings. I am in favor of a debenture issue being made on the above lines as a first charge upon the timber and fixed assets. Provision, however, should be made in the trust deed for the creation of a sinking fund by the payment to the trustee of a fixed sum per 1,000 feet of all lumber cut, which should not be less than $1.00. The trust deed should also be drawn so as to exclude the manufactured lumber and logs from the charge created, so that the company will not be hampered in its borrowing powers, and may be able to transact its banking business in the usual way by borrowing on produce loans.

Operations have been begun on the plant of the Empire Lumber Company at Deep Bay, Cowichan Lake, Vancouver Island. When the machinery now being placed is completed this mill will cut 25,000 feet per day.

Victoria, B.C., will be the centre at which the Pacific Coast fire chiefs' association will hold its convention next year. This was decided upon at the convention at Tacoma, where Fire Chief Davis, of Victoria, presented an invitation on behalf of the capital city of British Columbia.

The Hon. W. R. Ross, minister of lands, British Columbia, who has just returned from a trip of inspection in the north, states that the records of the forest branch up to date show that, whereas nearly six hundred small fires have occurred, all but ninety-five have been put out by the forest guards without expense. The cost of extinguishing the ninety-five fires, which assumed larger proportions, was only $4,500, an average of less than $50 per fire. Very few of these fires reached green timber. The aggregate area of merchantable timber burned over in the province this year was less than fifteen square miles.

CANADA'S PACIFIC COAST

New Drydock Scheme—Grand Trunk and Other Railways

(Staff Correspondence.)

Vancouver, September 15th.

Despite strike conditions in the coal mining centres of Vancouver Island, reports from that section of the province indicate brisk conditions. Things are particularly good in the Union Bay district, and at the thriving little town of Courtenay considerable building is going on. Hotel accommodation is being increased to meet the demand, and altogether the situation is encouraging. Farming is pursued on a large scale in that district, and as crops were good, progress will be continued. On the whole, there might be said to be an improvement generally on the coast. The salmon fishery has been good, and with an abundant crop on the prairie, a more confident tone exists. Credits have no doubt been shortened, but this is the natural result of conditions such as have existed during the past few months.

Control of the Canadian Fish and Cold Storage Company has passed to Sir William Mackenzie. This concern was organized in Vancouver four years ago, Mr. G. H. Collins being managing director. The base of operations is Prince Rupert, where the company has a cold storage plant. Halibut are being handled there and shipped east, and the company has been buying salmon on the Fraser River for packing in the cannery it has established. Grey cod is also being sought by one of the company's boats in Alaskan waters, and it is proposed to convert these fish into boneless cod bricks. The company is laying out an extensive scale of operations and to facilitate disposal of its product selling agencies have been established in the east and middle west.

Mr. H. H. Stevens, M.P., in a public speech this week, stated definitely that the Amalgamated Engineering Company purposes building a 16,000 ton dry dock on Burrard Inlet. It will take some time to complete a structure of this kind, but the assurance that it really is to come will be welcomed, not only by shipping interests, but also by those who desire to see Canadian business retained by Canada.

British Columbia's Forests.

The forest branch of the lands and works department is having made a complete estimate of the forest wealth of the province. This will include also figures of the amount of land available for agricultural purposes after the timber has been removed. Co-operation of the Conservation Commission has been secured in this work, and it is expected the figures will be of great value.

It is gratifying to note that as timber is being taken off provincial lands, effort is being made to bring the areas under cultivation. In south-eastern Kootenay, this policy is being followed by more than one large company owning its limits, and on the coast the Canadian Western Lumber Company has planned a definite campaign. This concern is logging on a very extensive scale in the Comox district beyond Courtenay, where the land is fertile. It is proposed to colonize these lands with settlers from Norway, Sweden and Denmark. The greatest drawback to settlement in the province is the excessive cost of clearing, but this will be removed when undertaken by logging companies.

Construction on Grand Trunk.

Announcement is made that every effort is being made to hurry completion of the Grand Trunk Pacific Railway through British Columbia. Construction of this new transcontinental line has been slow across the province, but now that the Panama Canal is soon to be ready no time will be lost in having through lines across the northern part of the continent ready to take care of development that may follow. There is considerable railway construction in British Columbia, both in the north and south. Within a year or two the line across the Hope Mountains, direct to the Kootenay, will be ready, the big contract for the portion across the most difficult part of the route having been awarded. It will take longer than that to complete the extensive work the Canadian Pacific has in hand, but when the new double track is in operation, Canada will be able to handle any traffic that may offer. There will also be the Canadian Northern, which will be completed before the Grand Trunk Pacific or at least about the same time, so that the coast cities will have ample connection with the east. Lines north and south on Vancouver Island and longitudinally through the province will be available as feeders.

◆

The city of Nelson is negotiating for the purchase of the gas works in that city. The bondholders, centred in Toronto, ask $60,000.

NEW BRUNSWICK'S PROSPECTS ARE BRIGHT

Agriculturists Have Satisfactory Year—Manufacturing and Distributing Interests Are Actively Engaged

(Special Correspondence.)

St. John, N.B., Sept. 16th.

Reports from all sections of New Brunswick show that the farmers are gathering excellent crops. Hay was housed in fine condition. The grain and root crops show a larger yield than was anticipated. The province will have large quantities of potatoes for export. The only shortage this year has been in apples and some of the smaller fruits. Farmers generally will have a very satisfactory year.

The saw mills at St. John are still idle, and there does not appear to be any prospect of an early settlement

St. John council has asked Hon. J. D. Hazen to arrange a conference with the officials of the Grand Trunk Pacific Railway, to learn the intentions of the company with regard to traffic at the port of St. John. No steps have yet been taken to provide terminals for the traffic which should be available within a year.

Railways Are Extending.

Rapid progress is being made with railroad construction work on the St. John Valley Railway. More than one hundred miles of the line will be completed by the end of the year. The Gibson and Minto Railway is nearing completion, and is now hauling coal.

The St. John Railway Company has agreed to extend its line and give a service which will be of great benefit in the development of East St. John. This line will be completed within two months, and will be the first extension the company has carried out for quite a number of years.

The Dominion government will construct grain conveyers on two additional wharves at West St. John to relieve the congestion so apparent last season.

Natural Resources of New Brunswick.

A body of silver, lead and zinc ore has been located near the Intercolonial Railway, a short distance above Bathurst. Iron mines are already being operated near Bathurst. Assays of the silver, lead and zinc ore have shown it to be valuable, and the property was recently examined by the representative of an American mining corporation.

Another gas well has been struck in Albert county. This is the second to be struck within a month, and both are of large capacity. The company are also drilling at Sussex, and in going down the first six hundred feet struck several pockets of gas. They expect to strike a large body of gas at a depth of fifteen hundred feet. The last well opened in Albert county was at a depth of sixteen hundred and forty feet. A Moncton resident, speaking of the benefit derived by that city from natural gas states that before the gas was laid into the city it was expected that the cotton mill would be closed, but that natural gas cut its expenses one-third, and there is a suggestion of doubling its capacity; while the Intercolonial Railway, by using natural gas, has cut its power expenses to $7.50 per horse-power, and is producing the cheapest electricity on the continent.

Work in Progress.

The work of placing the machinery in the new Canadian Pacific Railway grain elevator has been begun. The steel framework of the new sugar refinery buildings is now being erected. The foundations of the new post-office and of the new bridge to connect East and West St. John are nearing completion. Messrs. Norton, Griffiths & Company have two powerful dredges on the way out from the Old Country, and some other plant from Argentina, for dredging work in Courtenay Bay.

The Canada Cement Company will establish near St. John a million dollar plant for the manufacture of cement. There has been much complaint during the present year of difficulty in securing supplies of cement for building operations, which this will remedy.

◆

The Bank of British North America has opened a branch at McGregor and Selkirk Avenues, Winnipeg, under the management of Mr. D. H. Allan.

A Vancouver syndicate has taken over the interests of the Columbia Coal and Coke Company at Coalmont, B.C., near Princeton. The price was $1,750,000. Former owners were: Hon. Colin Campbell, W. L. Parrish, J. W. Brown, C. Brown and D. H. McDonald, all of Winnipeg, and J. T. Johnson and D. Donald, Vancouver.

The associated boards of trade of Western Canada new officers are: Mr. R. Loney, Moose Jaw, president; Mr. E. D. Martin, Winnipeg, first vice-president; Mr. E. A. Dagg, Calgary, second vice-president; Mr. A. A. Wilson, Fort William, third vice-president; and Mr. Chas. H. Webster, Calgary, secretary-treasurer.

NEW INCORPORATIONS

Thirty-six Companies in Five Provinces—Incorporation Active in Prince Edward Island.

Incorporations for this week number thirty-six, with a capitalization of $3,490,000.

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	Number of companies.	Capitalization.
Quebec	8	$150,000
Manitoba	7	845,000
Ontario	13	1,670,000
New Brunswick	2	29,300
Prince Edward Island	6	796,000
	36	$3,490,300

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Louis Lacouture.—Louis Lacouture, Joseph I. Pontbriand.

Sorel, Que.—La Compagnie Theatrale de Sorel, $20,000. Hilaire.

Fort William, Ont.—Young & Lillie, Limited, $500,000. S. Crawford Young, W. C. Lillie, M. I. Hall.

Moncton, N.B.—Mapleton Fox and Fur Company, Limited, $24,950. W. K. Gross, F. C. Robinson, F. C. Jones.

Pembroke, Ont.—The Pembroke Realty Company, Limited, $100,000. J. F. Munro, J. T. Stuart, E. A. Dunlop.

Quebec, Que.—La Compagnie Dorval and Pondot, $20,000. Joseph Dorval, J. Aurele Dorval, J. E. Belanger.

Newcastle, N.B.—Miramichi Dredging Company, Limited, $4,350. W. H. Belyea, C. C. Hayward, John Ferguson.

Souris, Man.—Geo. McCulloch and Sons, Limited, $300,000. George McCulloch, H. W. McCulloch, R. J. McCulloch.

Sudbury, Ont.—The Merritt Lumber Company, Limited, $20,000. G. E. Buchanan, J. Somerville McKessock, J. H. Clary.

St. Thomas, Ont.—The Henry Manufacturing and Importing Company, Limited, $100,000. I. Henry, J. Lyle, B. Franklin.

Eastman Village, Que.—Compagnie de Betes a Fourrure, Limitee, $10,000, the Reverend A. Emile Genest, Leon Menard, J. Israel Robin.

Three Rivers, Que.—La Compagnie Hydraulique Electriquede Levrard, Limitee, $20,000. Ludger Carignan, Arthur Roux, Adelard Roux.

Windsor, Ont.—Dodshon Overall Company, Limited, $50,000. F. G. Dodshon, V. K. McBride, L. A. Stoneman. Maple Leaf Condensed Milk Company, Limited, $300,000. S. C. Robinson, F. Millman, Charles A. Smith.

Montreal, Que.—Central Investment Company, Limited, $20,000. Joseph C. Barry Walsh, Paul S. Conry, Robert Henry Teare. Danville Realty, Limited, $20,000. Rene Chenevert, Frank Callaghan, Jean Ernest Saucier. Oriental Club, Limited, $20,000. Aziz Tabah, Michel Bouziane, Kalil Abdo. Longueuil East Land Company, Limited, $20,000. Russell Thomas Stackhouse, Thomas Reginald Ker, Ralph Erskin Allan.

Winnipeg, Man.—Northwest Live Stock Commission Company, Limited, $100,000. H. B. Wilcox, A. N. Strang, W. A. MacKenzie. Canora Townsite Company, Limited, $20,000. C. R. Graham, A. J. Andrews, D. L. Bastedo. The Pleasant View Farm and Dairy Company, Limited, $400,000. David Stewart Robb, Robert Prettie, L. Robb. Palace Billiard Parlors, Limited, $20,000. C. S. Shipman, C. Van Praagh, F. S. Andrews. Inland Sales Company, Limited, $5,000. W. L. Alexander, Harry M. Bickford, F. W. Gossens. Shaw's Dairy Lunch, Limited, $5,000. E. W. Shaw, M. M. Shaw, E. V. Shaw.

Toronto, Ont.—The Reliable Delivery Company, Limited, $40,000. E. W. J. Owens, W. A. Proudfoot, F. B. Goodman. Linton Realty Company, Limited, $300,000. H. A. Hall, L. F. Black, G. D. Waters. Ontario Estates, Limited, $100,000. C. M. Preston, R. H. Holmes, D. H. Holbrook. Teck Amusement Company, Limited, $40,000. F. J. Foley, C. Bowman, Pearl McLean. Petersons, Limited, $40,000. G. H. Sedgewick, Duncan McArthur, H. A. Beckwith. Depot Harbor Elevator Company, Limited, $40,000. G. H. Sedgewick, D. McArthur, H. A. Beckwith. Kerry & Chace, Limited, $40,000. W. H. Irving, J. R. Rumball, H. H. Davis.

Prince Edward Island.—The Howatt, Dalton Silver Black Fox Company, Limited, $165,000. J. E. Wilson, T. E. Bishop, J. E. Dalton. Tyne Valley Black and Silver Fox Company, Limited, $75,000. R. J. McNeill, T. E. Williams, P. Ellis. W. B. Hayes Black Silver Fox Company, Limited, $90,000. J. Richards, W. B. Hayes, R. C. Hayes. The Empire Black Fox Company, Limited, $150,000. G. Carruthers, H. E. McEwen, J. T. Lantz. The Equitable Maritime Black Fox Company, Limited, $96,000. A. U. Brander, G. M. Matthews, J. H. Trueman. R. J. McNeill Black and Silver Fox Company, Limited, $220,000. J. B. Champion, W. R. McNeill, H. Muttart.

MR. GEORGE ALLEN WANTS TO BE IN THE FIELD

Mr. George H. Allen, general manager of the Travellers Life Assurance Company of Canada, having asked to be relieved from the duties of that position, in order to be left free to devote his time to the company's outside interests, at a meeting of the executive committee his request was agreed to and he will resign on October 1st. Mr. Allen, who is one of the best insurance writers on this continent, and who organized this company, has entered into a contract with the company to continue his association with it in the field. His success there is assured.

◆

COST OF LIVING GOING UPWARD

Wholesale prices moved upward again during August, according to the Department of Labor's record, though only to a slight degree. The index number for 270 articles was 136.2 compared with 135.9 in July. In August a year ago it was only 133.3. The advance was due to higher prices in grains and fodders, eggs, potatoes, wool, jute, calfskins, lead and anthracite coal. At the same time there were somewhat lower prices for cattle, beef, butter, trout, whitefish, coffee, spelter, benzine, rubber and a few other articles. Comparing the month with a year ago, the chief increases are among animals and meats and the chief decreases among grains and fodders. In retail prices there was a general advance in eggs and butter and in certain meats. Rents were down somewhat sharply in several western cities, but were firm to upward in the east.

VALUABLE MANUFACTURING

SITE FOR SALE

The land and buildings formerly occupied by Canadian Gas Power and Launches, Limited, Dufferin Street, Toronto, for sale.

SITE: 259 feet frontage on Dufferin Street by 300 feet in depth.

BUILDINGS: Concrete, 242 feet by 80 feet and 156 feet by 40 feet.

SHIPPING FACILITIES: On two sides of block over C.P.R. and G.T.R. Lines.

The above are situated in the heart of the manufacturing district of the city.

PLANS AND PARTICULARS FROM

JOHN MACKAY & COMPANY

TORONTO GENERAL TRUSTS BUILDING

85 BAY STREET, TORONTO

DIVIDENDS AND NOTICES

THE RIORDON PULP AND PAPER COMPANY, LIMITED.

DIVIDEND No. 5.

Notice is hereby given that a dividend of 1¾ per cent. (being at the rate of 7 per cent. per annum), on the Preferred Stock of this company has been declared, payable September 30th, 1913, to shareholders of record at the close of business on September 15th, 1913.

By order of the Board.

CHAS. E. READ,
Secretary-Treasurer.

Montreal, September 10, 1913.

SHAWINIGAN WATER AND POWER COMPANY.

Notice is hereby given that a quarterly dividend of one and one-half per cent. (1½ per cent.) has been declared on the common capital stock of this company, payable October 20th, to shareholders of record, October 7th.

By order of the Board.

W. S. HART,
Secretary.

DOMINION CANNERS, LIMITED.

DIVIDEND NOTICE.

PREFERRED AND COMMON STOCK.

Notice is hereby given that a dividend of 1¾ per cent. for the three months ending the 30th of September, 1913, being at the rate of 7 per cent. per annum, has been declared on the preferred stock of the company, and a dividend of 1½ per cent. for the three months ending the 30th of September, 1913, being at the rate of 6 per cent. per annum, has been declared on the common stock of the company.

The above dividends are payable on the 1st of October next.

Transfer books will be closed from the 16th to the 30th of September, both days inclusive.

By order of the Board.

R. L. INNES,
Secretary.

THE MONTREAL CITY AND DISTRICT SAVINGS BANK

Notice is hereby given that a Dividend of Two Dollars per Share on the Capital Stock of this Institution has been declared, and will be payable at its Head Office, in this City, on and after **Wednesday, the 1st of October next,** to Shareholders of record at the close of business on the 15th day of September next.

By order of the Board,

A. P. LESPERANCE,
Manager.

Montreal, August 29th, 1913.

CROWN-RESERVE MINING COMPANY, LIMITED

DIVIDEND No. 44

Notice is hereby given that a dividend of 2 per cent. has been declared for the month of September, payable **15th October, 1913,** to shareholders of record the 30th September.

Transfer books will not be closed.

Dividend cheques will be mailed on the 14th October by our transfer agents, "The Crown Trust Company," and shareholders are requested to advise them of any change of address.

By order of the Board,

JAMES COOPER,
Secretary-Treasurer.

Montreal, September 8th, 1913.

CANADIAN WESTINGHOUSE COMPANY, LIMITED.

DIVIDEND No. 35.

The quarterly dividend of one and three-quarters per cent. (1¾ per cent.) has been declared upon the outstanding capital stock of the company, payable October 10th, 1913, to shareholders as of record at the close of business, September 30th, 1913. Transfer books will be re-opened October 1st, 1913, at 10 o'clock a.m.

Cheques will be mailed to shareholders.

By order of the Board.

JOHN H. KERR,
Secretary.

Hamilton, Canada, September 11th, 1913.

OFFICIAL CROP REPORT FAVORABLE

Ontario Almost Finished Harvest in August—Canada's Wheat Crop Over Two Hundred Million Bushels

A bulletin issued by the Census and Statistics Office of the Department of Trade and Commerce reports the condition of crops and live stock at the end of August, and gives preliminary estimates of the yield of spring wheat, rye, oats and barley as compiled from the reports of correspondents upon the appearance of these crops.

The weather conditions were favorable for ripening and harvesting the grain crops. In Ontario it was nearly all harvested by the end of the month, while in the prairie provinces harvesting operations were about two-thirds completed, and it was expected that threshing would be general by September 10th. In the Maritime provinces the harvest is more backward, being only general about the end of the month. The average condition of spring wheat is 88.43 per cent. of the standard of a full crop, which is represented by 100; oats, 87.85; barley, 87.07; rye, 80.49; peas, 80.81; beans, 78.67; buckwheat, 77.81; mixed grains, 89.04; flax, 85.06; corn, 79.78. On the whole, these figures maintain the high standard set by last month's report, and marks an advancement for spring wheat, oats and flax. Compared with the figures at the corresponding date last year, wheat is 88 to 84; oats and barley stand at 88 for each season; rye, 80 to 84; mixed grains, 89 to 87; flax, 85 to 88. Potatoes are 86 against 89 last month and 92 last year; turnips are 84 for both this month and last as against 88 last year; mangolds are 83 against 84 last month and 87 last year. Pasture has maintained its condition fairly well since last month, having only lost one point, the figures being 81 against 82 last month and 92 a year ago.

Average Yield Per Acre.

From the reports furnished by correspondents the following preliminary estimates of yield are based on the areas sown. Of spring wheat the average yield per acre is provisionally placed at 21.41 bushels per acre, which, upon an area of 8,990,500 acres, makes the total yield of spring wheat to be 192,517,000 bushels. This quantity, added to 18,481,800 bushels of fall wheat, as published last month, gives the total production of wheat as 210,998,800 bushels, compared with the final estimate for 1912 of 199,236,000 bushels, and for 1911 of 215,851,000 bushels. The yield per acre in 1912 was 20.99 bushels for fall wheat and 20.37 bushels for spring wheat.

Oats, with an average yield of 40.98 bushels per acre on 9,646,400 acres, gives a total production of 395,341,000 bushels as against an average yield of 39.25 bushels and a total yield of 361,733,000 bushels in 1912.

Barley and Rye.

Barley, with a yield per acre of 31.05 bushels and a total yield of 44,440,000 bushels as compared with an average yield of 31.10 bushels and a total of 44,014,000 bushels in 1912.

The estimated yield of rye is 2,425,000 bushels for 127,200 acres, being a yield per acre of 19.06 bushels as against a total of 2,594,000 bushels in 1912.

For the three North-West provinces the total yield of spring wheat is estimated at 188,018,000 bushels, oats 244,125,000 bushels, barley at 28,156,000 bushels, rye at 612,000 and flax at 15,056,000 bushels as compared with a total yield in 1912 for spring wheat of 183,322,000 bushels, oats 221,857,000 bushels and barley of 26,671,000 bushels.

The general condition of live stock is very satisfactory, being expressed in percentages of a standard of 100, representing a healthy and thrifty state, as 94.27 for horses, 91.37 for milch cows, for other cattle 93.54, for sheep 90.41, and for swine 94.83.

◆

FIRE CHIEF'S PROBLEMS

Loss by fire in Saskatoon during the past eight months, from January 1st to August 31st, according to the records of the department show loss covered by insurance at $21,751, while the loss not covered by insurance during the same period was only $1,220, making a total loss during the past eight months of $22,971.

During August Fire Chief Turner reported the Point Grey fire department had received 16 calls, but the fires had all been extinguished with little damage. The total value of the property threatened was $43,370, but the loss only amounted to $60. The insurance on the property was $18,000. He urged the need of more adequate ladder provision in the case of high buildings.

Nearly 400 fires were recorded at Montreal in the last month. The month previous there were close on 300. Of the 700 it is estimated that over 450 were of unknown origin.

The fires were generally small and occurred in the night time about twelve or one o'clock. In the mornings there were always eleven or twelve reports of the night's work presented by the various district chiefs. Out of a dozen reports eight or nine fires were invariably from unknown causes.

AUDITORS SELECTED UNDER NEW BANK ACT

The list of auditors eligible for employment on the external audit provided for under the new Bank Act has been prepared. The Minister of Finance has indicated disapproval of the eligibility of two of the gentlemen named. The list is as follows:—Oct. Belanger, Quebec; A. Cinq-Mars, Montreal; G. T. Clarkson, Toronto; H. D. L. Gordon, Toronto; R. J. Dilworth, Toronto; J. B. Robertson, Toronto; George F. Creak, Montreal; L. Cushing, Montreal; C. A. Hodgson, Montreal; J. F. Cunningham, Ottawa; F. F. White, Montreal; F. P. Page, Montreal; V. Harcourt, Montreal; G. Tansley, Montreal; Alex. Desmarteau, Montreal; A. F. Falls, Toronto; Geo. Gonthier, Montreal; Edmond Gunn, Toronto; J. F. Helliwell, Vancouver, B.C.; John Hyde, Montreal; S. H. Jones, Toronto; G. S. Laing, Winnipeg; J. P. Langley, Toronto; J. A. Larue, Quebec; R. E. Lefaivre, Quebec; P. MacIntosh, Montreal; George Hyde, Montreal; J. R. Hyde, Montreal; S. R. Mitchell, Montreal; A. K. Tod, Montreal; A. Bowman, Montreal; J. Marwick, Montreal; D. Dewar, Montreal; A. Stewart, Montreal; J. C. Pope, Regina, Sask.; A. B. Brodie, Toronto; D. M. McClelland, Toronto; A. L. Dickinson, Toronto; N. E. Waterhouse, Toronto; F. S. Price, Toronto; A. F. Riddell, Montreal; A. C. Stead, Montreal; James Hutchison, Montreal; J. M. Graham, Montreal; W. E. Hodges, Montreal; J. J. Robson, Montreal; W. S. Ronald, Winnipeg; J. G. Ross, Montreal; A. F. C. Ross, Montreal; J. W. Ross, Montreal; E. B. Savage, Montreal; C. S. Scott, Hamilton; W. E. Stavert, Montreal; A. W. Stevenson, Montreal; J. L. Apedaile, Montreal; M. H. Robinson, Montreal; C. H. D. Robertson, Montreal; S. E. Townsend, Toronto; C. R. Hegan, Montreal; E. S. Read, Montreal; T. H. Webb, Montreal; A. F. Whinney, New York, C. J. G. Palmour, New York; A. K. Fisk, Montreal.

◆

TOO MUCH FIRE INSURANCE?

Because it has seemed possible for insurance companies to get a small increase in premium from over-insurance or careless underwriting, it has been assumed that the general policy has been shaped by these sordid considerations, said Mr. Frank Lock, in an address at New York. It might with more reason be charged against the medical profession that they deliberately cause the spread of disease in order to secure income from its treatment, as doubtless it could be shown that such a motive might produce such an effort, but the medical profession is rightly acquitted of such a charge. As regards fire insurance, the motive lies wholly to the contrary of what is charged. Any company which would recklessly allow upon its books property over-insured, or would knowingly pass as policyholders men of incendiary tendencies, could not live. It is well known to be the practice of fire insurance companies to sift the business offered for evidence of moral hazard or for previous incendiary record by all the means which exist for these purposes. This is true notwithstanding all the assertions to the contrary made in the public press. Some chances may be taken by them on high physical hazard, but no company can play loosely with the moral hazard without being bitten. The business is bound to be judged upon the question of motive, as well as upon its broad policy of conservation. Furthermore, it is a matter of record that companies thrive best in those States which have the lowest average rate; they make the best profit out of the classes of risk which have the lowest rates. The cumulative weight of all the considerations advanced should be sufficient to establish that the business is one conducted on a high standard of regard for the public weal and to refute charges to the contrary which have been widely disseminated in the public press with but scant justification.

◆

Weyburn, Saskatchewan, is now added to Saskatchewan's list of cities, the incorporation being celebrated in the presence of a representative gathering of members of the provincial government and civic officials from sister cities and neighboring communities.

Sir Marchmont Wallace, now in Canada, says that the only trouble is that the people in the mother country do not understand the rapidity with which the people do things in the Dominion. It is not that there is anything wrong, but that the Canadians are in such a hurry to do big things.

A report just issued shows that in 1912 there were 35 persons killed and 537 injured in accidents during the last fiscal year on the street cars and radial railways of Ontario. There were four passengers killed and 306 injured. Two employees were killed and 31 injured. Of the travellers on highways, 19 were killed and 199 injured.

LEGAL NOTICE

ARCTIC GOLD EXPLORATION SYNDICATE, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 4th day of September, 1913, incorporating Charles Vane, of the Town of Grimsby, in the Province of Ontario, financial agent, George Patrick Reid, broker, James Hilton Hoffman, solicitor, Nugent Talbot Marquetti, accountant, and Alfred Ernest Wills, medical doctor, of the City of Toronto, in the said Province of Ontario, for the following purposes, viz.:—(a) To explore and prospect the territories known as Labrador, Ungava, Keewatin, Hudson's Bay, Baffin's Land and other Arctic regions for gold, coal and other minerals; (b) To trade in furs, fish, ivory, oil, whalebone and other Arctic products; (c) To establish posts at different points for trading purposes; (d) To acquire by purchase, lease, license, exchange or in any other way and to hold, develop, work, maintain and manage mines, mining rights, mining claims, quarries, deposits and properties of all kinds, and minerals, metals, ores and stone of all kinds, and to deal in, sell, lease, exchange or dispose of the same, or any part or interest therein, in any way whatsoever, and to carry on mining and quarrying operations of every kind; (e) To dig for, refine, reduce, smelt, manufacture and prepare for use by any means or process whatsoever, minerals, metals, ores and stone of every kind, whether belonging to the company or not, and to deal in, sell and dispose of minerals, metals, ores and stone of every kind and all products or any part thereof; (f) To acquire by purchase, lease, license, exchange or in any other way and to hold, manage and use any real property from time to time necessary or convenient for the carrying on of the operations of the company, and to sell, lease, alienate, convey, exchange and deal with in any way from time to time the whole or any portion thereof or any interest therein; (g) To acquire by purchase, lease, license, exchange or in any other way and to build, construct, improve, maintain, work, manage, carry out or control any roads and ways and tramways, branches and sidings on lands owned or controlled by the company, bridges, reservoirs, watercourses, wharves, docks, mills, furnaces, manufactories, warehouses, shops, stores, houses, engines, machinery and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests or operations, and to contribute to, subsidize or otherwise assist or take part in the building, construction, improvement, maintenance, working, management, carrying out or control of any part thereof; (h) To acquire by purchase, lease, license, exchange or in any other way and to build, charter, maintain, work, manage and operate vessels of all kinds for the transportation of minerals, metals, ores and stone and all products thereof and machinery, stores and articles of all kinds, and to contribute to, subsidize or otherwise assist or take part in the building, chartering, maintenance, working, management and operating of such vessels; (i) To equip, maintain, repair, acquire by purchase, exchange, lease, hire, charter, manage, own and control or otherwise deal with all kinds of steamships and other vessels, storehouses, warehouses, docks and wharves; (j) To build, lease, acquire and manage hotels, boarding houses, stores, shops, apartment houses and other establishments in connection with the business of the company and lease or sell the same; (k) To buy, sell and deal in furs, fish, ivory, oil, whalebone and in other goods, wares and merchandise, and to acquire, build, maintain, own and operate factories, shops and stores for that purpose; (l) To acquire, build, alter, hold, lease and manage houses and buildings necessary or convenient for the use of persons employed by the company and the family of such persons; (m) To carry on any other business which may seem to the company capable of being conveniently carried on in connection with its business, or calculated directly or indirectly to enhance the value of or render profitable any of the company's properties or rights; (n) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose which may seem directly or indirectly calculated to benefit this company; (o) To purchase, take on lease or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, and in particular any machinery, plant or stock-in-trade; (p) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (q) To sell, lease, exchange or dispose of the undertaking of the company, or any part thereof, for such consideration as the company may think fit, and in particular for shares, bonds, debentures or securities of any other company having objects altogether or in part similar to those of the company; (r) To sell, improve, manage, develop, exchange, lease, dispose of, distribute in specie or otherwise deal with all or any part of the properties, rights and assets of the company; (s) To do all and any of the above things as principals, agents, contractors, trustees or otherwise, and either alone or in conjunction with others; (t) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Arctic Gold Exploration Syndicate, Limited," with a capital stock of one hundred and five thousand dollars, divided into 105,000 shares of one dollar each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 9th day of September, 1913.

THOMAS MULVEY,
Under-Secretary of State.

11-2

The citizens of Alsask, Saskatchewan, have voted in favor of a by-law for the purpose of spending $6,000 for fire engine, hose and equipment, together with a water tank and hose, payable in twenty annual equal instalments.

Mr. H. S. Holt, president of the Royal Bank of Canada, says: "I have never had greater faith in the future of Canada than at the present moment. Business conditions are absolutely sound from coast to coast. The only trouble is that we have been going too fast, and the present steadying down will serve a very good purpose. The so-called setback —if I can designate the financial situation for the past six months by that word—will enable the people to get their wind and shape up matters for another period of increased confidence and general prosperity."

CANADA'S LATIN-AMERICAN TRADE

Where an opinion has been formed of Canada and Canadians in general in the Latin-American Republics, it seems, so far as can be ascertained, to be a favorable one; it is in the hands, therefore, of exporters to see that that is in no way impaired, but rather that through them it may be much enhanced, remarks Canadian Trade Commissioner H. R. Poussette in a report upon the commerce of Peru, Bolivia, Ecuador and Panama.

A few Canadian articles have been found along the coast. The best known is the Massey-Harris machinery, which has made a fine name for itself in Chile. Canadian windmills, ploughs, one or two industrial machines, a few tools, were also found there, and an occasional shipment of lumber and paper is also imported. To Bolivia, nothing beyond some chairs, brooms and wooden goods seem to have been exported. The importer, who had handled them, expressed himself as well satisfied with the articles, and wished to have more, but for some reason he seemed to have found some difficulty in gratifying this desire. Peru takes an occasional shipment of lumber, but nothing else comes to mind at this moment. In Ecuador, Canadian flour is finding a market, and bids fair to rival the United States product, if, indeed, it does eventually drive it out, or at least from that portion of the trade which buys quality and not the cheap, low-grade article which is obtained in California and the Pacific coast of the United States. In Guayaquil, some Canadian tools were also seen, but as they had but recently arrived no report on them was obtainable. Panama is now purchasing Canadian flour, and also small quantities of silver-plated ware and a patent automobile tire cement. Canadian patent medicines are also making their way on the coast, and are giving satisfaction.

As will be surmized, the total trade of Canada at present is small, but it is capable of some expansion, and even if the commerce of the four republics mentioned above is comparatively unimportant, it is something of a satisfaction and an advertisement as well, to be strongly represented. It is also worth while bearing in mind that events in Latin America move quickly, and progress may come in a shorter time than would seem possible to the average Anglo-Saxon. Conducted on sound lines, the republics under review are capable of no little expansion, but owing to the effects of certain fundamental characteristics in the people, the process from present indications appears likely to be a slow one.

At the present time, taking conditions in the Dominion and South America into consideration, the commodities offering the greatest promise for early success are lumber and flour, with agricultural implements and machinery, but these last in Chile only.

◆

As a result of complaints made that the elevators in Montreal were being used for storage purposes by the transportation companies, a by-law has been passed by the Montreal Harbor Board, increasing the rates for grain storage in the elevators. The new rate for twenty days, or part of an extra day, will be three-tenths of a cent per bushel where formerly it was one-quarter of one cent, the increase being one-twentieth of a cent per bushel. The charge for elevating grain into the elevator is also increased in the same proportion. The rates to be charged at the Grand Trunk elevator in Montreal are also made the same as those charged in the Harbor Board's elevators.

INSTITUTE OF ACTUARIES, STAPLE INN HALL, LONDON.

COLONIAL EXAMINATIONS.

Notice is hereby given:—

1. That the Annual Examinations of the Institute of Actuaries will be held in the Colonial centres, Melbourne, Sydney, Adelaide, Brisbane, Wellington, Montreal, Toronto, Ottawa, Winnipeg and Cape Town, and also in Calcutta, from Monday, 20th April to Saturday, 25th April, 1914, inclusive.
2. That the respective Local Supervisors will fix the hours of the Examinations, and inform the Candidates thereof and of the address at which they will be held.
3. That Candidates must give notice in writing to the Honorary Secretaries in London (England), and pay the prescribed fee of one guinea, not later than 31st January, 1914.
4. That Candidates who have passed Part I of a previous Syllabus will be permitted to take the Third Paper of Part I of the Syllabus dated 16th June, 1908, as a separate Examination, and will not be required to pay an Examination Fee.
5. That Candidates must pay their current annual subscriptions prior to 31st December, 1913.

(By order.) R. R. TILT, } Hon.
R. TODHUNTER, } Secs.

G. Cecil Moore,
The Imperial Life Assurance Company of Canada.
Supervisor in Toronto.

DEBENTURES FOR SALE

TENDERS FOR DEBENTURES.

Sealed tenders will be received by the undersigned for the purchase of $6,000 fire hose and equipment bonds, repayable in 20 annual equal instalments. The lowest or any tender not necessarily accepted.

J. L. SPICER,
Secretary-Treasurer.
Alsask, Sask.

SCHOOL DISTRICT OF JEANNE D'ARC No. 1673, MANITOBA.

DEBENTURES FOR SALE.

Tenders will be received by the undersigned up to September 25th, 1913, for the purchase of an issue of ten-years debentures, repayable $150 and interest, February 1st, each year at the Northern Crown Bank, Rathwell, Manitoba. These debentures for $1,500 bear interest at the rate of 7¼ per cent.

The money is for the purchase of building the school house.

Full particulars of the district on request.

The highest or any tender not necessarily accepted.

A. BALEZ.
Secretary-Treasurer.

TOWN OF WELLAND

HIGH SCHOOL DEBENTURES

Sealed tenders will be received by the undersigned up to eight o'clock afternoon, October 20th, 1913, for $60,000 worth of debentures bearing 5 per cent. interest, sinking fund, 30 years.

Particulars on application. The highest or any tender not necessarily accepted.

J. H. BURGAR,
Treasurer.

TENDERS FOR COUNTY OF MIDDLESEX DEBENTURES

The County of Middlesex offers for sale Twenty-five Debentures of the amount of one thousand dollars each, for which sealed tenders addressed to the undersigned and marked "Tender for Debentures" will be received by the undersigned up to **eleven o'clock a.m., the 10th day of October, 1913.** The County does not bind itself to accept the highest or any tender.

Each Debenture is dated the twenty-fourth day of July, 1913, and is payable on the tenth day of November, 1933, with interest thereon at five per cent., semi-annually on the tenth day of May and the tenth day of November in each year during the currency thereof, on presentation of the coupons to each of said Debentures attached at the office of the Treasurer of said County, but not elsewhere or otherwise.

A. M. McEVOY,
County Treasurer,
County Buildings,
London, Ont.

August 30th, 1913.

DEBENTURES FOR SALE

The village of Maryfield, Sask., offer $1,700 15-year, 7 per cent. debentures.

E. L. ANDERSON,
Secretary-Treasurer.
Maryfield, Sask.

DEBENTURES FOR SALE

Tenders will be received by the undersigned for the purchase of $14,000.00 6 per cent. debentures of Thibeault R.C. School District No. 35, repayable in 20 annual instalments.

J. B. DALPHOND,
Sec.-Treas.
Morinville, Alta.

TRADE DISPUTES DECREASE

There was a considerable decrease in the number of trade disputes in Canada during August, as compared with the number during the previous month and corresponding month of last year. There were also fewer employees involved and fewer working days lost than during July. A partial settlement of the strike of miners on Vancouver Island was effected during August, when an agreement was reached between the Vancouver and Nanaimo Coal Company and its employees. In other respects the dispute continued and considerable disturbance occurred within the area of the industrial strike. During August a strike of about 2,000 salmon fishermen occurred on the Fraser River, but lasted for two days only. With the exception of this, only two disputes commenced during August affecting more than 100 employees. The department's record shows that 6,896 employees were affected by disputes during August, as compared with 8,124 during July, and 9,500 during August, 1912. The number of working days lost during August was approximately 109,520, compared with 188,867 working days lost in July, and a loss of about 106,000 during August, 1912. Nine disputes actually occurred during August.

◆

It is quite clear that Canada ought to be sick-a-bed and very penitent, yet she positively declines to be ill, and, though heedful of advice, is unwilling to do voluntary penance. To confound the financial doctors she goes on doing business pretty much as usual, though borrowing less and reappraising some things, especially real estate, at lower prices. The thing most talked about has been the furious real estate gambling. That could hardly be avoided with a country in the making. A correspondent of the London Times, writing from Montreal, says that one of the shrewdest bankers in Eastern Canada, when asked what would happen if the town site boom collapsed, replied: "Nothing, except that a good many people would find they were not so rich as they thought they were." That is wisdom. Neither a collapse in the town site boom nor a financial prostration, if the very worst did happen, could matter much to the real future of Canada.—New York Times Annalist.

GERMAN STEAMSHIP COMPANIES' FIGHT AND CANADA

In all probability the result of the quarrel that has broken out between the North German Lloyd and the Hamburg American Line, with regard to the division of the North Atlantic emigrant passenger traffic, will be to provide this fall additional facilities for the transportation of Canadian produce to German ports via Boston and Baltimore at low rates, reports Mr. C. F. Just, Canadian Trade Commissioner at Hamburg. Recently the former company announced its decision to put on a tri-weekly line of steamers between Bremen and Boston and New Orleans, thus invading the territory hitherto reserved by a mutual understanding to the rival Hamburg company. To this unfriendly act the board of the Hamburg American Line has replied, announcing its determination to run a service to Baltimore in opposition to the North German Lloyd's service to that port. It is not believed, however, that the conflict can possibly be of long duration, and that in the upshot the transportation situation will be improved.

◆

With the purpose of promoting the interests of British Columbia manufacturers and exporters, a manufacturers' association has been formed in Vancouver with the following officers: president, Mr. F. T. Cope; Mr. D'Arcy Rowe, honorary secretary; Mr. E. G. Baynes, honorary treasurer.

We cannot shut our eyes to the fact that we here in Canada will be large borrowers for a good many years to come, as large, no doubt, in the future as we have been in the past. Consequently it will be decidedly advisable to go slowly for a period in order that our credit may not be strained in those markets.—H. V. Meredith, vice-president, Bank of Montreal.

Preparations are being made for immediate work on the construction of the Canadian Northern Pacific Railway line on Vancouver Island from Patricia Bay to the union terminals at Victoria for which contracts were awarded recently. The same contracts cover the link of road between mile 4.7 out of Victoria and the union station. This link was left unfinished when the general construction work on the island was begun.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

1914 ANNUAL REVIEW

OF THE

Monetary Times of Canada

The Monetary Times Annual Review which has now been issued each year for forty-six years has become recognized not only throughout Canada, but in all countries which have investment and commercial interest in Canada as the most reliable, most complete and comprehensive source of information concerning the financial and commercial possibilities of the Dominion.

In many offices the Annual Review will be found as a work of reference and its value in this connection has been demonstrated over and over again.

While previous Annual Reviews have had wide circulations, our plans for the Review of 1914 insure a wider and more valuable circulation. Editorially, too, it will have new features introduced that will make it more useful and attractive.

In spite of these larger plans for editorial and distribution purposes, the advertising rates will remain the same as in previous years. All advertisements will be placed on right hand pages and opposite reading matter.

In order to insure your securing the best position, it would be well if we were to receive your order as early as possible.

The Annual Review has been endorsed by the leading business men and financiers of Canada. Read what a few of them had to say about the Annual Review of 1913:—

"The Annual number is a credit to The Monetary Times."—T. BRADSHAW, Toronto.

"The Monetary Times improves steadily, and has become a valuable document to the business world."—(SIR) EDMUND WALKER.

"I have seen the copy of your Annual Statistical Review and the outlook number of The Monetary Times. There is no doubt that this special issue contains a large amount of information that will be useful, not only at home, but in British and Foreign financial and commercial spheres. I congratulate you on its excellence."—(SIR) T. J. SHAUGHNESSY.

"The 46th Annual Review of The Monetary Times will, I am sure, be very much appreciated by business men and investors, as it affords a handy book of reference, dealing as it does with every important interest throughout every section of Canada."—C. R. HOSMER, Montreal.

"Allow me to congratulate you upon the splendid issue of The Monetary Times Annual. It is an exceptionally interesting publication, full of valuable information, and one which will no doubt be retained by business and financial men in their libraries for reference purposes."—G. T. SOMERS, Toronto, Canada.

"I am obliged for your favor of Jan. 8th, and for your kindness in sending me a copy of the Annual Statistical Review of The Monetary Times. From a glance through its pages it seems a very useful number and containing much information that makes it of value in financial circles." (SIR) RICHARD MCBRIDE, Prime Minister, Victoria, B.C.

"We earnestly hope that all the endeavours you make in such an interesting way to encourage the financial relations between the two countries will be crowned with success. It is to the mutual benefit of your beautiful country and Holland. If at any time we can assist you in any way we will be only too pleased."—L. D. FORTUYN, Managing Director, Netherlands Transatlantic Mortgage Co., Winnipeg.

"With reference to your letter of the 9th inst., I may say that I have received a copy of your Annual Statistical Review and am very much pleased with it. It is very full and covers an immense deal of ground, and gives information to the seeker of knowledge that is valuable, and which it would be almost impossible for anyone to gather together without an expenditure of a vast deal of time and effort. I think you are to be congratulated on the issue, and I have no doubt it will prove of great value to our own and British traders"—(HON.) GEORGE E. FOSTER, Ottawa.

"I have this morning received the monumental number of The Monetary Times, for which I am much obliged. I do not pretend to have read it all, but I have read enough to be able to congratulate you on having produced such a compendious and detailed record of Canadian progress and prosperity."—(LORD) DESBOROUGH

"Referring to your letter of 8th instant, I have now had an opportunity of perusing the contents of the Annual Statistical Review of The Monetary Times, and it affords me pleasure to congratulate you upon the production of such a valuable record of financial events in Canada during the past year. We will keep a copy on file for reference. The letterpress and general appearance of the number are excellent. Wishing your journal the success its high standing and excellent tone deserve, and with kind regards to you personally."—(SIR) F. WILLIAMS-TAYLOR.

"I wish to congratulate you on the issue of the Annual Review. It is even better than the one issued a year ago, although when that was issued I thought it would be no easy task to improve on it. Every interest is dealt with and the amount of information given on each interest leaves hardly anything to be desired. It is a valuable encyclopedia of commercial, industrial, banking, insurance, transportation, etc., etc., interests of the Dominion."—(SIR) W. WHYTE.

1914 ANNUAL REVIEW

STOCKS AND BONDS TABLE—NOTES

(u) Unlisted

† Canadian Consolidated Rubber Bond Denominations, $100, $500 and $1000. Steel Company of Canada, $100, $500 and $1,000. Sherwin Williams, $100, $500 and $1,000. Penmans, Ltd., $100, $500 and $1,000. Canadian Cottons, $100, $500 and $1,000.

‡ Quarterly.

All companies named in the tables will favor The Monetary Times by sending copies of all circulars issued to their shareholders, and by notifying us of any errors in the tables.

** Trethewey pays no regular dividend. They have paid:—1906, 4%; 1907, 4%; 1908, 15%; 1909, 25%; 1910, 10%; 1911, 20%; 1912, 10%.

Montreal prices (close Thursday) furnished by Burnett & Company, 12 St. Sacrament Street, Montreal.

* $20,000 of this was redeemed April 1st, 1913.

Figures in brackets indicate in footnotes date on which books close for dividends, etc.

(1) Sept. 15-Oct. 1 (2) Aug. 16-Sept. 17 (3) Aug. 30-Oct. 2

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt station for the week ended September 12th, 1913: Hudson Bay Mines, 62,540; Penn Canadian Mines, 55,860; Bailey Cobalt Mines, 40,000; O'Brien Mines, 85,868; Peterson Lake, 59,280; Cobalt Lake Mines, 64,080; La Rose Mines, 87,828; Cobalt Townsite Mines, 160,100; McKinley Darragh Mines, 245,270; total, 908,526. The total shipments since January 1st are now 28,051,141 pounds, or 14,026 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

CONDITIONS IMPROVING AROUND SASKATOON

Conditions in this district and generally all over the west are improving gradually, writes a Saskatoon correspondent to *The Monetary Times*. The good crop is restoring confidence, and at the same time seems to be loosening money that was held in reserve. Collections are also good considering this season of the year, the prospects for them being much better during the next three months.

◆

The following are the officers of the Winnipeg Grain Exchange for the ensuing year:—President, Alvin K. Godfrey; vice-president, S. T. Smith; secretary-treasurer, C. N. Bell.

FISCAL AGENT FOR REGINA SCHOOL BONDS

United States Competition for Our Municipals Not Regarded Seriously in London

The Bank of Montreal will be asked to act as fiscal agents of the Regina public school for the purpose of selling the remaining debentures issued by the board to the extent of $400,000 on the market. The board dealt with a communication from Messrs. A. E. Ames Company, of Toronto, which, while it did not exercise the option that concern had on the remaining $400,000 worth of debentures, asked for a reduction of three points in the price and a renewal of the option for a week at the figure. An offer was also received from a New York bond house.

United States Competition for Bonds.

The movement to secure a really competitive United States market for Canadian bonds is being watched with apparent complacency in London, says a Windermere cable. Surprise, however, is expressed that the Toronto Electric Commission managed to get only 83 from an American financial house for $4,220,000 worth of its excellent four per cents. The London average price for a group of Canadian fours exceeds 93.

Saskatoon's city commissioners recommend the adoption of a local government board, for the province to supervise municipal bond issues, etc.

City of Prince Albert £102,700 4½ per cent. debentures, in lieu of scrip, has been listed on the London Stock Exchange.

The Toronto city council has guaranteed $1,500,000 Toronto Harbor Commission bonds.

Housing Company's Debentures.

At a meeting of shareholders of the Toronto Housing Company, called for Friday, September 26, a by-law will be submitted to authorize the issue and sale of $850,000 debentures of the company.

Changes in Canadian securities during the past week occurred as follows:—

Newfoundland consols, inscribed 1952, 90 to 92.
Province of Quebec, inscribed 1937, 3 per cent., 79 to 81.
Toronto, redeemable 1929, 3½ per cent., 86 to 88.

Canadian land shares have shown a better tendency. Southern Albertas have risen 2s. to 18s.; Western Canadas, 1s. to 17s.; Canadian Wheat Lands, 1s. 6d. to 13s.

DEBENTURES AWARDED

Westmount Schools, Que.—$50,000 5 per cent., to Messrs. Hanson Brothers, Montreal.

County of Halton, Ont.—$40,000 to Messrs. C. H. Burgess & Company, Toronto.

Brampton, Ont.—$31,000 6 per cent. 20 instalments, to Dominion Securities Corporation, Toronto.

Lachine, Que.—$50,000 to A. S. Johnson, $181,000 to J. A. Mackay & Company, Montreal; $25,000 to Phœnix Insurance Company, Montreal.

WANTS PULP AND PAPER INDUSTRY.

A pulp or paper industry at Bear River, N.S., would well repay capital investors, writes Mr. W. E. Reid, secretary of the Bear River board of trade, to *The Monetary Times.*

OPPORTUNITY FOR CAPITAL.

A number of companies have been formed, in Prince Edward Island, to develop the vacant oyster bottoms, under lease from the provincial government on an extensive scale and these are looking for both British and United States capital to assist them in their work, writes Mr. McCready, of Charlottetown, to *The Monetary Times.* This industry is a promising one, as the island claims to have the best native oyster in America and 100,000 acres of oyster bottoms awaiting replanting and restoration.

◆

The Grand Trunk has added to its equipment nineteen Mikado type locomotives and five steel mail cars, which have been distributed for service on different parts of the line in Canada.

Barrie, Ont., is considering tenders which were received for its recent issue of debentures, and Sandwich, Ont., is awaiting for an improvement in the municipal bond market before disposing of the block it has for sale.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Estevan, Sask.—Twelve shortage by-laws, approximating $120,000, were carried.

Sounding Creek R.M., Alta.—The council has been authorized to borrow $15,000.

Marquis R.M., Sask.—The council has been authorized to borrow $3,000. F. E. Hurd, secretary-treasurer.

Rhein Village, Sask.—The council has been authorized to borrow $2,000. Dr. J. Bruce, secretary-treasurer.

Bushville R.M., Sask.—This municipality has an issue of bonds for disposal. J D. Gratton, secretary-treasurer.

Elma R.M., Sask.—The council has been authorized to borrow $6,000. Secretary-treasurer, S. Finley, Dewar Lake.

Willow Creek, R.M., Ont.—The council has been authorized to borrow $4,000. S. Smith, Star City, secretary-treasurer.

Selkirk, Man.—Up to Monday, September 22nd, for $11,000 5 per cent. 25-year debentures. T. Partington, secretary-treasurer.

London, Ont.—By-laws dealing with electrification, storm sewers and the West London breakwater will be voted on during October.

Kamsack S.D., Sask.—Tenders are invited for $15,000 6 per cent. twenty instalment debentures. A. A. Crawford, secretary-treasurer.

Welland, Ont.—Up to October 20, for $60,000 5 per cent. 30 year school debentures. J. H. Burgar, treasurer. (Official advertisement appears on another page).

Alsask, Sask.—Tenders will be received for $6,000 20 instalment debentures. J. L. Spicer, secretary-treasurer. (Official advertisement appears on another page).

County of Middlesex, Ont.—Up to October 10th for $25,000 5 per cent. debentures. A. M. McEvoy, county treasurer, London. (Official advertisement appears on another page).

Maryfield, Sask.—Tenders are required for $1,700 15-year 7 per cent. debentures. E. L. Anderson, secretary-treasurer. (Official advertisement appears on another page).

Jeanne d'Arc S.D., Man.—Up to September 25th for an issue of 7¼ per cent. ten year debentures. A. Balez, secretary-treasurer. (Official advertisement appears on another page.)

Thibeault R.C. S.D., Alta.—Tenders are invited for $14,000 6 per cent. 20 instalment debentures. J. B. Dalphond, secretary-treasurer, Morinville. (Official advertisement appears on another page).

Victoria, B.C.—The early submission to the ratepayers of a by-law to authorize the expenditure of an additional $1,500,000 wherewith to complete the Sooke Lake waterworks scheme has been decided on by the city council.

Brantford, Ont.—The propaganda for a new city hall in Brantford has been deferred owing to existing financial conditions, although the civic treasury has a bank balance of approximately $100,000, accumulated from the sale of city lands.

Winnipeg, Man.—The city council has passed a $13,000,000 by-law for the construction of a water system from Shoal Lake. Voting will take place on this by-law October 1st. A by-law granting $275,000 to the Winnipeg General Hospital also has been passed.

WILL SELL BONDS IN NEW YORK

The city of Vancouver has authorized the comptroller to dispose of $800,000 worth of local improvement bonds in New York. The fifteen and twenty-year bonds will sell at 87, while the ten-year will bring 90.

MADE-IN-IRELAND TRAIN

The Canadian Press states that a made-in-Ireland train, under the auspices of the Irish chamber of commerce, is to tour Canada.

Specimens of Irish manufactures will be transported from Belfast to Quebec by way of Empress steamers from Liverpool. At Quebec a Canadian Pacific Railway train, consisting of ten sample cars, will be fitted up with exhibits, and sent for a trip over three transcontinental railways as far as Calgary, returning via Montreal and St. John, N.B.

At the latter port the exhibits will be reshipped for Liverpool and Belfast. The round trip, it is estimated, will cover about 12,000 miles, and will take up from 75 to 80 days. Arrangements have been made with the Canadian Pacific Railway that the cost of each car shall include all expenses of the entire trip from and to Belfast, including maintenance charges for four attendants allowed to each car.

CANADA AND SOUTH AMERICAN MARKETS

Canada is finding its way into the South American markets. Mr. H. R. Poussette is making an extensive tour of the Latin American Republics on behalf of the Department of Trade and Commerce, Ottawa. His second report has just been received and deals with the trade of Peru, Bolivia, Ecuador and Panama. The difference between the Atlantic and Pacific coasts of South America, from an economic and commercial standpoint, is, he says, most striking. On the one there is great enterprise, progress and immense wealth which gives a large buying power; on the other everything is on a small scale. There is little money, little enterprise, little progress, and small prospect of rapid improvement. From this comparison, Chile is excluded. That Republic, as stated in a former report, is exhibiting the early signs of a vigorous growth. One reason for this state of affairs is, perhaps, that the countries on the west coast have not had the advantage of the millions of immigrants which have poured into Argentina, Uruguay and Brazil, nor of the vast sums of capital which has been invested in those three states. Up to the present there has not been sufficient to attract them.

Mr. Poussette, during his travels, has kept a special lookout for Canadian articles, and reports that he has found a few. The best known is the Massey-Harris machinery which has made a good name for itself in Chile. Canadian windmills, ploughs, one or two industrial machines, a few tools, were also found there, and an occasional shipment of lumber and paper is also imported. To Bolivia, nothing beyond some chairs, brooms and wooden goods seem to have been exported. The importer, who had handled them, expressed himself as well satisfied with the articles, and wished to have more but for some reason he seemed to have found some difficulty in gratifying this desire. Peru takes an occasional shipment of lumber, but nothing else comes to mind at this moment. In Ecuador, Canadian flour is finding a market, and bids fair to rival the United States product, if indeed it does not eventually drive it out, or at least from that portion of the trade which buys quality and not the cheap low-grade article which is obtained in California and the Pacific coast of the United States. In Guayaquil, some Canadian tools were also seen, but as they had but recently arrived no report on them was obtainable. Panama is now purchasing Canadian flour, and also small quantities of silver-plated ware and a patent automobile tire cement.

As Mr. Poussette notes, the total trade of Canada at present is small, but it is capable of some expansion, and even if the commerce of the four republics mentioned is comparatively unimportant, it is something of a satisfaction and an advertisement as well, to be strongly represented. It is also worth while bearing in mind that events in Latin America move quickly, and progress may come in a shorter time than would seem possible to the average Anglo Saxon. Conducted on sound lines, the republics under review are capable of no little expansion, but owing to the effects of certain fundamental characteristics in the people, the process from present indications appears likely to be a slow one.

At present, taking conditions in the Dominion and South America into consideration, the commodities offering the greatest promise for early success are lumber and flour, with agricultural implements and machinery, but these last in Chile only. Those interested in the South American markets will do well to peruse carefully the two reports which Canada's special commissioner has made. In view of the opening of the Panama Canal, which event should occur in 1915, the cultivation of these markets is the more important.

UNITED STATES CAPITAL IN CANADA

The revised estimate of *The Monetary Times* of the amount of United States capital invested in Canada is being prepared. Preliminary information and statistics show that the amount is now at least $599,000,000, as compared with $279,000,000 in 1909, and $417,000,000 in 1911.

Over $150,000,000 is in the shape of branch factories and warehouses of United States manufacturers, while nearly $124,000,000 have been invested by the United States in Canadian government, municipal and industrial bonds since 1905.

United States life and fire insurance companies have $67,000,000 invested in the Dominion, while over $130,000,000 is invested in British Columbia mills, timber and mines.

Investments in the prairie provinces are in lands, mines, packing plants, factories and warehouses.

EMIGRATION AND IMMIGRATION

The Monetary Times, whose attitude has always been one of the greatest friendship for the western provinces, recently cited some figures furnished, by the way, by a western Canadian, respecting emigration from Canada to the United States, suggesting that everything possible should be done to keep our farmers on Canadian soil and appealing for greater agricultural production. The figures and suggestions brought protest, loud and strong. The Winnipeg Telegram gravely hinted that *The Monetary Times* might be "a party to the propaganda, engineered by certain politicians in the west," and that it should clear itself of "the unwholesome suspicion." A correspondent wrote stating there was no need to print the article "even if it is true, because it is detrimental to the west."

It is unnecessary to deny participation of *The Monetary Times* in that political intrigue. As for Western Canada, it is big, strong and sane enough to face its problems. Regarding the figures quoted, their authority was given. But the Manitoba Free Press has some comment upon them and other figures which we are glad to print here. It sets forth these statistics:—

Population of Canada, 1901 (government census)	5,371,315
Immigration, 1901-1911 (government statistics)	1,845,679
Natural increase, 1901-1911 (arbitrary estimate)	650,000
	7,866,994
Population, 1911, (government census)	7,204,838
To be accounted for	662,156

Our contemporary continues: "Various suggestions have been made to account for this loss. By some it has been said that the census was faulty and that the real population of Canada was larger in 1911 than the figures show. There is undoubtedly some truth in this statement. It is certain that the men who took the census did not enroll the total population. It is, however, improbable that a large number of the citizens of Canada were missed and fair minded men would probably admit that the census was approximately correct. Another explanation of the loss is suggested in the statement that the counting of the incoming immigrants is inaccurate and that the actual number of people entering Canada as permanent residents was less than the officials of the department of immigration state. Anyone who is familiar with the manner in which this work is done is aware that there is not much in this suggestion. Immigrants entering Canada are carefully counted. Money is freely provided for this purpose, and the work is done as thoroughly as human agents can be expected to do it. The only matter worthy of comment at this point is that numbers of immigrants do not report themselves truthfully to these officials of the government. They assert that they are to be permanent residents of the country when such is not their real intention. Their stay in Canada was never intended to be of a permanent character and does not prove to be permanent. The officials of the department, however, cannot go behind the statement of the traveller and these people are counted as permanent residents.

"After making allowance for these two factors in the case, it is still necessary to deal with the fact that a considerable number of people who might have continued to live in Canada left Canada during the decade referred to, for other countries. Numbers of young men born in Canada have been attracted to the large cities of the United States. Many young immigrants from Great Britain and Europe, who were in Canada for a period, passed over into the United States. Many immigrants return to Great Britain and Europe.

"Having admitted so much, it may be allowable to state the other side of the case. The chief thing to be noted on the side favorable to Canada is the fact that in spite of the inevitable losses the population of Canada during the decade increased over 34 per cent. This increase is entirely satisfactory. It compares quite favorably with the increase of the population of the United States at this same period of its development.

"It may also be said that at no time in the decade referred to was there a considerable movement of farmers of Western Canada into the United States."

The Monetary Times is pleased to accept that statement which doubtless is authoritative. When a special report was made on Canadian immigration a short time ago, it was said, we believe, that no proper statistical records were kept by Canada of the people leaving this country for the United States. Would it not be well, as a matter of record and of satisfaction, to know how many people actually leave this land (however few) and their occupation? Even should only three farmers migrate in one year, would not their reasons for so doing, which should not be difficult to obtain, make good economic and nation-building material? Canada needs the greatest possible agricultural production, and it is not helped by blinking any of its problems.

HOW TO MARKET PRODUCE

In his address to the Political Science Association at Ottawa, Mr. F. H. Coats, of the Department of Labor, afforded matter for serious thought. He discussed the role of the middleman and the position of several of our common Canadian foodstuffs, outlining the prominent features in the trade in them with special reference to crucial points in their progress from producer to consumer.

It is interesting to examine briefly some of his illustrations. A short time ago, for instance, Mr. Coats noticed that cheese was bringing thirteen cents on the Brockville board. On the same day in Montreal the wholesale price ranged from thirteen to thirteen and one-quarter cents, say $14.70 per cwt. of 112 pounds, this representing the price paid the farmer plus freight and other charges. In London, England, on the same date Canadian cheese ranged, wholesale, from sixty-four to sixty-six shillings per cwt., say a dollar higher than in Montreal. With a penny half-penny profit this cheese could be retailed in London at the equivalent of seventeen cents a pound, yet it would have been difficult to find a shop in Montreal on the same day in which it was selling at less than eighteen cents a pound. The Labor Gazette correspondent quoted it at twenty cents in a workingman's store, and this is probably the "typical" price.

The importance of this to the Canadian consumer is apparent. It is scarcely less important to the producer. Cheese is so valuable and so popular a food that a very little permanent cheapening of it would greatly increase the nearby demand and thus give the farmer a bigger and a better market.

Dealing with eggs, it was shown that the consumer in the Canadian city is paying anything from 50 to 100 per cent. more for his eggs than the farmer in the country receives. Mr. Coats traced the handling of eggs from the farmer to the consumer and reminded us that to the farmer an egg is an egg, large or small, dirty or clean, sound or cracked, old or new. So, likewise to the country storekeeper and the owner of the country egg wagon, one egg is very like his brother. Only when the large dealer is reached does the instinct of discrimination awake. Here the eggs are candled, and divided into grades—"strictly fresh," "fresh," "new-laid," and "eggs." The fact is the large dealer has got to exercise discrimination, for it is he who first comes into distant sight of the consumer with whom in the final analysis it is difficult to practice concealment if the egg is bad.

That the large dealers meet weekly in our cities and agree upon the price of eggs and other things, this being broken only under unusual circumstances, is not the fact Mr. Coats would adduce as cause for the spread between producer and consumer, though it may look suggestive. The incontestably bad feature in the case is the practice of not buying from the outset on a quality basis. It makes a gamble of what should be a perfectly four-square transaction. It encourages carelessness and inefficiency both in producer and middleman. What incentive has the farmer to prompt gathering and marketing, or to care in securing against fertilization, and what incentive has the country storekeeper to place the eggs where they will be cool and safe against the day of shipment?

Mr. Coats dealt with the production and marketing of fruits, vegetables, milk, butter, cheese, meats, cereals, flour, bread and several other commodities. In almost all cases, he revealed a serious looseness in marketing methods as they extend from the producer to the consumer. In some instances, the grower may get the better of the system; in others, the middleman; in others, another handling factor, but seldom the ultimate purchaser. Mr. Coats suggests an inquiry into the subject, an excellent idea, and thinks that this ought not to proceed so much by branches of trade as by the steps of the distribution process.

Discussing the transportation phase, he asks whether the public is benefiting as it should from the wonderful advantages in railroading efficiency of the past few years, during which the capacity of a box car has increased by a half and the length of trains by two or three times, to say nothing of refrigeration. Mr. Coats concluded his paper with a reiteration of the plea for more facts and of the suggestion that the Political Science Association encourage in any way it can the gathering of them. Probably 40 or 50 per cent. of the income of the average city is spent for food. In the average city there is only an individual here and there now who knows anything in a general way of whence and how the food supply is collected. A bill passed the United States Senate some time ago to provide for a Bureau of Markets. Its purpose was to save the billion or so dollars' worth of farm stuff that is estimated to go to waste annually in the United States from bad marketing methods. Whether such a Bureau, had it ever been formed, might not have been crushed at birth by the mere contemplation of its opportunity, the fact remains that our handling of the distribution problem is a touchstone of our efficiency as a nation.

Much has been done in Canada to show the farmer how to raise and increase his crops and products. Little is being done to help him to market them advantageously. Therein is excellent scope for a government inquiry and the construction of a proper marketing system.

AUDITORS FOR THE BANKS

The panel of accountants elected by the bank managers and approved by the finance minister, from whom bank shareholders may select an auditor, has aroused considerable discussion among accountants. *The Monetary Times* has received several communications on the matter. It is pointed out that in the Dominion Chartered Accountants' Association there are over 350 members and that one-third of the panel from which the shareholders may choose are to represent foreign firms and of over 350 names, the banks may choose from less than forty, allowing for the names of those who are not chartered accountants. However that may be, there seems to be considerable justice in the argument of several accountants that in the panel, individual firms should rank as only one name, and not eleven firms as forty-one names.

BANKING AND FARMING

The banks have refused the detailed information, as to their loans and deposits in Saskatchewan, requested by the Royal Commission on agricultural credits appointed by the Saskatchewan government. This province is taking considerable interest in the subject. It had two representatives on the American commission which recently toured Europe as did also Alberta and Ontario. The Saskatchewan commission is now gathering information within the boundaries of the province. The banks are not required by law to give the information requested by them, which is as follows:—

> The aggregate amount of deposits in current accounts month by month since September 1, 1911, in the branches of each bank in Saskatchewan.
>
> The aggregate amount of loans month by month since September 1, 1911, made by each bank in Saskatchewan.
>
> The amount of farmers' deposits in current accounts month by month during the same period, and in the same territory.
>
> The amount on loan to farmers month by month during the same period.
>
> The amount on deposit in the savings department of each bank month by month during the same period, for all Canada.
>
> The amount on deposit in the savings department of each bank month by month during the same period for Saskatchewan.

Several of the banks have decided not to give these details to the Commission, although they will probably afford information as to the proportion of loans to deposits in the province, which is really the essential information. The loans of one bank in Saskatchewan, it is said, were $1,452,000 in excess of deposits. There are twelve branches of this bank in the province, and of these, the manager stated, five were operating at a loss. The bank, was considering closing two of them, because there was not sufficient business for them. Another bank stated that its loans in Saskatchewan were 100 per cent. in excess of deposits.

At the end of 1912, there were 325 bank branches in Saskatchewan. The bank clearings for the province in 1910 were $59,000,000; in 1911, $176,000,000, and in 1912, $294,000,000. Probably the Saskatchewan Commission will find that Western Canada is a heavy borrowing country and that the major part of the chartered banks' business in the west, especially in Saskatchewan, a great province in the making, is lending money and not receiving deposits. The frequent talk of draining the west of its funds and loaning them in New York is obviously nonsense. Few people know that better than those who live in the west.

The Monetary Times supports any proposal which will help finance the business-like farmer. The information gathered by the Saskatchewan Commission will prove of interest in that regard. It is to be hoped that the Commission will not overlook a phase of the subject which is well known to the bankers and others who loan money and to the farmers concerned,—that is, some farmers have to complain of the lack of funds and of facilities in obtaining them, because by their lax methods they have shut the doors to new loans. The type to which reference is made is reflected in the letter printed in *The Monetary Times* the other week, and written by a Saskatchewan farmer. In refusing to pay the interest on his mortgage this year, he told the loan company that if they were not satisfied with the way he was running their property, they could go out to Saskatchewan and run it themselves. The type is further illustrated by the following statement of a western banker. "I am satisfied in the majority of cases, where crops do not come up to the average, it is lack of knowledge, industry and method, or poor management on the part of the farmer." Agriculturists who run their farms in a business-like way, we believe, do not complain frequently about banking facilities.

SMALL CHANGE

Now is the time to buy bonds.

* * * *

Of all the words of tongue or pen, the saddest of all "It's graft again."

* * * *

Tight money came with tight skirts. They are talking hoop skirts now.

* * * *

The Owen-Glass currency bill looks as though it may yet need plate glass insurance.

* * * *

The first signs of New Year are preparations for *The Monetary Times* Annual Review.

* * * *

Premier Sifton, of Alberta, has had enough of railroad puzzles as political presents.

* * * *

A bad cheque was given at Windsor, Ont., to pay a court fine—concentrated impudence.

* * * *

Labor Federation objects to use of militia in strikes. Citizens should turn the other cheek.

* * * *

Life insurance is a necessity. It will help to solve the cost of living problem in future days.

* * * *

Apparently the only difference of opinion between east and west on the steel tariff, is a vowel.

* * * *

Saskatoon has sold bonds in Cincinnati and the citizens are asking if the mayor was ever there.

* * * *

Men may come and men may go but Spanish River runs up and down, and mostly down, forever.

* * * *

The countenance of the West is changing from cloudiness to smiles and soon will come the broad grin.

* * * *

The idea of a national association of boards of trade for Canada is good. Its formation should not be delayed.

* * * *

Ottawa's £189,600 loan of 4½ per cents. was oversubscribed this week—cents which are financially aromatic.

* * * *

Those complaining of investment bargains and no money to buy them, forget the reason creating the bargains.

* * * *

In Prince Edward Island, they catch a black fox, shove it under a box, issue bonds and stocks, and steer clear of the rocks.

* * * *

They have found a discrepancy at Boston of $50,000,000 in railroad finance. How much better they do things in the States!

* * * *

Correspondents should spell Canada in full. Montreal, Can.; Winnipeg, Can., etc., looks as if we were really going to the dogs.

* * * *

There will be such pressure of traffic on Panama canal twenty years from now that United States will be compelled to rebuild the waterway, according to Captain Bunau-Varilla, of Paris, who negotiated sale of rights of De Lesseps Company to American government. That is the worst of living on a continent of growing pains.

THE TELLER.

The journal of the Sterling Bank is not for general circulation as suggested in a previous issue of *The Monetary Times*, but is supplied only to members of the Sterling Bank staff.

◆

CANADIAN BANKERS' ASSOCIATION AT WINNIPEG.

Several general managers of Canada's chartered banks were in Winnipeg for the Canadian Bankers' Association annual meeting, which was held in the board room of the Union Bank. In the evening a dinner was given at the Manitoba Club.

The president of the association, Mr. D. R. Wilkie, of the Imperial Bank, stated he is well pleased with the western financial situation. Matters of interest that came before the association in the form of papers were:—"The Saskatchewan Royal Commission of Enquiry," "Municipal Acts and Borrowings of Western Provinces" and "Provincial Taxation."

VIEWS OF WESTERN CONDITIONS.

Mr. W. S. Dinnick, of the Standard Reliance Mortgage Corporation, has returned to Toronto, from a five week's trip west. "I have not been in the west for ten years previous," Mr. Dinnick said, "so you can readily imagine the changes which have taken place. The west has practically been made within that time."

"I found that the farmers are beginning to realize the necessity of better farming. All over the country the weather has been propitious and the amount of land in summer fallow is the best evidence of another bumper crop next year. I also found out that the crops of 1911 and 1912 had made the farmer more careful and he is much less in debt to the storekeeper and others this year."

"It is the opinion of those who have a knowledge of the facts that it is the best crop the west has ever had. This crop is going to bring in a great quantity of new money—the unborrowed kind—but the west owes a lot and it needs a lot. However, the turn has been made, and we are now travelling toward better times, and the present conditions in the west will soon be history. While the west is tossing sheaves it is also flinging aside obstacles in the way of another long period of good fortune."

MANUFACTURER DISCUSSES BANKS AND BANKING

Says They Deserve Credit for Way They Have Handled Situation—Bank Stocks

Since the commencement of the financial stringency, a good deal of criticism has been levelled against the Canadian banks for their alleged failure to provide the funds necessary for the business of the country. From a wide acquaintance of men engaged in commercial pursuits and in large industrial undertakings, Mr. R. S. Gourlay, president of the Canadian Manufacturers' Association, is convinced that not only are these criticisms in the main uncalled for, but that, on the contrary, the banks are deserving of much credit for the successful manner in which they have handled a difficult situation. "To say that they have refused to provide money for speculative ventures, or for the financing of new enterprises, is to acknowledge that they have chosen rather to reserve their resources," continues Mr. Gourlay, "so as to be the better able to take care of legitimate business. And this, I believe, they have done, and done well, for, with one or two exceptions, where special considerations may have necessitated a curtailment of credit, I have yet to hear of a good business, manufacturing or otherwise, that has not been provided with what money it actually needed.

Inability to Increase Credit.

"All of us are perhaps more or less prone to depend upon the banks for money that should go into our businesses as paid-up capital, and those who may have felt disposed to complain because of their inability to increase their line of credit, should remember that the alternative course is often the more logical one.

"From now till the first of January our banks will require to provide in the aggregate a sum sufficient to purchase a grain crop in the west valued at $200,000,000. For the general welfare of the country it is imperative that the farmers be paid in cash in order that liabilities may be liquidated as between them and the retailers, the retailers and the jobbers, the jobbers and the manufacturers. In my humble opinion it speaks volumes for the banking system of Canada that so large a sum will be provided for so useful, so necessary a purpose, with so little disruption to other business.

Banks Need More Capital.

"Far from criticizing our banks, I feel that our attitude should rather be to accord them a larger measure of financial support than we have been accustomed to give them in the past. The return on bank stocks at present quotations does not mark them out as attractive when compared with other channels of investment, nor have they grown in popular favor since the shareholders in certain institutions, now defunct, were called upon under the double liability clause of the bank act. Yet in a growing country like Canada banks as well as factories need more capital, and I am hopeful that the new act, with its wise provision for an independent audit, will have the effect of inspiring fresh confidence in those that remain, and so pave the way for their expansion and continued prosperity."

◆

BANK OF ENGLAND STATEMENT

The weekly statement of the Bank of England shows the following changes:—

Total reserve, decrease	£1,289,000
Circulation, decrease	37,000
Bullion, decrease	1,325,852
Other securities, increase	1,306,000
Other deposits, decrease	662,000
Public deposits, increase	609,000
Notes reserve, decrease	1,253,000
Government securities unchanged.	

The proportion of the bank's reserve to liability this week is 58.34 per cent.; last week it was 60.75 per cent.

Rate of discount, 4½ per cent.

◆

WHAT BANK STATEMENT SHOWS.

The bank statement for August, says a despatch from Ottawa, will indicate fairly healthy business conditions throughout the country. Deposits will show an increase of five millions over the July figures, and other features will be satisfactory from a business standpoint.

IGNORANCE CAUSED LAPSE OF MANY LIFE INSURANCE POLICIES

Speakers at Underwriters' Convention Demand Better Publicity of Life Insurance Benefits

"Advertising in life insurance is the only antiquated feature of our business," said Mr. H. H. Ward, of Portland, at the National Association of Life Underwriters' convention at Atlantic City. This view was shared by other speakers, who indulged in strong criticism of the life insurance corporations of America, with aggregate assets of $4,404,000,000, for making no concerted effort to promote public confidence and discourage suspicion, through publicity. "If the actuarial departments of the companies were conducted on the same basis they would soon go into bankruptcy."

Want a Vigorous Campaign.

Mr. Warren M. Horner, of Minneapolis, presented a report from a special committee, urging the necessity of a vigorous campaign in support of the education and conservation movement, and expressed regret that little progress had been made during the past year.

"Big business houses of the country are spending hundreds of thousands of dollars to teach better farming methods, but next to nothing is being done to educate the public to the importance of life insurance," stated Mr. Jules Gerardin, of Chicago. "Seven million policies, representing twelve billions of protection for families are now in force, but 359,000 policies, the value of which was $642,000,000, were permitted to lapse during the past year, thus depriving thousands of widows and orphans of protection through ignorance or misunderstanding."

Attitude of Daily Press.

He added that there was need of a systematic campaign of publicity, supported generously, not by the agents, upon whom the expense of publicity now falls chiefly, but by the companies, many of which are doing little to promote the conservation movement.

The speaker said that the attitude of the companies toward the daily newspapers and publicity was largely accountable for the fact that during a coincident meeting of distillers and insurance men in a big city the distillers, whom he characterized as "manufacturers of widows and orphans," were given a page with pictures while the insurance convention was barely mentioned. He pleaded for intelligent institutional advertising.

◆

WHEAT AND WESTERN CONDITIONS.

Monetary Times Office,
Winnipeg, September 23, 1913.

Satisfactory conditions are prevailing all over the west for threshing, and work in this connection is ahead of last year. The grain is now pouring into the country elevators and the inspections passing Winnipeg run to about one thousand cars a day. The railways seem to be in good condition for handling the crop and the Canadian Pacific Railway has announced that it started the season with 40,000 cars, 1,171 engines to handle the grain of the company's western line. This is an increase over last year of 5,000 cars and 100 engines.

Crop estimates vary from around 175,000,000 bushels of wheat to as high as 220,000,000 bushels. It is thought, however, by conservative men, that the yield of wheat will be in the neighborhood of 200,000,000 bushels. Mr. Thompson, president of Thompson Sons and Company, who has been in the grain business in Winnipeg for many years, places the wheat output at about 200,000,000 bushels. Mr. Frank O. Fowler, secretary of the North West Grain Dealers' Association, figures the yield at 176,920,000 bushels.

There is improvement reported from all over the west in regard to collections, the harvesting of the crop is beginning to make its effects felt.

A representative of *The Monetary Times* went over the Grand Trunk Pacific line from Winnipeg to Saskatoon and found conditions everywhere improving. At Rivers, Manitoba, a good average crop has been reaped and the town is progressing in a substantial manner. Several new buildings are going up and merchants and the business men generally, are very optimistic about the future. At Melville, Saskatchewan, the crop has been the best in five years and the present conditions are good. Melville is one of the progressive towns in the west and has gone ahead rapidly. This year the Merchants Bank have erected a new building, a town hall has been built, a college, a new church, a theatre, a three-story business block and a large number of residences. The president of the board of trade at Melville reports that business conditions are favorable and the outlook for the coming year bright.

UNITED STATES STEEL CORPORATION HAS BIG CANADIAN BUSINESS

Company Has Excellent Selling Organization Here—Canadian Manufacturers Want Revision of Steel Tariff—They Appeal for Upbuilding of Primary Rather Than Secondary Industries

The United States Steel Corporation is obtaining a strong foothold in Canada and is getting more business here than is generally known. This fact is recalled by the application of the United States Steel Products Company, to do business in Manitoba. The United States Steel Corporation is already doing considerable business in Canada through the Canadian Steel and Wire Company, the Central Steel and Wire Company and the United States Steel Products Company.

The Canadian Steel and Wire Company has a comparatively small plant at Hamilton, Ont., under the management of R. S. Ryder, which has up to the present time manufactured practically nothing but farm fencing. The Central Steel and Wire Company was incorporated in Canada late in 1912, with Mr. J. L. Sharkey as president. This company has a branch at Montreal and will likely soon establish branches at Winnipeg and Vancouver. It has the sole agency for Canada for the triangular mesh concrete reinforcement made by the American Steel and Wire Company. The head office is at Toronto.

The Canadian sales offices of the United States Steel Products Company are in the Bank of Ottawa Building, Montreal; at 220 King Street West, Toronto; in the McArthur Building, Winnipeg; and at 46 Beach Avenue, Vancouver. The head office of the company is in the Hudson Terminal Buildings, New York City. The chief products sold are those of the Carnegie Steel Company, the American Steel and Wire Company (with the exception of the mesh that is handled by the Central Steel and Wire Company), the American Bridge Company, the Illinois Steel Company, the Lorain Steel Company and the National Tube Company.

Sales Force at Montreal.

The Montreal sales force is divided into two departments, the wire department being managed by Mr. Geo. A. Childs and the steel department by Mr. C. B. Rittenhouse. The wire department sells the nails and other wire products, excepting the mesh of the American Steel and Wire Company. The steel department specializes on the products of the Carnegie Steel Company and the National Tube Company. The Toronto sales force specializes on the products of the Lorain Steel Company and the Carnegie Steel Company. Frederick C. Bruncke is the Toronto manager. Of course, in addition to the lines in which they specialize, every attention is given by all four offices to inquiries for any of the other products of the United States Steel Corporation. The principal sales up to the present time have been of structural steel shapes, steel sheet piling, steel pipe, nails and other wire products, bars and rods.

Subsidiary Canadian Company.

As is known, the United States Steel Company has formed a subsidiary company for Canada and has obtained a Dominion charter. The capital of this concern, the Canadian Steel Corporation is $20,000,000. It was organized in order to meet in a more satisfactory manner the growing demands of the Canadian trade for the products of the subsidiary companies. The manufacturing plant in Canada will be established on the site which the corporation secured some years ago at Ojibway, Ont., opposite Detroit, Mich. The site consists of about 1,500 acres with a frontage of about a mile and a half on the Detroit River. The plans for and the scope of the construction of the plant has not been fully developed, but will probably include blast furnaces, open hearth steel works, nail mill, wire mill, structural and bar mills; and perhaps some other mills. The cost of the plant will probably be financed in part by an issue of bonds.

Plans for this plant are not yet completed and it is not thought that it will be possible to break ground this fall, in which case building operations will be postponed until the spring of 1914. Nothing has yet been done regarding the flotation of a bond issue for building the plant. When the announcement of the corporation's intention was made, it was intimated that such an issue would be likely, and in spite of the large earnings reported by the corporation this year, which would be ample to permit of an appropriation for constructing the new plant, it is still thought that the directors will favor meeting the building expenses from bonds rather than from earnings.

Mr. James A. Farrell, a director of the United States Steel Corporation in testifying as to the corporation's export trade in the recent United States Government suit, referred to the Canadian business in part as follows:—

"Through Montreal we sell about 60,000 tons of wire product a year, sheet iron, mine rails, and sometimes standard rails, when they cannot be supplied by their own corporations. We are now supplying the Canadian Northern Railway with 25,000 tons of rails shipped by boat from Chicago and thence by rail to Calgary, where they cost $47.13, delivered.

"At Vancouver we supply much material, but the freight rate from Pittsburgh there is $18 a ton. Material from Liverpool or Antwerp may be shipped for $6 to $8 a ton. After we established our office there we found it necessary to run a steamship service there. Our ships leave about every two months, making stops all along the line. On the return we go into a general merchandising business. The steamships come back sometimes laden with chalk, and just at present we are bringing a load of tin plate. We own four ships and we charter two more. The round trip takes from six to eight months."

Speaking of export business into Canada, he said that the Canadian preferential tariff in favor of British rails prevented United States manufacturers from selling that product there at a profit. The duty on United States rails is $7.84 a ton, he said, and on British $5.94.

Of a Curious Story.

A story has been heard to the effect that the United States Steel Corporation does not actually intend to build a Canadian plant, but that its announcements on the matter are more of a threat as to what may be expected if the Canadian tariff on steel is changed. In short, it is asserted that if the tariff remains as it is, the United States Steel Corporation will not build a Canadian plant, but if the tariff is revised to favor Canadian manufacturers, the plant will be erected.

Such a position seems most unlikely, firstly, because the United States Steel Corporation is apparently going ahead with its plans and has already purchased a large site; secondly, because Canadian steel manufacturers are in no uncertain way fighting for a revision of the steel tariff.

Anomalies of Steel Tariff.

In his address at the annual meeting of the Dominion Steel Corporation, at Montreal, in June, Mr. J. H. Plummer, president, said:—

"Although the Dominion Government has not hesitated to admit that the representations made to them respecting the absence of duty on wire rods, in particular, and the anomalies and in consistencies in the iron and steel tariff in general, are well founded, any effort to cure these defects and to place the industry on the same level as the others, has been postponed, as we understand, for another year. One of the questions on which this bears is our wire and nail business. It has always been our desire that we should make wire rods for the wire and nail manufacturers in Canada, but, as I have said more than once, if they are left on the free list we cannot take this business, and to utilize our rod mill must use the wire rods ourselves as raw material for our own wire and nail mills. These have been so constructed that their capacity can be more than doubled, at a very moderate expenditure, and I need scarcely say that with our advantages we are in a good position to compete for this business. There is, however, sufficient wire and nail machinery now in the country, and we would be well satisfied if the promised revision of the tariff removes the unfortunate and anomalous conditions which now affect the wire-rod industry. If not removed they must ultimately force us into competition with those whom we would rather have as customers.

"On the question of the tariff generally it must be a matter of great regret to everyone interested in the welfare of the country that we are importing such an enormous amount of stuff which could be made in Canada. The growth of our foreign indebtedness is cause for great anxiety, and these imports are contributing largely to this growth."

Mr. Thomas Cantley, of the Nova Scotia Steel Company, addressing the Canadian Manufacturers Association, at Halifax last week said:—"Both political parties in the Dominion are avowed supporters of the policy of moderate protection to home industry. That policy in the past has done much to create, foster and upbuild the various industries of the Dominion, but so far as the iron and steel industry is concerned, the present tariff is far from satisfactory. The iron schedule has been mutilated, and tinkered from time to time till it now bears no semblance to the original structure. The large range of exemptions covering the so-called raw material of one manufacturer which is the finished product of another has produced a condition of affairs which is now intolerable and as a result we see Canadian capital being utilized to assist and exploit German enterprise in a foreign country enabling them to dump their bounty-fed material on our shores in immediate competition with the output of our own workmen. This condition of affairs, I trust, will soon be remedied."

Want Primary Industries.

At the annual meeting of the Canadian Manufacturers Association last week, Mr. R. S. Gourlay, president, said:—"As at present constituted, the iron and steel industry is to some extent encouraging the establishment and expansion of what might be called 'secondary industries,' but it is far from adequate in the protection it affords to certain of the more basic branches of the iron and steel trade, where the investment in plant must necessarily be heavy and where volume of output counts for so much."

Mr. J. H. Plummer regards it as a lamentable feature that the strong tendency of the iron and steel tariff is to build up secondary industries in Canada, depending on foreign manufacturers for their raw material. "I am quite well aware," he adds, "that the Canadian plants cannot as yet cope with the great demand for iron and steel, but it is to be regretted that people in the business are deterred by tariff conditions from increasing the primary and basic lines of manufacture; that large secondary industries are growing up whose existence may depend on the maintenance of supplies of raw material entering at low duties, or even duty free; that these conditions will make it increasingly difficult to get the primary industries established in Canada. The outcome may be a condition of industrial dependence on foreign makers of pig iron and of steel in its earlier stages of manufacture, except in the case of a few concerns which start with the coal and ore and sell the product in wire, nails and other finished articles."

Canada's Steel Imports.

Taking iron and steel products alone, and counting only such as in our present state of development, are or should be made in Canada, our imports for the twelve months ended March 31st last amounted to 1,168,467 tons, valued at $28,331,349, as against 273,650 tons in 1909, valued at $7,234,116. This takes in only the less-finished articles, as the low average price shows. Taking the whole line of iron and steel and manufactures therefrom, excluding only automobiles, the increase is striking; the total in 1909 was $40,717,761 and in the year ended March 31st, 1913, $138,648,364.

ROYALTIES ON LUMBER

Legislation in British Columbia May Embody Lumbermen's Suggestions

(Staff correspondence.)

Vancouver, September 20th.

Investors in timber in British Columbia are opposed to the proposed increase of royalties and have submitted an alternative schedule of increases. At the last session of the legislature, a bill was brought down in which it was proposed to increase the royalties on January 1st, 1916, but owing to opposition from lumbermen the bill was withdrawn. The minister of lands and the chief forester are consulting with the lumbermen and it is probable their views will be embodied in the legislation to be enacted in the coming session. The proposals made are: no present increase on stumpage dues for No. 3 grades of hemlock, balsam and cottonwood, or low-grade cedar; an increase of 25 cents per thousand on Nos. 1 and 2 grades fir, spruce and cedar from 1916 to 1921; a further increase in 1921 of 25 cents; while in 1926 a general increase of 25 cents more be made, at which time it would apply to the No. 3 grades. These increase then to have effect until 1936.

Put Industry on Settled Basis.

It was pointed out that full development of the forest resource would not take place if stumpage on No. 3 grades was now exacted, as it would not pay to bring this timber out. Moreover, time should be allowed in making increases so that adjustments can be made by lumbermen. Timber legislation is now so unsettled that banks are turning down licenses and leases as collateral for loans, and the suggestion has been made that royalties and rentals should be fixed for a period of thirty years.

General conditions in British Columbia appear to be improving. Some concerns report money easier, and industries are not inactive. Some of the shingle mills have started operation again, and it is thought they are anticipating a revival of trade with the prairie country in view of the good wheat crop, which will bring in money.

Municipalities and Electric Lighting.

South Vancouver council has approved the proposition of establishing a municipal lighting plant. The cost is placed by the municipal electrician at $600,000 and would be revenue producing. To meet this, the British Columbia Electric Railway Company has made a concession in the matter of rates, but the reeve states this will make no difference to plans under consideration. In Vancouver the proposal has also been made that the city get into the lighting business, and when the Seymour Creek watershed is acquired it would not be a difficult matter. For an expenditure of half a million dollars the city can secure all the land and timber in the Seymour Creek valley, and thus absolutely ensure a never-failing and abundant water supply. An engineer has reported that the water can be stored, and run through pipes operating a turbine plant, without making the water less impure. The storage basin is necessary for water supply purposes, so the cost of installation of turbine machinery would be the largest item.

BUSINESS MEN AND THE WEST

Conditions Are Improving This Fall—Talking of a Good Nineteen Fourteen Now

Monetary Times Office,
Winnipeg, Sept 23rd.

Mr. W. Smith, managing director of the Western Empire Life Insurance Company, has returned from a trip through the West as far as Vancouver and Victoria.

In discussing conditions with *The Monetary Times* Mr. Smith said he was well satisfied with conditions, and is confident that the situation in the West will greatly improve this fall. He had an opportunity of studying the crop situation, and stated that everywhere he went the crops were good and the grade will be considerably higher than it was last year.

Threshing is in full swing in all parts of the West, and, despite some pessimistic reports, the crop will be better, both in quantity and quality than in any past year.

Conditions on Pacific Coast.

Mr. Smith thinks that conditions on the Pacific Coast are improving. In the Okanagan Valley the fruit crop is good. In the city of Kelowna and all the towns and cities of the Okanagan Valley and southern British Columbia conditions seem to be good. Many buildings are going up in Kelowna, costing as high as $30,000 and $40,000, a number of them being of reinforced concrete.

Mr. Smith states that the Western Empire Life are having a successful year, and he is well satisfied with the outlook in the West.

Views of the Future.

Mr. Charles M. Simpson, president of the Empire Loan Company and vice-president of the Fidelity Trust Company, of Winnipeg, has returned from a holiday trip to a number of United States cities. In an interview with *The Monetary Times,* Mr. Simpson states that conditions in the States are much like they are in Canada, the tightness of money being just as apparent there, and in many cases more so than it is in Canada. For general commercial business, Mr. Simpson says that business there is good, but that the spirit of speculation has experienced the same dullness as in Canada.

Mr. Simpson thinks that after the crop is marketed, conditions in Canada will materially improve, and he is optimistic regarding the outlook in Western Canada this fall and thinks that next year will see a return of normal conditions, and that 1914 will be a splendid year in every respect.

◆

ALBERTA RAILWAY CASE SETTLED

Premier Sifton states that Messrs. J. D. McArthur and his associates, owners of the Edmonton, Dunvegan and British Columbia Railway, now being completed to Peace River, who also built a section of the Grand Trunk Pacific, and are now building the Hudson's Bay Railway for the Federal Government, will take over the charter of the Alberta and Great Waterways Railway, complete the road, and assume all existing liabilities.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian General Electric Company.—The Canadian General Electric Company has acquired by purchase all the plant and assets of the Stratford Mill Building Company, and there will be manufactured, not only the well-known lines of flour mill machinery heretofore produced at that point, but also the wider range of similar machinery and equipment as produced by the Allis-Chalmers Company of the United States.

Canadian Transportation Lines, Limited.—Mr. James Carruthers, president of the Richelieu and Ontario Navigation Company, expresses the opinion that the net earnings of the company for the year will show an increase of between $200,000 and $300,000 over last year. In round figures net earnings are figured as being in the neighbourhood of $1,200,000, equal to about 12 per cent. on Richelieu stock, as compared with little better than 9 per cent. last year.

City of Cobalt Mines, Limited.—A special meeting of City of Cobalt shareholders has been called for October 1st to ratify a by-law of the board, increasing the capital from $1,500,000 to $2,100,000, the new stock to be offered to shareholders at 25 cents a share in the proportion of six new for fifteen of old. It is also proposed to move the head office of the company from Cobalt to Toronto. The purpose for which the money raised by the sale of new stock is to be used is not stated in the official circular.

Algoma Steel Corporation.—The output of the Algoma Steel Corporation for the year ended June 30th was the largest yet attained. Compared with 1911-12, the figures for the past year were:—

	1911-12. Tons.	1912-13. Tons.
Pig iron	258,979	326,073
Steel rails	241,729	289,343
Merchant mill material	39,446	26,295

Sherbrooke Railway and Power Company.—At the annual meeting this week, gross earnings were reported showing an increase of $34,058, or nearly 37 per cent., while the net earnings, after charging renewals, gained $19,080, or 58 per cent. over the previous year. These increases were principally due to the lighting and power branches of the company's system. During the year $32,000 bonds and $32,000 stock were issued and sold and the proceeds expended in extensions and betterments.

The directors of the company during the year succeeded in locating two large industries in Sherbrooke—the Canadian Connecticut Cotton Mills, Limited, and the Panther Rubber Manufacturing Company. Both of these concerns will be large consumers of the Sherbrooke Company's power.

The profit and loss statement of the company for the year was as under:—

Revenue		
Gross revenue from railway, power, light, real estate, rentals, etc.		$126,646.23
Expenditure		
Operation, maintenance and management		$ 74,718.31
Net revenue for 1913		$ 51,927.92
Balance at credit, 1912		2,341.55
		$54,269.47
Deductions:—		
Bond interest	$52,273.64	
Less interest on unfinished construction work	6,000.00	
	$46,273.64	
Interest on current liabilities....	927.21	
Accidents written off	758.45	
Head office and legal expenses..	3,093.74	
		61,053.04
Balance carried forward to the credit of profit and loss		$3,216.43

Ritz-Carlton Hotel Company, of Montreal, Limited.—The following circular letter has been addressed to the holders of preferred stock: "At a special general meeting of the shareholders of the Ritz-Carlton Hotel Company, of Montreal, Limited, held on Friday, the 5th of September, 1913, a by-law was unanimously approved of authorizing the directors to issue $750,000 second mortgage ten-year 6 per centum (6 p.c.) gold bonds. The proceeds from these bonds, if sold, will place the company in a financial position which, they believe, will enable them to carry on the business without embarrassment.

"Preferred shareholders are hereby invited to subscribe at par for the above second mortgage bonds to the extent of their present holdings. Subscriptions to be made on the accompanying form, and payment to be made as called for by the directors.

"The earnings of the company during the first four or five days of September, when the rooms were full, demonstrate that when the hotel is doing the business that the the directors have every right to expect, and which they believe it would have done had it not been for the financial stringency, not only would the interest on the first and second mortgage bonds have been earned, but also the dividend on preferred stock, so that the directors feel warranted in believing that with the return of normal conditions, which appear to be now in sight, the hotel will fulfil the earlier expectations of its friends.

"The directors earnestly trust that the existing preferred shareholders who have already subscribed to $1,000,000 of stock in the company, will take up their proportion, and have only to add that they and their friends are liberal subscribers to this issue."

Beaver Consolidated Mines.—The quarterly report of the Beaver Consolidated Mines, Limited, shows the position of the company on August 31st as follows:—

Cash on hand	$ 26,098.27
Due from smelters	13,234.58
Ore on hand ready for shipment (estimated)	106,038.58
	$145,371.43
Less accounts payable	17,460.93
Available balance	$127,910.50

Brazilian Traction, Light and Power Company, Limited.—Statement of combined earnings and expenses of the tramways, gas, electric lighting, power, and telephone services, operated by subsidiary companies, controlled by the Brazilian Traction, Light and Power Company, for the month of August, 1913:—

	1913.	1912.	Increase.
Total gross earnings ...	$ 2,038,340	$ 1,802,691	$ 235,649
Operating expenses	901,258	844,303	56,955
Net earnings	1,137,082	958,388	178,694
Aggregate gross earnings from January 1st	15,624,438	13,493,369	2,131,069
Aggregate net earnings from January 1st	8,367,429	7,228,645	1,138,784

BANKERS AND LOANS TO FARMERS.

The loaning of money to farmers to finance their threshing was one of the important subjects of discussion at the meeting of the Canadian Bankers' Association at Winnipeg. The proposal met with general sympathy by the bankers and a committee was appointed to investigate the question.

FERNIE, CENTRE OF COAL INDUSTRY.

An interesting and well-illustrated supplement has been issued by the Fernie District Ledger, depicting the natural advantages of Fernie, B.C., and those of the neighboring towns of Hosmer, New Michel, Presburg, Coleman, Blairmore, Bellevue and Taber. It shows the extent and value of the coal deposits in this district. Some of the principal coal operators are given as follows:—The Crows Nest Pass Coal Company, Limited, whose daily average output is 4,250 tons; the Canadian Coal and Coke Company, which anticipates a return of 2,000 tons daily in 1914; the International Coal and Coke Company, which produces 35,000 tons of coal and 6,000 tons of coke per month; the McGillivray Creek Coal and Coke Company, Limited, produces 20,000 tons of coal monthly; Western Canadian Collieries have an output of 2,000 tons per day; Hillcrest Collieries' output is about 1,200 tons daily; Maple Leaf Coal Company's capacity is around 1,000 tons daily.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Lethbridge, Alta.—Prairie fires causing estimated loss of over $1,000,000.

Kamloops, B.C.—September 14—Queen's Hotel. Loss and cause unknown.

Brook, Alta.—September 19—Business section. Loss $25,000. Cause unknown.

Victoria, B.C.—September 15—1029 North Park Street. Loss slight. Cause, sparks.

Newdale, Man.—September 14—Mr. H. Driver's barns. Loss $1,500. Cause unknown.

Chatham Township, Ont.—September 15—Mr. V. Cotton's barns. Loss and cause unknown.

Kamsask, Sask.—September 19—Mr. P. Moroso's residence. Loss and cause unknown.

Tugaske, Sask.—September 18—Mr. G. McKinley's garage. Loss and cause unknown.

Viceroy, Sask.—September 18—Mr. C. T. McDuree's hardware store. Loss and cause unknown.

Pickering, Ont.—September 17—Rev. Campillion's residence. Loss $7,000. Cause unknown.

London, Ont.—September 18—Mr. P. Koesler's residence and barns. Loss $4,000. Cause unknown.

La Conner, B.C.—September 13—Four frame houses on First street. Loss $5,500. Cause unknown.

Perth, Ont.—September 22—Perth Felt Company's factory. Loss $20,000. Cause, supposed picker.

Quebec, Que.—September 18—Hon. R. Turner's pulp and lumber mills. Loss $17,000. Cause unknown.

North Portal, Sask.—Mr. L. Thompson's grain separator. Loss unknown. Cause, supposed dropped cigarette.

Port Arthur, Ont.—September 17—Mr. B. Bennett's residence, Red River Road. Loss $2,500. Cause unknown.

Midgic, N.B.—September 12—Mr. C. Anderson's residence and barns. Loss $3,000. Cause, defective chimney.

Fielding, Sask.—September 16—British American elevator. Loss unknown. Cause, supposed overheated machinery.

Amherstburg, Ont.—September 19—Lake Erie Fish and Ice Company's barns. Loss $20,000. Cause, supposed dropped match.

Bowmanville, Ont.—September 19—Mr. H. B. Foster's farm buildings. Loss $6,000. Insurance $3,000, Dominion. Cause unknown.

Brantford, Ont.—September 22—Mr. A. McPherson's barn, 35 Mt. Pleasant Street. Loss unknown. Cause, supposed incendiary.

Milestone, Sask.—September 19—International elevator and Mr. O. K. Wilson's elevator. Loss unknown. Cause, supposed incendiary.

North Sydney, N.S.—September 15—Nova Scotia Steel and Coal Company's warehouse, etc. Loss $90,000, partially insured. Cause unknown.

Weyburn, Sask.—September 13—Chinese restaurant, Mr. Worden's hardware store. Loss, Mr. Worden, $5,000, partially insured. Cause unknown.

Louisburg, N.S.—September 17—Steamer "Winnie Hazel," owned by Messrs. Brister and Sons, Halifax. Loss $6,750. Cause unknown.

Kingston, Ont.—September 17—Dr. Keyes' residence. Loss slight. Cause, electrical defects. Mr. W. J. Baker's, 255 Queen Street. Loss $50. Cause unknown.

Saskatoon, Sask.—September 8—Overhead bridge, 20th Street, owned by city. Loss slight. Cause, dropped cigar.

September 11—Prairie fire. Caused by dropped match.

Ottawa, Ont.—September 18—Greater Ottawa sash and and door factory. Loss unknown. Cause, hot box.

September 19—Messrs. Booth's Fraserfield yard. Loss $1,000.

South Vancouver, B.C.—September 16—Mr. F. Bretlove's residence, Collingwood West. Loss $1,500. Cause, overheated stove pipe. Mr. C. Madduch's residence, Earls Road. Loss slight. Cause, exploded lamp.

Hamilton, Ont.—September 15—Mr. Radigan's workshop, Ferguson Avenue and Jackson Street. Loss $150. Cause, supposed cigar stub.

September 20—Mr. J. Peltern's barn, 7th concession of Elizabethtown. Loss $2,500. Insurance $950. Cause unknown.

Edmonton, Alta.—September 13.—Mr. Parchen's residence, 2244 Carey Street. Loss $2,000. Cause unknown. 619 Clara Street. Loss $300. Cause, overheated stove pipe. Daily Bulletin Office. Loss unknown. Cause, gasoline explosion. Mr. George Cope, Syndicate Avenue. Loss unknown. Cause, overheated stove pipe.

Montreal, Que.—September 17—Mr. W. Burleys, Apartment, 198 William David Street, Maisonneuve. Loss $2,000. Cause unknown.

September 18—J. T. Gilmour and Company's plant, 23 Beaver Hall. Loss and cause unknown.

September 19—397 Chambly Street. Loss $300. Cause, supposed defective wiring.

Toronto, Ont.—September 20—Mr. T. J. Bowen's stable, Dundas Street. Loss $800. Cause unknown. 74 King Street. Loss $2,000. Cause, dropped match.

September 22—108 Hamilton Street. Loss, contents, $300; building, $100. Cause, rats chewing matches. 15 Norman Avenue. Loss $50. Cause, children playing with matches. New York Central box-car, foot Abell Street. Loss $100. Cause unknown. Mr. A. Thomas' residence, Bedford Park Avenue, York Township. Loss $3,500. Cause, lightning.

September 23—311 Parliament Street. Loss $10. Cause, oil stove exploded. 170 McCaul Street. Loss $25. Cause unknown. 6 St. Patrick Square. Loss $50. Cause, overheated stove. Canadian Carbon Company, 23 Pearl Street. Loss slight. Cause unknown.

◆

BIG PAVING FIRM MAY BE WOUND UP.

Application was made at Osgoode Hall last week to wind up the Canadian Mineral Rubber Company. J. S. Lovell, who was the petitioner, is a creditor for $2,500. It was suggested that this year's business will increase the company's liability by $200,000.

The company was incorporated in 1909, under Canadian laws. It owns a Gilsonite property near Price, Utah, a bituminous limestone property near Tucker, Utah, and also the entire $500,000 capital stock and $500,000 bonds of the American Asphaltum and Rubber Company, of Chicago.

The company manufactures "Pioneer" mineral rubber asphalt, insulating and waterproofing compounds, pipe coatings, paints, etc. The registered office in Canada is in Toronto, but the Toronto office is very small compared to the large staff at the Chicago headquarters of the American Asphaltum and Rubber Company, which hanudles a large volume of business throughout the United States.

The officers are D. B. Hanna, Toronto, president; A. J. Mitchell, Toronto, secretary. The directors were the foregoing and Sir H. M. Pellatt and A. D. Davidson, Toronto; H. Sutherland, Winnipeg; J. M. Creata, J. J. Hill and D. Northall-Laurie, Chicago.

The outstanding capital stock of the company is $200,000 preferred and $800,000 common. The bonded debt is $825,000, most of which, it is understood, was issued in England, with the British Empire Trust Company, Limited, of London, as trustee.

It is generally thought that the application for winding up the Canadian Mineral Rubber Company is probably the direct result of the suit against the American Asphaltum and Rubber Company, which was won recently in the Illinois courts by a competing company, the Standard Asphalt and Rubber Company, of Chicago. The latter company, which makes practically the same products as are made by the American Asphaltum and Rubber Company, claims to own the basic patents covering the methods of manufacture of many of the American Asphaltum and Rubber Company's products, and their contention was apparently upheld by the courts.

◆

A company has been organized at Regina to assist industries deciding to locate in the city. The organization is comprised of many of the leading business men of the city, who, in addition to assisting financially, also use their endeavors toward securing suitable sites for industries deciding to locate in the city. The organization is known as the Saskatchewan Industrial Development Company, Limited. Mr. A. T. Hunter has given his time to the management of the affairs of the concern, and several industries have profited. By securing subscribers for stock, free sites, etc., it is made easy for industries to locate, and by reason of the support of the industrial company, the firms so locating are assured of the support of the citizens at large.

INDEPENDENT ORDER OF FORESTERS

Actuarial Science Points Out Defects—Supreme Court Adopts New Plan

(Written for *The Monetary Times* by W. H. Orr).

The important feature of the sixteenth session of the Supreme Court of Independent Order of Foresters held at Toronto, was the question whether or not the society should accept the new Dominion Forester Consolidation Act, which was passed at last session of the Dominion parliament. Over two hundred delegates were in attendance, including 37 from the four High Courts of Ontario, 17 from Quebec, 18 from New York State, 13 from Michigan, 9 from Ohio, and 8 from Illinois. After discussing it from every view-point for nearly six hours, a vote was taken, showing 176 for and 28 against. On a motion to make the acceptance unanimous, four of the twenty-eight only opposed the measure.

All the old officers were re-elected, but the office of secretary-treasurer was divided. R. Mathieson remains supreme treasurer, and F. J. Darch is constituted supreme secretary, Alexander Stewart becomes supreme auditor, in place of Mr. Darch.

Much interest was developed in the benevolent work of the order, apart from the insurance feature, and 5 cents, instead of 2 cents per member, per month, is to be collected for charitable purposes hereafter. Chief Ranger Elliot G. Stephenson announced that within two years there would be provided a home for aged foresters without any expense to the order. As long as he lived he would maintain it at his own expense, and at his death, two old line policies of $50,000 each would give it a suitable endowment for future maintenance. Nothing has been revealed, however, as to what rules would govern admittance of members, as to age or illness, or ability to contribute a weekly fee towards the expense.

The supreme secretary's report shows the membership of the order to consist of 246,463, being a gain of 3,410 since the beginning of the year. On the 1st of August the accumulated funds were $20,721,428, being an increase since December 31st, of $508,251. The supreme physician's report showed that during the past two years, of the 56,107 applications accepted, one-half were for only $500 each, and the rest for $1,000.

Change in Value of Certificates.

The feature of the session, however, was the change made in the value of certificates of all old members—those who joined previously to January 1st, 1899. The number of these is about 86,000, or about one-quarter of the whole membership. Of the three plans indicated by the new law for choice, the first one was accepted—that of placing a special block assessment, according to age, against each certificate, varying in amount, from $100 to $260 per $1,000. The amount thus called for is to be paid in cash, on or before the 1st day of October next, or it may stand as a lien on the certificate at 4 per cent. per annum compound interest, or the 4 per cent. may be paid in equal monthly instalments with the usual monthly assessment.

To provide a hope of relief, as the years go by, from this heavy burden thus placed upon all the old members, it was resolved that in addition to $1,000,000 which is taken from the accumulated funds belonging to the post-1899 members, (and without which the liens would have been still heavier), there is to be an annual valuation, by actuaries, to ascertain if a further amount can be spared from the future accumulated funds, without trenching upon the 4 per cent. interest which the new Act requires to be earned as a minimum on all funds, old and new. The following is the way this is stated in the "notice of assessment" which has been sent to all the members, namely:—

"Until the first such valuation is made, the grant from the fraternal fund to reduce the lien upon each mortuary-benefit certificate becoming a claim, is fixed at $60, where the lien on the 1st of October was $260, and at $50 where it was $250 or less, and between $260 and $250, the grant is in like proportion. It is expected that the grant from the fraternal fund can be increased from time to time, as the excess interest earnings of the funds increase year by year."

In the circular sent to the members is an extensive table showing the amount of lump assessment thus placed against each of the pre-1899 certificates, per $1,000, according to the age at entry, and of the time elapsing from the date of joining until now. In nearly all cases it is the full $260 per $1,000 that is levied, because so many of them were over age 38 at entry, or if younger than that when they joined, have been ten, fifteen or more years in the enjoyment of the low assessments made upon the pre-1899 members. For instance, every entrant at ages 39 to 54 inclusive, is now assessed for an extra $260. Every entrant of between ages 23 and 38 inclusive, if less than ten years on the books, will pay from $180 upward to $257, and all of those ages at entry, if more than ten years insured, will pay $260. And so will all ages from 16 to 23 if they have been twenty years in enjoyment of low rates. A person who was 16 years old at entry in 1898, and has been insured 15 years, and is now aged 31, will get an extra call for only $100; but, if he joined in 1888, and therefore has had a benefit for 25 years, his extra will be $205. And if he joined in 1883 and has had 30 years' benefit, he is assessed for the full $260, being now 46 years old. A table in the August number of the "Forester," covers, in pretty solid figures, a space of about 5 by 13 inches, giving the ages, from 16 to 54 in the first perpendicular column, and the years of entry along the top of the twenty columns, from 1877 to 1899 inclusive.

This table, so nicely graded as to do even-handed justice to the different ages, puts the society for the first time in its long history, upon a somewhat reasonably equitable footing, as between the old and the new members.

What Actuaries Demonstrated.

It was ascertained, from the report of the actuaries employed to value the two sections, that on December 31st, 1912, there was, in the total accumulated fund, $6,245,660.62 belonging to the old members, who joined before January, 1899, and $14,314,250.09 belonging to the newer members who joined since 1898. To meet the liabilities of the pre-99 members this left a shortage of $26,000,000.00, while the post-98 members had a small surplus (in the $14,314,250.09) of about $1,725,000, supposing the funds to be safely invested, in future, at not less than 4 per cent. compound interest per annum.

It was rather a bold proceeding on the part of those 204 supreme representatives, nearly all of whom are said to have belonged to the pre-98 section, to lay hands upon so large an amount of cash as one million dollars belonging to the younger members, and transfer it into the old people's purse, to lighten their burden. Hence the Supreme Chief deems it needful to have "A Word with the Post-'98 Members," in which he labors to show them that it will prove a paying operation to thus heal the sore spot, so that "none of the '99 members should be forced to drop out of the order." But far greater than the million is the excess of interest on the gross funds above 4 per cent. interest, that is to go to the relief of those against whom the extra assessments are made. The May number of "Forester," in each year, is to contain a "valuation and explanation of the financial condition of the order, and the condition of the fraternal fund."

Work is Commendable But Not Complete.

But, after all that is thus commendably done to repair the loss occasioned by failing to accumulate a fund in the earlier years of the order, it seems apparent that little has been done, to speak of, to really fill that gap. These extra assessments now imposed at so late a date, do nothing more than raise the unfit old rates up to what they need to be for the future. The premium that a man of 30 or 31 years of age pays to an old line company for a policy of $1,000 without profits, is about $20. After the small amount needed for expenses has been deducted, one-half of the remainder is needed to pay the one year's death losses, and the other half (about $10) has to be accumulated to meet the future heavy loss belonging to that policy. Therefore, every time any fraternal order collects $100,000 to bravely meet death losses, it should collect another $100,000 to be laid aside at 4 per cent. interest. If it does not do this during a space of say 20 or 30 years, how can it, at the end of that, or at any time, assess those members who have died or dropped out long ago, so as to fill this gap, and prevent an ultimate collapse? A small portion may be obtained, as in the present case, by a heavy extra call, and by devoting the extra future interest above 4 per cent. to that end; but, no one can say that the future extra interest will not, every cent of it, be needed to meet the extra mortality such as is experienced during certain unfortunate years, by every life insurance company. If any regular life insurance company were seen to be holding, today, only a 4 per cent. reserve, with no surplus above that scale, and no capital stock to fall back upon, it would be deemed so unsafe that business would fall off, and early insolvency would be staring it in the face.

Therefore, the officers of the Independent Order of Foresters are to be congratulated upon what they have succeeded in getting the 16th supreme session to do, but they must not allow themselves to imagine that the deficiency is filled once and for all. The basis adopted is that used for medically selected lines, but a process of heavy adverse selection is operating in every society on the assessment plan.

That adverse selection has been affecting the Independent Order of Foresters for many years. It is impossible to say whether it will not call for all the interest that can be earned on the funds above 4 per cent., and still another extra assessment, as the years go by, to bring it safely through.

MEDICAL EXAMS. IN GROUP INSURANCE

They Are Shown to be Unnecessary—How the Law of Average Works

"It has often been said that if all the people who pass along the street in front of the office of a life insurance company should be insured, the death rate would be lower than among the policyholders who have been subjected to a rigid examination and have been pronounced satisfactory risks by the physicians representing the company;" thus says Mr. W. Alexander, secretary of the Equitable Life Assurance Society in what amounts to a reply to the opponents of group insurance.

"This is probably true, for the majority of those who hurry along the street are vigorous and young," adds Mr. Alexander; "few invalids and no bedridden people are among them. Sometimes action which is eminently conservative and safe startles the public by its novelty, and is at once characterized as radical and dangerous. Such misapprehension is common when the action taken is contrary to some custom with which the people have long been familiar. The offer of life insurance without medical examination is an instance of this.

"To most Americans the idea of granting insurance without medical examination will seem reckless. For generations they have been led to believe that the safety of the whole life insurance fabric has depended on the protection resulting from medical selection.

Is Simply Law of Average.

"And yet it can be readily demonstrated that, subject to certain reasonable conditions, the life insurance business can be conducted as safely without medical examinations as with them, for the following reasons. All life insurance is based on the law of mortality, which is simply the law of average as applied to the duration of human life.

"Life insurance charges are based on an expected death rate indicated by a reliable table of mortality, and if all the people of the United States should be compelled to insure, medical examinations would obviously be superfluous. This would be true also if all the people insured voluntarily. In either case the law of mortality would work with precision.

"But the companies cannot force people to insure. They can only insure those who apply, and if they offered to insure without examination all those who saw fit to apply, most of the healthy people would stay away, and the invalids, including those with one foot in the grave, would flock to them. The result would be what is called 'adverse selection,' and the death rate, instead of corresponding with the mortality table, would be excessive.

No Person Need Question Safety.

"From all this it will be seen that the medical examination is simply a makeshift, to counteract by medical selection the adverse selection which would result if undesirable risks should be invited to come unchecked under the protection of the companies.

"But the company with which I am identified, the Equitable Life Assurance Society of the United States, issues no insurance on the lives of separate individuals except subject to an examination. The only insurance written without examination by the Equitable is what is known as 'group insurance'. And whatever difference of opinion there may be as to the safety of insuring individuals without examination, no intelligent person cognizant of all the facts need question the safety or expediency of issuing group insurance without examination if proper precautions are taken; for the business can be protected by safeguards, which although of an altogether different character, are quite as efficient as the protection furnished by the medical examinations with which our people are so familiar.

"This branch of the insurance business enables a corporation or business house having a large body of employees to give each one of them the protection furnished by a moderate amount of insurance in addition to the salary paid for services rendered. The essential aim of the plan is to give this protection to all the employees of the organization. At times the blanket policy covering the whole transaction is drawn to include officers or partners as well as those occupying subordinate positions, but this is not essential.

Examinations Then Dispensed With.

"If in such a case a rigid medical examination should be required, and if only those pronounced absolutely first-class risks should be accepted, the object aimed at would be defeated. But happily in such a case examinations can be dispensed with. In the first place, the company will not consider a transaction of this kind unless the employees are sufficient in number to permit the law of average to work smoothly. In the second place, no corporation or business firm employing a large number of workers could carry on their affairs successfully if the mass of their employees were not in fit condition to do their work. In fact, vacancies are as a rule filled by selecting those who are young, vigorous, healthy and efficient.

"Thus every large group, consisting in the beginning chiefly of those who are young and vigorous, does not remain a fixed group, consisting of the same individuals who are constantly growing older, but of an active group constantly changing. In every such group there will, of course, be many who will die while in the service of the organization; a few old and faithful employees will be retained permanently as a reward for faithful service; a few of those who are young and vigorous may drop out; but the vast majority of such employees will be better risks than those who come one by one to the insurance companies for individual protection.

Large Groups are Better.

"There is no adverse selection. An individual insured in any particular group has not applied for insurance because he fears death, but is automatically included as one of a large group, every member of which is necessarily included. Care in transacting business of this kind must be exercised by the company, but the chief care must be in selecting the group as distinguished from the health of this or that individual in the group. Other things being equal, a large group is better than one that is small.

"The character and responsibility of the corporation or firm to whom the insurance is issued must be carefully scrutinized. The character of the work done by the employees must neither be dangerous nor unwholesome, and the place where they work must be healthy and safe."

MEETING DEMAND FOR HIGHER RATES

Montreal Amended City Charter and Alberta Government Raises to Four and a Half Per Cent.

In his annual report, city treasurer Arnoldi, Montreal, says: "In order to realize as near as possible the nominal amount of our loans it was found necessary to raise the rate of interest, and the city charter was amended in that sense in December last, the city being authorized to fix and pay any rate of interest which might be judged reasonable, the provision applying to the above loans authorized but not yet negotiated. The rate of 4½ per cent. was substituted for the former one of 4 per cent., and it is confidently expected that at that rate par will be obtained for the present projected borrowing and for future loans.

Price is Likely to Stay.

"According to the best financial authorities, the increase in the price of money for long-term loans is likely to remain permanent. In the meantime, in order to finance the large disbursements of the city on capital account, it was necessary to have recourse to temporary borrowing, to be redeemed, ex-proceeds of permanent loans when realized. In connection with this matter I must say that the most willing and financial help was always had from our bankers during the year, and principally from our financial agents, the Bank of Montreal, in London.

Could Not Float Loans.

"The financial year has been one of great stringency, both in the local and foreign money markets, due to the disturbed political situation in Europe and the congested state of the British money market. In consequence it was found impossible to float at acceptance rates either a permanent loan of $7,000,000 placed in the hands of the Bank of Montreal, London, last year or another loan of $6,962,646 issued during 1912, both bearing interest at 4 per cent."

Premier Sifton, of Alberta, has asked leave to introduce a bill to amend the act respecting loans, by repealing the clause setting interest at 4 per cent. and inserting in its place 4½ per cent. The province has a large issue for sale.

Want Rate Raised to Five.

Messrs. Boulton Brothers, of London, are negotiating with Burnaby municipality for bonds. An offer was made some time ago to advance 91½ per cent. of the total issue of unsold bonds at six per cent., on condition that the interest on about $1,300,000 bonds be raised from 4½ to 5 per cent. The by-law to validate the increase was defeated recently, and a second proposal has been made.

MORE TORONTO BONDS QUOTED.

A city of Toronto further issue of 4 per cent. debentures is now quoted in the official list in London.

NATURAL RESOURCES ATTRACT CAPITAL

Canadian Coal and Coke Reorganization—Alberta's Oil Fields

One hundred and twelve new companies are included in this week's incorporations. The foremost being the reorganized Canadian Coal and Coke Company. The total capitalization of all these new companies amounts to $32,781,000. The largest companies are as follows:—

Canadian Coal and Coke Company, Montreal...	$15,000,000
Hawkesbury Board and Paper Mills, Limited, Montreal	2,500,000
Robinson, Little and Company, Limited, London	2,000,000
Gull Lake Gold Mines, Limited, Haileybury....	1,500,000
Slater Shoe Company, Limited, Montreal, Que..	1,000,000
Black Fox Gold Mining Company, Limited, North Bay	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	Number of companies.	Capitalization.
Manitoba	4	$ 40,000
Quebec	20	19,944,000
Ontario	22	7,100,000
Alberta	24	2,355,000
Saskatchewan	12	455,000
New Brunswick	3	278,000
British Columbia	27	2,609,000
Total	112	$32,781,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Grouard, Alta.—Slave Lake Agencies, Limited, $10,000.

Red Deer, Alta.—Seymour and Dawe, Limited, $25,000.

Sedley, Sask.—Saskatchewan Farms, Limited, $150,000.

New Westminster, B.C.—McAllister's, Limited, $250,000.

Innisfail, Alta.—Innisfail Rink Association, Limited, $5,000.

Lacombe, Alta.—The Lacombe Produce, Limited, $10,000.

Pilot Butte, Sask.—McClinton Lumber Company, Limited, $25,000.

Fleming, Sask.—The Fitzsimons Gas Company, Limited, $55,000.

Athabasca, Alta.—Athabasca Forwarding Company, Limited, $10,000.

Seattle, Wash.—Pantages-Edmonton Theatre Company, Limited, $100,000.

Prince Albert, Sask.—The Prince Albert Mining and Developing Company, Limited, $20,000.

Kamsack, Sask.—Kamsack Brick and Tile Company, Limited, $20,000.

Swift Current, Sask.—J. A. Rollefson and Company, Limited, $50,000.

Conquest, Sask.—The Conquest Curling Rink Company, Limited, $10,000.

Duncan, B.C.—Somenos Poultry and Produce Company, Limited, $30,000.

New Westminster, B.C.—Canadian Coast Chemical Company, Limited, $100,000.

Brantford, Ont.—National Stores, Limited, $500,000. A. E. Ross, G. H. Stedman, C. R. Pettit.

Cariboo, B.C.—The Prince George Investment and Development Company, Limited, $400,000.

Prince Rupert, B.C.—Railway Employees' Investment and Industrial Association, Limited, $100,000.

Moncton, N.B.—Reade Fur Farms, Limited, $49,000. B. F. Reade, S. O. Humphrey, W. E. Sherrard.

Melrose, N.B.—Melrose Black Fox Company, Limited, $40,000. A. F. Emery, J. M. Barry, C. Miller.

Utterson, Ont.—The G. W. Lankin Company, Limited, $40,000. N. Somerville, T. A. Rowan, E. Gibson.

Haileybury, Ont.—Gull Lake Gold Mines, Limited, $1,500,000. J. J. McLean, W. R. Strong, J. McN. Hall.

Mont-Laurier, Que.—La Fonderie Mont-Laurier, Limited, $25,000. S. Ouellette, J. E. Vezina, J. B. Forget.

Megantic, Que.—The Megantic Broom Manufacturing Company, $49,000. E. Loubier, V. Cliche, P. Cliche.

Nanaimo, B.C.—Arlington Shingle Company, Limited, $15,000. Island Building Company, Limited, $50,000.

Hamilton, Ont.—Nagrella Manufacturing Company, Limited, $250,000. W. A. Welsh, A. Carey, S. Barlow.

Saint Victor de Tring, Que.—The Victor Lumber Company, Limited, $20,000. T. Pepin, P. Fortin, N. Gagne.

St. John, N.B.—King Square Realty Company, Limited, $180,000. R. M. Rive, C. H. McLean, G. D. Wanamaker.

Sarnia, Ont.—Perfection Stove Company, Limited, $1,000,000. R. V. LeSueur, A. I. McKinley, N. L. LeSueur.

Ottawa, Ont.—L'Association Saint Jean-Baptiste D'-Ottawa, C. S. O. Boudreault, C. A. Seguin, J. B. St. Laurent.

Sherbrooke, Que.—Elbram Stone Company, Limited, $100,000. J. Simoneau, Marc-Edouard Cadieux, D. Panneton.

Gentilly, Que.—La Compagnie Hydraulique Electriquede Levrard, Limitee, $20,000. L. Carignan, A. Roux, A. Roux.

Joliette, Que.—La Compagnir de Publication L'Action Populaire, Limited, $20,000. A. Boucher, E. Hebert, R. A. Forest.

North Bay, Ont.—Black Fox Gold Mining Company, Limtied, $1,000,000. J. C. Thompson, E. Beatty, E. E. Eddy.

Moose Jaw, Sask.—The Prairie Press Publishing Company, Limited, $20,000. Proby, Cook, Henderson, Limited, $50,000.

Windsor, Ont.—Maxwell Motor Company of Canada, Limited, $10,000. W. E. Flanders, W. M. Antony, E. E. von Rosen.

Saskatoon, Sask.—Leader Cigar Stores, Limited, $5,000. The Davies Realty Company, Limited, $25,000. The Independent Fruit Company, Limited, $25,000.

Windsor, Ont.—The Alexandra Club, M. Jackson, C. H. Williams, D. A. McPhail. Palmer-Clarke, Limited, $40,000. P. Clarke Palmer, V. E. Palmer, W. J. Clarke.

Medicine Hat, Alta.—Consolidated Securities, Limited, $50,000. Alberta Clay Products Company, Limited, $700,000. Dominion Sanitary Fountain Company, Limited, $100,000.

Fort William, Ont.—Catholic Young Men's Association, J. Murphy, W. K. O'Donnell, J. J. F. O'Brien. Franco-Canadian Associates, Limited, $125,000. D. R. Byers, J. E. Swinburne, H. L. Palmer.

London, Ont.—Robinson, Little and Company, Limited, $2,000,000. A. T. Little, E. S. Little, G. S. Gibbons. Simpson Folding Case and Trunk Company, Limited, $40,000. C. E. Speiran, W. J. Bigelow, F. J. Hutchins.

Edmonton, Alta.—D. Blais Contracting and Manufacturing Company, Limited, $10,000. Edmonton Hay and Grain Company, Limited, $25,000. Dominion Hat Shop, Limited, $10,000. Phoenix Taxi and Auto Company, Limited, $10,000. Connaught Court, Limited, $250,000. The Crossing Land Company, Limited, $25,000.

MONTREAL'S GRAIN SHIPPING PROBLEMS

Port Facilities Have Greatly Improved, But Volume of Shipments Has Not Done So

Monetary Times Office,
Montreal, September 24th.

Shipping interests of the port of Montreal are somewhat depressed over the fact that grain shipments have declined during the past few years, notwithstanding the fact that the facilities of the port have been greatly improved. A few years ago, the storage capacity was practically nil, and handling of grain was performed by means of floating elevators which ran alongside the lake grain boats and unloaded them into the steamships awaiting at the docks. In this manner the trade of the port amounted to 40,000,000 bushels, there being no storage capacity worth speaking about. During the past year the trade amounted to only 35,000,000 bushels. This was in spite of the fact that the floating elevators are still available, and that there was storage capacity there for upwards of 2,000,000 bushels, while the harbor was equipped with the best type of belt conveyers. This year, owing to the additions to No. 2 elevator, the storage capacity of the port is 4,500,000 bushels, while next year additions to No. 1 elevator and to the Grand Trunk elevator will have increased this capacity to 7,000,000 bushels. The Harbor Commissioners apparently do not see much advantage in increasing the storage capacity any further, although it was stated not long since that this capacity would be increased to about 10,000,000 bushels within a couple of years.

Various explanations of the somewhat illogical situation are offered. It is said that cargoes were lost to this port this year owing to the acceptance by New York of No. 3 grade, and the issuing upon this of a certificate for No. 1, whereas at the port of Montreal No. 1 grade has to be shipped in order to obtain a No. 1 certificate. It is claimed in Montreal that that situation is understood in England and that a certificate would be properly discounted there, but with certain other ports the situation is not understood. Insurance rates which must be paid by the shippers coming to the St. Lawrence route, and the heavier loading charges there, are other reasons advanced.

In explaining how it could be that hundreds of thousands of bushels of wheat could be kept waiting in lake boats in the port of Montreal when the total grain shipments show a decline and the storage capacity an increase, the statement was made that sample wheat is being placed in bins of much greater capacity than the sample grain stored and that as a result of this there is much unfilled elevator space. Sometimes this sample grain is held for considerable periods. By a recent decision increasing the carrying charges upon such grain, it is likely that this practice will be put a stop to.

◆

TO SUPERVISE DEBENTURES ISSUES.

To appoint a commission to supervise or control all debenture issues of municipalities in the province of Saskatchewan, with power to regulate the term of debentures, etc., is the suggestion which has been made by the Regina board of trade, and there is every prospect of the matter being taken up at the next session of the legislature. It is believed that if such a scheme were worked out much of the difficulty now experienced by some of the municipalities in securing sufficient funds for much needed improvement works, would be overcome, as the purchasers of the debentures would have the government assurance as to security, etc.

VALUE OF LIFE INSURANCE

XXXI.

Benefits of Insuring While Young

BY C. A. HASTINGS

No man has any valid excuse for the postponement of assurance. In a previous article on the "Risk of putting off assurance," it was pointed out the effects which always come down to one thing, and that is, that man is unable to make up what it pleases him to call his mind. Of course, many of us find it difficult to save, but no one will ever learn to do so until he is the proud possessor of a life policy, and, until then, "money" will only know one word in the vocabulary and that is, "good-bye." The should-be-insured must realize that life insurance is not a substitute for, but is equivalent to a cash savings in a bank, available to meet any extreme urgency; I say "extreme" because if it were in a bank extreme urgencies would, in most cases, be unlimited, whereas, if it were a deposit in an insurance company, the policyholder would realize that he is borrowing money—which in reality is not his own—and he would think twice—more than twice—about it; he would then see that he is reducing the ultimate benefit to his family, or the loan must be repaid, which could not be done as I am discussing the case of a man who insures to the hilt.

Your policy is sacred—it is in trust for your family, or for your future dependents—and should never, under any circumstances, be used except for some extreme crisis, such as a serious illness. You do not buy a policy with a view to pledging it—that would be a ridiculous argument—your personal apparel can be pledged, but no one would suggest that that was why you bought it.

No Reason in Waiting.

How many readers have postponed insurance on the grounds that they do not propose to apply until they can afford to do so for a large policy? Think how absurd this is. Everyone is aware of the fact that half a loaf is better than no bread at all, and if any of my readers think this metaphor cannot be applied here, I would remind them what a well-known manager once said to an actor to whom he offered a small part, at a small salary, " . . . that a small role is better than a whole loaf."

You are allowed to buy insurance more than once during your life, you may do so daily, if you wish, and there are many men, maybe some of my readers, who never miss an opportunity to increase their protection as often as possible, and what so many people think a fallacy, make money by it. Take the man who wants $20,000 insurance, and if all the readers will follow the example given, they will see that this man, by purchasing at intervals, finds it infinitely cheaper than the man who waits.

Two Methods Examined.

Now then, Brown buys four policies for $5,000, each when he is 25, 30, 35 and 40. Jones waits till he is 40 and then buys $20,000. Then each have an equal amount; but in the meantime, if my readers will go carefully into this proposition, they will find that Brown has been insured for $5,000 for 15 years, for $10,000 for 10 years, for $15,000 for five years and has also had large bonus additions (having made a proper choice).

I will now go into Jones' side of the case. He may have put by money during these twenty years, but then he has had no protection, and he most certainly could not have invested his savings so judiciously as Brown, with an equal amount of safety. Yet again, when Jones does buy, at age 40, his average premium is much higher, he has to pay during those later stages of life when most men wish to be relieved of any obligations. Furthermore, Brown has opportunities of saving from age 40, for every five years a policy matures, and, I have already credited Jones with his opportunities of saving prior to insurance, therefore, the difference in the total amount of premiums is a dead loss to Jones:—

	Amount of Insurance.	Age.	Annual Premium.	Total premiums paid in 20 years.
Brown.	$5,000	25	$156.70	$3,134
	5,000	30	169.20	3,384
	5,000	35	185.00	3,700
	5,000	40	205.00	4,100
	$20,000		$715.90	$14,318
Jones	$20,000	40	$820.00	$16,400

Another point, which is of no little consequence, and that is, that Jones is paying four times as much as Brown when both men are ageing and when faculties decline.

INSURANCE COMPANIES' INVESTMENTS IN SASKATCHEWAN

Life Companies Have Over Twenty-two Million Dollars in the Province

The investments of insurance companies in Saskatchewan exceed $25,000,000, divided as follows:—Life, $22,773,060; fire, $2,560,465; accident and general, $41,896.

These figures relate to the year 1912. The following table shows the investments of the individual life insurance companies in the province:—

Life Insurance Company.	Amount invested in Saskatchewan.
Canada	$3,363,303.78
Confederation	2,515,422.83
Continental	67,613.75
Crown	66,798.41
Dominion	780,347.01
Excelsior	890,195.41
Federal	47,193.66
Great West	3,995,155.32
Home	118,711.49
Imperial	1,196,763.85
London and Lancashire	4,500.00
London	361,615.74
Mutual of Canada	2,915,744.41
Manufacturers'	3,719,318.89
Monarch	227,154.32
Metropolitan	515,022.60
National of Canada	129,017.04
North American	756,452.90
New York	145,000.00
Prudential of America	36,924.75
Prudential	29,675.65
Royal	1,061.00
Standard	376,848.82
Sun	296,514.04
Sovereign	164,561.04
Western Empire	12,677.50
Capital	39,465.78
Total	$22,773,059.99

Have Large Investments.

Six life insurance companies have invested in Saskatchewan more than $1,000,000. The Great West Life Assurance Company, a western institution, has the largest amount invested in Saskatchewan—namely, $3,995,155. The Manufacturers' Life, an eastern company, has invested there $3,719,318. The Canada Life has $3,363,303 placed in that province. The investments of the United States life insurance companies in Saskatchewan are comparatively small.

Here is a table showing the investments of the fire insurance companies in the same province:—

Fire Insurance Company.	Amount invested in Saskatchewan.
Alberta-Canadian	$ 15,966.69
British America	4,200.00
Caledonian	4,050.00
Canada National	142,740.01
Central Canada	35,219.67
Continental (Winnipeg)	5,568.41
General Accident	102,638.92
Law Union and Rock	2,123,656.19
London Mutual	4,764.46
Miniota Farmers' Mutual	5,700.00
North British and Mercantile	33,000.00
North Empire	33,446.90
Royal Exchange	12,600.00
Security National	23,200.00
Saskatchewan	11,566.67
Winnipeg	2,147.50
Total	$2,560,465.42

Small Investments of Fire Companies.

Only one fire insurance company, the Law Union and Rock, has more than $150,000 in Saskatchewan. Its amount is $2,123,656. The Canada National has $142,740 and the General Accident Fire and Life has $102,638 placed in Saskatchewan.

The following three guarantee and accident insurance companies have $41,896 invested in Saskatchewan, as follows:—Canadian Railway Accident, $5,000; General Accident of Canada, $26,596.38; Saskatchewan Guarantee and Fidelity, $10,300.

GRAIN GROWERS AND STORAGE

If Stored, Average Price Would Be Greater Than Under Existing System

The storage question has also been an interesting one, suggested Mr. Andrew Kelly, retiring president of the Winnipeg grain exchange, at the annual meeting of the exchange, and the agitation over same, he said, was the means of forcing the Manitoba government into buying a large line of country elevators, which proved to be most disastrous from a financial standpoint, and they were glad to lease them to another company.

This, however, does not relieve them of the responsibility, and the future only can tell how the government are going to come out of the experiment. The Saskatchewan government has gone into the elevator business along different lines, and so far are said to be making a success. The Dominion government have undertaken to provide terminal and interior storage elevators,

If our government would go a step further and introduce some system whereby they could educate the farmers to provide storage for say 50 per cent. of the grain they produce, it would be of immense benefit to the western provinces, and especially to the farmers. It would enable them to hold a part of their crop on the farm, and not rush it on the market in the short space of about three months, there by causing railroad and elevator blockades, to say nothing of the depressing prices.

Average Price Would be Greater.

If they would distribute the marketing of their crop over a longer period, the average price received would be greater than under the present system, especially as the bank act has been amended to allow the farmers to borrow money from the banks on warehouse receipts in their own granaries, and in this way enable them to pay their pressing bills and hold their grain for the higher prices, which so many claim always come at a time when the farmers have no grain to market.

We have nearly finished harvesting the crop of 1913, which is conceded by all to be a record one so far as quality and quantity are concerned. The yield, according to the returns from the threshers is likely to equal anything we have had in the past, and it looks as if our wheat crop will run well over the 200,000,000 bushels. Oats about the same as last year, barley about 30,000,000, and flax probably about 15,000,000. Based on present prices, the crop should net the farmers about $170,000,000, wonderful showing, considering there is only about 12 per cent. of our land under cultivation.

The Winnipeg exchange was a party to the organization in New York in December last of the North American Export Grain Association, organized to represent and protect the north American grain export interests, as the same may be affected by the form of foreign contracts and export documents. This organization has already secured good results as to the acceptance of drafts made in connection with British contracts.

Official notice was received from the New York produce exchange that on January 2, 1913, that body would inaugurate trading in Canadian wheat in bond for future delivery, such trading to be under a special rule regulating transactions in bonded wheat, the spreads between the contract grades deliverable being based upon the Winnipeg exchange's rule in that regard.

Officers and Committees.

The new officers for the year are as follows:—President, Mr. Alvin K. Godfrey; vice-president, Mr. S. T. Smith; secretary-treasurer, Mr. C. N. Bell.

Council:—Messrs. G. V. Hastings, Lake of the Woods Milling Company, Limited; David Horn, David Horn and Company; Andrew Kelly, Western Canada Flour Mills Company, Limited; W. E. Milner, Maple Leaf Milling Company, Limited; Donald Morrison. Donald Morrison and Company; J. C. Gage, Consolidted Elevator Company; Thos. Thompson, Thompson, Sons and Company; W. A. Anderson, North Star Grain Company; W. R. Bawlf, the N. Bawlf Grain Company, Limited: Thos. Brodie. Union Grain Company, Limited; Geo. Fisher. Scottish Co-Operative Wholesale Society.

Committee of arbitration.—Messrs. H. N. Baird. G. R. Crowe, John Fleming. A. R. Hargraft, F. N. McLaren, W. L. Parrish and A. C. Ruttan.

Committee of appeals.—Messrs. E. W. Kneeland. British American Elevator Company, Limited: W. A. Matheson, Lake of the Woods Milling Company, Limited: S. A. McGaw. Western Canada Flour Mills Company, Limited; W. W. McMillan, the Dominion Elevator Company, Limited; E. S. Parker. broker: S. Spink, commission; C. Tilt. Jas. Carruthers and Company, Limited.

FORT WILLIAM'S IMPORTANCE

Transhipping Centre and Manufacturing City—Much Progress Achieved

The tremendous growth of Fort William's transhipping trade within the past few years has given great impetus to the development of the city, but Fort William was not contented to remain merely a transhipping point, her citizens realizing the importance of what nature had already done for the city in the way of harbor facilities, etc., and, seeing that the geographical situation destined the city for a strategical manufacturing point of importance, they have through various channels aided and encouraged manufacturing industries to establish at the head of the lakes, and as a result Fort William is to-day rated as one of the important manufacturing centres of the Dominion.

During 1912 Fort William secured some ten manufacturing industries which are erecting plants valued at nearly $4,000,000 and giving employment to close on to 3,000 men.

Thirty Manufacturing Concerns.

Fort William has now some 30 manufacturing concerns and 40 wholesale houses. The leading manufacturing industries include such firms as:—

The Canadian Car and Foundry Company, Limited, whose plant is now under construction and will cost in the neighborhood of $2,000,000 and give employment to 1,600 men.

The Canada Iron Corporation, Limited, with a million-dollar plant employing nearly 500 men.

The Fort William Starch Works, with a group of buildings nearing completion costing $500,000 and to employ 200 men.

The Canadian Steel Foundries plant, to be erected within the next twelve months at a cost of $250,000 and to employ 250 men.

The National Tube Company, Limited, with a plant and equipment valued at $400,000 and practically now ready to begin operations with a staff of 150 employees.

Among the successful manufacturing enterprises of the city may be mentioned the Ogilvie Flour Mills, the Copp Stove Company, the McKellar Bedding Company, the Superior Brick and Tile Company, the Fort William Broom Company.

Natural Resources are Valuable.

One of nature's valuable gifts to Fort William is the water power available. Within a radius of 50 miles of the city there is water power to the extent of probably 1,000,000 horsepower available. Some 35,000 horsepower has been developed at Kakabeka Falls, on the Kaministiquia River, 17 miles above Fort William. This power has been developed by the Kaministiquia Power Company.

Fort William's harbor and rail facilities are well known. In connection with western Canada's grain crop, it is of some interest to note that Fort William has 23 elevators, with a combined capacity of close on to 30,000,000 bushels. The largest elevator at present in Fort William is the Grand Trunk Pacific, which has a capacity of some 6,500,000 bushels. Additional annexes are being added from year to year that will ultimately bring the total capacity of this elevator to 40,000,000 bushels. This city has been chosen as home of the board of grain commissioners and is to be the headquarters of the grain sample markets.

Iron and other mineral deposits exist in the immediate vicinity. Quite recently considerable development work has been undertaken and samples of iron ore, assaying from 43 to 65 per cent., have been procured.

Lumbering forms a very important industry at and near Fort William and gives steady employment to a great many men and within a fifty mile radius of the city is much arable land.

◆

SOUTH VANCOUVER'S WISE PRECAUTION

The house-to-house inspection being made by the fire department of South Vancouver with a view of preventing fires by advising the occupants of possible sources of danger is proceeding satisfactorily, according to a statement made recently by Fire Chief Lester.

"On the whole," said the chief. "the people take our inspection in the spirit in which it is meant and receive us very well, appreciating the fact that all we are anxious to do is to remove. if possible, the cause of fires. and thus prevent future trouble. There are a few persons, however, who are inclined to look upon our inspection as superfluous and officious, and these people make our work a little unpleasant at times. Still, generally speaking, the people realize that prevention is better than cure. and are grateful when we point out where danger may arise which may be easily avoided by taking certain precautions."

FRENCH STAMP DUTY EXPLAINED

Authority Interprets New Law—Provinces of Canada Enjoy an Advantage

With increasing French investments in Canada and the recent controversy in Paris and Montreal regarding the relation of the Quebec Railway, Light, Heat and Power Company's securities to the Bourse, the new French stamp duty is of particular interest to Canada. Since the French Budgetary law of July 31st was passed, including certain stringent regulations as to the stamp duty payable on foreign government securities when subjected to dealings in France, there has been considerable difference of opinion among those best qualified to know as to the actual and ultimate effects of the new legislation. The London Financial Times has consulted the opinion of the highest authority on security taxation in France through the medium of the British Chamber of Commerce in Paris. It is as follows:—

How the Duty Applies.

(1) The new French 3 per cent. stamp duty applies to the securities specified in law of May 13th, 1863, that is, all foreign government securities (titres de rente, emprunts et autres effets publics de gouvernements étrangers).

(2) Article 13 of the law of July 31st, 1913, exempts from the application of the 3 per cent. duty the government securities already stamped at ½ per cent., 1 per cent., or 2 per cent., under the various laws adopted before August 1st, 1913. However for foreign government securities which were stamped at the reduced rate in force prior to the law of December 28th, 1895, the duty of 3 per cent. will be applied after deduction of the stamp duties already paid. This class of securities stamped prior to 1895 have already paid successive increases of stamp duty. Their original stamp duty was a very low one, amounting, we believe, to little more than 15 centimes per cent.

Law is Not Retrospective.

This authoritative interpretation shows decisively that the law is in no sense retrospective, it being understood from the first that the securities stamped at the very low rate prior to December 28th, 1895, were liable to successive increases. The practical interest of the legislation is with reference to the stamping of the new government bonds issued or to be issued on or after August 1st last. For instance, the loans generally understood to be forthcoming to satisfy the monetary wants of the Balkan States will be subjected to the 3 per cent. duty, and we have heard from many sources, though not from the authoritative one that we are now quoting, that the new French stamp legislation is aimed particularly against ill-considered and unsound emissions likely to be hazarded on behalf of one or more of these countries in the near future.

As to the Direct Debtor.

An interesting and practical point is suggested by the question:—What is a government security in the sense of the present law? Is any security accompanied by a government guarantee, such as a railway debenture, which has a kilometric guarantee attached from the government of the country where the railway is constructed, to be considered as an "effet public"? The answer from the same authority is as follows:—

(3) The 3 per cent. duty will apply to government bonds and securities presenting the character of "effets publics," and not that of an engagement between individuals or companies. For example, it has been decided that the loans of the various states of a federation are "titres des gouvernements étrangers," but not the loans of simple provinces. In other cases, for example, conceded monopolies or state guaranteed railways, the fiscal service has to decide whether the state is the direct debtor (the company or concessionnaire simply supplying a supplementary guarantee) or whether the company is the debtor and the state simply a guarantor. For example, Kharkof-Azof Railway and Tabac Portugais are considered as government securities; Société financière de Roumanie, on the contrary, as a private undertaking (Jobit 327).

(4) Foreign municipal bonds and similar are not considered as government securities, and we believe usually pay the stamp tax annually (0.06 per cent., plus droit de transmission 0.25 per cent.).

The above information is based upon the strict terms of the Budget Law.

As to foreign municipal and provincial bonds entering France, the authority gives the following further information:

Foreign municipal or provincial bonds pay the stamp duty annually—6 centimes per cent., plus "transmission." 25 centimes per cent., and the "impôt sur le revenu." If, for any reason, foreign municipal or provincial bonds were not "abonnés aux timbres," they would pay the stamp duty and other taxation exactly as similar French securities—i.e., stamp duty 1.20 franc per cent., plus "droit de transmission" and "impôt sur le revenu." The cases where municipal bonds would escape the payment of the annual stamp duty, and in consequence have to pay same "au comptant" are, however, rare.

Canada Enjoys Advantage.

The provinces of Canada and of the Union of South Africa, for instance, would thus enjoy an advantage in the Paris market, were they to introduce their loans there, which the Australian states would not. But "it should be borne in mind," says the authority, "that the stamp duty (of ½, 1, 2 or 3 per cent.) is the only tax imposed on foreign government securities"—which is no doubt a compensation. From the fact that "the fiscal service has to decide whether the state is the direct debtor" there will always be need of considerable circumspection on the part of any financiers who wish to introduce foreign government guaranteed stocks into France.

◆

PERSONAL NOTES

Mr. J. B. Morrisette, president of the Life Underwriters' Association of Canada, was in Toronto this week.

Mr. W. S. Dinnick, of the Standard Reliance Mortgage Corporation, Toronto, is leaving for a six weeks' trip to the Pacific coast.

Mr. C. E. La Branche has opened business as a private banker, Estevan, in addition to his board of trade commissionership duties.

Mr. W. J. McMurtry, general manager of the Northern Life Insurance Company, of London, was a recent visitor to *The Monetary Times* head office.

Mr. H. Slasor, C.A., has been admitted as a partner to the firm of Messrs. Pender and Company, chartered accountants, Winnipeg, the company's name now being Messrs. D. A. Pender, Cooper, Slasor and Company.

Mr. McMillan, geologist of the Timiskaming and Northern Ontario Railway, has been appointed mining inspector of the Cobalt district, in succession to Mr. Thomas Sutherland, who has been made chief mining inspector.

Mr. W. C. Brent, of the well-known Toronto brokerage firm, Messrs. Brent, Noxon and Company, has been elected a member of the Toronto Stock Exchange. Formerly Mr. Noxon has been the only representative of the firm on the board.

Mr. J. E. Aldred, president of the Shawinigan Company, has formed a partnership with Mr. R. M. Smith, secretary of the Pennsylvania Water and Power Company, under the name of J. E. Aldred and Company. The company will deal in public utility securities.

Mr. John Wood, of the financial firm J. and L. M. Wood, died this week at Boston, Mass. Mr. Wood was 34 years of age, and was one of the younger financiers. He was a lawyer by profession and was the son of the late Joseph Wood, of Halifax, N.S. He was educated at Dalhousie College and practised in Sudbury from 1906 to 1908. Later he became associated with Hon. Wallace Nesbitt, K.C. and James Bicknell, K.C.

◆

EVIDENCE OF OVERLOADED EUROPEAN MARKETS.

One sign of the times which is causing not a little comment is the bid for capital in this market by Canadian borrowers, remarked the New York Sun in a recent article. The latest example of this development is an advertisement in the local papers offering $1,000,000 province of Ontario 4 per cent. bonds at what are nothing less than bargain prices.

These bonds are described as direct obligation of the wealthiest province of the Dominion, which, because of market conditions are offered at the lowest price ever known.

Here is tangible evidence of the overloading of the European investment market with Canadian securities in recent years. Up to recently, such issues found a ready market in London. There was no necessity for advertising; they were snapped up immediately by foreign underwriters as the cream of security offerings.

Now, as the result of the tremendous amount of financing done recently, Canada finds that she has to go "shopping around" to find a market for her best securities.

CANADIAN PROVINCIAL SECURITIES AND THE BRITISH TRUSTEE LIST

A Brief Record of the Position of the Provinces and Their Securities, the Obstacles To Their Inclusion in the Trustee List, the Efforts Made To Achieve the Desired Object, and the Strong Claims Advanced On Behalf of the Provinces.

(Concluded)

By FRED. W. FIELD

Another point in connection with this question arose in May, 1911, in the English courts in the case of Sir S. M. M. Wilson's estate. Here are the material facts as stated by Mr. A. R. Barrand, F.I.A., in the Journal of the Institute of Actuaries:—

A testator by his will had declared that, notwithstanding any restrictions contained in the Settled Land Acts, any capital moneys arising under those Acts might be invested, "In the stocks or securities (not payable to bearer) of the Government of India for the time being, or of any British colony or dependency." The testator died on December 31st, 1897, and his will was duly proved. The trustees had in hand a sum of about £5,000, representing capital moneys arising under the Settled Land Acts, and the respondent, as tenant for life in possession under the settlement, desired that they should invest in some or one of certain stocks, including stock of the provinces of Nova Scotia, Ontario, Quebec, Manitoba, Saskatchewan, and British Columbia, in the Dominion of Canada.

Trustees Were Willing

The trustees were willing to make the investments if they had power to do so, and an originating summons was accordingly taken out by them asking for the direction of the Court as to whether, as such trustees, they were justified in making the said investments, or any of them. The only question was whether each of the several provinces of the Dominion of Canada was a "British colony or dependency" within the meaning of the investment clause of the will.

The case came before Mr. Justice Eve, in May last, and he held that the trustees were not authorized by the will to invest in such securities. In delivering judgment to this effect, he said: "The whole point which I have to determine is whether these stocks issued by the several provinces constituting the Dominion of Canada are securities of a 'British colony or dependency.'

Definition of a Colony

"The tenant for life argues that each of these provinces is a British colony or dependency—preferably a British colony—and on his behalf it is pointed out that in some recent statutes, more particularly in the Colonial Stock Act, 1900, which followed upon and amended the Colonial Stock Acts of 1877 and 1892, the provinces are all treated as separate colonies. In the Act of 1877, Section 26, the definition of the expression 'colony' is very wide, and includes the whole of the dominion, colonies, islands, territories, provinces and settlements under one central legislature, and such part of the said dominion and such of the said colonies, islands, territories, provinces and settlements as is under a local legislature. For the purposes of those Acts it is clear that each of these particular provinces is a colony. But on behalf of the trustees it is urged that it is only with reference to those particular Acts that each of these provinces is to be deemed a colony, and it does not follow that the proper interpretation of the expression in this will is the same.

"They suggest that the ordinary and proper meaning of the expression is to be found in the Interpretation Act, 1889, where, in Section 18, Subsection 3, the expression is defined as meaning 'any part of Her Majesty's dominions exclusive of the British Islands and of British India,' to which is added this qualification: 'Where parts of such dominions are under both a central and a local legislature, all parts under the central legislature shall, for the purposes of this definition, be deemed to be one colony.' The qualification exactly fits the Dominion of Canada. . . . I think, according to its ordinary and natural use, the expression 'British colony or dependency' means the aggregation of the provinces and settlements making up the Dominion, and cannot be construed in such a document as this will to mean each of the individual provinces or settlements which go to make up the Dominion."

Comment on the Case

Interesting comment on the same legal case was also printed in the *Canadian Gazette* in 1911 by Mr. J. G. Colmer, C.M.G., a valued contributor to *The Monetary Times*, and a gentleman who has taken probably a keener interest than any in this matter:—

"Mr. Justice Eve, in May last, had a case before him in which a decision was asked upon the question whether trustees, who were authorized to invest in the stocks of any British colony or dependency, were justified in investing in stock issued by the provinces of the Dominion of Canada.

"The decision was to the effect that trustees had no power to invest in such stocks in the circumstances; although it was admitted by the judge that the Canadian provinces, under the Colonial Stock Acts, were included in the interpretation of the term "colony." It was maintained, however, that the true interpretation of the word "colony" is to be found in the Interpretation Act, 1889. Section 18, Sub-section 3, which states that all parts of the Dominion under a central legislature shall be deemed to be one colony.

Decision Was Confirmed

"On appeal before the Master of the Rolls, Lord Justice Fletcher Moulton, and Lord Justice Farwell, this decision has been confirmed, and is based largely, as in the case of the decision of Mr. Justice Eve, on the terms of the Interpretation Act of 1889.

"The inscribed stocks of the provinces of Canada are eligible for registration under the Colonial Stock Act of 1877, and amending Acts; and the word colony is defined in the Colonial Stock Act of 1877 as follows:—

> Clause 26. In this Act, unless the context otherwise requires, the expression "colony" means any dominion, colony, island, territory, province, or settlement situate within Her Majesty's dominions, but not within the United Kingdom, the Channel Islands, or Isle of Man, and not forming part of India as defined for the purposes of the Acts for the time being in force relating to the Government of India; and for the purposes of this Act the whole of the dominion, colonies, islands, territories, provinces, and settlements under one central legislature, and also

> such part of the said dominion and such of the said colonies, islands, territories, provinces, and settlements as is under a local legislature is deemed to be a colony.

Trustee Would Be Justified

"It would seem to the ordinary mind that if the stocks of any of the provinces of Canada are brought within the terms of the Colonial Stock Acts (and this has been done in the case of British Columbia, Manitoba, New Brunswick, Nova Scotia, Ontario, and Saskatchewan) a trustee would be justified in investing any funds in those stocks, when authorized to make investments in the stocks of any British colony or dependency. And it hardly seems reasonable to suppose that the special interpretation clause in the Colonial Stock Act, is rendered invalid by the terms of the general Interpretation Act of 1889, which are as follows:—

> Sec. 18. In this act, and in every act passed after the commencement of this act, the following expressions shall, unless the contrary intention appears, have the meanings hereby respectively assigned to them, namely:—
>
> . . . .
>
> Sub-sec. 3. The expression 'colony' shall mean any part of Her Majesty's dominions, exclusive of the British Islands and of British India, and where parts of such dominions are under both a central and a local legislature, all parts under the central legislature shall, for the purposes of this definition, be deemed to be one colony.

Would Have Serious Effect

"The Master of the Rolls stated, in the course of his judgment, that 'it was argued that Mr. Justice Eve's decision would have a serious effect upon the financial position of the provinces. The answer is simple. If they elect to take advantage of the Colonial Stock Act, 1900, no difficulty will arise. They are colonies within the definition of that act. Their securities will at once become authorized securities.' But His Lordship is apparently not aware that the provinces of Canada are not permitted to take advantage of the Act of 1900.

"The Australian States, and many of the Crown colonies and dependencies have been brought within the Act of 1900. But the privilege is withheld from the Canadian provinces, some of which have populations of over two millions, while in the aggregate their populations number over seven millions. The Colonial Stock Act of 1900 extended the powers of trustees, under the Trustee Act of 1893, to enable them to invest trust funds in colonial securities under regulations to be made by the Lords Commissioners of the Treasury."

Provinces Could Readily Comply

Mr. Colmer then quoted the conditions numbered 1, 2, and 3 at the beginning of this article, and continued: "The Canadian provinces could readily comply with the first two of the regulations, and the only difficulty in the way of extending the benefits of the Act of 1900 to them, under the regulations in question, is found in the third regulation. It is held by the Imperial authorities that they have no direct right of disallowance, as far as the legislation of the provinces of Canada is concerned, and that the position in that respect is different to the position obtaining in the case of colonies to which the provisions of the Act of 1900 have been applied. Under the British North America Act, the power of disallowance in relation to the legislation of the provinces is, it is true, reserved to the Governor-General-in-Council, and the contention is, therefore, correct so far as it goes; but the provinces have placed on record, through resolutions passed, in every case, by the provincial legislatures, that any provincial legislation which appears to the Dominion or Imperial Governments to alter any of the provisions affecting the stock to the injury of the stockholders, or to involve a departure from the original contract, would properly be disallowed by the Governor-General. And further, if that assurance is not deemed to be sufficient, the provinces have expressed their willingness to give favorable consideration to any suggestions that may be made by his Majesty's Government to enable the Stock Act of 1900 to be extended to the stock already issued, or to stock which may be issued in the future by the Governments of the provinces of Canada.

Have Been Unsuccessful

"These provinces have, however, so far been unsuccessful in their endeavors to obtain for their stocks the privileges conferred by the Act of 1900, although they are prepared to give effect to the provisions of the regulations of the Treasury under the Act in question; and they alone, among all the constituent parts of the Empire, are in consequence prejudiced and their financial interests and credit adversely and seriously affected.

"The Canadian provinces seem, indeed, to be in an unfortunate position. They are not regarded in law as colonies or dependencies, and executors or trustees cannot invest in their stocks, when specifically authorized to invest in the stocks of any British colony or dependency. Surely this discrimination ought to be remedied; and if the decisions referred to are right in law, and the Interpretation Act of 1889 over-rides the special interpretation clause in the Act of 1877, the former ought to be amended so as to include the provinces.

Means Should Be Found

"And again, some means ought to be found to give the provinces of Canada the benefit of the Act of 1900, and to make their inscribed and registered stocks rank with other colonial trustee stocks, such as those of the Dominion of Canada, South Africa, Newfoundland, New South Wales, New Zealand, Queensland, South Australia, Tasmania, Victoria, Western Australia, Barbados, British Guiana, Ceylon, Gold Coast, Grenada, Hong Kong, Jamaica, Lagos, Mauritius, St. Lucia, Sierra Leone, and Trinidad. Surely the great provinces of Ontario, Quebec, Nova Scotia, New Brunswick, Manitoba, Saskatchewan, Alberta, and British Columbia are equal in importance to the states and colonies that are mentioned above? The loans they issue are all sanctioned by Parliament, and the Acts authorizing them are assented to in the name of His Majesty. They ought not to be penalized because their position in the Confederation of Canada is not so loosely determined as that of the States of Australia in the constitution of the Commonwealth. If, instead of joining together and making one great union, the Canadian provinces had retained the status of separate colonies, they would have been eligible to receive the benefits of the Act of 1900, which are now denied to them."

A copy of the Colonial Stock Act, 1900, the Treasury Order and other official documents in connection with this subject may be seen at the head office of *The Monetary Times*, Toronto.

◆

THINGS ARE BRISK AT MEDICINE HAT.

From figures which have been compiled by building inspector Daley, of Medicine Hat, the excellent record made in Medicine Hat this year for building permits was fully maintained during August, showing that, in spite of untoward financial conditions generally prevailing, this city continues to show substantial progress. For the month of August, 1913, the building permits issued by the city amounted to $802,241, while for the same month of 1912, the total of the permits amounted to $243,400, being an increase of more than 300 per cent. this year over last. For eight months of 1913 the total of the building permits issued here totalled $3,009,175, while for the corresponding period of 1912, they amounted to $1,906,664. In fact the building permits issued in the eight months of this year are more than during the 12 months of last year, when they were $2,836,219.

SUSPICIOUS AND INCENDIARY FIRES

Analysis Made By an Expert — Question of Motives

That all intentionally-produced fires spring from one of the following four causes, was the assertion of Mr. Frank Lock, of New York, manager of the Atlas, of London, at the 41st annual convention of the International Association of Fire Engineers, held in New York:—

1. Motives of revenge or spite.
2. Insanity, weak-mindedness, drunkenness or mania for excitement.
3. To cover up evidence of crime, such as theft or murder.
4. For unlawful gain to procure insurance money.

We have seen, said Mr. Lock, that incendiarism is localized to what in the insurance business is called "Moral Hazard." Pursuing our investigation further, we have proved that out of the four causes of incendiarism there is only one which has any possible relation to fire insurance. This is most essential to bear in mind, as almost all popular discussions assume, as a matter of course, that insurance is the underlying cause of everything classified as incendiarism—a very unfair assumption.

Small Percentage Incendiary.

Mr. Lock cited statistics showing that of about 77,000 fires in nine states 2.97 per cent. were classed as "suspicious or incendiary," while in Greater New York the percentage for three years (nearly 44,000 fires) was 4.42 per cent., the whole giving a result of 120,903 fires, of which 3.49 per cent. were "suspicious or incendiary," while 18.59 per cent. were ascribed to "unknown causes."

From the foregoing figures, we are justified, he said, in assuming as a fair estimate based upon all available data, that the number of suspicious or known incendiary fires of all kinds does not exceed a percentage of 3.50 of the total number of fires.

But it will be rightly argued that, hidden in the mass of fires "cause unknown," lies a further heavy percentage of incendiary fires. This is surely so. It may even be allowed, for the sake of argument, that one-half of all the "cause unknown" fires are incendiary, and should therefore be added to those reported as incendiary. As out of the 120,903 fires with which we are dealing, 18.59 per cent. are reported as "cause unknown," we add one-half, or 9.29 per cent., to the ratio of incendiary fires of 3.50, so making 12.79, or say 13 per cent., estimated as the total proportion of all fires in the country due to incendiarism. This must be deemed a very liberal estimate. Taking the best known estimated figures of the total United States and Canada fires, those compiled by the Journal of Commerce, we find for 1912 they amounted to $225,321,000. Assuming 13 per cent. of this amount to be due to incendiarism as a whole, the figure reached is $29,291,430.

Owes Origin to Fire Insurance.

But this is the figure of incendiarism due to all four motives of revenge, insanity, crime and insurance. Eliminating the three which have no bearing upon insurance, and keeping to the topic, "The Relation of Fire Insurance to Incendiarism," we now reach the question:—What proportion of the 13 per cent. of the total fire loss owes its origin to fire insurance? The available statistics are meagre; but three states give the motives of incendiary losses so far as known—viz., Massachusetts, West Virginia, Ohio. The figures for 1,320 incendiary fires recorded in these states are:—For revenge, 351; crime or drink, 36; insanity, 167; for insurance, 258; unknown, 508; this item of "unknown" being about 38.5 per cent. of all incendiary fires. From these figures it would appear that 19.5 per cent. of the known incendiary fires had insurance imputed as the motive by the state officials; if to this we add one-half of the "motive unknown" incendiary fires, we reach 19 per cent. more, or 38.5 per cent. in all, as a proper estimate of the incendiary fires which have fire insurance as the exciting cause. As we have before demonstrated the volume of all the fires caused by incendiarism to be approximately $29,291,430, we now take 38.5 per cent. of that amount, showing an amount of $7,705,978 as the probable fire loss in the United States and Canada which can fairly be imputed to fire insurance in its relation to incendiarism, or a ratio of 3.42 per cent. of the total estimates for all losses for the year 1912.

This figure of 3.42 per cent. compares with widely-promulgated estimates of from 25 to 50 per cent. of our total fire loss based upon nothing but guesswork. The figure is doubtless not far from the truth, and justifies what is said before, that while we cannot prove exactly any estimate, it is easy to disprove those which have hitherto been extant. Facts are very disturbing; they upset theories, guesses and sensations which are dearly prized by those who beget them. Doubtless the reason why the popular conception is so much higher than the reality is due to the fact that fires suspected to be due to incendiarism attract notice and are talked about, while the fires having only careless, but not criminal, origin, pass without comment.

As to Over-Insurance.

Discussing over-insurance, Mr. Lock said that the great bulk of policyholders in the community are honest people who do not pay premium upon more than a fair valuation of their property. Thus the vast proportion of property in the country is not over-insured.

Over-insurance is usually in evidence from one of three causes:—

1. Honest over-valuation of property from failure to understand the effect of age, depreciation, or wear and tear.
2. Fluctuation in quantities of merchandise passing in and out of stores or warehouses, or from changes in market values.
3. Intentional over-valuation for fraudulent ends.

Upon this subject we have access to some figures which are illuminating. In 1912 statistics of 55,391 losses incurred by 44 insurance companies in the western field were analyzed, showing only 783 cases of over-insurance, or about one and one-half per cent. of the whole. Of these cases 265 were shown to be from causes perfectly honest, leaving 528 of doubtful origin. The fact would seem to be that, as suspicious losses generally come to the attention of public officials, an impression is made as though a general epidemic of over-insurance existed, when in sober reality in over 95 per cent. of all cases of loss the amount of insurance is well within the value of the property.

SITES AND POWER FOR NEW INDUSTRIES.

The town of Renfrew, Ont., has a few sites and surplus power from the new municipal power development, which could be placed at the disposal of companies wishing to establish branches in Canada.

TRADE BETWEEN CANADA AND BRITAIN.

The following are official figures of the trade between Great Britain and Canada during August:—

From Canada—	1912.	1913.
Wheat	£696,657	£868,255
Flour	217,943	144,539
Oats	75,436	75,999
Cattle	27,094	......
Bacon	138,539	65,893
Hams	32,669	24,857
Cheese	652,589	649,590
Canned salmon	5,796	22,202
To Canada—		
Spirits	54,275	43,885
Sugar	16,958	3,728
Wool	10,368	6,743
Hides	16,382	1,485
Pig iron	19,945	6,975
Wrought iron	4,468	5,286
Rail iron	1,079	......
Plates	3,569	11,262
Galvanized sheets	29,746	33,878

CANADA'S FINANCES.

Canada's financial statement for August shows increases in both revenue and expenditure over the figures for the corresponding month of 1912. The revenue amounted to $14,547,853, as against $14,445,849, an increase of $101,986. The ordinary expenditure totalled $11,028,196, an increase of $4,075,131 over the expenditure for August, 1912. There was also an increase of $2,397,062 in expenditure on capital account—namely, from $4,803,811 to $7,200,873. This increase was about equally divided between the expenditure on public works and payments of railway subsidies during the month.

For the six months ended August 31, the revenue amounted to $71,628,457, an increase over the revenue for the first half of the last fiscal year of $4,725,290. Expenditure on ordinary account totalled $39,428,572, an increase of $4,077,435. Expenditure on capital amounted to $20,215,144, as compared with $8,701,167 for the six months ending 31st August, 1912, an increase of $11,513,977. The principal revenue increases in the half-year were:—In Customs receipts, a million and three-quarters; in post-office revenue, half a million; and in receipts from public works and railways, $666,100.

MINERALS OF MANITOBA

Possibilities of Production — Necessity of Utilizing Resources

It cannot be said that a great deal of attention has been paid to the possibilities of Manitoba as a mineral producer. This is as might be expected in a province where agriculture has been, and is, of paramount importance. And yet the soil is not the only natural asset of any country; and a systematic investigation of the mineral resources must always play a prominent part in contributing to the development of the whole, suggests Dr. R. C. Wallace, of the University of Manitoba.

If we associate with the name of minerals such ores as are mined for gold or silver or copper, then it is, indeed, the case that minerals and good agricultural soil are not as a rule found together in nature. But under mineral resources must also be included materials such as clays, shales, sands and gravels, limestones, marls and coals, all of which are frequently found in districts which support a thriving agricultural population, and all of which call for development in the agricultural areas of our own province.

One need only instance the case of our neighbor across the international boundary line, where a strong State Geological survey and equally strong School of Mines, both integral parts of the University of North Dakota, are doing magnificent combined work in directing the development of the clays, cements, and coals of that State along the most rational and economical lines. A study of the features of industrial progress in a State pre-eminently agricultural, which are to be directly attributed to the researches and guidance of these organizations, would well repay the people of Manitoba.

Where Possibilities of Revenue Lie.

But at a time when the province is on the eve of entering into a larger heritage, it is natural that attention should be directed rather to what we are likely to obtain than to what we already possess. Although certain areas in the vast Archæan territory of the new Manitoba have a coating of clay sufficient to provide an agricultural soil, the possibilities of revenue lie mainly in the mineral resources, the timber, the fisheries and the water power which the new territory will provide. And it is here that the onus of the work will fall. Up to the present time it has been found possible to carry out organized geological survey work only along some of the principal waterways, and private prospecting has been desultory in the extreme. In order to realize the extent of our possibilities, and the importance of systematic work in this field, it need only be pointed out that in a district—comparatively speaking at our own doors—a discovery of gold was made over two years ago which has led to the influx of a large number of prospectors into that particular area; and this in a belt which had not previously been geologically examined or even topographically mapped.

Utilizing Available Resources.

The glamor of the Northland ought not to blind us to the necessity of utilizing the resources more easily available within the limits of the province. If Portland cement were manufactured from raw materials mined in Manitoba, a very considerable saving in freight rates might be effected. Limestones sufficiently pure for this purpose outcrop at various points on Lake Manitoba, and the necessary clay or shale is available conveniently near at hand.

The following figures are given as summarizing the present situation, in so far as can be done with the latest available figures. They will also serve to contrast the present with possibilities for the future, when serious attention is given to developing our minerals.

Total production for Manitoba, 1911	$1,684,677
Total production for Saskatchewan	618,379
Total production for Alberta	6,404,110

The detailed statement of Manitoba's mineral products for 1910 shows: Gypsum, $195,000; clay products and sand-lime brick, $753,232; granite, $3,345; cement, $21,995; lime, $100,800, and limestone, $328,000.

◆

The Railway Commission has given its approval to the operation of the Regina-Boundary line of the Grand Trunk Pacific Railway. This line will give Regina direct connection with Minneapolis and St. Paul.

That Vancouver Island timber is reasonably free from damage by insect pests is the conclusion of Mr. J. M. Swaine, of Ottawa, assistant entomologist for the Dominion Government, who has just completed a two months' inspection of the island's timber reaches. Mr. Swaine states that at Campbell River and other points on the island he found damage had been done to trees, but the harm was well scattered. The bark-beetle was causing damage among the white pine, but the timber growth generally was healthy.

BRITISH COLUMBIA'S MINERAL PRODUCTS

Display of Provincial Minerals—Land Question and Colored Races—Russian Trade

British Columbia mining interests plan a display of provincial minerals for 1915, the idea being to have something worthy to show people who may be coming and going to the Panama Exposition at San Francisco in that year. A nucleus of the collection has been formed, for the Vancouver Exhibition has been assembling ores for several years. In the mineral department at the recent exhibition there was not only metalliferous ores, but raw material, which is the basis of several established industries, such as cement manufactories, salt works, pulp works, plaster factories, etc. Mr. H. B. Brown, of Hedley, manager of this department, is well versed in all kinds of ores and has had successful mining experience in different parts of the continent.

Valuable Commercial Deposits.

Most people know that in British Columbia there is gold, copper, iron, silver and lead in large quantities, but it was a surprise to some residents of British Columbia to see salt from the wells of the British Columbia Salt Company, of Prince Rupert, which are located at Kwinitsa, on the Skeena River, and an exhibit of polished marble, comprising twelve distinct colorings, from Texada Island. This marble is the equal of Italian and Tennesseean marbles. The marble here is located within fifty miles of Vancouver. Gypsum, of which there are large quantities in the Similkameen, was shown, as well as the finished plaster. With the completion of the direct railway lines between the coast and the Kootenay, this product may be manufactured and shipped to Victoria and Vancouver, displacing imported material of the same kind.

Wheat Shipments and Land Settlement.

A group of Canadian Pacific Railway officials are on the coast this week, having timed their visit so as to see the Empress of Asia, which arrived here a week or so ago. The party includes Sir Edmund Osler, president of the Dominion Bank; Mr. H. S. Holt, president of the Royal Bank of Canada; Mr. W. D. Mathews, president of the London Electric Company, etc.; Sir William Whyte, and Mr. George Bury, vice-president of the railway company. Sir William Whyte, who is recognized as perhaps the leading transportation man in Canada, discussed the grain yield and possibilities of shipment via Pacific coast cities. He would not commit himself as to the policy of the Canadian Pacific Railway, contenting himself with giving the assurance that the railway company would be found equal to the occasion. "Wait until the Canal is opened and we will soon decide what is required," was his statement. Commenting on general financial conditions, he said that as a result a much firmer basis would be established, and that there would be a great improvement in the situation as a whole.

The Vancouver board of trade has endorsed the action of the board of trade of Duncan, Vancouver Island, that the government should pass legislation to prevent persons, other than those belonging to the white races, to acquire any title or other interest in lands in British Columbia. The government at the last session enacted the law that only white people should farm land in this province, Mr. C. E. Tisdall, M.P.P., stated at the meeting, the object being to encourage settlement by European races. The matter has come to the front by the action of the legislature in California, and also by the number of people on the coast who are out of work. Foreign races coming here have taken hold of the land question, especially Chinese. Ordinarily, the white man cannot get down to the labor required to make cultivation of small holdings pay. The cost of land is heavy, clearing is expensive, and it is difficult to secure holdings within a reasonable distance of a city. The inability to get land is the primary reason of non-settlement. That land is in demand is shown whenever a portion is available for pre-emption.

Trade with Russia.

Dr. I. M. Goldstein, fellow of the University of Moscow, who has been studying economic and industrial conditions in the Dominion on behalf of the Russian government, was on the coast this week. One of the objects is to build up trade between Canada and Russia, and he expects an expansion as a result of his investigation and the recommendations he will make. Trading with Russia through western Canadian ports is not unknown, for the transpacific boats of the Canadian Pacific Railway often carry freight consigned to Vladivostok. The Russian volunteer fleet is establishing a steamship service direct between Victoria and Vancouver and Vladivostok, the first boat of which is soon expected. There is also being discussed the inauguration of a service between Western Canada and Odessa, on the Black Sea, by Russian capitalists, who foresee trade possibilities following the opening of the Canal.

The Bank of Nova Scotia has opened a branch at Chester, N.S., under the management of Mr. P. C. Pope.

COURSES IN BANKING

Our courses in practical banking have been compiled to meet the need of CANADIAN BANK OFFICERS, and are the product of years of deep study and ripe experience of our staff of

6 WELL-KNOWN AUTHORITIES

These courses include instruction in

Commercial Arithmetic
Penmanship
Bank Geography
English Composition
Bank Correspondence
Commercial Law
Bookkeeping
Practical Banking
Economics
Current Financial Events
Bank Organization & Management
Auditing

THE OFFICERS OF SEVERAL OF CANADA'S LEADING BANKS ARE NOW STUDYING WITH US. EVERY BANK OFFICER NEEDS THIS INSTRUCTION.

Fill in name and address—cut out, and mail this ad. to-day.

M.T.

WORDS OF A WELL-KNOWN LIFE UNDERWRITER.

Mr. J. B. Morrisette in his interesting address before the National Association of Life Underwriters said in part:—

"I am the bearer of greetings from the Life Underwriters' Association of the Dominion of Canada, representing as it does the life insurance interests extending throughout the northern part of this continent, from the province of Prince Edward Island, where millionaires are being made by the breeding of black and silver foxes, to British Columbia, where millions of salmon are annually caught and canned by machinery, and where the mining, the fruit-growing and the timber industries are among the wonders of the west.

"My only regret is that you are not, one and all, as intimately acquainted with the marvellous, yet almost undeveloped resources of forest, mine and water power of that country, and therefore as competent to judge of its capabilities and possibilities, as Sir Wilfrid Laurier is.

"He predicted 'that while the nineteenth century was the century of the United States, the twentieth would be Canada's century.' Be this as it may, and I wish for your great friendly country not one bit less of progress and prosperity in the years to come than have attended it in the past—a wish in which every true-hearted Canadian earnestly joins, the nineteenth century was indeed the seed time of life insurance, education, life insurance organization and life insurance work, the twentieth is destined to be, in both Canada and the United States, the season of their full and ample fruitage."

"It has been claimed that the life insurance interests of this continent are scarcely secondary to its banking ones. How exceptional, therefore, are the opportunities for usefulness open to the National Association—the active official organization of the ambassadors of so goodly and so noble a cause."

"I am among friends, upon whose sympathy in our Canadian work, for the good cause, we can always depend, and from whose fellowship and experience I hope to learn much that may prove useful to us in the great awakening north country, which has only lately, by its hopes and aspirations, its agricultural, industrial, financial and intellectual development, taken its place among the nations."

CANADIAN PACIFIC RAILWAY'S CROP REPORT

The following is the estimate of the Canadian Pacific Railway's general grain agent, Mr. T. Achison:—

Wheat

Province.	Yield per acre.	Bushels.
Manitoba	19.0	59,679,000
Saskatchewan	20.0	114,800,000
Alberta, "S"	22.0	22,000,000
Alberta, "W"	20.0	1,540,000
Wheat, total		198,019,000

Oats

Manitoba	46.0	89,240,000
Saskatchewan	38.0	100,244,000
Alberta	35.0	44,345,000
Oats, total		233,829,000

Barley

Manitoba	35.0	40,390,000
Saskatchewan	40.0	12,280,000
Alberta	30.0	11,310,000
Barley, total		63,980,000

Flax

Manitoba	12.0	1,380,000
Saskatchewan	12.0	11,604,000
Alberta	10.0	650,000
Flax, total		13,634,000

Total grain yield, 509,462,000.

A London cable to the Montreal Star says: Ottawa's success has an interesting feature in the fact that it is the first issue made by Herbert, Wagg & Russell, whose retirement from the Stock Exchange some months ago caused much comment, the reason given being the decline of business in Throgmorton Street, and the restriction which the membership of the house involved to issuers of new loans in London.

OLD COUNTRY MANUFACTURERS AND CANADA

Exhibition Trains May Be Run Here—Commercial Bodies Considering the Matter

It seems decided that a made-in-Ireland train, under the auspices of the Irish chamber of commerce, is to tour Canada. Specimens of Irish manufacturers will be transported from Belfast to Quebec by way of Empress steamers from Liverpool. At Quebec a Canadian Pacific Railway train, consisting of ten sample cars, will be fitted up with exhibits, and sent for a trip over three transcontinental railways as far as Calgary, returning via Montreal and St. John, N.B.

At the latter port the exhibits will be reshipped for Liverpool and Belfast. The round trip, it is estimated, will cover about 12,000 miles, and will take up from 75 to 80 days. Arrangements have been made with the Canadian Pacific Railway that the cost of each car shall include all expenses of the entire trip from and to Belfast, including maintenance charges for four attendants allowed to each car.

Made-in-Britain Train.

If it is true that an exhibition on wheels is also the latest project for bringing British manufactures before the people of Canada, would it not be possible for the Irish and English trains to combine forces? The idea regarding the second "exhibition," is to buy a train, stock it with British products and send it on an almost continuous run, extending over four years, from Atlantic to Pacific. The Canadian Chamber of Commerce in London, which has taken the initiative in the matter, is in negotiation with 18 of the principal chambers throughout the United Kingdom.

What a United States Firm Did.

In 1911 a United States manufacturing firm built an exhibition train to show its manufactures, visiting 36 cities in 18 states in three weeks. The train was composed of an engine with two tenders, carrying their own coal, two suite cars, two dining cars and nine exhibition cars. The cost is estimated to have been $1,500,000. The overhead expenses were about $3,000 per day, the total trip costing about $60,000.

In his report to the Imperial Board of Trade, on the trade of Canada for 1912, Mr. C. Hamilton Wickes, British Trade Commissioner in this country, mentions the Canadian Manufacturers' Association exhibition train, which has twice toured Canada and asks:—"Is there any reason why this should not be utilized to exhibit British manufacturers right through the Dominion, visiting the principal cities on a regular and published itinerary? The organizer of such a tour should engage a small office staff to accompany the tour, to include a man thoroughly conversant with transportation rates, ocean and rail, and a financial secretary acquainted with the customary terms of payment of sales, given by manufacturers and dealers, for the various main merchandise lines sold in the Dominion. Both of these men could, no doubt, be provided by the transportation company,"

As to Heavy Lines.

There would seem to be some difficulty in providing suitable space for many of the heavy lines manufactured in Great Britain and for which there is such an excellent market in Canada. That might be overcome by the exhibition of working models and in other ways which should readily occur to those interested.

◆

CRITICISM FROM WITHIN

It is good sometimes to hear Western Canada admonish itself. Here is an extract from a letter written to *The Monetary Times* from a correspondent in the West, regarding the manner of dealing with tax arrears in Saskatchewan.

"Amongst the great number of complaints which we have against the method of treating arrears of taxes in Saskatchewan," says the letter, "three stand out very clearly and distinctly:—

1. The system of forfeiture of lands to the municipality is wrong.

2. The notification given to mortgagees is utterly inadequate, and, in practice, valueless. In place of notice through the mails there should be personal service as in the province of Manitoba.

3. The confusion which exists in the different kinds of procedure for cities, towns, villages, rural municipalities, school districts and separate school districts utterly defies the understanding of our best solicitors, who are at a loss to discover why a uniform method is not in use for each class of municipality or district.

LAKE SUPERIOR CORPORATION

Reports Compared—Changes in Accounting—Substantial Increase in Earnings

The Lake Superior Corporation in its annual statement for the year ended June 30th last, shows a gain of $251,762 or no less than 150 per cent. in the balance remaining after fixed charges and general expenses had been met.

After paying the full interest on the $3,000,000 5 per cent. income bonds and setting aside $234,372 for reserve funds, the corporation showed at credit of profit and loss account at the end of the year the sum of $56,573, as compared with $21,765 the previous year, and $4,346 in 1911.

Changes in Accounting.

Some bookkeeping changes, by which certain charges of the Algoma Steel Corporation were apparently deducted from the earnings of that company instead of going under the head of the Lake Superior's charges affect comparisons in respect to both the income from subsidiary companies and the charges paid out. These changes are adjusted when the figures come down to the balance after all charges and the net result is to show the substantial gain in that item already referred to.

The progress of the corporation in the last few years is shown by the fact that from $85,977 in 1911, the balance, after fixed charges, had grown to $167,418 in 1912 and to $419,180 in 1913. The full interest on the $3,000,000 income bonds has now been paid for two years in succession, as against a little less than 3 per cent. paid in 1911.

Report for Year Ending June.

The report for the year ended June 30 last, with changes from the previous year, is as follows:—

	1913.	Increase.
Income from subsidiary companies	$793,148	$ 97,172
*Other income	12,514	111,935
*Total income	$805,662	$ 14,763
*Interest	386,482	266,525
Balance	$419,180	$251,762
From previous year	21,765	.17,418
Balance	$440,945	$269,180
Interest on income bonds	150,000	
Balance	$290.945	$269,180
Reserve funds	234,372	234,372
Surplus	$ 56,573	$ 34.808

---

*Decrease.

◆

DOMINION STEEL BONDS IN LONDON.

The London Stock Exchange has listed a further issue of £200,000 5 per cent. consolidated mortgage bonds (sterling series) of the Dominion Iron and Steel Company, Limited, making the total amount listed £1,599,900.

◆

UNITED STATES AUGUST FIRE LOSS.

The fire losses of the United States and Canada for August as compiled from the carefully-kept records of the New York Journal of Commerce show a total of $21,180,700. The following table gives a comparison of the losses by fire during the first eight months of 1913, together with the same time in 1912 and 1911, also the losses by months for the balance of those years:—

	1911.	1912.	1913.
January	$21,922,450	$35 653,150	$20,103.250
February	16 415 000	28,601.650	22.084.600
March	21.569.800	16.650.850	17.511.000
April	17,670,550	16,340.400	16,738.250
May	21.422.000	21,013.050	17.225.850
June	20.601.050	16,103.450	24.042.700
July	25.301.150	15.210.100	20.660.000
August	12,662.650	14.158.800	21.180.700
Total 8 mos.	$167,655,550	$163,750.350	$160.537,250

The Monetary Times' fire register shows Canada's fire loss totalled $3,034,775 during August, the total for the year being $19.939.036.

EAST AND WEST ARE CO-PARTNERS

There Are No Divisions in Commercial Canada—Manufacturers Discuss Tariff Adjustments

"It must be remembered that since 1878 the investment of British and foreign capital in manufacturing establishments and in industries incidental thereto, has been enormous. Any change, therefore, in the policy of the country in regard to tariff matters must be approached in a careful and conservative manner, if the best interests of our own people are to be considered, and if the capital already invested is to be properly safeguarded and the high credit and borrowing powers we have enjoyed in the past maintained," remarked Mr. C. B. Gordon in his presidential address at the Canadian Manufacturers' Association Convention.

"But although I think I am safe in making the statement that the tariff is generally satisfactory to the manufacturers' interests, and is approved by the vast majority of the people of Canada, still, through the lapse of time, and due to the ever-changing conditions under which business is carried on, especially in a new country, inconsistencies have crept into it, and if in many cases these are not of a serious nature, still they call for adjustment.

"I am not here to say that a general revision of the tariff is either necessary or advisable at this time—but I am convinced that there are some items in the tariff which call for immediate action on the part of the government, which, if not properly adjusted, will lead to serious losses to investors and to the credit of the country, generally.

Semi-finished Materials Left Without Protection.

"I refer, for instance, to the iron and steel tariff, to which a certain amount of protection is given with one hand, and taken away with the other.

"The finished products in this industry have been given a fair amount of protection, but the materials of a semi-finished nature, and which are produced by the development of our natural resources, are left without proper protection. I do not think, from what I am told, that even this schedule calls for any advance which would cost the consumer a penny, but rather to internal adjustment placing the rates on the different manufactures of iron and steel, where they properly should be, to afford fair and scientific protection according to the amount of capital and labor involved.

"The Manufacturers' Association understands that the position of the government in dealing with tariff is a delicate one, as it has been said that the West was opposed to protection. But we have reason to believe that a considerable change has come over the West in this respect. Why? Because they are witnessing the establishment of more manufactures in their midst, and it has become a settled policy of the Association to encourage in every way in their power the opening of establishments in the West.

"If any person be doubtful of the present or future prospects of manufacturing in Canada, I would advise a visit to the Canadian National Exhibition at Toronto, which has just closed. Here will be found gathered together, each year, and placing before the Canadian people for their approval, as it were, the results of our present tariff policy, and I think those of you who have visited that exhibition, will agree in pronouncing it conclusive evidence of the progress of manufacturing and the desirability of continuing present policy.

Development Based on Firm Foundation.

"I referred to the position of the East and the West in regard to tariff matters, and to the difficulty which the government of Canada, for the past ten years, has been confronted with, but really, for anybody to speak of the East and West of Canada in any way, other than in geographical terms, is ridiculous, for, in so far as trade and commerce are concerned, there is no such thing as East and West in Canada—the West has been made by the East and the East is now benefiting by the prosperity of the West. The immense development of our western country would not have been possible, and could not have taken place in the limited space of time in which it has taken place, were it not for the firm foundation of credit which has already been established by our eastern provinces."

◆

CANADIAN MANUFACTURERS' NEW OFFICERS

The election of officers at the convention of the Canadian Manufacturers' Association resulted as follows: President, C. B. Gordon, Montreal; first vice-president, E. G. Henderson, Windsor, Ont.; second vice-president, J. H. Sherrard, Montreal; treasurer, George Booth, Toronto; auditors, Wilton C. Eddis & Sons, Toronto.

Chairman of Committees—Tariff, H. H. Champ, Hamilton; Transportation, S. R. Parsons, Toronto; Legislation, T. Findlay, Toronto; Membership, N. A. Howie, Toronto; Insurance, H. W. Fleury, Aurora, Ont.; Technical Education, H. H. Mason, Toronto; Workmen's Compensation, P. W. Ellis, Toronto.

CANADA TRANSPORTATION LINES ORGANIZED

All Companies Except Richelieu and Ontario Have Been Actually Taken Over—Details of Capital

The position of the Canada Transportation Lines, Limited, is stated as follows by Messrs, Colin McCuaig and Company, of Montreal. All the companies, except the Richelieu and Ontario, which were included in the consolidation plan, have now actually been taken over by the Canada Transportation Lines. The Richelieu and Ontario, was to go in under certain conditions and it is on the working out of this side of the plan that the various interests are now engaged. Meanwhile the Richelieu and Ontario is merely continuing along on the old lines as a separate enterprise.

Capitalization of New Company.

The capital of the new company will be as follows:—

$8,000,000 5 per cent. debenture stock.

$12,500,000 7 per cent. cumulative preferred stock.

$12,500,000 common stock.

Regarding the above issue of common stock, it is probable that not more than $9,500,000 will be actually issued. Any such change will not affect the proportion of the common stock which the shareholders of the Richelieu and Ontario Company are to receive. Therefore they will get, as originally announced, 120 shares of the preferred of the new company with a bonus of 40 per cent. common of the new company, for every 100 shares of the Richelieu and Ontario.

Estimated Total Earnings.

The estimated total earnings of the new company for the year 1913 are as follows:—

Total net earnings		$2,016,948
Debenture interest	$375,000	
Preferred dividend	875,000	
		$1,250,000
Available for reserve and dividends on common stock		666,948

Equivalent to 6½ per cent. on the common stock.

From a market standpoint, the introduction of the stock into England should considerably reduce the floating supply, as it is the intention to list it on the London Stock Exchange, as well as the Montreal and Toronto, and thus a much wider market will be established.

◆

DEATH OF MR. JAMES ROSS

Mr. J. Ross, the well-known railway builder and financier, died at his residence, Montreal, on September 13th. The late Mr. Ross was born at Cromarty, Scotland, in 1848, and was educated at Inverness Academy and elsewhere. He took up the profession of civil engineering, emigrating to America in 1870, where he was employed with the Ulster and Delaware Railway, a line in New York State, and later with the Wisconsin Central and the New York, Ontario and Western.

He removed to Canada with his wife in 1878, and became a resident of Lindsay, Ont., where he was appointed chief engineer and general manager of the Victoria Railway, now part of the Canadian Pacific system. During the same period he built the Credit Valley Railway. In 1883 Mr. Ross joined the Canadian Pacific Railway, then a line largely on paper, and was placed in charge of the construction west of Winnipeg. As engineer, and later as contractor, he built the main line through the Rocky Mountains, completing what he regarded as his greatest achievement in 1885. Subsequently he built the Regina and Long Lake, and the Calgary and Edmonton lines of the Canadian Pacific.

Mr. Ross removed to Montreal in the year 1888, and soon afterwards turned his attention to the newly-invented electric street railway, of which he built a large number in Canada. The Toronto Railway was one of these, Mr. Ross, with Mr. William Mackenzie, having bought the old horse car system from the city in 1892, with a thirty-year franchise. Mr. Ross electrified the system and Mr. Mackenzie attended to the financing of the company. He also built the electric railways in Montreal, Winnipeg, London, St. John, and Kingston, Jamaica. He was associated with Mr. Mackenzie in the electrification of the steam tramway system in Birmingham, England, which was later bought by the municipality. Mr. Ross also was connected with the organization of the Mexican Light and Power Company, now controlled by the Pearson interests.

Since his retirement from the Dominion Coal Company, Mr. Ross has had little to do with the direction of the numerous companies in which he was financially interested. He retained, however, the presidency of the Dominion Bridge Company and of the St. John Street Railway, and was a director of the Bank of Montreal, the Royal Trust Company and the Canadian General Electric Company, as well as of several industrial corporations.

PANAMA CANAL AND ITS ECONOMIC EFFECTS

Britain's Favorable Position in International Trade—Decisive Factors and Competition

Local effects and the influences upon world trade were the basic heads under which Professor A. W. Kirkaldy discussed the economic importance of the Panama Canal before the British Association at Birmingham recently. "The Panama Canal will add enormously to the commercial facilities between the various regions of the American continent and the adjacent islands, hence important developments may be expected. The West India Islands will enter upon a new period of prosperity, especially when the internal combustion engine takes the place of steam and oil replaces coal. English business and fiscal methods will have a great effect on making the West Indies important to shipping, and thus assist the development of local industries, especially the export of raw material. The comparatively unprogressive states of Central and South America will undergo remarkable developments owing to increased immigration of Europeans and increased trade. These local benefits will be the chief, and ample, justification for the construction of the canal."

Britain Must Hold Market.

Of the effect on world trade, he suggested:—"America realizes the importance of the coal trade to the United Kingdom; there will be a strenuous attempt to displace British coal throughout the world in order to give American shipping the advantages at present enjoyed by British. If successful, this will deal a mortal blow at our mercantile marine. Thus the British coal industry must realize the situation, and both the capital and labor interested resolve to hold the market at all costs until the fuel question—coal or oil—is finally settled.

"The published scheme of tolls which frees American coasting ships raises an international question. If the canal be worked on business principles, higher tolls will be exacted from other shipping; this will either cause a grievance, or decrease the tonnage using the canal. The question might be made domestic instead of international if America charged equal tolls to all, and gave bounties to such shipping as it wished to favor."

Effect of Distance.

As to the effect of distance, the professor thought that on Australasian and Far Eastern markets it would be considerable, as the mileage run by a steamer was a serious factor in cost of service. In this shipping offered a contrast of railways, for when trucks were loaded, length of haul had but little effect on cost of service.

"Taking London and New York as the typical European and American ports," he said, "the markets of the world fall into three classes—(1) Countries in close proximity to the canal; here the effect will be greatest and, in many cases, the use of the canal a necessity; (2) Australasia and the Far East. At present there is a choice of routes to these markets; Panama will offer another alternative; (3) ports not directly affected.

"Class 2 is receiving most attention from those estimating the effects on world trade. There is a parallel equidistant from London via Suez, and from New York via Panama. On the south coast of Australia this is Port Lincoln. Adelaide being the nearest great port. All Asiatic ports west of Japan will continue to be nearer London—e.g., Manila will be 2,000 miles nearer. But all Japanese and New Zealand ports and all Australian ports east of Adelaide will be nearer New York. If it costs 2s. to transport one ton of goods 1,000 miles, distance saved will give American manufacturers an advantage of from 2s. to 7s. 6d. per ton on all goods supplied to ports between Melbourne and Wellington, N.Z.

Tolls and Freights.

"Panama differs from Suez in the matter of tolls. The Suez Canal had an immediate monopoly; with the Panama there is in many instances a choice of routes, and high tolls will deflect tonnage.

"To benefit American shipping, freight must be available both out and home. To benefit American manufacturers, freights must be low. At present Europe supplies Australasia with manufactured goods, and the shipping goes via Suez. This route gives a maximum of trading possibilities and great facilities for coaling. The Cape route, too, offers to fully loaded steamers the advantage of cheap bunker coal. For the homeward voyage from Australasia a partly loaded steamer goes via the Horn to pick up cargo at ports like Monte Video. The canal would not attract these ships. When the Panama Canal is open, will all-round-the-world services be organized? Great Britain is in a better position to do this than any other country. The rumors current recently that an existing shipping combine was trying to arrange an amalgamation with one of the oldest Far Eastern shipping companies were probably due to the hope of being able to commence such a service, having some of the chief trades of the world as tributaries, from the moment that Panama is available. America hopes to open up new markets—e.g., wool. This now concentrates at London, but there is a tendency towards decentralization, and if America develops the woolen industry, she will get a wool market without necessarily constructing a Panama Canal.

Decisive Factors in Commercial Relations.

"One of the decisive factors will be that of fuel stations, and it is also one that will lead to the keenest commercial rivalry. The American Government are planning to supply good coal at either end of the canal at 19s. per ton. The English coal on the Suez route is at present much dearer; to maintain the Suez route in its integrity the supply of cheaper coal is a necessity. When oil replaces coal the British Empire resources will be ample to maintain our commercial position, but this must not in the meantime be placed in jeopardy, or disaster may ensue.

"Insurance rates will probably be the same on both routes.

"The working of the Imperial idea in Great Britain, America and Germany should be noted.

"Preference granted by the dominions have materially assisted British trade. The possession of the Philippines has displaced Spain from the position of chief trader there in favor of America. The importance of this factor can be traced in the case of Japan and China, when settled government comes, will be another notable instance.

"The Far East has a silver, Europe and America a gold, standard. Rates of exchange will effect trading relations. The whole question should be carefully studied. About seven years ago, when a Chinese merchant could get exchange on the west coast of America at the rate of 110 taels for $100 gold, it paid him to import thence timber and flour; but at present rates—namely, 160 taels for $100 gold, this ceases to be profitable business, and he can trade to greater advantage locally. This factor works independently of trade routes.

Investments and Banking

"Great Britain is a great creditor nation. Her advances have been really made in goods, and though the interest has to be paid in gold, it comes in goods covered by bills in terms of sterling, so that investors get their interest in gold. The British, too, have banking establishments all over the world. London is the great settling place for international trade. All this gives England a very great advantage, Germany has followed England in this.

"Finally, the Englishman is, roughly speaking, the man in possession, and though at one time he seemed somnolescent, at present he is very wide awake," added Professor Kirkaldy. "He has many advantages:—(1) for the transport services; cheap, economically worked ships, carefully organized trading facilities throughout the world, and the knowledge and experience which enables him to retain old trades and be the first to enter new ones; (2) so far as retaining the markets for manufactured goods is concerned, he has an unrivalled labor force endowed with hereditary skill, he can get the pick of the raw material, thanks to his knowledge of markets, and a fiscal policy which favors England as a buyer of raw and semi-manufactured materials; finally, British goods are known all over the world for their quality. Honest goods and honorable dealing on the part of the seller are their own market."

WESTMOUNT'S FINANCING.

The following is a summary of appropriations for 1913-14 of Westmount, Quebec:—

	1913.
Finance and municipal buildings committee	$142,977.09
Reserve for discount	9,456.61
Road committee, general	96,574.00
Scavenging	18,875.00
Garbage destruction	15,000.00
Water, hydrant rental	15,500.00
Parks committee	17,050.00
Street lighting	25,000.00
Police, fire and health committee	46,932.00
Library committee	8,000.00
Total	$395,264.69
Total increase in appropriations, 1913-14	$ 77,161.36

CONSOLS AFFECTED BY LOAN.

News of a "big" Canadian government loan caused a temporary drop in consols, but they soon recovered, according to dispatch from London.

DIVIDENDS AND NOTICES

SHAWINIGAN WATER AND POWER COMPANY.

Notice is hereby given that a quarterly dividend of one and one-half per cent. (1½ per cent.) has been declared on the common capital stock of this company, payable October 20th, to shareholders of record, October 7th.

By order of the Board.

W. S. HART,
Secretary.

CROWN-RESERVE MINING COMPANY, LIMITED

DIVIDEND No. 44

Notice is hereby given that a dividend of 2 per cent. has been declared for the month of September, payable **15th October, 1913,** to shareholders of record the 30th September.

CALGARY
Delaware Underwriters, Philadelphia
Equitable Fire & Marine Insurance Co.
Germania Fire Insurance Co. of New York
Rochester German Underwriters Agency
Yorkshire Insurance Company Limited
Agents wanted at unrepresented points in Alberta & Saskatchewan

---

BELL TELEPHONES WILL ISSUE BONDS.

A despatch from Boston states that the Bell Telephone Company of Canada has sold an issue of $4,500,000 5 per cent. debenture bonds, maturing on April 1, 1925, to Boston bankers.

The purchasers are Messrs. Lee, Higginson and Company, who, with the Royal Securities Corporation, Limited, of Canada, will make, it is understood, an early offering of the issue.

The board of railway commissioners has granted permission for the Grand Trunk Pacific Railway Company to construct a double-track branch line from its main line at Empire Avenue, Fort William, northward on what was formerly known as James Street, thence easterly along the city limits to Thunder Bay. The new spur track will be over three miles in length, and will open up and serve an industrial area, as well as giving the Grand Trunk Pacific Railway access to the new government elevator.

DECADE OF SASKATCHEWAN'S HISTORY

Is Told by Census Statistics—Large Increase in Population Has Occurred

Saskatchewan receives its name from the Saskatchewan River, which flows across its northern part and empties by way of Cedar Lake into Lake Winnipeg, and thence finds its way to Hudson Bay. It comprises the old territorial districts of Assiniboia East, Assiniboia West (part), Saskatchewan and the eastern portion of Athabaska. It was created a province in 1905. The area is 251,700 square miles, of which 8,318 square miles are water. At its southern boundary it is 390 miles wide, and stretches nearly 760 miles from south to north.

The population in 1901, contained within the present limits of the province was 90,129, of which 73,729, or 81.80 per cent., was rural and 17,550, or 18.20 per cent., urban. In 1906 the population was 257,763, of which 209,301, or 81.20 per cent., was rural. In 1911 the population numbered 492,432, of which 361,067, or 73.32 per cent., was rural. In other words, the proportion of urban to rural per 1,000 of population in 1901 was 818 to 182; in 1906, 812 to 188; in 1911 the proportion of urban to rural in every 1,000 of the population was 733 to 267.

The number of farm holdings in 1901 was 13,612, of which 13,380 contained five acres and over, as compared with 95,808 farm holdings of five acres and over and 563 of less than five acres, or a total of 96,371 holdings in 1911. The average size per holding in 1901 was 286 acres and in 1911 299 acres.

Over One Million Acres Improved Yearly.

The area of improved lands increased from 1,122,602 acres in 1901 to 11,871,907 acres in 1911, being an increase of 10,749,305 acres, or 957.53 per cent., in the ten years. Supposing the increase to be constant, the average area per year occupied for agricultural purposes from 1901 to 1911 was 2,480,954 acres, and of this there was improved yearly an average of 1,075,305 acres.

Land in field crops increased from 655,539 acres in 1900 to 6,871,863 acres in 1910, being an increase of 6,216,324 acres in ten years; the area under field crops in 1911 was 9,137,502 acres, an increase of 2,921,178 over the preceding year. Excluding farms of less than five acres, the area under field crops averaged 45 acres per holding in the census of 1901 as against 95 acres in 1911; land in orchard and nursery, which amounted to only 88 acres in 1901 had increased to 5,625 acres in 1911; land in vegetables and small fruits increased from 1,584 acres in 1901 to 14,380 acres in 1911; vineyards were represented by 1 acre in 1901 and by 348 acres in 1911.

Population Ahead of Products.

The cultivation of flax has made the greatest relative increase of all cereals, both in the decade and from 1910 to 1911. In 1900 there were only 227 acres with a yield of 2,420 bushels, while in 1910 the area devoted to it had increased to 506,425 acres with a yield of 3,893,160 bushels. In 1911 the land sown to it was 1,136,157 acres, being an increase of 629,732 acres, or more than one hundred per cent. for the harvest year 1911 over the preceding one.

In this province, as in Manitoba, the farmers have made a beginning in the cultivation of tame grasses and alfalfa. In addition to 45,129 tons of cultivated hay grown on 37,694 acres, the records show that 94,345 tons of prairie hay were gathered, but as no instructions were issued to enumerators regarding collecting statistics of natural hay, it is probable that the foregoing figure does not represent the total quantity harvested. Potatoes had an area of 6,133 acres with a yield of 690,332 bushels in 1900 as against an area of 24,046 acres and 2,917,340 bushels in 1910.

The increase in the productiveness of the land devoted to the principal grains in 1910 over 1900 indicates a more careful preparation of the soil for the seed-bed of the plant and a better understanding of climatic and seasonal influences, enabling the progressive farmer to not only overcome them, but to make them a factor in increasing the fertility of his fields. The average yield per acre in 1910 of wheat was 15.84 bushels; of barley, 23.61 bushels; of oats, 31.20 bushels; of rye, 15.43 bushels; of mixed grains, 14.07 bushels, as against a yield per acre in 1900 of 8.83 bushels for wheat; of 15.84 bushels for barley; of 16.04 bushels for oats, and of 10.83 bushels for mixed grains. Flax, only, showed a smaller production per acre in 1910 than in 1900, but as the few acres sown to it in 1900 were confined to the older and more settled part of the province, whilst the more than half million acres in 1910 were scattered over an area 390 miles by about 350 miles, a fair comparison cannot be made between the two census years. The cultivation of potatoes, field roots, etc., although improving has not kept pace with the increase in population and the consequent demand for them in urban centres. Of cereals, having each a value of more than one million dollars, the largest gross monetary return per acre was given by flax with $16.11, followed by wheat with $11.87, barley with $10.02, and oats with $9.33 per acre. Hoed crops gave a return ranging from $53.87 per acre for turnips to $99.53 for sugar beets.

The total value of field crops, vegetables and fruits in 1910 was $81,005,631 as against $4,656,646 in 1900, being an average per holding for the last census of $840.55 and for the previous one of $341.36. When it is considered that 83,000 of the total number of holdings in 1910 were unbroken prairie in 1900, it is evident that these figures do not tell the whole story of the advancement made in the decade.

Horses had increased by 423,599, milch cows by 124,512, other horned cattle by 240,321, sheep by 48,168, swine by 258,446, turkeys by 65,461, geese by 19,976, ducks by 46,787, hens and chickens by 2,965,735. Whilst the increases in all classes of farm animals are large the most noticeable feature as contrasted with the eastern provinces is the increase of nearly 73 per cent. in the production of sheep in 1911 over 1901. There are also increases in the numbers of pure-bred animals in the decade.

The average value of horses in 1911 was $175; of milch cows, $43.25; of other horned cattle, $30.94; of sheep, $5.44; of swine, $8.77, as against an average value for 1901 of $76.45 for horses; of $32.51 for milch cows; of $17.43 for other horned cattle; of $4.14 for sheep; of $6.60 for swine. The total value of all live stock in 1911 was $115,769,685, an average per holding of $1,201.29, as against a total value of $12,521,896 in 1901, and an average value per holding of $919.91.

The value of live stock sold in 1910 was $13,191,863, and $1,626,446 in 1900, being an increase of $11,565,417, or 711 per cent., in ten years. The value of animals slaughtered on the farm rose from $375,059 in 1900 to $2,203,391 in 1910, being an increase of $1,828,332; the value of dairy product, which was reported at $729,574 in 1901, had increased to $10,779,947 in 1911. Eggs gave a value of $161,652 in 1901 as compared with $2,252,253 in 1911.

Capitalization of Province's Agriculture.

The number of weeks of hired labor on the farm in 1910 was 564,417 and the value $5,909,663, being an average wage per week of $10.47 as against 143,701 weeks in 1900 with a value of $880,319 and an average of $6.12 per week, being an increase in the cost per week of farm labor of nearly 72 per cent. from 1900 to 1910.

The total value of lands owned, buildings, farm implements and live stock on hand was $832,907,494, with an average value per holding of $8,643, as compared with a total value of $44,461,874 and an average of $3,266 in 1901. The gross returns to the farmers as represented by field crops, fruits, live stock sold, dairy products, animals slaughtered on the farm, wool, eggs and honey aggregated in the last census $109,493,322, or an average of $1,136 per farm holding as compared with $7,585,587 and an average per holding of $557 in 1900. From the gross earnings must be deducted the fixed charges for seeds, for feed for animals, for upkeep of buildings, for depreciation and renewal of farm implements, and for labor, before the net revenue from the farm can be even approximately estimated.

From the returns made by enumerators it is ascertained that of the total area of 9,137,502 acres planted, 159,456 acres did not produce a crop. The percentage of the non-productive areas to the areas sown was 1.52 per cent. for wheat, 2.27 per cent. for barley, 3.12 per cent. for oats, and 6.38 per cent. for flax.

DIAMOND COAL COMPANY REORGANIZATION

A meeting will be held on November 4th, 1913, (a) to sanction a scheme for the reconstruction of the Diamond Coal Company and (or) the amalgamation of the Company with another company, and to authorize the trustee to accept in satisfaction or part satisfaction for the sale or transfer of all or any part of the mortgaged premises any shares, debentures, mortgage debentures, debenture stock or any other securities of the said company.

(b) to sanction the exchange of the debentures now issued as aforesaid for and (or) the conversion of said debentures, mortgage debentures, debenture stock or any other securities of the Diamond Coal Company, Limited, or any other company.

(c) to sanction the release of the company and of the whole or any part of the mortgaged premises from the whole or any part of the principal and interest owing upon the debentures now issued as aforesaid.

(d) to distribute in specie and shares or securities received under the above headings "a" and "b."

(e) to assent to certain proposed modifications of the rights of the debenture holders against the company and its property and certain modifications of its said trust deed which have been proposed by the company, and to authorize the trustee, with a view to effectuating such modifications, to concur with the company in executing a supplementary trust deed in the terms of the draft which will be submitted at the meeting; and for other purposes.

VANCOUVER'S AUGUST FIRE LOSSES.

Vancouver's loss by fire for the month of August was $50,129, the insurance paid was approximately $36,744, leaving the property loss above insurance $13,415. The total value of property involved was $713,375. The department responded to 59 alarms during the month, 29 of which were for fires where damage occurred, four chimney fires, five false alarms, two smoke scares, 19 were fires where no damage occurred, 10 of which were bush fires; 21,150 feet of hose was laid and 1,333 gallons of chemical was used to extinguish the fires. There was one second alarm during the month which was sent in for a fire at 821-3-5 Powell Street, being a three-story brick warehouse occupied by four different firms; damage to the extent of about $21,000 was done at this blaze. A complete list of fires where damage resulted follows:—

August 1st.—Alarm from Box 26 at 6.13 a.m. Fire at the Alhambra Cafe, Carrall and Water Streets. The blaze started in the kitchen and was caused by an overheated range setting fire to woodwork, and spread to the dining room before being extinguished. Building owned by F. and T. Lee and E. Temple and occupied by J. McNiven and used as a hotel and restaurant. Damage $1,305, covered by insurance. Telephone alarm at 11.45 a.m. Small fire on roof at 720 Jervis Street, caused by sparks from chimney. Building owned and occupied by H. Abbott. Damage $15, covered by insurance. Alarm from Box 413 at 11.47 a.m. Small fire on roof at 1911 Third Avenue West, caused by spark from chimney, the blaze setting fire to the adjoining house 1917 before being extinguished. Both buildings were owned by M. Fitzpatrick, one being occupied by W. Hart and the other by W. Burdon and used as dwellings. Damage $35, covered by insurance.

August 4th.—Verbal alarm at 2.40 p.m. Fire in window curtains in front room at 2117 Yew Street, caused by children playing with matches. Fire extinguished before the apparatus arrived. Building owned by J. Morrison and occupied by Mrs. Hewitt and used as a dwelling. Damage $6. Telephone alarm at 7.35 p.m. Small fire around stove pipe hole in two-story frame building at 230 Hastings Street E., caused by woodwork being too close to stove pipe. Building owned by Mrs. Rowbottam and occupied by P. Nonas and used as a restaurant with furnished rooms above. Damage $5.

August 7th.—Telephone alarm at 9.20 a.m. Fire in pantry on first floor in suite 7 at the Hollywood Apartments, 1111 Seymour Street, caused by spontaneous combustion. Building owned by Mr. De Gray and occupied by (suite 7) Mrs. Reeve. Damage $27, partly covered by insurance.

August 8th.—Alarm from Box 135 at 7.21 a.m. Fire in three-story brick building at 821-3-5 Powell Street, owned by Young and Gregor and occupied by Pacific Builders' Supply Company, C. C. Snowden Oil Company, Mussens, Limited, machinery and A. Giambastiania Macaroni Factory. The blaze apparently started from spontaneous combustion near the elevator shaft in the basement, which was occupied by the C. C. Snowden Oil Company, and had a good hold on the rear part of the building when the fire apparatus arrived on the scene, considerable damage being done to both building and contents before the fire was brought under control. A second alarm was turned in for this fire. Damage $20,917, partly covered by insurance.

August 9th.—Telephone alarm at 4.04 a.m. Fire at the Empire Manufacturing Company's plant at Sixth Avenue and Alder Street. The whole building, which was a one-story frame and galvanized roof, was enveloped in flames when the department arrived, was totally destroyed. The contents of the place also suffered heavily. Building used as a machine shop and foundry. Damage $17,500, partly covered by insurance. Telephone alarm at 3.45 p.m. Fire in hay loft in stable at Ross and Howard's Iron Works, foot of Woodland Drive, caused by carelessness with lighted cigarette. Building owned and occupied by Ross and Howard. Damage $15.

August 10th.—Alarm from Box 6 at 4.42 a.m. Fire in cigar store at 802 Granville Street, occupied by Lewis and Blumenthal. The blaze started in the show window apparently from defective wiring, considerable damage resulting to the stock. Building owned by P. W. Charleson. Damage $2,200, covered by insurance.

August 11th.—Telephone alarm at 1.47 p.m. Small fire on roof of dwelling at 507 Hastings Street, E., caused by sparks from steam shovel working on the adjoining lot. Building owned by James Stuart and occupied by E. Price. Damage $10.

August 12th.—Telephone alarm at 1.01 a.m. Fire in one and a half story frame dwelling at 17 Dufferin Street, W., owned by Mr. Buzza and occupied by Mrs. Addie Dickerson. The fire had a good hold on the interior of the house and flames were shooting through the roof in the rear when the apparatus arrived and considerable damage was done to both building and contents. Mrs. Dickerson was absent from the city at the time. Damage about $1,000. Telephone alarm at 3.24 a.m. to the Gittord Hotel, 1348 Robson Street. Fire started in woodwork around the chimney on the ground floor and ran up to the roof before being extinguished. Fire presumably caused by a defective chimney. Building owned by R. J. Ker and occupied by Mr. Thompson. Damage $630, partly covered by insurance. Telephone alarm at 4.53 a.m. to 311 Hastings Street, E., owned by William Hickey and occupied by Mrs. E. Each and used as a rooming house. Small fire in upstair bedroom caused by sparks falling on bed from a defective stove pipe. Damage $118 partly covered by insurance. Alarm from Box 5 at 2.34 p.m. Fire in motor in basement at 1244½ Granville Street, caused by an overload of current. Building owned by the London and British North America Company and occupied by the Goodyear Tire and Rubber Company and used as a warehouse. Damage $45.

August 14th.—Telephone alarm at 10.40 p.m. to 763 Nicola Street, owned by J. Raynor and occupied by Miss Roberts and Miss Foncica and used as a dwelling. Small fire in front room behind grate caused by a defective fire place. Damage $44, covered by insurance.

August 16th.—Telephone alarm at 10.56 a.m. Fire in store room in rear of dwelling at 1061 Comox Street. Cause unknown. Building owned and occupied by John Johns. Damage $482, partly covered by insurance.

August 18th.—Alarm from Box 522 at 11.45 p.m. Fire in vacant frame cottage at 879 Union Street, owned by C. S. Brown. The fire, which was evidently of incendiary origin, had started under the stairway leading to the attic and had a good hold on arrival of the fire apparatus. Damage $300.

August 19th.—Telephone alarm at 9.05 a.m. Fire in woodwork under the fireplace on the second floor at the Majestic apartment house, 700 Broughton Street, caused by a defective grate. Building owned by J. J. Dissette. The fire occurred in suite occupied by Mr. Von Roggen. Damage $90, covered by insurance.

August 21st.—Telephone alarm at 8.46 a.m. Fire in some clothing in bedroom in one-story frame cottage at 618 Hamilton Street. Cause unknown. Building owned by L. Barry and occupied by M. Barry. Damage $165, partly covered by insurance.

August 22nd.—Telephone alarm at 2.33 a.m. Fire in one-story frame building at 2637-41-43 Fourth Avenue West, owned by Bowen Brothers, and occupied by W. H. Eve, dry goods store, D. H. Sexton, grocery and Owen and Whalley, hardware store. The blaze started in the rear of the grocery store from some cause unknown and had a good start when the apparatus arrived, considerable damage being done to both building and contents. Damage $4,350, covered by insurance.

August 23rd.—Telephone alarm at 11.55 a.m. Fire in yacht "Konomie" at the Vancouver Yacht Club, Stanley Park, caused by lighting a stove with coal oil. Yacht owned by F. C. Schooley. Fire extinguished before the arrival of the apparatus. Damage $15, covered by insurance.

August 24th.—Telephone alarm at 10.10 p.m. Gasoline launch on fire at the British Columbia Marine Railway, foot of Victoria Drive, caused by a gasoline explosion, when a lighted lantern was taken into cabin. Boat owned by McKenzie Brothers. Damage $300.

August 25th.—Telephone alarm at 3.28 p.m. Small fire in shack in rear of 569 Beatty Street, caused by an overheated stove setting fire to paper on wall. Building owned by A. E. Carter and occupied by William Johnson. Damage $40, partly covered by insurance.

August 28th.—Telephone alarm at 3.24 p.m. Small fire on roof at 995 Seymour Street, caused by sparks from chimney. Building owned by Geo. Munroe and occupied by Geo. Mune and used as a dwelling. Damage $10, covered by insurance.

August 30th.—Alarm from Box 2115 at 1.22 a.m. Fire in lumber piles of lumber at the Enterprise Saw Mills, Napier Street and Boundary Road. Cause unknown. Damage $150.

August 31st.—Alarm from Box 17 at 2 a.m. Fire in Solby Krems' printing office on the second floor of building at 411 Hastings Street, W. The fire appeared to be of incendiary origin, the stock being destroyed, but the blaze was confined to the room where it originated. Building owned by A. F. McMillan. Damage about $150, covered by insurance. Telephone alarm at 1.55 p.m. Small fire on roof at 1300 Howe Street, caused by sparks from chimney. Building owned by the British and London North America Company and occupied by Mrs. Armiside and used as a dwelling. Damage $5.

Total number of alarms, 59; chimney fires, 4; false alarms, 5; property involved, $713,375; loss, $50,159; insurance paid, $36,744; loss above insurance, $13,415; hose laid at fires, 27,150 feet; chemical used, 1,333 gallons.

DEBENTURES FOR SALE

TENDERS FOR DEBENTURES.

Sealed tenders will be received by the undersigned for the purchase of $6,000 fire hose and equipment bonds, repayable in 20 annual equal instalments. The lowest or any tender not necessarily accepted.

J. L. SPICER,
Secretary-Treasurer.

Alsask, Sask.

TOWN OF WELLAND

HIGH SCHOOL DEBENTURES

Sealed tenders will be received by the undersigned up to eight o'clock afternoon, October 20th, 1913, for $60,000 worth of debentures bearing 5 per cent. interest, sinking fund, 30 years.

Particulars on application. The highest or any tender not necessarily accepted.

J. H. BURGAR,
Treasurer.

The Town of Neepawa, Manitoba, has for sale the following Local Improvement Debentures:—

$7,038.44 Local Improvement (Granolithic Sidewalks) 20 years, 5 per cent., dated January 1st, 1913. Interest coupons attached. Interest payable annually on November 1st at Canadian Bank of Commerce, Neepawa.

Offers for the above will be received up to and including **Friday, October 10th, 1913.**

J. W. BRADLEY,
Secretary-Treasurer,
Town of Neepawa, Manitoba.

TOWN OF CHAUVIN

Tenders addressed to the undersigned will be received up to October 30th, for the purchase of $1,800 ten-year debentures, bearing 5½ per cent. interest, payable in annual instalments of principal and interest. Full particulars upon application. The highest or any tender not necessarily accepted.

R. A. COWAN,
Chauvin, Alberta. Secretary-Treasurer.

FIRE ADJUSTERS WILL DO SOME MORE ADJUSTING.

Upon receiving the promise from Myron Stern and C. Trowbridge that they would pay back within 24 hours the 75 per cent. they had extracted from a client for adjusting an insurance policy, and charge only seven and a half per cent., as they had at first agreed, Judge Morgan, Toronto remanded the two brokers for sentence. He found them guilty of "obtaining money by fraudulent means." The readjustment of their "adjustment" will weigh in passing sentence. Meantime Trowbridge was again allowed out on $1,000 bail, but Stern was held in custody.

◆

The Montreal Tramways Company has applied to the New York Stock Exchange to list $13,335,000 first and refunding mortgage 30-year 5 per cent. coupon bonds series "A" due 1941.

G-V Electric Trucks

FOR

Bakers, Butchers, Grocers, Distributors, Brewers and Bottlers, Hardware Merchants

Paving Contractors, Coal Dealers, Lime and Sand Dealers, etc.

We have a truck for every requirement

ranging from 750 lb., 1000 lb., 1 ton, 2 ton, 3½ ton, 5 ton, 6 ton.

Made by The General Vehicle Co. of Long Island

Makers of 7000 of the 12000 electric trucks in use in America.

MANITOBA ELECTRIC MOTOR CAR CO., Limited

Sales Room and Office:
Leslie Bldg., Assiniboine Ave.
WINNIPEG

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required, and name of secretary-treasurer:—

Alberta.

Todd Creek, No. 2968, $1,200.
Elcan, No. 2225, $400. B. F. Johnson, Elcan.
Delta, No. 2985, $1,500. R. McDonald, Empress.
Matthews, No. 3003, $1,200. D. B. Wilson, Killam.
Beaver Hills, No. 246, $800. W. Attewell, Bremmer.
Neutral Hills, No. 2791, $400. F. H. Piper, Consort.
Pineville, No. 2948, $1,200. Thos. W. Kerr, Nugent.
Sunny Bank, No. 2771, $1,000. H. Haywood, Pembina.
Turkey Hill, No. 2211, $1,000. T. H. Taylor, Vermilion.
Medicine Hat, No. 76, $9,745. R. M. Napier, Medicine Hat.
Medicine Hat, No. 76, $150,250. R. N. Napier, Medicine Hat.
Vermilion Centre, No. 1446, $2,000. H. P. Long, Vermilion.
Handale, No. 2662, $1,600. Miss Sarah Haniford, Wildunn.
Metiskow Lake, No. 2726, $1,200. W. A. Cooper, Metiskow.
Golden Sunset, No. 2971, $1,200. E. F. Simmons, Tawatinaw.
Peace River Crossing, No. 2526, $2,000. H. A. George, Peace River Crossing.

Saskatchewan.

Elim, No. 713, $1,000. S. Phipp, Welwyn.
Lyons, No. 2983, $1,800. F. Wilson, Ogema.
Nybo, No. 3006, $1,800. B. K. Nybo, Vanguard.
Ardath, No. 2863, $1,000. W. O. Hunt, Ardath.
Neville, No. 2846, $8,000. A. J. Grenache, Neville.
Redrows, No. 3038, $1,500. J. A. Salter, Balcarres.
Verlo, No. 3002, $1,700. S. O. Granley, Gull Lake.
Bailey, No. 3014, $1,700. Chas. Bailey, Craiglands.
Zalischyky, No. 2061, $1,200. J. Kuszneruk, Wakaw.
Harnett, No. 3017, $1,700. S. J. Harnett, Tompkins.
Turberville, No. 1379, $1,800. G. T. Waters, Oldbury.
Soda Lake, No. 1209, $1,500. W. L. Marvin, Radville.
St. Joseph, No. 17, $500. Geo. E. Newman, Galgonie.
Ealingford, No. 3069, $2,000. J. A. Webb, Fairmount.
Highcroft, No. 2953, $3,000. Geo. Pomeroy, Kincaid.
Garden River, No. 607, $400. S. Dunsmore, Henribourg.
Bolen, No. 1188, $1,800. R. F. Beilhartz, Gravelbourg.
Stanmore, No. 3025, $1,600. Stanley K. Carter, Artland.
Pizarro, No. 2984, $2,100. H. H. McNaughton, Marengo.
Mackie, No. 3031, $1,000. N. C. Draper, Grand Coulee.
Twynholm, No. 3010, $1,500. Thos. R. Halliday, Macklin.
Murraysmith, No. 3031, $1,600. S. C. Smith, Graham Hill
Shakespeare, No. 3057, $1,700. S. C. Smith, Graham Hill.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

OPPORTUNITIES IN SELKIRK DISTRICT

Agricultural Products Are Easily Marketable—Cities' Growth and Demand

Written for *The Monetary Times.*

BY BRUCE CAMPBELL.

The business influences of the town and district of Selkirk, Manitoba, as represented by its Board of Trade, extend over a rather large area; in fact, practically all of north-eastern Manitoba, as all of the industrial enterprises of Lake Winnipeg have Selkirk as the headquarters in some way or another. The notable feature respecting British and foreign capital here is that there is absolutely no active British capital employed in this entire district, but there is a comparatively large amount of United States capital so employed. The only British capital is that represented in a more or less tangible way by the mortgage loans placed on land and property in this district in Canadian loan companies

At the same time there is every opportunity for the employment of active British capital in the Selkirk and Lake Winnipeg district. There are many opportunities for industrially exploiting the natural resources of the district, while the opportunity in the Selkirk district for the employment of British capital on a comparatively large scale in land and agricultural operations is an excellent one.

Land is Unusually Fertile.

I have travelled extensively over Western Canada and made a close study of the operations most of the British land companies operating in Western Canada are carrying out, and including practically every one of the widely-known British companies operating large farms, developing irrigation blocks, or interested in the investment in fruit lands of British Columbia. Natural opportunities, equal or superior to any I have seen in the west, are presented at Selkirk for the building up of many estates where English capital could be profitably employed and a splendid individual outlet provided for English agricultural emigration.

The reason for this unusual degree of opportunity lies in the fact that the land in this district is unusually fertile, having been pronounced at different times, by the Dominion government, Cornell University of Ithaca and the Manitoba Agricultural College to be one of the finest soils in the world. It is eminently suited for all kinds of mixed farming, dairying, market gardening, poultry ranching, and so forth. The products from any part of this district can be placed in the Winnipeg market within a few hours at a minimum expense over the lines of the steam roads or the electric railway, which runs through this district and which is being considerably extended. Large tracts of land, perfect in every physical way, can be purchased at reasonable prices.

Model Farms Are Successful.

Sir Wm. Van Horne, former president of the Canadian Pacific Railway, has profitably conducted a model estate of 7,000 acres lying on the Red River, and opposite the town of Selkirk, for about ten years, and his herd of shorthorn cattle at this farm have become famous. Several large and model poultry farms are run in this district, while dairying is successfully conducted. The demand at Winnipeg for these kinds of products will always exceed the supply for the reason that behind the demand of Winnipeg is the demand of the prairie cities, as these cities cannot find sufficient food produce in their own neighborhoods.

This situation provides an opportunity for an intelligent individual application of active English capital in Canada that would give the investor a safe and profitable and interesting means of participation in Canada's business.

◆

NATURE OF BUSINESS ORGANIZATION.

Business men desiring a knowledge of the economic and legal aspects of the concerns with which they are connected, will do well to peruse a new volume from the pen of Dr. Lewis H. Haney, "Business Organization and Combination." According to the sub-title, it is "An analysis of the evolution and nature of business organization in the United States and a tentative solution of the corporation and trust problems." The general scheme of the work is as follows:—First comes a series of chapters describing and analyzing the various forms of business organization in such a way as to bring out the centuries-long evolution which has moulded them. Then the corporate form being clearly dominant, the life history of a corporation is set forth with the main events such as promotion, underwriting, reorganization and the like. Business Organization and Combination. L. H. Haney, Ph.D., $2 net. Macmillan Company of Canada, Limited, Toronto.

STOCKS AND BONDS TABLE—NOTES

(u) Unlisted

† Canadian Consolidated Rubber Bond Denominations, $100, $500 and $1000. Steel Company of Canada, $100, $500 and $1,000. Sherwin Williams, $100, $500 and $1,000. Penmans, Ltd., $100, $500 and $1,000. Canadian Cottons, $100, $500 and $1.000.

‡ Quarterly.

All companies named in the tables will favor The Monetary Times by sending copies of all circulars issued to their shareholders, and by notifying us of any errors in the tables.

** Trethewey pays no regular dividend. They have paid:—1906, 4%; 1907, 4%; 1908, 15%; 1909, 25%; 1910, 10%; 1911, 20%: 1912, 10%.

Montreal prices (close Thursday) furnished by Burnett & Company, 12 St. Sacrament Street, Montreal.

* $20,000 of this was redeemed April 1st, 1913.

Figures in brackets indicate in footnotes date on which books close for dividends, etc.

(1) Sept. 15-Oct. 1 (3) Aug. 30-Oct. 2

McLEOD'S COMMISSIONER IS AFTER INDUSTRIES

Mr. W. C. A. Moffat, industrial commissioner at McLeod, Alta., is on a visit to Eastern Canada. He recently forwarded to Toronto, Hamilton, London, Guelph, Owen Sound and Galt much publicity matter, and now will visit these cities to place before manufacturers statistics and data of all kinds relative to McLeod's position as a distribution point and location for branch factories.

◆

Messrs. Read, Hegan, Collingham & Company have opened an office at 1302 Canadian Pacific Railway Building, Yonge Street, Toronto. This firm has offices now in the following cities in Canada: Winnipeg, Calgary, Edmonton. Vancouver, Montreal and Toronto; also in London (Eng.) and Glasgow (Scot.).

ANOTHER LARGE MORTGAGE COMPANY.

The directors of the Canadian-European Mortgage Corporation, incorporated in Manitoba with capital of $4,000.000, are Messrs. Charles A. Crawley, Gerald F. de C. O'Grady, Herbert Dunk, James Cormack and James Kerr. Their charter gives them authority to carry on general mortgage, investment, financial and agency business of any and every description at any branch house of the company in Canada.

◆

The Hollinger mine holdings or the Anglo-French Exploration Company are said to total 21,000 shares.

Efforts are being made to organize a Retail Merchants' Association at Regina. The results so far are encouraging. Mr. J. F. McDonald has been elected temporary chairman, and Mr. Williamson is acting as secretary.

OTTAWA ISSUE OVERSUBSCRIBED

Other Cities Are Placing Short Term Loans in London—Conditions Improving Overseas

The brighter outlook in London has brought a rush of new issues. Harrod's London stores, which are allied with the Hudson's Bay Company, seek $6,250,000 in sixes for extension of their business in Argentina. Other issues, totalling $750,000, concern the Russian oil fields.

A Canadian Associated Press message says that Messrs. Helbert, Wagg & Russell are about to issue a new loan in London for the city of Ottawa. This will take the form of £189,600 4½ per cent. debentures of £100 each. The price of the issue will be 98½, and interest will be paid half-yearly, and the first coupon for £1 will be payable on the first of January next. The debentures are repayable at par by series between 1932 and 1953. This is the issue sold to Stimsons, of Toronto, recently.

Wanted More Information.

The London Daily Mail's financial editor remarks that Ottawa is quite a modest borrower in comparison with many other Canadian cities.

The London Morning Post agrees that Ottawa's credit stands high, but says the information in the advertisement of the new loan contains no particulars as to the debt, assessment, or population, which prevents any useful estimate of this class of the security.

The loan, though comparatively small in amount, was over-subscribed. Scrip was quoted at ⅛ premium. Many other municipalities will probably float loans in London as a result of Ottawa's success.

A Canadian Associated Press message says: The success of the Ottawa loan has caused but little surprise in Canadian financial circles here. The amount of the loan, for one thing, was small, and Ottawa's credit is among the highest of any. It is gratifying to learn that the outlook for Canadian securities here is somewhat improved, but there will certainly be a big lot of home flotations this autumn, so that some intending Canadian borrowers will doubtless receive advice to wait a little while.

Dominion Government Loan.

Another important issue appeared this week, comprising three million sterling four per cent. Dominion stock at 99. This will be the first four per cent. loan floated by the Canadian Government for many years, which, like most other dominions, is now obliged to adopt four per cent. basis. The price here is generally considered correct, and it is doubtful if any other dominion could have come within two points of that price.

Placing Short-term Loans.

Montreal, South Vancouver and Regina are placing further obligations on the London market in the shape of short-term loans. South Vancouver notes are 6½ per cent.; Montreal's, 4⅞ per cent. It is understood that an amount of about $1,500,000 of Regina's bills are for six months, says a cable to the Montreal Star.

The Bank of Montreal is the issuing house for Calgary City, and are renewing line of treasury bills due September 30th at about six per cent. Regina has also placed a small amount of bills at the same rate.

The Government of South Africa, rather than risk a loan, has just renewed $10,000,000 bills at 4⅞, and has also placed $5,000,000 new bills on the same terms.

Calgary Power bonds are being urged upon investors in London. The financial editor of the London Express says: "Calgary is destined to be one of the most important industrial cities in Canada, and it is reasonable to anticipate that the future development of the city will lead to an expansion of business for Calgary Power."

Fifty-three per cent. of Victoria, Australia, fours has been left with the underwriters.

◆

MORE ABOUT DOMINION'S LOAN.

The Bank of Montreal opened on September 25th lists for the Dominion Government loan of £3,000,000 4 per cents., redeemable between 1940 and 1960 at an issue price of 99 partly to redeem £1,700,000 fours due on October 1st and for other purposes.

This is the first 4 per cent. loan Canada has issued in a good many years and has now to follow the example of the other dominions, suggests Windermere in a cable to the Montreal Star.

The price is considered a fair one, both to the borrower and the lender in the present conditions, and is probably much better than is possible for any other borrower of the same class.

SELLING BONDS LOCALLY

Chatham, Ontario, is Talking to Its Citizens—Saskatchewan Settlers to Be Offered Debentures

The sale of municipal debentures "over the counter" is proceeding in many localities. The city of Chatham has for sale $40,080 worth of debentures, and has sold locally $15,376, leaving a balance of $24,714 to sell. This is how they are advertised in a Chatham paper:—

Tempting the Local Man.

"Chatham debentures have always sold well. The city council decided to give our own citizens an opportunity to purchase some of them. Thus they are offering city debentures for $100 and upward. Why leave your money in the bank drawing 3 per cent., when you can get Chatham's debentures, paying 5 per cent. and affording you the very best security in the world? If you have one hundred dollars or ten thousand dollars, it makes no difference. You can purchase these debentures, which can be sold any time you may wish, or can be held as an investment, paying 5 per cent. interest. One mechanic from one of the local factories purchased fifteen hundred dollars' worth this week. He will make thirty dollars a year more than he has been getting for the money. Wasn't he wise? Apply to the city treasurer or to S. B. Arnold, chairman of committee."

Selling to Settlers.

Paradise Hill, No. 501, Saskatchewan, has for sale $5,000 permanent improvement debentures, payable in ten equal annual instalments. It is proposed to issue these in small denominations and to float the loan among the settlers in the district.

Reports received by *The Monetary Times* do not indicate that a great measure of success is being achieved by various cities and towns in selling their bonds locally.

◆

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Dilke Village, Sask.—The council has been authorized to borrow $1,500. J. Montgomery, secretary-treasurer.

Excel R.M., Sask.—The council has been authorized to borrow $15,000. J. A. Carr, secretary-treasurer, Viceroy.

Baildon R.M., Sask.—The council has been authorized to borrow $5,000. A. Dunlop, secretary treasurer, Baildon.

Chaplin Village, Sask.—The council has been authorized to borrow $2,000. H. S. G. Columbinee, secretary-treasurer.

Wallace R.M., Sask.—The council has been authorized to borrow $1,000. R. H. Perkins, secretary-treasurer, Yorkton.

Victoria, B.C.—A by-law to borrow $1,500,000 to acquire and construct the Sooke Lake water supply system, will be voted upon October 2nd.

Welland, Ont.—Up to October 20, for $60,000 5 per cent. 30 year school debentures. J. H. Burgar, treasurer. (Official advertisement appears on another page).

Chauvin, Alta.—Up to October 30th, for $1,800 5 per cent. 10-year debentures. R. A. Cowan, secretary-treasurer. (Official advertisement appears on another page.)

Alsask, Sask.—Tenders will be received for $6,000 20 instalment debentures. J. L. Spicer, secretary-treasurer. (Official advertisement appears on another page).

Neepawa, Man.—Tenders are invited for $7,038.44 5 per cent. 20-year local improvement debentures. J. W. Bradley, secretary-treasurer. (Official advertisement appears on another page.)

◆

DEBENTURES AWARDED

Chatham, Ont.—$15,376 out of an issue of $40,080 to local investors.

Lachine, Que.—$104,000, to Messrs. J. A. Mackay and Company, Montreal.

Wellington R. M., Sask.—$3,000 6 per cent. 20 years, to Messrs. W. L. McKinnon and Company, Toronto.

North Battleford, Sask.—$60,000 7 per cent. 30 instalments, school bonds, to Messrs. Wood, Gundy and Company, Toronto.

TO SELL MORE LIFE INSURANCE

Life insurance companies realize that there is still a barrier between insurance and the public which must be removed before they write the large volume of business which should be written. Much has been done during recent years to mitigate the antagonism of the average man to being interviewed by life insurance salesmen. More has yet to be accomplished. *The Monetary Times* believes that the cause and benefits of life insurance need far more publicity than they have had. The insurance agent knows well how perhaps half a dozen arguments given for taking life insurance will fail with his prospect, and how the seventh may appeal to his reasoning and imagination, because it caters to the individual need. Life insurance needs to be popularized and its technicalities simplified in readable articles for citizens throughout the Dominion.

Mr. N. A. Hawkins, the sales manager of the Ford Motor Company, of Detroit, gave some excellent advice on this subject at the convention of underwriters recently held at Atlantic City. He recalled that in the beginning, life insurance dealt only with contracts terminating at death; hence the name life insurance. It was found that the plea based on the one factor of providing for a family after death of the provider, was not sufficient to build up a large business. The so-called investment features were then introduced as business getters. Life insurance is a product of an advanced civilization. To-day there is no subject of such vital importance to the people, and to the future of the state, regarding which there is so much popular ignorance. It has never been properly put before the public in a plain, understandable way, either through its representatives, or by advertising.

Mr. Hawkins thought that when a man tried to make an investment out of it he was trying to make it serve his own selfish ends, which, to a large extent, defeated his original purpose. The average insurance company, as well as the average solicitor, he believed, made a mistake in the manner they talked different kinds of policies. They did not fit men with what was needed, but took orders for what was wanted. They tried to write a $5,000 twenty-year endowment policy because they sized the man as a $5,000 man, and if they got this policy they would get a $250 premium, while, if they wrote a twenty-year payment life policy for $5,000 they would get approximately a $185 premium, or if they wrote an ordinary life with a twenty-year settlement they would get $125.

The basis on which insurance should be considered by the customer and solicitor is free from the standpoint of the premium, not from the size of the policy—and from the viewpoint of the person insured, not that of the solicitor, eager for a premium. Life insurance salesmen must learn what most merchants know—that a satisfied customer is the best of all advertisements.

This enterprising sales manager, who perhaps brought to the business of life insurance a somewhat new point of view, emphasized the human side of insurance which should be kept before every man, woman and child. "Its benefit," he said, "should be demonstrated to school children. Money spent for the right kind of an educational advertising campaign would benefit all insurance companies. Such a campaign would do three things: Increase insurance. Cut the cost of getting it, and diminish the lapses. Advertising and salesmanship are both parts of one great problem—distribution. The one is the missionary going about planting in men's minds silently, subtly, alone or in the crowd, the seeds which blossom into inquiries. The solicitor, doing best what advertising has not done so well, gets the application. It costs millions more than it should to keep men doing the advertising by word of mouth. I know advertising of the trade mark, balance-sheet style of copy, is no new thing to insurance companies—but human life insurance advertising is entirely a new thing. Life insurance advertising has nearly always been written by insurance men who thought in figures and not in terms of life and sentiment. Life insurance advertising needs the human touch.

Canadian companies have a fertile field for writing new business. The population of the country is increasing by leaps and bounds, partly as a result of the heavy volume of immigration. Few companies, however, are making a proper attempt to bring life insurance down to the people, to make the agent welcome everywhere to present his proposals. Several Canadian companies have, during recent months, issued cleverly worded advertisements which cannot fail to strike their reader, who is always a prospective policyholder. That is only a beginning. There is ample scope for a campaign of the right kind of publicity on the part of the life insurance companies of Canada.

TIME FOR SELF-EXAMINATION

The financial experiences during the past few years of many Canadian industrial concerns have been sufficiently interesting for a large number of promoters and financiers to change their methods. There have been enough reorganizations, doubtful amalgamations, receiverships and dividend passings for a great many gentlemen to assume a more humble air and to resolve not to attempt any further pyrotechnics in finance. The British investor has suffered by some of the industrial breakdowns and it is not surprising that one of his mouthpieces has found it necessary to say a few straightforward things. The London Financial Times, in a recent issue, discusses the insolvency of the Canada Iron Corporation and describes as a bolt from the blue the Western Canada Trust's urgent demand for $250,000 to prevent the entire close of the business with great loss even to the holders of the corporation's first bonds.

The paper asks how these things can be, with a properly managed company, capitalized at $12,379,200, and claiming a credit profit and loss balance of $406,400, and continues:—

"The number and seriousness of failures among industrial companies of the Dominion recently is such that if Canada wishes to retain the confidence of British investors, her leaders of industry must adopt a far more conservative financial policy and refrain from attempting to carry a volume of business which no English concern would dream of doing without much greater liquid resources.

"Canadians are fond of telling us that they are no longer children to be led in leading strings, but are a great nation. If they really desire to be regarded in this light, they must act a great deal more circumspectly in commercial matters, and not allow their desire to do business outrun their financial discretion."

The Monetary Times reluctantly admits that this advice is timely and has been earned. During the past few years there have been reorganized, the Amalgamated Asbestos Corporation, the Black Lake Consolidated Asbestos Corporation, the Dominion Sawmills Limited, the Canadian Cereal and Milling Company, the Canadian Coal and Coke Company, and several others. In many instances, it was found necessary to wipe out altogether the bonds or to cut the bond issues in a severe way. Several industrial amalgamations have been effected, apparently for high-sounding economic reasons, but actually to save disaster to some of the companies participating. More than one company has found it necessary to pass dividends. The stocks of other companies have declined so badly that one cannot be blamed for surmising that something is radically wrong with their internal organization and finances. These events make a sad comparison with the optimistic utterances of the promoters in the various prospectuses.

Several reasons can be ascribed for the poor financing which has been exhibited by too many Canadians. First, there is the national characteristic of optimism. In a country of vast natural resources and possibilities, such as Canada, it is difficult to adopt and maintain a conservative tone. It is difficult to train the financial mind not to base estimates on what one would like to achieve in times of high prosperity, but on what one may have to do in times of depression. This has been seen in the difference in estimates of earnings which promoters made and in the actual earnings their companies made subsequently. Then again, there has been the desire of promoters to acquire goodly sums by easy methods. It is not difficult to merge companies, stick on a few millions of bonds and stocks and pocket a few hundred thousands for doing the job. It is far more difficult for the company to earn enough money to pay dividends. Over-capitalization, sometimes indulged in to cover promoters' profits, is a bad practice for a young country which must borrow heavily for many years to come to continue its developments.

It is in the best interests of Canada to adopt a far more conservative attitude in regard to its company promotions. Why not try capitalization in hundreds of thousands rather than in millions? It is time that some of our financiers examined their methods for the benefit of Canadian credit and investors everywhere in our securities.

PRIVATE EXPERTS IN A CITY HALL

An examination, by privately employed experts, of the municipal revenues and expenditures of Toronto was authorized this week at the city council meeting. A civic survey will be made by specialists from the New York Bureau of Municipal Research. The survey will be financed wholly by the committee, which expects to have a report on the results of the survey available some time in February next. This is certainly a unique experiment and one which might be extended with surprisingly interesting results—if the civic rulers gave permission. On the other hand, the council voted 13 to 1 in favor of the present investigation, which is a pretty good indication of faith in their administration and the work of city officials. Sir Edmund Osler told the council that the inquiry could do no harm, and he believed the results would be of great value to the council and to the citizens at large, and would in a great measure do away with the prevailing habit of criticism—perhaps and perhaps not.

A PRINCE EDWARD ISLANDER'S ROMANCE

Everybody in Prince Edward Island is talking, buying, company promoting or farming foxes—that is, everybody except one gentleman who recently made a bid for a Spanish beauty and incidentally a fortune. The result was a loss of $700 to the Islander. The old "Spanish prisoner" scheme had actually worked successfully in Canada's cautious maritime provinces. The incident has apparently moved the post office department at Ottawa to steer others clear of the danger, as the following warning has been issued:—

"Letters from the Spanish prisoner are actively circulating in Canada. These letters are mailed at Madrid, Spain. This fraud is many-sided, as in the latest case it is a Russian banker who is in prison. At other times it is either a French or Spanish character, but the essential part of the fraud is the same, viz., that the prisoner has an immense sum of money deposited in hiding, and generally an interesting daughter, and on certain conditions he is willing to share his treasure with and entrust his daughter to the person in whom he is confiding. Of course, as a preliminary and evidence of good faith, a certain sum of money must be put up by the correspondent. The case is a pure fraud, and the public are warned against it."

The moral of the Prince Edward Island man's experience is to confine one's investment to Canada, one of the best investment fields of the world, and leave the bull fighting countries to look after their own love affairs. By the way, who was the Prince Edward Islander?

SMALL CHANGE

Now they want the man who will put more life in life insurance.

Exclusive London Cable Service for - The - Monetary Times

THE MONETARY TIMES has arranged with the Central News Limited, of London, England, for a full and reliable cable and letter service from London regarding financial matters of interest to people of this continent. This service will be supplemented by special arrangement with the Canadian Associated Press, with their numerous cable messages, from the same centre, on financial and commercial topics of interest to Canada.

Great Britain has invested over £3,200,000,000 in its Dominions and in foreign countries. Canada and Newfoundland had more than £372,000,000 of that sum. To date this year, Canadian flotations, according to the records of *The Monetary Times*, total £29,400,000. The prospects are that during the remainder of the year, a large number of Canadian issues will be made in London. The British investor is discussing Canada's borrowings, its trade balance, the proposed supervision of municipal loans and many other topics which interest both the British investor and those here who are building Canada's economic foundation. Six Canadian banks have important branches in London, and the Dominion's financial and commercial colony in the world's metropolis is extending rapidly. With these facts in view, *The Monetary Times* has made the arrangements as noted above, which will give the readers of this paper an excellent London news service. The Central News Limited is one of the best known and authoritative news gathering organizations, and the articles to appear in *The Monetary Times* will be from the pen of an expert and a man in close touch with business and financial affairs overseas. The service will be printed in Canada exclusively in *The Monetary Times*. The Canadian Associated Press dispatches are well known and during recent years have paid special attention to financial topics.

The service will commence next week.

LET IN BRITISH MACHINERY FREE

That Would Solve Canadian Freight Rates Question, Says Ben H. Morgan

Mr. Ben H. Morgan discussing the question of Canadian freights rates in the London Financial News, declares the Dominion government has a remedy in its own hands, says a Canadian Associated Press message. One solution, he maintains, could be found in a reduction or abolition of existing Canadian duties on British machinery, steel and iron girders and heavy goods of that class. Such a concession to the Motherland need not affect more than 68 items in the Canadian tariff, but it would undoubtedly attract considerable volume of British goods to Canadian ports, and assure considerable freightage in the direction of Canada.

Frieght Would be Lower.

Assuming that the British consignor paid 12s. 6d. per ton on this freight, says Mr. Morgan, the return freight would be very much lower and would be all in favor of the Canadian producer, and would have the effect of assuring a given volume of freight. Cheaper return freight is one of the commonplaces of shipping. This country does a larger trade in exactly this class of goods with Argentina, and takes in return year by year a very considerable amount of Plate wheat. Precisely the same phenomenon is witnessed in the case of Russia's Black Sea ports.

Difficulties of Canadian Tariff.

He is quite aware of the difficulties involved in dealing with the Canadian tariff, but the circumstances of this case are so urgent that the government of Canada would, in the interests of her primary producers, be well advised to throw her ports open to this particular class of British goods, and so secure relatively favorable freights for her grain, flour, lumber and other products.

One thing is certain, he concludes, that it is only by encouraging importation of heavy and bulky British goods that she will draw British tramp steamers to her ports, and without tramp steamers, low freight rates are, at present, an economic impossibility.

Similar Views Expressed.

A Canadian, who has grown up in the shipping world of Europe, writes to the London Times regarding Canadian freight rates, that if to the Canadian any form of trust is abhorrent, what about the tariff trust? Why are so many British ships loading machinery for the Argentine Republic and returning laden with grain? Is it not an answer clear that Canada can attain a similar position as the Argentine, and without hurting herself materially, by the simple means of cancelling her tariff imposts on a few articles, such as structural iron, steel rails, locomotives, tin, cement and coal? Steamships would then flow in an uninterrupted stream to Canada carrying "labor" and Britain would in exchange take food stuffs.

◆

FAR EASTERN MARKETS FOR CANADA

To the Canadian Club at Montreal, Hon. George E. Foster, minister of trade and commerce, pointed out the extent and nature of the trade possibilities of the Eastern empires and the Antipodes. China and Japan had done wonders in the way of intensive cultivation of their half-acre farms, and that was just the reason why, with their growing industrial population, they would not be able to do any more to supply their own increasing demand for foodstuffs. Therein, said Mr. Foster, lay Canada's opportunity.

But the East, in presenting a possibility, brought a problem as well. Nine hundred toiling millions of Orientals, descendants of an ancient civilization and still true to its ideals despite the introduction of modern methods, were the human factors in it.

However prevalent the notion might have become, they were not Anglo-Saxons, their ideas were not and their aims were not. They were going to be neighbors and, in view of the improving facilities of transportation, comparatively near neighbors, and therefore must Canadians seek, as the first step, to understand them as they must understand us.

◆

The Minister of Finance, Hon. W. T. White, is taking up the question with the banks with a view to seeing if arrangements can be made permitting the local transfer of shares.

Offices in Vancouver have been opened by the Imperial Canadian Trust Company, a concern controlled by the same interests as the Great West Permanent Loan Company and the Canadian National Fire Insurance Company.

EASTERN AND WESTERN MUNICIPALS

The Pas Bonds to Get Government Guarantee—St. John May Try Local Investors

Dr. Sinclair, in company with Mayor Finger and Dr. Orok, M.P.P., have completed arrangements with the Manitoba provincial treasurer, Hon. Hugh Armstrong, whereby the government will guarantee the Pas bonds for the completion of civic improvements in the northern town.

French Offer for Winnipeg's.

French financial interests are said to have applied, through the Canadian Commissioner in Paris, to be allowed to participate in the bidding on Winnipeg's new $13,000,000 loan.

Hon. Charles Stewart, minister of municipal affairs for Alberta, is considering the request made by the convention of the municipalities of Alberta that the provincial government should guarantee bonds of municipalities after they have been approved by a body acting in a similar capacity as the local government board in England. No action is likely to be taken at the present session of the provincial legislature.

St. John to Sell Bonds.

Referring to the fact that St. John, N.B., will issue $200,000 bonds shortly to provide for capital expenditures, Mayor Frink says that he has had inquiries from the leading bond houses in Canada, and also from many citizens of St. John who desire to invest in city debentures. It is possible that bonds may be issued in as small a denomination as $100, in order to facilitate local investment. The financial position of the city is strong.

Burnaby's council has accepted an offer of $1,143,750 from Messrs. Boulton Brothers, of London, Eng.

This firm's offer of 91½ per cent. of $1,250,000 at six per cent. gives the municipality the money at about 91 net, and the details are now being arranged. As security, Burnaby gives her entire unsold debentures amounting to $1,716,000, the same to be irredeemable for two years. After that an unrestricted sale can take place, and Messrs. Boulton Brothers agree to act as agents for the municipality, provided it is so desired.

◆

TRADE CONDITIONS IN CHINA.

Trade openings for Canadian products are a desideratum, and a Canadian-born author, Mr. J. S. Thomson, has, in an interesting volume, "China Revolutionized," discussed commercial and industrial matters in that land from many view points.

Mining resources, manufacturing possibilities, docks, railways, shipping and water routes are described.

Agriculture and forestry; architecture and art; military and naval matters; religion and marriage; social standards and the morale, all are considered.

Public works; systems of communication; the development of general trades and the business of the country are reviewed.

Space is devoted to the capitalist class; finance and the budget; money standards and currency; internal and international politics; the influence of Japan, the European nations and America.

Mr. Thomson was born at Montreal and educated at McGill University, he is the author of "China Revolutionized," published in London and New York; "The Chinese," "Bud and Bamboo," "Estabelle" and "A day's Song," published by Methodist Book Company, Toronto and is a contributor to several British magazines.

In this latest volume, the author gives the first details of his plan for an Anglo-American naval alliance, whereby with the same efficiency as at present, $500,000,000 yearly may be saved and devoted to commercial and financial expansion, and the civilization of the world—assured on an Anglo-American "square deal" unassailable basis.

The London Times, in a long review, states:—"It is the book of the hour. Its many excellent qualities fully entitle it to a second edition soon; shrewd, eloquent, much food for thought; business houses would do well to follow its hints"

The London Chronicle, in a review says:—"The author who has travelled much in the country which he describes, and mixed freely with all sorts and conditions of men there, has written an authoritative work on the present outlook and possible future of things."

"China Revolutionized." J. Stuart Thomson. $2.50 net: Bobbs Merrill Company, New York.

UNITED STATES COMPANY'S BONDS TO ISSUE HERE

Transit Company Will Try Canadian Market—Alberta's Treasury Note Issues

A syndicate composed of N. W. Harris & Company, Inc., Lee, Higginson & Company, and Bissell, Kinnicut & Company, New York, have purchased $30,000,000 Interborough Rapid Transit Company first and refunding mortgage 5 per cents., due January 1st, 1955, and a public offering will be made.

A block of $5,000,000 of the bonds have been allotted to a foreign syndicate, and the remaining $25,000,000 will be offered in the United States and Canada. The price at which the bonds will be offered has not yet been determined.

The bonds will be offered in Canada by Messrs. N. W. Harris & Company, Inc., Montreal.

Power Company's One Year Notes.

Messrs. J. C. Dann & Company, Ellicott Square, Buffalo, N.Y., and their New York correspondents, Messrs. Laidlaw & Company, 26 Broadway, New York, are offering one year 6 per cent. collateral notes of the Niagara, Lockport & Ontario Power Company. This company owns all of the capital stock, except qualifying directors' shares, of the Salmon River Power Company. The following securities have been deposited with the trustee as security for these notes:—

$1,000,000 par value of Salmon River Power Company first mortgage 5 per cent. bonds, due 1952.
600,000 par value of Ontario Power Company stock (dividend rate 5 per cent).

$1,600,000 total par value of collateral security.

The aggregate value of this collateral at current market is over 33⅓ per cent. in excess of the par value of the total authorized issue of collateral trust notes.

The Niagara, Lockport and Ontario Power Company operates 762 miles of transmission lines (407 miles owned, 355 miles leased), supplying the trolley lines in Syracuse, Rochester, Batavia, Oswego, and Lackawanna; the interurban lines between Rochester and Geneva, Rochester and Sodus Bay, Rochester and Mount Morris, Rochester and Lockport, between Syracuse and Oswego, and Syracuse and South Bay, and between Buffalo and Westfield (near Erie, Pa.), the total length of trolley roads thus operated, wholly or in part, being 588 miles. The company furnishes the public service corporations supplying light and power in Syracuse, Auburn, Rochester, Batavia, Lockport, Albion, Medina, Middleport, Depew, Lancaster, and Lackawanna, besides smaller communities. Power is also supplied to the Lackawanna Steel Company, the American Locomotive Company (Dunkirk shops) and many other large manufacturing concerns.

In order to supply the increasing demand for power in the Syracuse district, the Salmon River Power Company is being built (officers of the company state that the first installation of 15,000 horse-power will be completed before the end of 1913). The demand for power in the Syracuse district for street railway, lighting and general power purposes is shown by present sales, under contracts, of 17,911 horsepower, an increase of 39 per cent. in the last two years, and 150 per cent. since 1908.

Alberta's Treasury Notes.

The total outstanding indebtedness of province of Alberta at present is $15,741,981. Particulars of the debt were given by the premier as follows: Bonded indebtedness, $6,860,200; treasury notes, $7,533,333; bonds payable to banks or otherwise, $971,500; and overdrafts, $376,948.

The premier said there had been two re-issues of treasury notes since the last session of the house as follows:—

$7,290,000 due on December 30th, 1913, and $243,333 due April 1st, 1914. The expenses of negotiating the re-issues were $218,700 and $4,496, respectively.

The re-issues were arranged through Lloyds' Bank, the amount paid being one-quarter per cent., which included bank commission, brokers' commission, legal expenses and stamps on the treasury. They were negotiated at five per cent.

◆

At a public conference at London, Ont., the Grand Trunk System, represented by Mr. Long, head of the freight department, Ontario, stated that the Grand Trunk would have nothing to do with the London and Port Stanley road if it is electrified.

Canadian butter and farm produce are being shipped to commission men at St. Paul, Minn., and held in bonded warehouses until the passage of the tariff bill, which is expected to lower the duty approximately $1,000 a carload, states a despatch from that city. Several large shipments of produce also are being held on the Canadian side of the border.

LIFE INSURANCE COMPANIES' PROFITS

What Line Marks Division Between Those Divisible Among Policyholders and Shareholders? Asks Correspondent

Respecting the analysis of life insurance stock as an investment, which appeared in a recent issue of *The Monetary Times*, a correspondent writes:—"This makes it quite clear that from past experience, life insurance stock is a remunerative field of investment, but I know from my experience with investors that one point is not clear to many who have looked at this stock with a view to investment and which, perhaps, your expert would make clear for those who would like to have the information.

Is the Prevailing Idea.

"The prevailing idea among policyholders, I think, is, that any savings effected or profits earned in life insurance business, are distributed among participating policyholders, and it is not clear to them what line marks the division between profits divisible among policyholders and profits divisible among shareholders. The obscurity of this point to many has kept them away, I think, from life insurance stock as an investment, because they are not able to see clearly where their profits are to come from or what basis is taken or what system is followed in determining what profits may be properly divided among shareholders. I have heard some express the belief that the dividends on life insurance stock are limited to what may be termed an ordinary interest rate.

"If your expert would briefly, but concisely, clear up this point, I think he would go a long way toward turning the eyes of would-be investors to life insurance stock. I can understand myself that the stock available would be limited since the amount required is not large. Nevertheless, if the idea of your article is to produce an awakening, I think what I have referred to, if properly cleared, would help quite a few to awaken, as investors like to study the possibilities of an investment field."

What the Act Says.

The writer of the article in question says in reply:—

"The payment of dividends to shareholders of life insurance companies, formed since the passing of the Insurance Act, 1910, is regulated by Section 185 of that Act. Under this section, shareholders are entitled (1) to interest upon their unimpaired paid-up capital stock at the average net rate earned upon the mean invested funds of the company; (2) to not more than one-tenth of the profit realized upon participating business; (3) to the profit arising from non-participating business; and (4) to a share of any profit on securities realized. 'Such shareholders to be, however, charged with a fair proportion of all losses incurred upon investments or other losses of a similar character.'

"The only difference between this and section 110, regulating companies organized before the passing of the Act is that participating policyholders in any company then having existing rights under the Acts relating to such company, to any share of the profits of the non-participating business retain them."

◆

CANADA AND LOW WHEAT PRICES IN NEW YORK

Heavy northwestern offerings of wheat, almost wholly of Canadian origin, with unexpected lightness of foreign demand has caused weakness in prices resulting in a decline of 9⅛ cents a bushel in December contracts and 8⅛ in September deliveries in New York. A recent quotation of September at 85⅜ is the bottom for this season, comparing with the high of 93½ cents. December deliveries now at 87⅛ are less than a cent higher than September, compared with the high of 96¼. Since the beginning of September these two contracts have declined 4½ and 5⅝ cents respectively.

"Unless developments in the foreign market should take a more favorable turn," says the Wall Street Journal, "it is doubtful whether the domestic conditions will offer much immediate relief to the pressure of Canadian supplies. Free imports may any day now become a fact. Canada's crop of 211,000,000 bushels of wheat and 420,000,000 bushels of oats have the best month of their movement immediately ahead of them. In spite of improved storage facilities the offerings are to be taken care of through concessions to distributors and their capacity to make a market for the surplus.

◆

The last payment in the Canadian Pacific Railway new stock issue will be due on October 20th. The first payment was made on February 13th, and subsequent payments were made in April, June and August.

WANTS MUNICIPAL FIRE INSURANCE

City Engineer Doane, Halifax, Suggests Scheme for Nova Scotia.

A scheme for mutual municipal fire insurance is the suggestion of city engineer Doane, Halifax. While the dangers of municipal insurance have frequently been pointed out, the proposal has attracted attention.

A list of questions was sent by Mr. Doane to the municipal clerks to ascertain what sums are involved in the existing insurance system. Twenty-seven of the towns and six of the rural municipalities responded, and a statement of the statistics given, is appended.

Says Property Is Good Risk.

Mr. Doane says:—"The larger risks are carried by several different insurance companies; in some cases it is divided up among a considerable number of companies. There are two reasons for this; one, because it is not advisable to carry too large a risk in a company which is also carrying insurance all around the property; the other, because insurance companies do not desire to carry too large a risk in one particular quarter. Municipal property is becoming one of the best risks for insurance: first, because the greater part of it is being constructed of fire-proof materials; and second, because it usually has better fire protection facilities than private property."

Suggests Appointment of Commission.

He suggests the appointment of a commission to handle the scheme. The trustees would be obliged to insure all public property covered against a maximum loss of, say, $100,000, the premium to be paid out of the total premiums pooled. "The balance," continues Mr. Doane, " should be invested, say for 10 years, by which time the amount of the investment would reach about $100.000, if there are no losses. According to the returns received, last year the total fire loss was five dollars.

"Any fire loss up to $100,000 would be paid by the insurance companies; over $100,000, which is very unlikely, would be paid out of the invested funds. After reaching $100,000 or more, the fund could be trusted to carry the whole risk and it is unlikely that any further premium would be required from any municipality. Provision should be made, that in case of serious loss the municipalities might be required to resume payment of premiums until the fund was again self-sustaining. Provision should also be made for municipalities to pay a premium for new buildings, say for 10 years, after which no further premiums would be required except as suggested, in case of very serious loss.

"Municipalities entering the scheme after the beginning, should pay for the same number of years as in the case of buildings. The same principle should apply when any increase in the amount of insurance carried is asked for. After 10 years, or after the time at which the fund assumes the liability for loss, machinery would be required for determining the amount of losses. The investment of the funds should also be properly guarded."

Insurance in Nova Scotia.

Here are the figures collected:—

Annapolis.—Insurance $12,450, on electric light plant, schools, town hall, watering cart; premium $183.88; no fire loss in 1912; total assessment $349,013.

Bridgetown.—Insurance $9,500, on school, town hall and contents; premium $95; no fire loss in 1912; total assessment $384,815.

Bridgewater.—Insurance $9,200, on power house, electric plant, fire hall, one dwelling, three schools; premium $89.90; no fire loss in 1912; total assessment $756,650.

Canso.—Insurance $8,850, on court house, hospital, school; premium $61.83; no fire loss in 1912; total assessment $195,900.

Dartmouth.—Insurance $49,600, on public buildings, schools, fire apparatus, furniture, horses, etc.; premium $125.58; $5 fire loss in 1912; total assessment $3,000,000.

Digby.—Insurance $9,500, on school, town hall, warehouse, fire apparatus; premium $127.75; no fire loss in 1912; total assessment $567,225.

Dominion.—Insurance $3,000, on town hall, jail, school; premium $12; no fire loss in 1912; total assessment $518,000.

Glace Bay.—Insurance $90,300, on schools, lighting plant, town hall, pumping plant, infectious hospital; premium $906.15; no fire loss in 1912; total assessment $4,043,000.

At Halifax and Other Centres.

Halifax.—Insurance $433,800, on schools, public buildings, fire engine houses, infectious hospital, etc.; premium $3,136; no fire loss in 1912; total assessment $26,062,000.

Hantsport.—Insurance $4,500, on schools, town hall, fire apparatus; premium $30.75; no fire loss in 1912; total assessment $203,925.

Inverness.—Insurance $9,434, on schools, town hall, fire apparatus; premium $63.26; small damage to school building; total assessment $454,635.

Kentville.—Insurance $9,400, on schools and town hall; premium $77.36; no fire loss in 1912; total assessment $585,200.

Lunenburg.—Insurance $43,000, on schools and court house; premium 1 per cent. and 2 per cent.; no fire loss in 1912; total assessment about 75 per cent.

Parrsboro.—Insurance $13,500, on schools, furniture, electric light plant, machinery, town hall, etc.; premium $121.83; no fire loss in 1912.

Pictou.—Insurance $72,500, on schools and other town buildings, etc.; premium $265.76; no fire loss in 1912; total assessment $1,112,500.

Port Hood.—Insurance $7,500, on schools, boilers, two town buildings, etc.; premium $40; no fire loss in 1912; total assessment $158,000.

Shelburne.—Insurance $15,000, on schools, engine house and fire apparatus, power houses, electric equipment; premium $80; no fire loss in 1912; total assessment $371,005.

Springhill.—Insurance $40,500, on schools and town hall; premium $486,25; no fire loss in 1912; total assessment $1,000,000.

Stellarton.—Insurance $25,500, on buildings and steam boiler; premium $160; no fire loss in 1912; total assessment $1,066,000.

Sydney and Sydney Mines.

Sydney.—Insurance $148,500, on schools and public buildings; premium $414.08; no fire loss in 1912; total assessment $8,008,255.

Sydney Mines.—Insurance $9,600, on schools and furniture; premium $96; no fire loss in 1912; total assessment $1,750,000.

Truro.—Insurance $99,250, on schools and fixtures, fire stations, poor house, pumping station, infectious hospital, boiler, pumps, engines; premium $946.08; no fire loss in 1912; total assessment $4,500,000.

Trenton.—Insurance $5,400, on school and town hall; premium $36; no fire loss in 1912; total assessment $623,000.

Wedgeport.—Total assessment $127,000.

Windsor.—Insurance $54,000, on civic buildings, schools, hospital and fire hall; premium $247.33; no fire loss in 1912; total assessment $1,400,000.

Yarmouth.—Insurance $46,700, on schools, contents and fire station; premium $375.08; no fire loss in 1912; total assessment $3,690,800.

Amherst.—Insurance $25,000, on municipal buildings and asylum; premium $298; no fire loss in 1912; total assessment $3,679,055.

Arichat.—Insurance $14,000, on municipal buildings and asylum; premium $136.80; no fire loss in 1912; total assessment $850,645.

Barrington.—Insurance $4,000, on court house, poor house and fixtures; premium $26.66; no fire loss in 1912; total assessment $603,110.

Chester.—Insurance $1,100, on court house; premium $4.50; no fire loss in 1912; two-third valuation on real and personal property.

Cape Breton.—Insurance $115,000, on court house, jail, asylum, lock-ups; premium $655.25; no fire loss in 1912; total valuation $3,568,180.

Halifax.—Insurance $93,000, on court house, county home and county jail; premium $267.93; no fire loss in 1912; total assessment $3,116,252.

Pictou.—Insurance $40,000, on asylum, court houses, jail, lock-up, market house, etc.; premium $150.70; no fire loss in 1912; total assessment $2,000,000.

The total amount of insurance carried by the above-named municipalities is $1,522,884; total annual premium $9,717.62; total fire loss in 1912, $5; total value for assessment, $74,745,565.

Is a Dangerous Experiment.

The proposal for municipal fire insurance is made periodically. Only a few weeks ago, Regina made a similar suggestion. Luckily the civic authorities were sufficiently wise to reject the idea. A few days later part of the city's exhibition buildings were burned with losses that would have entirely obliterated the municipal fire insurance fund and left it in debt besides.

It is often forgotten, as *The Monetary Times* has previously pointed out, that the fire insurance premium is ever ready to meet the fire risk, present every minute, day and night. Fire may occur at any moment, the loss may be $1 or it may be $1,000,000. Whatever is the loss, the fire insurance companies will pay—if the insurance is placed with reputable companies. Civic fire insurance has been tried and has invariably proved a disastrous failure.

LARGE EMIGRATION FROM CANADA MYTHICAL

Head Tax of United States Apparently Causes Fibbing and Republic's Returns Are Unfairly Enlarged

Regarding the figures printed in *The Monetary Times* recently, as to emigration from Canada to the United States, this journal has interviewed Mr. J. Bruce Walker, Canadian commissioner of immigration at Winnipeg, one of the best posted men on the subject on this continent. Mr. Walker stated there was no serious emigration from this country to the States. "At least," he added, "that is so far as it relates to Western Canada.

How the Fear of Taxation Works.

"I have no knowledge of and cannot presume to speak about the flotsam and jetsam in the human tide of affairs across the boundary at such points as Detroit and Windsor, Niagara and Buffalo, Vancouver and Seattle, except to say that to my knowledge a great many persons in Canada are under the impression that unless they declare themselves intending to become settlers in the United States they will be obliged to pay a head tax of $4.00 upon entering the United States. The United States Immigration Law, of course, exempts Mexicans and Canadians from this head tax. Notwithstanding this, there is a very popular and widespread opinion that persons are liable to the head tax of $4.00 unless they declare themselves intending to become settlers in the United States and this practice is more general than you would suppose in Eastern Canada, and accounts for a very large number of the so-called emigrants who leave Canada to reside in the United States, but who, as a matter of fact, return on the next convenient train or steamer.

"With reference to Western Canada," said Mr. Walker, "persons leaving the country are checked by the same officers and with the same care as those who enter the country from the United States. The article conveyed the impression that a vast proportion of the numbers of persons quoted as leaving Canada had been agriculturists. I can give the name and age and nationality of every man, woman and child who leaves Canada at any point between Port Arthur and the Rocky Mountains."

Helped to Swell Totals.

Mr. Walker prepared the following statement from his books, giving the total number of emigrants who have left Western Canada from January 1st to September 25th, and declaring themselves intending to reside permanently in the United States. The total number of persons for the period referred to is 3,453, of whom 991 were farmers and farm laborers. These figures are absolutely reliable and official. The number of persons leaving the country at such points as North Portal and Coutts is due to the fact that this spring the United States government threw open a large area for homesteading purposes in the State of Montana, contiguous more or less to these two ports.

No Serious Exodus.

"You can accept it from me as beyond question," concluded Mr. Walker, "that the statement from any source that there is any serious or important exodus of citizens of Canada to the United States from Western Canada is untrue and without foundation in fact, and that the exodus, such as it is, represents an insignificant percentage of those who enter this country from the United States."

SALES OF INDUSTRIAL BONDS

Part of Bell Telephone Issue Was Placed in London—Edmonton's Issue

Messrs. Lee, Higginson and Company, of Boston, state that the issue of $4,500,000 5 per cent. bonds of the Bell Telephone Company of Canada, has been oversubscribed, the issue having been announced only the previous day. Part of this issue was offered in London this week.

The Dominion Government loan lists closed on Monday. The oversubscription of Harrod's (Buenos Ayres) $6,000,000 issue, indicates that much money is awaiting investment, if the price and class of security satisfy the investor, says a Windermere cable message.

Purpose of New Dominion Loan.

The proceeds of the new Canadian 4 per cent. loan of £3,000,000, issued in London last week, will be used in part to pay off a 4 per cent. loan of £1,700,000, which matured on October 1st. The balance will not be specially appropriated to any item or items, but used for the general purposes of the Dominion.

The city of Edmonton has issued in London £900,000 5 per cent. bonds at 96. This price, says a Montreal Star cable, is three points below the present quotation of 5 per cent. sterling bonds, for a little over a million were issued in April last at 100½.

Edmonton last year raised £600,000 in 4½ per cent. debentures at 99½, and now issues a 5 per cent. loan at 4 per cent. discount, which proves how municipalities all over the world have to realize the tightening of London's purse strings.

The new issue is apparently a part of the $10,000,000 that Messrs. Kleinwort, Sons and Company, agreed some time ago to place for the city. The price of the former issue—of $5,340,000, 5 per cent. debentures, maturing in 10 and 20 years and offered April 24 last—was 100½, or to yield 4.87 per cent., four and a half points above the price of the forthcoming issue. The former issue this year was 20 per cent. subscribed.

Toronto Housing Company's Bonds.

A block of $650,000 of the Toronto Housing Company's 5 per cent. bonds have been sold at 99¼, less brokerage to the Dominion Securities Corporation, Toronto. The price received is better than that obtained for the Hydro-Electric or Harbor Board issues.

The Toronto city council has given the Toronto Hydro-Electric Commissioners authority to apply to the Ontario Railway Board for permission to make an additional issue of bonds amounting to $700,000, required for extensions.

◆

President Chamberlin, of the Grand Trunk Railway, according to a Providence despatch, is said to have stated that the Southern New England Railway had not yet made financial arrangements which would warrant its resuming work in Rhode Island. This message was in answer to a request for a confirmation of announcement made at Montreal that the contractors had been ordered to proceed with construction operations.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Grenville, N.S.—September 23—School. Loss $1,500. Cause, supposed incendiary.

Cornwall, Ont.—September 30—McLennan, business block. Loss and cause unknown.

Londonderry, N.S.—October 1—Waverley Hotel and store. Loss and cause unknown.

Gananoque, Ont.—October 1—Spring and Axle Company's premises. Loss $50,000. Cause unknown.

Steveston, Lulu Island, B.C.—September 26—Mr. S. J. Gilmore's farm buildings. Loss $10,000. Cause unknown.

Winnipeg, Man.—September 29—T. D. Robinson Coal Company's stock and stable. Loss $4,000. Cause unknown.

Vancouver, B.C.—September 27—Messrs. Woodward's store, Hastings and Abbott Streets. Loss $4,000. Cause unknown.

Montreal, Que.—September 30—Mr. E. Brassard's stables, 481 St. Zotique Street. Loss $6,000. Cause unknown.

October 1—Mr. L. M. Tremblay's sheds, 2239 St. Hubert Street. Loss and cause unknown; 99 Mansfield Street. Loss unknown. Cause, defective chimney.

Toronto, Ont.—September 27—Suckling Building, 68-70 Wellington Street West. Loss $40,000. Cause unknown.

September 29—Mr. S. Burroughs' residence, 103 Dupont Street. Loss building, $30; contents, $70. Cause, electric iron; Mr. G. Walkey's residence, 834 Bathurst Street. Loss $2,000. Cause unknown; shed at 40 Brier Hill Avenue. Loss unknown. Cause, supposed incendiary.

September 30—Hay shed, Union Stock Yards. Loss $750. Cause unknown.

◆

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Kingston, Ont.—September 22—Davis Drydock Company, boiler room and machine shop. Loss, stock, $2,393; buildings, $1,034. Insurance, stock, $7,600; buildings, $400. Cause unknown.

The following fires were adjusted by J. S. Rankin, Vancouver:—

Penticton, B.C.—August 16—Mr. Arthur Thompson's automobile. Loss $100. Cause of fire, collision. Insurance, St. Paul Fire and Marine, $1,500.

Lynn Valley, B.C.—July 25—Mr. Anton Anderson's dwelling. Loss on building, $1,235. Cause of fire, defective chimney. Insurance, Royal, $1,400.

South Vancouver, B.C.—August 16—Mr. H. N. Hallberg's stores and office. Loss on building, $950. Cause, supposed lighted match or cigarette. Insurance, building, Dominion Fire, $1,500; London Mutual, $1,500.

Hardy Bay, B.C.—August 7—Hardy Bay Trading Company's, Limited, general store. Loss on building, $1,100; on contents, $5,800. Cause of fire unknown. Insurance, Phoenix of London, building, $800; contents, $3,200.

Hammond, B.C.—September 10—Messrs. Brown Brothers and Company's, Limited, greenhouses and plant. Loss on building, $8,000; on contents, $3,000. Cause of fire, supposed cigarette. Insurance, buildings, Agricultural, $6,000, covering under schedule; Acadia, $3,000, covering under schedule; North Empire, $3,000, covering under schedule; total, $12,000. Total value of plant approximately $65,000 with only $12,000 insurance.

Vancouver, B.C.—August 10—Mr. Robert J. Ker's temperance hotel. Loss on building, $600. Cause of fire, defective chimney. Insurance, Queen, $16,000; North British and Mercantile, $15,000.

August 31—Johnston's Big Shoe House, Limited, stores and rooms. Loss on building, $50; on contents, $700; on fixtures, $75. Cause of fire unknown, (supposed incendiary), started in printing office on second floor. Insurance, contents, $45,000; fixtures, $3,400, with the following companies: Aetna, Agricultural, Canadian, Canada National, Connecticut, Firemen's Insurance, General Assurance, Liverpool and London and Globe, National Union, North Empire, Northern Assurance, Northwestern National, Providence-Washington, Queen, Scottish Union, Union Assurance, Western.

September 18—Mr. John Sullivan's dwelling. Loss on building, $50. Cause of fire unknown. Insurance, Anglo-American, $2,000.

The following fires were adjusted by H. T. Hughes, adjuster, Toronto:—

Uxbridge Township.—Thos. J. Graham's barn, value $2,400. Insurance, Commercial Union, $1,200. Loss, total unknown.

New Liskeard, Ont.—September 12—J. W. Fitzpatrick's dwelling. Insurance, Canada Fire, $500. Loss $650. Cause unknown.

Welland, Ont.—September 7—L. Johnson. Loss, barn, $379; contents, $160. Insured with Mercantile Company. Cause, burning rubbish.

Tynendenaga, Ont.—September 8—P. Bardy's farm house. Insurance, Anglo, $900; loss, $800; furniture, insurance, $200; loss, $207.65.

Cobalt, Ont.—September 13—J. B. Moyneau, Cobalt Meat Market. Insured with Anglo-American and Montreal-Canada. Loss on insured building, $66.20; loss on uninsured building, $1,100. Cause, man smoking in bed, (three deaths).

Toronto, Ont.—September 1—Geo. Grazamo, 240 Queen East. Hay. Loss $900. Cause unknown. Insured with Royal. J. Miller, 224 Fairview. Loss $15. Insured with Waterloo and Mutual. Ternay, 259 Gerrard East. Building $10. Cause unknown. Insured with London, Liverpool and Globe. Elen Petheck, 709 Brock Avenue. Building $29. Cause unknown. Insured with London, Liverpool and Globe.

September 2—Mr. Scott, 63 Laplante Avenue. Loss $85. Insured with London, Liverpool and Globe. Cause, incendiary. F. W. Stockdale, Alexander Gardens. Hay stack, value $750. Insured, London, Liverpool and Globe. Cause unknown.

September 3—Jos. Millington, 352 St. Clarence. Loss, furniture, $8. Cause, gas and curtain. Geo. Williams, 690 Queen West. Building, $460. Cause, from store next door. Insured with Royal Company. Bush and Company, 122 Wellington West. Drugs, $240. Cause, water from upper floors. Insured with Royal Company.

September 6—Steinbach, 43 Augusta Avenue. Building. Loss $15. Cause, gas and curtain. Insured with Royal.

September 9—L. Bournsten, 37 Elm Street. Furniture. Insurance, Royal, $1,200. Loss $20.

September 10—Clara Evans, 166 Euclid Avenue, household furniture. Insurance, London, Liverpool and Globe, $500. Loss $825. Cause, gas and curtain.

September 11—Elmsley Estate, 51 St. Vincent. Building. Insurance, London and Lancashire, $5,000. Loss $700. Cause, pipe left in coat pocket.

September 13—S. Gales, 49 D'Arcy Street, furniture. Insurance, London, Liverpool and Globe, $500. Loss $6. Cause, cigar stub. E. O. Hewitt, 61 Munroe Street. Building. Insurance, Norwich Union, $600. Loss, $10.65.

September 14—Chas. Edwards, 563 Charles Street. Building. Insurance, Norwich Union, $2,000. Loss $8. Cause, stove set fire to towels.

September 16—S. Myres, 75 Teraulay Street. Building. Insurance, $1,550, with London, Liverpool and Globe. Loss $1,170. Cause, Sabbath candles. Geo. Faulkner, Northern Forwarding Company. Automobile. Insurance, Queen, $2,250. Loss $1,700. Cause, incendiary fire in garage.

September 21—Joseph Atkinson, Norman and Gilbert Building. Insurance, Montreal-Canada, $1,200. Loss, $86.60. Cause, dropped match. Empress Hotel, Yonge Street. Insurance, London, Liverpool and Globe, $14,700. Loss, $10. Cause, dropped match. Douglas Ponton's automobile. Insurance, Queen, $3,000. Loss $90.13. Cause, back-firing.

◆

RESULT OF DOMINION'S LOAN

Fifty-seven per cent. of the new Dominion £3,000,000 loan in London at four per cent. is left with the underwriters, says the Canadian Associated Press. The result is about what was anticipated here and is regarded as satisfactory under all the circumstances. The price, which before the announcement of the result, was one quarter premium, has now receded to a half discount. It was certainly a wise step not to pitch the price too high for a fiasco would undoubtedly have ensued. Now that Canada is out of the way, New Zealand is likely to soon become a borrower, but probably at a much lower price.

◆

The Bank of England rate has been raised from 4 to 5 per cent. this week.

The Department of Marine and Fisheries has completed plans for the construction of the second largest ice-breaker in the world. The vessel is for use on the lower St. Lawrence. The cost is estimated at $750,000. The contract will be given to the British firm of Vickers Sons & Maxim.

SEPTEMBER FIRES

Halifax, N.S.—Imperial Oil Company's lighter "Mayflower." Loss, $5,000.

Mabel Lake, B.C.—September 18—Mr. F. D. Abbot's residence. Loss and cause unknown.

Kingston, Ont.—September 22—Davis Drydock Company's plant. Loss, $4,000. Cause unknown.

Lenore, Man.—September 20—Grain Growers' Elevator and two cars of wheat. Loss and cause unknown.

Advocate Harbor, N.S.—September 22—Dr. F. L. Hill's garage and barn, etc. Loss and cause unknown.

Victoria, B.C.—September 22—British Columbia Pottery Company's plant. Loss, $75,000. Cause unknown.

Hopewell, N.S.—September 25—Three residences, three barns and Foresters' Hall. Loss, $6,000. Cause unknown.

Sudbury, Ont.— September 28— Messrs. Kelly's and Henry's residences and barns. Loss, $7,500. Cause unknown.

Canora, Sask.—September 21—Hanks & Betram's builders' premises. Loss unknown. Cause, supposed incendiary.

Carleton Place, Ont.—September 24—Mrs. G. E. Leslie's residence. Loss, $9,000; partially insured. Cause unknown.

Hamilton, Ont.—September 26—Mr. W. Dobson's residence, Barton Street. Loss, $3,000. Cause, overheated coal stove.

Chatham Township, Ont.—September 26—Mr. F. McKim's barns and outbuildings. Loss unknown. Cause, sparks.

Quebec, Que.—September 26—Mr. V. Trudel's residence, 48 St. Francois Street. Loss and cause unknown. Nine deaths.

Calgary, Alta.—September 22—T. Burns & Company's clothing store, 130 Eighth Avenue. Loss, $20,000. Cause unknown.

Milverton, Ont.—Messrs. Semple Bros.' barns. Loss, $6,500. Insurance, horses, $2,000; building, $1,000. Cause unknown.

London, Ont.—September 25—R. Hueston & Sons' Medway Mill, fourth concession London township. Loss and cause unknown.

North Bay, Ont.—September 28—Mr. F. St. Lawrence's residence, First Avenue. Loss, $3,500; insurance, $2,500. Cause unknown.

Ottawa, Ont.—September 24—Mr. J. Durocher's store, Montreal Road. Loss, building, $8,000. Mr. E. Desrosier's loss, contents, $4,000. Cause unknown.

New Westminster, B.C.—September 17—Chimney fire at residence of S. Hutchinson. Sing On Company, 863 Columbia Street. Loss, $15. Cause, greasy range.

Roblin, Ont.—September 25—Messrs. J. Hughes' and R. E. Thompson's stores and other buildings. Loss, $15,000; insurance, $5,000. Cause unknown.

Toronto, Ont.—September 26—J. Hillard's barber shop, 273 King Street West. Loss, $15. Cause, clothing hanging near gas jet. Rear 190 Dundas Street. Loss, $10. Cause unknown.

Montreal, Que.—September 23—Mrs. Solofsky's store, 150 Sanguinet Street. Loss unknown. Cause, supposed matches.

September 25—290 and 292 St. Antoine Street. Loss and cause unknown.

September 28—St. Clement's School. Loss, $100,000. Cause unknown.

Petitcodiac, N.B.—September 23—Five stores and two residences. Loss, $20,000. Dr. McDonald, Dorchester, residence, $2,000; Uz Ping, occupant, $1,000. Jones building, dealer in hides, etc., $800. Thaddy Drysdale, harness shop, $2,000. W. M. Bickerton, merchant tailor, $1,000. Parkinson's gents' furnishings store, $1,500 on building, and at least $2,000 on stock. Robert Wilmot, who resided upstairs in the Parkinson building, $1,000. Parker's new livery stable, $1,000. (No horses lost.) Mrs. Pollock's millinery parlors, $2,000 on building and $1,500 on stock. She resided upstairs, and her loss in house furnishings is about $800. E. R. Lockhart, residence, $2,500; $800 on furniture. Freeze Taylor, of Moncton, about $500. Cause unknown.

◆

Mr. Richard Grigg, Canadian Trade Commissioner, has returned to London, after his mission to China and Japan, where he was sent by the Hon. G. E. Foster, to inquire into openings in the Orient for western wheat, flour, lumber and possibly fish. He sails for Canada on October 15, says a Montreal Star cable. Mr. Grigg found the consensus of opinion among Chinese and Japanese merchants that Vancouver and other North Pacific ports are destined in the near future to see a greatly extended export of flour to China and wheat to Japan. Manchurian producers, who were formerly thought to be Canada's chief rival in supplying Japan, are devoting themselves rather to millet, maize, and sova bean, leaving the Canadian exporter a freer field. The Canadian officers are spending to-day at Portsmouth dockyard. They are being most hospitably received everywhere.

UNITED STATES CAPITAL IN THIS COMPANY.

The Hamilton By-Product Coke Ovens, Limited will locate in Hamilton.

The first unit of this company's plant will be built on a 33-acre site on the bay shore, in the east end, and will consist of 50 ovens, each of 16 tons capacity, operating on 18 hours coking time. A large gas holder will also be erected there. The plant will carbonize 1,000 tons of coal per day, producing 700 tons of coke per day. United States capital holds a controlling interest.

◆

EDMONTON LOAN CRITICIZED.

A Canadian Associated Press cable says:—No announcement has been made of the closing of the lists of the city of Edmonton loan, but the market formed an impression that the issue was being well applied for, and in this case also dealings were reported in the bonds at about ¼ premium.

The financial editor of the London Daily Sketch says that considerable dissatisfaction is expressed at the fact that the issue of the city of Edmonton 5 per cent. bonds now being made, are similar to those issued six months ago at 100½, and purchasers of those bonds feel that they have a grievance that another issue should be made so soon at 4½ per cent. below the price at which they became holders. Had the credit of Edmonton depreciated in interval or monetary conditions altered, there would be some excuse for the big reduction in price, but this is certainly not the case. Investors will be chary in taking up similar loans lest they be treated in the same way.

The London Morning Post, however, declares that Edmonton has been a free borrower of late and the yield of the new issue is not too high.

◆

CALGARY HAS A BIG DAY'S VOTING.

(Special Correspondence.)

Calgary, September 28th, 1913.

When the city fathers arranged to have the property owners express their wishes with regard to 20 questions, in one day, each calling for a yes or no mark, they set a record among Canadian cities for voting on municipal affairs.

Some doubt may well be permitted as to whether or not each item received the consideration which was its due and so complex did the situation appear to old time electioneers, that about the only well-defined forecast was that possibly, on general principles of economy, half the list submitted might be defeated.

What happened was discovered when in the evening the votes were counted. The issues and their fate, so far as can be learned to date, were as follows:—

		By-law.
Bridge across the Elbow River, 4th St. West	$ 82,500	Defeated
Bridge across Bow River, 15th St. East	82,100	"
Bridge across Bow River, 9th St. West	173,000	"
Bridge across Bow River, Centre St...	468,900	"
Bridge across Bow River, 4th St. West	319,350	"
Bridge across Bow River, 14th St. West	173,000	"
For tuberculosis hospital	30,000	Carried
For purchase of land adjoining proposed Union stockyards, 55 acres, which it is proposed to hold for sale to incoming industries, and for the construction of an abattoir	350,000	"
For park improvements	45,100	....
For pavement construction on boulevard	19,250	....
For construction of sewer and sewage disposal plant at Ogden	63,140	....
For purchase of Lowry Gardens for public park	155,000	....
For widening certain streets	10,000	....
For erection of industrial building ..	250,000	Carried
For additional equipment for fire brigade	52,000	....
For Hillhurst athletic grounds to convert to park purposes	60,000	....
To increase number of city commissioners from three to four		....
To authorize agreement intrusting hospital control to a composite committee		Composite committee
To abolish the ward system		Carried
Whether hospital board shall be appointed by council or elected by ratepayers		Elected by ratepayers

AMONG THE INSURANCE COMPANIES

Activities of Life, Fire and Miscellaneous Companies During the Past Month

The following notes detail the activities in Canada of various insurance companies during August and September:

ACCIDENT AND MISCELLANEOUS.

Motor Union Insurance Company, Toronto, commenced to sell stock.

Western Canada Accident and Guarantee Insurance Company, Winnipeg, added six directors to the board.

The Niagara Fire Insurance Company was licensed by the Dominion government to transact automobile insurance. Mr. T. V. Nutter is Canadian chief agent at Winnipeg.

Western Hospital and Accident Insurance Company will apply for a Dominion charter to transact accident, health, guaranty and employers' liability insurance. This company is doing business in prairie provinces and British Columbia and has moved its head office from Edmonton to Regina.

LIFE.

Vancouver Life, Vancouver, continued organization.

The North American Life was licensed to do business in Alberta.

Empire Life, Toronto, commenced to sell stock in Ontario and Quebec.

The Gresham Life Assurance Society was licensed to do business in Alberta.

Minister of Finance appointed G. T. Clarkson to examine conduct of affairs of Union Life, Toronto.

Sterling Life, Toronto, reached $250,000 stock subscribed and anticipate writing business, January 1st, 1914.

George H. Allen resigned as general manager of Travellers Life of Canada, Montreal, to go in the field for the same company.

The Mutual Life and Citizens Assurance Company, of Melbourne, Australia, obtained a Dominion license. The head office for Canada is at Montreal.

FIRE.

Urban Mutual Fire was licensed to do business in Alberta.

Rimouski Fire, control passed to directors resident in Rimouski.

The Occidental Fire Insurance Company was licensed to do business in Alberta.

The Urban Mutual Fire Insurance Company was licensed to do business in Alberta.

The Firemen's Insurance Company, of Newark, N.J., was licensed to do business in Alberta.

The Springfield Fire and Marine Insurance Company was licensed to do fire insurance in Alberta.

The Alliance Assurance Company, Limited, of London, England, was registered to do business in Alberta.

The Fireman's Insurance Company, of San Francisco, California, was licensed to do business in Manitoba.

The Franklin Insurance Company, of Washington, D.C., ceased to carry on fire insurance in British Columbia.

The Equitable Fire and Marine Insurance Company, of Providence, Rhode Island, was licensed to do business in Manitoba.

The Springfield Fire and Marine Insurance Company was licensed to do tornado and sprinkler leakage insurance in Alberta.

The Imperial Underwriters Corporation of Canada was licensed by the Dominion. H. M. Blackburn is chief agent, at Toronto.

The Mount Royal Assurance Company of Montreal received an Ontario license for the transaction of fire and plate glass insurance.

Canadian business of Sovereign Fire, Toronto, was taken over by Phœnix, of Hartford, and United States policies by a New York company.

The Nova Scotia and Sovereign Fire Insurance Companies applied to the Dominion for release of deposits and securities respectively.

The Imperial Underwriters Corporation of Canada was registered in Saskatchewan. This company ceased to do business in British Columbia.

The Marine Insurance Company was licensed by the Dominion to transact fire insurance in addition to automobile and inland transportation insurance, for which it is already licensed. W. J. G. Thomson is chief agent, at Halifax.

RECENT CANADIAN BANK FRAUDS

Forgery and Cheque Raising Frequent—Does Competition Encourage These Crimes?

While banks have taken the utmost precaution to protect themselves against burglars by massive vaults and safes and other protective measures, the more insidious forms of robbery—viz., forgery and cheque raising, have been somewhat neglected.

The following are three conspicuous cases which have been perpetrated lately:—

1. A man walked into a bank and opened a small account. A few days later he deposited a marked cheque on another bank for a few hundred dollars and drew it nearly all in cash, then disappeared. The cheque was bad, and later it was found that the acceptance stamp was either stolen or specially made for the purpose.

Raised the Amount.

2. A person opened an account at a bank, and later filled in a cheque for a small amount and requested to have it marked. The cheque was so made out that it was easily altered into a larger amount. Once having a marked cheque in his possession, the cheque-raiser raised the amount and proceeded to another town, where he deposited the marked cheque at another bank and drew a considerable amount against it.

3. A branch bank received a letter purporting to have been sent by another of its branches advising that a Mr. —— had gone on a trip and would probably be in their district. A specimen of his signature was enclosed and the letter reported that this gentleman was a holder of their letter of introduction and requested that any assistance he required be given to him. A few days later the gentleman called, presented his letter of introduction, drew a substantial amount and made his departure to another branch, where he intended to repeat the operation. This he kept up until sufficient time had elapsed for the drafts to be presented, and when the fraud was discovered he had disappeared.

How to Avoid Frauds.

How could such frauds as these be avoided? asks the journal of the Sterling Bank of Canada.

In the first place, a few simple rules may be laid down which, if adhered to, will make it materially harder for this class of thief to accomplish his purpose.

1. No cheque should be marked for a savings bank customer.

2. No current account should be opened unless the prospective customer furnishes the manager with satisfactory evidences as to his identity.

3. No cheque which is badly filled in should be marked.

4. Letters of introduction should not be given to customers for the purpose of their obtaining money.

Increased competition between banks is no doubt one reason for important rules of this kind being waived at times, thus paving the way for the fraud; but probably one of the most important factors for his success is the courtesy which is extended by bank managers to customers and others who do business with them, and the manager's anxiety to create a good impression with the person who is introduced.

So frequent have been the frauds in the past year or two that this matter demands the special attention of every officer of a bank.

Be Slow to Part With Money.

The man who schemes to defraud banks in this way is usually one with plenty of confidence and a plausible manner, so that the courtesy he meets with in the bank becomes an excellent weapon for him.

For this reason the manager and, in fact, all other members of the staff must be on the alert for undesirable visitors of this kind.

This does not mean that if a stranger enters the bank, one must not be as courteous to him as to one of the regular customers; but never be in a hurry to part with the bank's money.

◆

MEDICINE HAT TO FLOAT ISSUE IN LONDON

Arrangements are being made by Medicine Hat civic officials for the placing of a bond issue of about $2,000,000 on the London market during next January or February. This amount will include an issue of $1,200,000 already authorized, the balance being for municipal capital expenditures that will be required during 1914.

ST. JOHN DIRECT MAIL PORT

Grand Trunk Terminals Site—Some Labor Difficulties—Potatoes Are Good Crop

(Special Correspondence).

St. John, N.B., September 29th.

There is some complaint that collections are a little slow in New Brunswick, otherwise there is no complaint as far as legitimate trade is concerned, as healthy conditions prevail.

Though labor troubles have affected certain trades somewhat. Several of the saw mills at St. John have begun operations, and it is expected that all of them will soon be busy, although the mill owners still refuse to grant any increase in wages or to recognize the international union of mill workers. The fact that the mills have been idle for more than three months has, of course, affected business to a considerable extent, but when they now begin, they will continue in operation much later than usual.

The Longshoremen's Association has had a working agreement with the steamship companies for five years, but it expires on November 16th. The association has now submitted a new schedule, demanding a great increase in the rate of wages. The rate has been 30 cents per hour, and they now ask 40 cents for day work and 45 cents for night work, with many stipulations which will otherwise greatly increase the cost of loading a vessel. The new schedule would come into effect on November 16th. There is some anxiety in business circles over the general situation.

What are Railway's Intentions?

The St. John Railway Company is pushing the construction of the extension of its line toward East St. John, and will have an important loop line completed before winter sets in.

Mayor Frink has been authorized by the city council to proceed to Montreal and interview the officials of the Grand Trunk Pacific Railway, to learn if possible their intentions with regard to the port of St. John. They have a site for terminals here, but no action has yet been taken to provide the terminals, or make any arrangements for handling the traffic of the new transcontinental at St. John. The road will be completed before terminals could now be provided, even if the work was begun at once.

Mails to be Handled at St. John.

During the coming winter St. John will be given a fair test as a direct Atlantic mail port. Heretofore the mails were handled at Halifax, the steamers calling there on the way to and from St. John. During the coming winter a portion of the mail service will be direct to and from Halifax, and a portion direct to and from St. John. The contention of St. John has always been that this port could give an entirely satisfactory direct mail service, and now it has an opportunity to demonstrate the fact.

Hon. Mr. Hazen has assured the citizens that grain conveyers on two additional steamship berths at West St. John will be provided in time to relieve the congestion when the heaviest rush of grain comes next winter. The fear that grain conveyers would not be constructed has caused a good deal of anxiety, since even with them there will be some congestion during the last few months of the winter season.

New Brunswick has this year a large crop of potatoes, and, although it has been reported that some rotten stock was placed on the Toronto market, all that have been offered in St. John have been of excellent quality. The price is low, 70 to 75 cents per barrel being offered for car lots in Carleton county. It is hoped that the expected reduction in the United States tariff will soon take place, as a good export market is greatly needed.—H.

TOLEDO AND CANADA'S MUNICIPAL BONDS

Several Canadian municipalities are probably thinking that the United States market for Canada's municipal bonds is a somewhat erratic factor, more particularly the Toledo section. Edmonton's school bonds, it was understood, were sold to a Toledo house. Later, something happened and the bonds went elsewhere. Regina was complimenting itself upon selling $500,000 of its school bonds in Toledo when technicalities, more or less serious, were raised by the purchasers and the debentures were sold to a house elsewhere. Nepawa and Carleton Place had somewhat similar experiences. It is likely that Canadian civic authorities will consider more carefully in future offers which come for their bonds from quarters which a few months ago looked as though they might prove a wide channel for the absorption of Canadian municipals.

VALUE OF LIFE INSURANCE

XXXII.

Your Family History

BY C. A. HASTINGS

Many a man asserts, as an excuse for putting off insurance, that he is in perfect health, and that he is sure to be when he has made up what he is pleased to call his mind, and has decided to assure.

Most men know that the longer insurance is postponed the higher the premium, to say nothing of the fact that the would-be policyholder runs a great risk by reason of illness or accident.

These details were noted in the previous article on "The Benefits of Insuring Young." But there is another penalty—namely, blood relations. Family history plays a very important part in the selection of risks, and the man who postpones insurance on the grounds of his own perfect bodily health, must also remember that if (while he is making up his mind), any of his relations died or suffer from say, cancer, consumption or so forth, he will probably find his proposal rejected or "rated up."

So that the would-be assurer is taking a desperate gamble, or rather, he is forcing his dependents to do so.

Why Proposals are Declined.

As all his relations may lead a totally different life, it is impossible for him to feel sure about their own constitutions, however confident he may feel about his own.

As magnitude is always relative, I do not propose to argue the point that there are not many people, out of the many millions there are in the world, who do contract any dreadful disease. The fact remains, that every life office reckons with family history and many proposals are declined because a near relative is suffering from some serious malady.

Why the Exception?

I strongly recommend those men, who are not only uninsured, but also inadequately insured, to devote one solitary hour of their leisure towards discovering what real grounds they have for their dilatoriness. Let them frame up their own balance sheet, and they will be astonished to find what they have spent every month on luxuries, not necessities. Then let them reduce their expenditure on luxuries by one-third and put that amount into a life policy before it is too late. Most of us dote on buying a certainty—why make life assurance the exception?

MACDONALD COMPANY PASSES DIVIDEND

The following official statement has been issued by the directors of the A. Macdonald Company:—

"The purchasers of the company's preferred shares took delivery of the shares on the instalment dates as arranged up to July, when they asked the company for further time to take up the balance of the $2,100,000 to be issued.

"This the company agreed to, and arranged with the old Macdonald Company for corresponding extensions. The remaining payments due to the old company amount approximately to $790,000, payable in instalments during October, November, December, January and February.

"The balance due from the purchasers of the preferred shares will enable the company to complete these payments. The instalment of $50,000, due October 1st, has been received and will be paid to the old company on that date.

"The relations between this company and the old company are entirely harmonious.

"The auditors' statements for the half year show that the earnings of the company have been quite up to expectations and dividends on the preferred and common shares earned with a surplus.

"While the earnings have been more than sufficient to pay the dividend on the common stock at this time, the directors feel that in view of the general financial conditions, and until the purchasers have taken up the remainder of the preferred shares and completed their payments, no action should be taken on the common dividend. They have, however, declared the regular quarterly dividend on the preferred shares issued.

"The business of the company is progressing satisfactorily, and sales and collections have shown substantial gains over the previous year."

The Finance Department, under the direction of Hon. W. T. White, is making a test of a new method for the sterilization of bank notes.

DETAILS OF CANADIAN PACIFIC REVENUE

Sir Thomas Shaughnessy Gave Many Facts, Probably to Satisfy the German Thirst for More Information

At the annual meeting of the Canadian Pacific Railway this week, Sir Thomas Shaughnessy gave considerably more information than usual regarding the miscellaneous revenue of the company. This was given probably to satisfy, in part at least, the German demand for further information, as expressed in a scathing article in the Frankfurter Zeitung of September 3rd. This influential journal said there were few shares handled in Germany surrounded with so much obscurity as to their real value as shares of the Canadian Pacific Railway. The company's annual report was characterized as imperfect, and complaint was made that it was difficult for the German investor to understand the American audit system. The miscellaneous revenue account was criticized, it being said that investors did not know of what it consisted.

The paper then dealt at length with the company's land holdings, which, it stated, had tickled the imagination of speculators all over the world. It regretted that the company did not deem it necessary to give details of the value of land holdings. The tone of the entire article was such as to be of little help to the price of Canadian Pacific stock.

Fifteen Per Cent. Held in Germany.

Sir Thomas Shaughnessy recently informed *The Monetary Times* that about 15 per cent. of the company's stock is held in Germany and France, the greater part probably in Germany.

Sir Thomas went into very full details at the annual meeting regarding the company's revenue from steamships, hotels, lands and other sources. "Only a very small portion of the earnings of your Atlantic and Pacific steamship lines were during the past few years included in your net revenue," he said, "having been transferred instead to the steamship replacement fund. As this fund now approximates the entire cost of your original Atlantic fleet, it is neither necessary nor desirable to increase it by the acquisition of eighteen steamships with a gross tonnage of 146,361 tons The earnings of these steamships have been utilized in retiring their cost to your company, which now stands at about $2,250,000, included temporarily in advances and investments pending a determination of policy.

Revenue of Two Millions.

"The trans-Pacific steamships, while useful as contributors of traffic to your railway system, have never been particularly profitable, and, indeed, the Atlantic Ocean traffic varies considerably from year to year in volume and value, but I think we may with safety anticipate an annual net revenue of $2,000,000 from the trans-Atlantic and trans-Pacific steamship lines, after making due provision for interest on their cost and for depreciation. The formation of a steamship company to acquire the vessels, whose cost has not been capitalized, to charter or lease those purchased with the proceeds of securities, and to provide means for the construction or purchase from time to time of additional vessels of a suitable type to maintain the character of the fleet, and to strengthen its earning power is receiving some consideration.

Fair Profit from Hotels.

"Most of the company's hotels are yielding a fair return, but some of them, provided as necessary accessories to your tourist traffic during the summer months, are operated at a loss. However, on the whole, your hotel system is reasonably profitable, and hereafter the net profits, which have been used in the past for additions and improvements, will be treated as special income.

"Legacies that come to you with acquired lines, the utilization of some of your coal lands, and other circumstances, have involved you in a number of enterprises that do not ordinarily come within the province of a railway company.

Some of the Miscellaneous Revenue.

"There are your mining, smelting and water power interests of considerable value, as compared with what they cost you, from which your revenue in the current year will be approximately $250,000. Your coal mines at Bankhead, Hosmer and Lethbridge, from which you received in the year upwards of $300,000, and your lumber mill at Bull River, in British Columbia, where ties and timber are manufactured, are for the company's use a doubtful commercial enterprise, excepting in so far as it serves to keep prices within reasonable bounds.

Will Segregate Earnings in Future.

"Railway companies in the United States are required to segregate their railway earnings proper and their income from other sources, and while there is as yet no similar legal requirement in Canada, we have, as you know, recently made such a change in our system of accounting as to practically conform to the practice of other railway companies, but we still include in the earnings of the railway the returns from our commercial telegraph system and our Pacific coast steamships. In the next annual report the revenue from these sources will be treated as 'special income,' and, of course, there will be a corresponding reducing in the gross and net earnings of the railway.

Information as to Prairie Lands.

"Your ownership of 6,287,250 acres of land in Manitoba, Saskatchewan and Alberta, is mentioned in a footnote to the balance sheet, but it plays no part in your accounts excepting when the lands are sold. With established conditions in western Canada and the experience of the last few years there would appear to be no difficulty about determining, with a fair degree of accuracy the present value of this asset. Of course as the lands are disposed of and the country becomes more thickly populated the market value of the remaining areas will naturally tend upwards, but in order to be quite on the safe side, let us adopt a figure that is somewhat below the average of the last few years—namely, $14 an acre. On this basis your unsold lands are worth $88,021,500, but you have spent a large sum on irrigation works in the Calgary district, with the result that 500,000 acres of the irrigable land should bring an average of $25 per acre above the price mentioned, or $12,500,000 additionally.

"The Esquimalt and Nanaimo lands on Vancouver Island and your residuary interest in other lands constituting a portion of your system, will realize at least $7,000,000. Then you have over six hundred townsites, including Vancouver, appraised by the officers of the land department at $21,500,000. The present estimated market value of these lands and townsites still belonging to the company is, therefore, $129,021,500.

Objections to a Land Company.

"Your directors have been considering the desirability of conveying these lands and townsites and other interests to a company in exchange for all its capital stock to be held in your treasury, and taken into the balance sheet with your other assets; but a conveyance of that description has its disadvantages, particularly with reference to the lands, and it is probable that the same end may be accomplished by the creation of an investment fund to be administered by trustees or by officers of the company specially designated. In any event your directors will endeavour, before the next annual report is published to devise some plan for reconstructing the special income account and showing your extraneous assets in more definite and tangible form.

"Meantime while the present policy in dealing with your land sales will remain unchanged, and the proceeds will be conserved as heretofore, it is felt that the cash proceeds of sales in your townsites which, last year amounted to $1,409,747, may, with propriety be taken into special income, to be dealt with as the directors in their discretion deem best."

RAILWAY EARNINGS

The following are the railroad earnings for the first three weeks of September:—

Canadian Pacific Railway

	1913.	1912.	Inc. or dec.
Sept. 7th	$2,496,000	$2,649,000	— $153,000
Sept. 14th	2,462,000	2,667,000	— 205,000
Sept. 21st	2,769,000	2,549,000	+ 220,000

Grand Trunk Railway.

Sept. 7th	$1,099,259	$1,082,457	+ $ 16.802
Sept. 14th	1,144,856	1,110,514	+ 34,342
Sept. 21st	1,134,021	1,101,588	+ 32,433

Canadian Northern Railway

Sept. 7th.........	$ 382,400	$ 376,400	+ $ 6,000
Sept. 14th	398,000	378,300	+ 19.700
Sept. 21st	488,200	390,200	+ 98,000

Temiskaming and Northern Ontario.

Sept. 7th	$ 33.546	$ 30,635	+ $ 2.011
Sept. 14th	34,435	29,597	+ 4,838
Sept. 21st	30,598	29,171	+ 1,427

The Saskatchewan Bridge and Iron Company, a company with a capital of $500,000, which has been operating for nearly two years at Moose Jaw, has started work on the foundations of a new factory to be built at a cost of about $150,000 on the West Industrial site, Medicine Hat.

During the present year the New Brunswick farm settlement board has placed eighty-five men on farms in the province, under the terms of the ready-made-farm scheme. Most of them are from the Old Country and the New England States, although a number of the farms have been sold to sons of native farmers.

BANK BRANCHES OPENED AND CLOSED

During August 21 branches of Canadian chartered banks were opened and 6 closed. The following gives details of the branches opened and closed this year:—

	Opened.	Closed.
January	34	15
February	29	16
March	25	6
April	28	4
May	20	8
June	22	10
July	20	8
August	21	6

Houston's Bank Directory gives the following particulars for August:—

Branches Opened.

Chambly Basin, Que.	Banque d'Hochelaga.
Chandler, Que.	Bank of Nova Scotia.
Edmonton, Alta., West End	Merchants Bank of Canada.
Glacier, B.C.	Union Bank of Canada.
Havana, Cuba, Vedado.	Royal Bank of Canada
Houghton, Sask.	Union Bank of Canada.
Lanoraie, Que.	Banque d'Hochelaga.
La Tuque, Que.	La Banque Nationale.
Montreal, Que., Bourbonniere and Ontario Streets	Union Bank of Canada.
Montreal, Que., Fairmont and St. Lawrence Streets	Union Bank of Canada.
Montreal, Que., St. Catherines and St Christopher Streets	Union Bank of Canada.
Montreal, Que., Windsor Street	Bank of Montreal.
Notre Dame de Grace, Que.	Banque d'Hochelaga.
150 Mile House, B.C.	Bank of British North America.
Point aux Trembles, Que.	Banque d'Hochelaga.
St. Ignace de Loyala, Que.	Banque d'Hochelaga.
St. Flavie Station, Que.	La Banque Nationale.
Santa Clara, Cuba	Royal Bank of Canada
Shaunavon, Sask.	Union Bank of Canada.
Smithers, B.C.	Union Bank of Canada.
Toronto, Ont., Humber Bay	Imperial Bank of Canada.

Branches Closed.

Amqui, Que.	La Banque Nationale.
Clarkes Harbour, N.S.	Bank of Nova Scotia.
Fernie, B.C.	Bank of Hamilton.
Forward, Sask.	Bank of British North America.
Portneuf, Que.	La Banque Nationale.
St. Cuthbert, Que.	La Banque Nationale.

Totals	$195,628,092	$176,975,406	$194,750,761

PERSONAL NOTES

Mr. G. M. Bosworth has resigned the vice-presidency of the Crown Trust Company.

Mr. Percy Robertson, the Toronto insurance broker, has been appointed vice-consul for the Argentine Republic.

Mr. Stanley Henderson, of Vancouver, has been appointed branch manager for British Columbia of the Imperial Life.

Mr. H. Detchen, general manager of the Canadian Credit Men's Trust Association, was tendered a banquet at Calgary by the wholesalers of that city.

Mr. William Smith, managing director of the Western Empire Life Assurance Company, was a recent visitor to *The Monetary Times* head office.

Mr. C. G. McLean has been elected managing director of the Ontario Fire Insurance Company, succeeding Mr. J. E. Rice, resigned. Mr. McLean was secretary of the Western Union Fire before its amalgamation with the Ontario.

Mr. R. S. Waldie has been elected president of the Toronto Paper Company, vice Mr. G. P. Grant, who has resigned. Mr. Waldie has been a director of the company for ten years, and is now managing director.

The late Mr. James Ross, the millionaire railroad builder, is supposed to have been the largest individual shareholder of Canadian Pacific Railway stock. It is understood his outright holding of that stock was in the vicinity of 25,000 shares.

Mr. A. E. Blagdon, for the past eleven years manager of the advertising and purchasing department of the Union Life Assurance Company, Toronto, has accepted a responsible position with the Gendron Manufacturing Company, of Toronto.

Mr. T. W. Lawson, late of Messrs. Bicknell, Bain, MacDonell & Strathy, has taken over the Toronto management of Messrs. J. & L. M. Wood. Mr. Lawson's headquarters will be in the offices of the latter company in the Canadian Pacific Railway building.

Mr. R. M. White has resigned his position as manager of the Royal Securities Corporation, Toronto, and is leaving for England to join Sir Max Aitken in London. Mr. Stuart Macfarlane is acting Toronto manager until a successor to Mr. White is appointed.

Mr. J. Kerr Osborne, Toronto, director of the Massey-Harris Company, Limited, has been elected a director of the Canada Accident Assurance Company, in succession to the late Hon. S. C. Wood, the other directors being: S. H. Ewing, president; J. S. N. Dougall, vice-president; the Hon. N. Curry, James McGregor and T. H. Hudson.

Mr. Eugene O'Keefe, Toronto, is dead. He was born in Bandon, County Cork, Ireland, in 1827. In 1832, at the age of five, he came to Canada with his parents, who were well-to-do Irish people, settling in Toronto. He entered the Toronto Savings Bank as a junior clerk, and was still connected with that institution as a director at the time of his death. He was also president of the O'Keefe Brewing Company.

◆

MONEY MARKETS.

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report exchange rates as follows at closing:—

	Between Banks.		
	Buyers.	Sellers.	Counter.
N. Y. funds	1-64 pm.	3-64 pm.	⅛ to ¼
Montreal funds	10c. dis.	par.	⅛ to ¼
Sterling—60 days	8⅜	8 7-16	8 11-16-8 13-16
do. demand	9⅜	9 13-32	9⅝ to 9¾
Cable transfers	9 15-32	9½	9¾ to 9⅞
Rates in New York:		Actual.	Posted.
Sterling, 60 days' sight		481.80	483
do. demand		480.10	487

◆

The lists in London for the issue of $4,500,000 five per cent. bonds of the Bell Telephone Company of Canada were closed within a few hours, the subscriptions having been on a large scale. The bonds were quoted at a small premium later in the day.

As a result of negotiations between the Canadian Government and Lloyds concerning the lowering of insurance rates for shipping on the St. Lawrence route, arrangements have been completed for a more thorough and complete system of telegraphing the arrival and departure of vessels in the Maritime Provinces and Quebec will go into force.

CANADA'S SEPTEMBER FIRE LOSSES

Total for Month is Smaller, But Amounts to Nearly One and a Half Million Dollars

The Monetary Times' estimate of Canada's fire loss during September amounted to $1,468,324, compared with August loss of $3,034,775, and $883,949 for the corresponding period of last year. The following is the estimate for the September losses:—

Fires exceeding $10,000	$1,013,000
Small fires	264,260
Estimates for unreported fires	191,064
	$1,468,324

The following are the monthly totals of the losses by fire during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
January	$ 1,275,246	$ 2,250,550	$ 3,002,650	$ 3,913,385
February	750,625	941,945	1,640,153	2,037,386
March	1,076,253	852,380	2,261,414	1,710,756
April	1,717,237	1,317,900	1,355,055	1,470,622
May	2,735,536	2,564,500	2,251,815	2,123,868
June	1,500,000	1,151,150	4,229,412	3,069,446
July	6,386,674	5,384,300	1,741,371	2,579,698
August	1,667,270	920,000	1,164,760	3,034,775
September	894,125	1,123,550	883,949	1,468,324
October	2,195,781	580,750	1,416,218	....
November	1,943,708	1,506,500	1,184,010	....
December	1,444,860	2,866,950	1,769,905	....
	$23,593,315	$21,459,575	$22,900,712	$21,408,260

Large Fires.

The fires at which the loss was estimated at $10,000 and over were:—

Aug. 25—Edmonton, Alta.	Cartage premises	$10,000
Aug. 28—Vercheres, Que.	Yacht	15,000
Aug. 29—Fairbank, Ont.	Hotel	12,000
Aug. 29—London, Ont.	Exhibition buildings	50,000
Sept. 1—Saskatoon, Sask.	Warehouse, etc.	30,000
Sept. 2—Belleville, Ont.	Buildings	15,000
Sept. 2—Montreal, Que.	Warehouse	15,000
Sept. 2—Montreal, Que.	Sheet metal works, etc.	35,000
Sept. 3—Innisfail, Alta.	Buildings	20,000
Sept. 3—Ottawa, Ont.	Business block	33,000
Sept. 3—Strathclair, Man.	Business section	70,000
Sept. 4—Quebec, Que.	Launch	20,000
Sept. 5—Kincardine, Ont.	Grist mill	12,000
Sept. 6—Toronto, Ont.	Pottery plant	15,000
Sept. 7—St. John, N.B.	Hardware store	70,000
Sept. 7—Ottawa, Ont.	Lumber mill	75,000
Sept. 8—Timmins, Ont.	Hotel, etc.	20,000
Sept. 9—Brockville, Ont.	Boathouses, etc.	12,000
Sept. 9—Edmonton, Alta.	Country club	12,000
Sept. 11—Sault Ste. Marie, Ont.	Lumber mill	15,000
Sept. 14—Comber, Ont.	Cooperage	10,000
Sept. 15—North Sydney, N.S.	Warehouse	90,000
Sept. 15—Bobcaygeon, Ont.	Stores, etc.	20,000
Sept. 17—Durham, Ont.	Hardware store, etc.	25,000
Sept. 18—Quebec, Que.	Lumber mill	17,000
Sept. 19—Amherstburg, Ont.	Ice houses, etc.	20,000
Sept. 19—Brooks, Alta.	Business section	25,000
Sept. 22—Perth, Ont.	Felt works	20,000
Sept. 22—Calgary, Alta.	Clothing store	20,000
Sept. 22—Victoria, B.C.	Pottery plant	75,000
Sept. 23—Petitcodiac, N.B.	Stores, etc.	20,000
Sept. 25—Roblin, Ont.	Stores	15,000
Sept. 28—Montreal, Que.	School	100,000

Matches and Defective Stoves Swells Total.

The structures damaged and destroyed included 57 residences, 29 barns and stables, 20 stores, 7 lumber mills, 4 elevators, 4 hotels, 3 halls, 3 warehouses, 3 restaurants, 3 sash and door factories, 3 factories, 3 garages, 2 pottery plants, 2 grist mills, 1 each saw mill, skating rink, bank, church, convent, bottling works, ironworks, foundry, drydock, brickyard.

Of the presumed causes 12 were attributed to matches, 9 incendiary, 9 sparks, 6 lightning, 5 dropped cigarettes and cigars, 4 defective chimneys, 3 overheated stoves, 4 lamp explosion, 3 overheated stove pipes, 3 gasoline, 3 friction, 2 defective wiring, 2 spontaneous combustion, 1 comb fell on stove, 1 oil stove, 1 oil stove exploded, 1 fumigating room, 1 greasy range, 1 rats chewing matches.

There were destroyed 21 horses, 5 cows, 6 sheep, 11 calves, 98 pigs, 195 chickens, 46,975 bushels wheat, 500 bushels oats, 261 tons hay, 60 tons coal, 10 sets harness, 4 cutters, 3 carts, 2 waggons, 30 barrels gasoline, 40 barrels of oil, 2 box cars, 4 freight cars, 5 steamers, 2 grain separators.

Twenty-Seven Deaths Reported.

During September, 27 lost their lives through fire.

The following are the monthly totals compared with 1909, 1910, 1911 and 1912:—

	1909.	1910.	1911.	1912.	1913.
January	16	27	27	27	14
February	8	15	12	11	21
March	16	20	18	24	22
April	18	37	20	15	11
May	21	15	28	18	33
June	16	52	13	6	18
July	4	15	110	9	9
August	17	11	22	16	29
September	10	10	13	6	27
October	26	16	17	21	..
November	34	19	20	22	..
December	33	19	17	28	..
Totals	219	256	317	203	184

The fires at which the fatalities occurred were:—

Cobalt, Ont.	Burning building	2
Montreal, Que.	Burning building	1
Cornwall, Ont.	Set clothing alight	1
Toronto, Ont.	Set clothing alight	1
Belleville, Ont.	Set clothing alight	1
Timmins, Ont.	Burning building	1
Malcomb, N.B.	Set clothing alight	1
Carstairs, Alta.	Burning building	1
Listowel, Ont.	Gasoline explosion	1
Quebec, Que.	Burning building	1
Moose Jaw, Sask.	Pouring coal oil on fire	1
Toronto, Ont.	Lighting fire with coal oil	1
Maud P. O., Sask.	Burning tent	2
Montreal, Que.	Lighting fire with coal oil	1
Windsor, Ont.	Burnt at work	1
Montreal, Que.	Clothing set alight	1
Quebec, Que.	Burning building	9
		27

Provincial Fire Losses.

The fire waste in each province for first nine months of this year has been estimated by *The Monetary Times*, as follows:—

Ontario	$6,667,496
Quebec	3,467,226
Alberta	3,461,861
Manitoba	2,039,337
Saskatchewan	1,915,106
Nova Scotia	1,508,692
New Brunswick	1,034,580
British Columbia	862,896
Prince Edward Island	451,066
	$21,408,260

◆

CHANGES IN THE RIMOUSKI INSURANCE COMPANY

The control of the Rimouski Fire Insurance Company, which was established in 1876, has been purchased again by citizens of Rimouski. This company has had a rather unfortunate career. While its loss ratio has been fair, managerial efficiency seems to have been lacking to some extent. Now, the entire stock of the company has changed hands, and Messrs. A. M. Tessier, M.P.P., J. A. Talbot, G. A. Theberge, N. Bernier and A. Audet have become associated with the company as directors. Mr. Bernier is president, Mr. Talbot, vice-president, and Mr. Audet, general manager. In future, the various provincial officers of the company will report direct to the head office at Rimouski.

Mr. W. Walker will be provincial manager for Ontario. He is a well-known and capable insurance man, formerly in charge of the Ontario business of the Hudson Bay Insurance Company. He acts also as secretary of the Ontario Fire Prevention Association. Mr. Walker will examine carefully the company's business in Ontario, which totals about $150,000. This may be reduced in order to improve the standard of the business. Under Mr. Walker's management in Ontario, the Rimouski should prosper.

The Quebec provincial business of the company will be conducted as in the past, from the head office. The company has done well in that province. The directorate is a substantial one, and the changes effected should mean a new and better era for the Rimouski Fire Insurance Company.

WANT COMMISSION TO SELL BONDS

The finance committee of the Calgary city council and the finance committee of the school board, meeting jointly, decided to recommend to their respective bodies that an effort be made to procure legislation making provision for the control and sale of all city and school district securities through the medium of a commission, the majority of the members of which will be independent of either the council or school board.

◆

REFUSED HALIFAX TRAMWAY'S REQUEST

The Board of Commissioners of Public Utilities at Halifax refused to grant the application of the Halifax Electric Tramway Company to issue $600,000 of new capital. Leave was given to amend the application and present it at a later date. The board declared that while reluctant to hamper the financing of any public utility, they find that in the present case it has not information enough to satisfy it as to the propriety of the proposed scheme. The board decided against the city solicitor's contention that the company had no right to pay off its bonds by issue of shares, but should provide for the liquidation of bonds by a new issue.

◆

UNITED STATES COMPANY STARTS CANADIAN PLANT

The Buffalo Union Forge Company has found a considerable market in Canada for its product, and two years ago decided to establish a plant in Canada to supply this trade. The plant was commenced about a year ago under the corporation name of the Canadian Furnace Company, and Messrs. Baird and Collins, the president and vice-president, invited their Buffalo friends and a number of Canadians to witness the ceremony of lighting the furnace this week. The new plant, which represents an investment of about $1,000,000, is designed to produce 125,000 tons of pig iron per year, is situated conveniently both for land and water shipment at the Lake Erie end of the Welland Canal in Port Colborne, on the opposite side of the canal from the Maple Leaf Milling Company's plant.

◆

LETHBRIDGE'S LIABILITY INSURANCE

Tenders for Lethbridge's liability insurance $200,000 policy were as follows:—

North American Accident Company, by Lethbridge-Weyburn Company, $1.50 per hundred—premium $3,000.

Canadian Railway Accident, by Ives & Stephens, $1.50 per hundred—premium $3,000.

Guardian Accident Insurance Company, by Alberta Loan and Investment Company, $1.35 per hundred—premium $2,700.

Railway Passengers Insurance Company, by Asquith & Lindsey, $1.25 per hundred—premium $2,500.

Employers Liability Insurance Company, by Wilson & Skeith, $1.15 per hundred—premium $2,300.

The contract was awarded to the Alberta Loan and Investment Company.

◆

ENGLISH HOLDERS ASK ABOUT SPANISH RIVER

The financial editor of the London Standard expresses a widespread view when he says that the remarkable drop of 33 points in the shares of Spanish River Pulp and Paper Company calls for a directors' explanation of the drop which puzzles English holders, especially seeing that the company is under the new consolidation, and is apparently earning a considerable surplus over the dividend requirements, says a Montreal Star cable. If the sensational drop is due to the machinations of a bear group, the Standard asks why this security was selected for attack.

In Toronto, it is said, unofficially, that arrangements for the sale of an issue of short-term notes in London has been made. It is stated that as part of the arrangement the company will defer its preferred stock dividend until such time as the notes can be retired.

The London Daily Mail refers to the recent sensational dip in Spanish River shares as a Canadian collapse, and points out that coming without a word of explanation from the directors is creating a bad impression. An official statement, the paper adds, would not be out of place.

The London Daily Chronicle joins other journals in declaring that the fall of 25 points in Spanish River preference since September is one that makes an official statement necessary.

EFFECT OF THE PANAMA CANAL

Mr. William H. Avery, the English shipping expert, who has recently returned from Panama, says the effect of the Canal's opening will be detrimental to the railroads for the first five years.

There is likely to be a great diversion of emigrant traffic from Europe to the western coast of North America, and immense areas now sparsely populated will become far more closely settled.

He does not believe any passenger route from Europe to the Far East will be transferred from Suez to Panama, as that would mean missing the valuable Indian trade.

◆

PROGRESS OF THE GRAND TRUNK PACIFIC

At the adjourned annual meeting of the Grand Trunk Pacific Railway Company, the following directors were elected:—Alfred W. Smithers, Sir Henry Mather Jackson, Bt., John A. Clutton-Brock, Rt. Hon. Lord Welby, K.C.B.; E. J. Chamberlin, Wm. Wainwright, M. M. Reynolds, Howard G. Kelley, W. H. Biggar, E. B. Greenshields, Hon. R. Dandurand, Wm. M. Macpherson, Hon. Geo. A. Cox, E. R. Wood and J. R. Booth.

The construction of the main line to the Pacific has now reached mile 1204 west of Winnipeg, and from Prince Rupert eastward the construction has reached mile 305, leaving a section of 236 miles in British Columbia, on which the grade is to be completed and the track laid when the steel will be connected through to the Pacific Ocean. This work is being rushed forward vigorously, and it is expected that the last spike in the construction of the main line will be driven at some point in British Columbia probably within the next nine months. After this is accomplished, considerable work will still remain to be done along the line to put it in suitable condition for daily train service. As the line is nearing completion interest in the undeveloped country through which it runs, particularly in British Columbia, is increasing.

◆

CANADIAN COAL AND COKE COMPANY

Pursuant to the resolutions passed by the shareholders and bondholders of the Western Coal and Coke Company, the Pacific Pass Coal Fields, the St. Albert Collieries, and the Lethbridge Collieries, the properties of these companies have now been vested in the Canadian Coal and Coke Company.

The authorized capital of the Canadian Coal and Coke Company is $15,000,000 divided into $4,000,000 preferred and $11,000,000 common. Of this amount about $3,750,000 of preferred has been issued and between nine and ten million of common, the balance of the issue being retained in the treasury.

The Canadian Coal and Coke Company has authorized an issue of three millions of bonds, two millions to be presently issued. The proceeds of these bonds will be appropriated to discharging certain current liabilities incurred by the companies above-mentioned in carrying through their development work, and the balance for completing the development and equipment of the properties and for working capital.

Negotiations in reference to the placing of the bonds are in progress.

◆

BANKERS' ASSOCIATION OFFICERS

The following officers were elected at the Canadian Bankers' Association at Winnipeg:—

Honorary presidents—George W. Hague, Montreal; Sir Edmund Walker, president Canadian Bank of Commerce, Toronto; R. B. Angus, president Bank of Montreal, Montreal; Duncan Coulson, president Bank of Toronto, Toronto.

President—D. R. Wilkie, president Imperial Bank, Toronto,

Vice-presidents—George Burn, vice-president Bank of Ottawa; Alexander Laird, general manager Bank of Commerce, Toronto; E. L. Pease, general manager Royal Bank, Montreal; H. V. Meredith, general manager Bank of Montreal.

The following, all of whom are general managers, form the new executive council: E. F. Hebden, Merchants Bank, Montreal; F. T. How, Bank of Toronto, Toronto; B. B. Stevenson, Quebec Bank, Montreal; James Elliot, Molsons Bank, Montreal; N. Lavoie, La Banque Nationale, Quebec; W. P. Schofield, Standard Bank, Toronto; C. A. Bogert, Dominion Bank, Toronto; G. H. Balfour, Union Bank, Winnipeg; H. A. Richardson, Bank of Nova Scotia, Toronto; T. Bienvenu, La Banque Provinciale du Canada; Senator Mason, Home Bank of Canada, Toronto; H. B. McKenzie, Bank of British North America, Montreal.

INTEREST IN BRITISH COLUMBIA'S MINERALS

Difficulties of Settlers—Coasting Shipping Trade—Capital and Mineral Deposits

(Staff Correspondence.)

Vancouver, September 29th, 1913.

The effect of general conditions on railway contracting is instanced in the figures for the construction of the section of 40 miles through the Hope mountains. This section will be used jointly by the Great Northern and the Canadian Pacific Railway, the latter operating under the Kettle Valley charter. Time was when big contractors got 95 cents a yard for certain material, but now the figure is 65 cents. It can hardly be that labor is that much cheaper, but methods are much more economical and engineers have eliminated much wasted time and energy. An engineer remarked that the tender for the construction submitted by the successful firm was a revelation to contractors on the Pacific coast.

Agricultural Credits.

Credit for agriculturists is taking up the attention of the Vancouver board of trade. It is realized that something substantial has to be done if settlement of land is to be encouraged. Cost of clearing is high, transportation is expensive and if fruit crops are relied on, these are not available until five years after getting a start. Information secured by the board of trade will supplement that gathered by the agricultural commission, though how relief or assistance is to be given is difficult to see at present, unless the federal government takes the matter in hand.

Expansion on the coast is indicated further by the decision of the White Pass and Yukon Railway Company to put on two steamers between Seattle, Victoria and Vancouver in the south and Skagway in the north. Not only that, but the railway itself is to be extended toward the scene of the new strike at Shushanna along the White River. Development is taking place slowly in the north, and in addition tourist travel to Alaska is a feature of summer steamship traffic.

Capital and Succession Mining.

Several mining properties that are good propositions, have been held at such a high figure that capital has not been available. The practice has been to ask a big payment down for a property that has been developed very little, in fact where the basic ore body has not been revealed. It was not that the prospector got the benefit, but often middlemen took hold and tried to effect a sale. They could not see that capital did not care to become interested where there had not been enough development to show what was below the surface. With money scarcer, the inclination now is to accept something of the terms of the man who has to take the chance. One of the delays in the recent sale of the Voight claims in the Similkameen was the initial payment and the terms, but the purchasing company was given a chance with the result that the deal went through and extensive operations will be conducted. Recently, ***The Monetary Times*** **has** heard of one or two instances where owners are willing to consider something else besides a large initial haul, and are willing to take a chance with the company who will put up the money to prove the proposition. This will mean that more capital will come into this province for development of mining properties. That there is good money to be made is shown by the successful operations in every part of British Columbia, from the west coast of Vancouver Island to Fernie, and from the southern boundary to beyond Prince Rupert and Hazelton.

MONTREAL FIRE ENQUIRY

The cause of two Montreal fires was enquired into in the fire commissioners' Court, presided over by Commissioner Ritchie, but the evidence did not throw any light on the cases. At the investigation into a fire which broke out at Mr. S. Gordon's furniture store, 604 St. Lawrence Boulevard, on September 17th, at 1.44 a.m., Mr. Gordon testified that the blaze originated in the cellar, but in which portion of it he could not tell. He and Mr. Max Rosenthal, his bookkeeper, left the store at 11 p.m. on the night preceding the fire. Gordon stated he did not go down into the cellar between 6 and 11 p.m., but said that his bookkeeper did. The value of his stock was $12.000, which was insured in several companies for the total amount of $6.000. He testified that he was indebted to different furniture manufacturers for from $3.000 to $4,000, and that the loss by fire amounted approximately to the same figure.

No cause could be assigned for the fire which broke out on September 23rd, in the grocery store of Mrs. Alice Robillard, at 493 Laniel Street.

REVIEW OF THE MONTH

Canadian Flotations in London—Investment Offerings Dividend Changes—New Stock Exchange Listings

SPECULATIVE AND INVESTMENT OFFERINGS

The following offerings were among those made in Canada during September:—

J. Walter Cage Realty Company, Incorporated.—Offering of $100,000 first mortgage collateral 6 per cent. gold bonds, payable in 5, 10 or 20 years.

Marcus Loew's Theatres, Limited.—Offering $1,750,000, 7 per cent. cumulative preferred stock at par, with bonus of 25 per cent. common stock.

SEPTEMBER DIVIDEND CHANGES.

McKinley-Darragh-Savage Mines Company, of Cobalt, Limited.—Directors reduce the extra dividend declared each quarter, from 7 per cent, to 3 per cent. Regular quarter's dividend of 3 per cent. declared. Both dividends payable October 1 to holders of record September 1.

Lake of the Woods.—2 per cent. bonus on common stock declared.

CANADIAN FLOTATIONS IN LONDON IN SEPTEMBER.

The following flotations of interest to Canadians were made in London during September:—

City of Edmonton.—£900,000 5 per cent. loan.

City of Ottawa.—£189,600 4½ per cent. debentures, at 98½, repayable at par by series, between 1932 and 1953.

Northwest Corporation.—Capital of $7,500,000. Klondike gold mining company. Prospectus issued for public information only.

Dominion of Canada.—£3,000,000 4 per cent. Dominion stock at 99.

NEW STOCK EXCHANGE LISTINGS.

Nine thousand additional shares common stock of the Spanish River Pulp and Paper Mills were listed on the Montreal Exchange on September 2nd.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt station for the week ended September 26th, 1913:—Hudson Bay Mines, 61,093; La Rose Mines, 109,476; Cobalt Lake Mines, 20,093; McKinley-Darragh-Savage Mines, 213,744; Cobalt Townsite Mines, 91,914; Nipissing Mines, 353,497; Timiskaming Mines, 249,139; total, 1,098,956. The total shipments since January 1st are now 29,599,692 pounds or 14,794 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

LETHBRIDGE BOND DEAL OFF.

Because the Lethbridge city council disagreed with the proviso of the Bank of Montreal in connection with the bond deal, whereby the Dominion Securities Corporation was to buy $150,000 of the bond issue and take a two months' option on the remainder, the council decided to cancel the deal. The city owes the Bank of Montreal $70,000 approximately on capital account. Before closing the deal with the Dominion Securities Corporation, they asked the Bank of Montreal if it would allow the city to apply the whole proceeds from the $150,000 sale against notes now outstanding against the city. The answer was that the bank would allow the city half the proceeds, but would require, in return for this, that all the unsold portion of the $520,000 bond issue be hypothecated to that concern.

FOX FARMING IN PRINCE EDWARD ISLAND

It Gives the Investor Plenty of Risk For His Money—Pups Sold Before They See Daylight—Some Details of the Industry

Written for *The Monetary Times* by J. A. MACDONALD

Reports on black fox breeding in Prince Edward Island, have appeared frequently in the newspapers, so that people are not unfamiliar with this industry in the garden province, nor of the profits that are being made by fox-breeders.

The silver black fox industry will bring $6,500,000 to the ranchers of Prince Edward Island this year. Orders for 650 pairs of these particular breed of foxes have been received at an average price of $12,000 per pair. The breeding season of 1913 indicates that the harvest was a little below expectations. There are now over one hundred and twenty registered companies doing business with a capital of more than $7,000,000 and between fifty and sixty private partnerships capitalized at $1,000,000, and a total of $8,000.000 invested in the industry, of this amount two-thirds is Island capital, over $4,500,000 having been withdrawn by farmers and others from the Government Savings Bank, where it was bringing 3 per cent. interest, for fox investment. The lure of this investment has proved strong, it being the exception to find anyone of any importance in the Island who is not financially interested, one way or another, in foxes.

Wealth to the Square Mile.

Since the advent of the first settlers, a century and a half ago, the Island was noted for as a land of a happy medium, where there was neither riches nor poverty. It has now more apparent wealth to the square mile than any other province or state in the North American Continent.

Farmers are now more interested in the various breeds, colors and stripes of black, blue and silver foxes than they are in cattle, horses, swine or sheep. Nearly every Islander can expatiate on the values and breeding of these Reynards. In my own locality, the more substantial farmers are attending less to the dairy and the hog and going into black fox breeding. A neighbor found a fine litter of six young pups in his ranch one morning last May. Those who are not in the fox breeding business are living in envy of those that are, and are bewailing their financial inability to enter the business. It takes ten thousand dollars to twenty thousand dollars to make a start with only one pair of breeders.

Ten, fifteen or twenty farmers form a company, each putting in some capital. Those who have money in the savings bank withdraw it, and those who haven't, mortgage their farms, if necessary, to enable them to put up the necessary capital. They engage an expert keeper as caretaker, lay out a ranch or fox-yard which does not cost much, purchase a pair or two pairs, and start business. Many other companies are started by speculators, who form a company and sell the stock. Some of these companies sell stock indirectly guaranteeing a dividend in the coming fall, of 30 to 40 per cent. The writer was tacitly guaranteed 38 per cent. one day this summer, in shares of a fox company payable this fall when the young foxes would be fairly matured. There must be some "wild cats" among these companies.

Comparatively New Industry.

It is ony about three years and a half since the Islanders began to work this business. A few men were in the fox breeding industry—not more than half a dozen—since about twenty years ago, but those people were wise, and while they were making fortunes, they kept their operations secret. In fact, many scientists and naturalists declared that herding foxes in captivity was an impossibility. The pioneers in the fox business, while working quietly, had the disadvantage of inexperience. All the systems and plans of enclosure for breeding in general use to-day, are the outcome of the labors, desires and the "school of experience," of two or three men. The men of to-day who enter upon fox-ranching with such optimistic spirits probably fail to realize the debt they are in to those pioneers for their original designs which solved the problem of isolation, privacy and freedom to the foxes, with at the same time ready access and control, to the ranchmen.

Orders have poured in to the ranchmen, in such numbers that the existing ranches cannot accept them, and already this season, orders for some three hundred pairs of silver black foxes, at $12,500 and as high, lately, as $20,000 a pair, are going begging. Nowhere else, apparently, can foxes with the same quality of pelts be bred. Further north the wool predominates at the expense of the hairs; further south, the hair, at the expense of the wool, only on the Island appear to be the right conditions.

A fox ranch may be from half an acre to five acres in wooded land. The area to be enclosed is first stockaded with a fence ten feet high of special woven wire with an inner fence, as shelf, two feet wide on top. The fence is sunk about two feet in a trench in the ground and another shelf of two feet width at the bottom, so the foxes can neither escape by climbing over the top or burrowing underneath. Inside this are the kennels, roomy structures, one for each pair, and in the kennels the den or lair, where the foxes sleep and make their nests.

The cost of maintaining a pair of foxes is not more than twenty dollars per year, formerly it was only seven to ten, but with the prosperity of the industry, the cost of foodstuff has increased. The principal food given the foxes is any carcass of an animal that has come to its end by disease, a horse killed through accident, old hens, and dead chickens and such like feeds. Day-old calves and old hens are finding a ready market just now at the fox-ranches.

The real pioneer of the industry, Hon. Charles Dalton, worth now, it is said, close on two millions, and now also a member of the House of Assembly, declared in a recent speech in the legislature, that the present rate of profits was good for at least a quarter of a century, and submitted facts and reasons in support of his statements, and, when the demand for breeding foxes slackens, the industry will continue to be a most remunerative one in supplying the demands of the market for fur, ensuring a good return for the money invested.

The average returns from the sale of young foxes, during the next five years, probably will not be less than $7,000,000 a year. That it will help the Island as a whole I have my doubts. This money will be divided up among a limited number and as Goldsmith says:—"Ill fares the land to hastening ills a prey Where wealth accumulates and men decay."

Prices of Foxes Go Higher.

The price asked for a pair of young breeders appears abnormally high, but the risk demand fully warrants asking anywhere from $12,000 to $20,000 for a pair of silver black foxes by a reliable breeder. Last spring all the pups were sold before any of them ever saw daylight. Options were taken, even before the breeding animals were mated in many cases, for the spring litters.

That the price of foxes is bound to be higher next spring is borne out by the fact that last spring litters were not satisfactory, owing to the warm spell in March and April, when the litters began to come. The dens are made warm on account of the cold winter, and also from the fact that the young foxes have no hair when born. On account of the warmth last spring many of the litters suffocated in the over-warm dens. Breeders, therefore, who sold their litters months before yelping time were unable, in many cases, to "furnish the goods," and must fill the order or sacrifice the options this next spring.

From this it will be seen that breeders will, in many cases, be obliged to fill orders taken last fall, in addition to the demand of the season of 1914,; a breeder, a few weeks ago, refused $50,000 for a pair of proved breeders, two years old, and it seems he was amply justified in doing so. This pair brought a litter of four silver blacks, when a year old, in the spring of 1912, and last spring brought up a litter of five of equal quality. Should this pair bring up a litter of five, maybe six, next spring, the owner has no difficulty in arranging for their sale now, as any time, for between $30,000 and $40,000, while the parent foxes will then be only three years old, just in their prime.

Effect of Crossing Breeds.

What effect the importations of cross and patched foxes from North Western Canada will have is not yet known. The original breeders, however, are preparing for untoward circumstances by forming a silver black fox association and listing the animals. The local government is also making every endeavour to protect the native silver black and keep it distinct from the nondescript breeding stock of which so many have been imported to the Island this past spring and summer.

Fox-stock appears to sell readily, none so far has been offered below par as the price asked per share.

The Island black fox will always be valuable for its fur. A case in point, Mr. Dyner, of Kildare, Prince County, lost an eight-month old fox by sickness in March. He skinned it immediately and shipped the skin to London. He was agreeably surprised to find that the skin fetched £540 on the London market, and a skin is never so valuable even in health, in the month of March, as it is in the late fall, in December.

FINANCES OF LUMBER ENTERPRISES

Troubles From World-Wide Financial Factors—Some Lessons Learned

That a certain amount of trouble exists in the Canadian lumber industry is evident from the fact that the vice-president of the Canadian Western Lumber Company has recently cabled to London that the trade "has taken a most unsatisfactory turn in consequence of monetary stringency in Canada"; while it is within the recollection of many people that more than one company has recently had to undergo the painful process of reconstruction. From this it has been inferred that the lumber trade itself is passing through a crisis. So far from this being the case, however, the truth is that prices are high and demand good, so that those companies whose affairs are in good order are doing an excellent business and are making money fast, says the Canadian Gazette. Such trouble as does exist is partly due to adverse money market developments, which have severely inconvenienced commercial enterprises of every class in the Dominion in any way dependent upon banking assistance for the carrying on of their operations, although in some instances the strangling effects of over-capitalization are most pronounced. Not only have the big financial institutions refrained from making fresh advances, but loans which have been outstanding for a long time have been called in, and it is this circumstance which has created such an atmosphere of depression in the market for the capital issues of lumber companies as a whole. In the sharp decline which has recently taken place in the prices of the capital issues relating to this industry very little discrimination has been shown, and with few exceptions the bonds of sound undertakings have suffered almost as much as those of companies less favorably situated.

Capitalization on Erroneous Basis.

Probably few industries have in their infancy been made the happy hunting-ground of promoters to such an extent as was the lumber trade, and, as is well known, many of the companies were capitalized at the outset on an entirely erroneous basis. They were tied to the banks from the moment of their inception, and their indebtedness has in not a few cases tended to increase rather than otherwise. They have traded up to the last dollar of their credit; consequently, when the blighting influence of dear money made itself felt it became necessary to adopt drastic measures to meet the situation. The fact that only some three or four of these undertakings have had to resort to reconstruction is, we think, a favorable point, and while the fact that even this number of concerns have had to admit their weakness has created a feeling of suspicion towards the entire industry on the part of investors, we believe that it will emerge successfully from the ordeal with which it is now faced.

Prevent Speculative Promotions.

The immediate effect of the financial stringency throughout the Dominion has been to curtail the volume of operations on the part of many lumber companies, and there is likely to be a noticeable decline in the volume of sales for some little time to come. This, however, will tend to advance prices, and may prove to be no bad thing in the end. Moreover, the bitter experience of those concerns whose finance has been faulty, has taught a lesson not only to those who were responsible for the flotation of such companies, but also to investors regarding the necessity for inquiring very closely into the financial methods of each individual member of the industry, which will be all to the good in the future, and should prevent any further speculative promotions hereafter

NEW LIFE COMPANY ORGANIZING

The Vancouver Life Insurance Company, with capital of $1,000,000 is organizing, and will hold their first general meeting within the next two months. The head office is in Vancouver.

SOLD TO UNITED STATES BOND HOUSES.

Hanley, Sask., which for some months has attempted to dispose of $15,000 6 per cent. debentures, has sold them to an American banking firm at 90. The debentures bore accrued interest amounting to $700. The debentures were offered 18 months ago, but defects in the town by-law prevented the sale until after a time when the demand for debentures had slackened.

The fourth block of Sault Ste. Marie debentures for this year were sold to Messrs. Spitzer, Roorick and Company, of Toledo, Ohio. The debentures total $48,000 and were sold at 91, bearing 5 per cent.

UNITED STATES TARIFF AND CANADA

Large Increases in Canadian Exports Are Said to be Expected

According to an Ottawa dispatch to New York large increases in exports to the United States of the principal Canadian commodities affected by the United States tariff bill are confidently expected by the Department of Trade and Commerce and Customs.

There are signs that in all the lines of production to be affected by the new tariff extensive preparations are being made to take the fullest advantage of the changes. This is especially noticeable in live stock, meats, hay, coal, fish, and in some lines of manufactures. The trade figures for the first five months of the fiscal year—up to September 1st—are out to-day and they show great increases. Canadian exports during August broke all records. Total imports and exports for August were $97,742,581, a gain of nearly $8,000,000 over August, 1912. Exports of agricultural products in August—nearly all to the United States—were $18,000,000, a gain of $5,000,000 over August last year, while the total exports for August—mostly to the United States—were $64,000,000, a gain of $9,000,000 over August, 1912. For the five months' period ended August 31st, the total of imports and exports was $456,723,167, compared with $418,658,748 for the same period last year.

Buyers Are in Evidence.

United States and Canadian buyers of live stock, hay and other agricultural products for export to the States are much in evidence throughout Ontario, Quebec and the other Eastern provinces. Cattle and hay buyers are specially active for exports to the Buffalo, New York and Boston markets. Practically all available live stock has been bought up for shipment to these markets after the enactment of the bill.

The reduction of the hay duty from $4 to $2 a ton has stimulated buying. Lumber activities are noticeable. In the maritime provinces of New Brunswick and Nova Scotia a revival of selling to the New England States, especially of fish, lumber, coal and agricultural products, is, foreshadowed by present activities.

A New York Opinion.

Commenting upon the new tariff of the United States and trade with Canada, the New York Journal of Commerce says:—"By every lessening of obstacles which add to cost, trade between the United States and Canada will be increased in volume and in value to the benefit of both countries. Free trade between them would be as certainly advantageous as it is between the Eastern and Western or Northern and Southern sections of the United States, or the Eastern and Western provinces of Canada. Every step in that direction will tend to demonstrate the fact and will afford a lesson in favor of tariffs confined to the purpose of raising revenue, and adjusted to accomplish that purpose with the least hindrance to desirable trade."

LAKE SUPERIOR'S NEW PLANT.

Operations have been started on the construction of a new ore-roasting plant by the Lake Superior Corporation at a cost of $50,000.

In this plant experiments will be made with the siderite ore now being mined at the Helen Mine and Magpie Mine.

Siderite is too high in sulphur to be used economically, and the object of this roasting plant is to find a means of eliminating the sulphur.

Experiments along the same line have been conducted at the Helen Mine and satisfactory results obtained.

WESTERN CANADA ACCIDENT COMPANY

At a recent meeting of the Western Canada Accident and Guarantee Insurance Company, Winnipeg, the following directors were added to the board, namely: Hon D. C. Cameron, Lieutenant-Governor of Manitoba; A. C. Bulling, managing director of Stobart, Sons and Company; A. E. Mott, manager of the Cockshutt Plow Company; James McDiarmid, president of the J. McDiarmid Company, Limited; J. A. Marion, alderman of the city of St. Boniface, and H. A. Mullins, ex-M.P.P. The directors elected officers as follows: President, Edward Brown; vice-president, Edward Cass; medical referee, T. M. Milroy, M.D.. The directorate consists of:—Edward Brown, Edward Cass, T. M. Milroy, M.D.; Hon. D. C. Cameron, A. C. Bulling, R. M. Matheson, H. A. Mullins, A. E. Mott, James McDiarmid, J. A. Marion and H. H. Cottingham.

CANADIAN FRUITS IN BRITAIN

Trade Commissioner Suggests Missionary Work Would Benefit Canadian Exporters

"With regard to peaches, as far as England is concerned, this is a fancy trade, the fruit being grown under glass. There is a common peach shipped here from America grown outdoor in California and Washington. Some of these were on the market last week, boxes containing 64 to 72 fruits, and they realized from 3s. to 3s. 3d. The peach has yet to be popularized in England," suggests Messrs. W. Dennis and Sons, Limited, in a weekly report dealing with the British fruit trade. "At the prices we have just quoted, they go readily into consumption. We had a consignment last year from Wenatchee and Yakima in Washington, same variety Elbertas, and they made from 3s. 3d. to 3s. 6d. for boxes of 64 to 72 fruits. It all depends what the Canadian fruit is like, of course."

In case Messrs. Dennis' modest valuation should disappoint Canadian visitors who have had the privilege of paying the fancy prices demanded in this country for peaches by fruiterers, says Mr. Harrison Watson, Canadian trade commissioner at London, it should be borne in mind that at least as far as London is concerned, the Canadian peach would not in any way come into competition with the English artificially cultivated peach. The Canadian variety, while possessing most excellent qualities, differs altogether in appearance, size and flavor, from the English hothouse peach which, selling at prices varying from 12½ to 50 cents—according to season—is consumed only by the wealthy classes, and is, owing to its price, practically unknown to the great mass of the population.

Some Missionary Work Necessary.

Although the habit of fruit eating in the United Kingdom generally has developed enormously during the past decade, cheapness has been an all-important factor in this increased consumption, and even in the case of an inexpensive article like the banana, a great deal of missionary work had to be undertaken in order to combat the inherent conservative prejudices of the people.

There is good reason to believe, however, that if Canadian peaches can be laid down here at prices which will bring them within the reach of the masses, they would share the popularity of the banana and apple. As Messrs. W. Dennis & Sons, Limited, state, however, the Canadian peach is practically a novelty at present, and the development of the business will require the same careful study and enterprise which has resulted in the Canadian apple becoming so universally popular in this country.

Pears Would be in Demand.

The commissioner adds: "Another well known firm which handle large quantities of Canadian apples, mainly from Nova Scotia, state that they might be able to handle Canadian pears, and 'there is no doubt that there will be a good demand for good stuff if it carries sound. During the past season we had many thousands of cases and trays of Australian pears which arrived in very fine condition, but, of course, these were pre-cooled and carried in cold store.'

"As a representative of this latter firm is visiting Canada, his company have cabled out to him to look specially into the pear question, and Mr. Harrison has recommended that he might advantageously get into touch with the fruit division of the department of agriculture in order to obtain the most recent information and get into touch with shippers of pears seeking export trade."

CHARGE OF ONTARIO'S WATER POWERS

"In view of the comprehensive schemes outlined by the Dominion Government for the creation and improvement of waterways in connection with the St. Lawrence River, Welland Canal, French River, Sault Ste. Marie, Trent, Ottawa, and others, involving a large expenditure of public money, and in view of the extensive power developments which are possible in consequence thereof, also in view of the rapidly increasing power requirements of the province, be it resolved that this association request the Dominion Government to put all such water powers under the jurisdiction of the Hydro-electric Power Commission of Ontario, to be developed by them for the use of the municipalities of the province for the benefit of the people." This is a resolution of the Ontario Municipal Association.

◆

Mr. J. J. Stewart, for many years accountant of the Merchants Bank, Galt, has been transferred to Hamilton to manage a new branch of the institution in that city.

SHOULD INCREASE TRADE WITH INDIES

Fast Steamship Service Arranged and Cable Rate Halved

Arrangements have been completed with the Royal Mail Steampacket Company for a fast steamship service between the British West Indies and Halifax and St. John, commencing November 1st. Negotiations have been terminated with the cable companies by which the rate between Canada and the British West Indies will be cut in two.

When the agreement was made with the West Indian Islands for a preferential interchange it was understood that arrangements were to be made for cheaper cable communication with Canada and for more adequate steamship service. Without these the agreement was of little value. Both these have now been arranged by Hon. Mr. Foster, Minister of Trade, and Canadian exporters will be able to take full advantage of the new tariff rates.

Five Years' Service.

The shipping arrangement is for a five years' service running from St. John and Halifax to the various colonies included in the trade agreement. Four vessels are to be devoted to the service and these are in every respect modern and well equipped for both freight and passengers, capable of carrying 5,000 tons and maintaining an average of between 11 and 12 knots at sea. An arrangement has been made by means of which perishable cargo will be taken from St. John to Halifax without increasing the cost, the rate between the two cities to be absorbed by the company.

The Royal Mail Steampacket Company, one of the oldest shipping companies, has been engaged in the West Indian and South American trade for many years, and is experienced in the conditions and necessities of that trade. It has connections with ports in other of the West Indian Islands and with the East and West Coasts of South America, so that it will be possible to make through rates of freight for Canadian goods to other ports than those in the islands included in the agreement.

Cable Rates Cut.

In regard to cheaper cable rates, Mr. Foster has been carrying on negotiations for some time with the cable companies through the British Government, which is equally interested. The present rates are cut in half, and to enable this to be done a contribution of £8,000 is to be made by the home government and a similar amount by Canada.

COST OF PANAMA CANAL

The grand total of Panama Canal cost to May 30 was $295,587,518, including construction and engineering, $182,187,886; sanitation, $16,132,056; civil administration, $6,370,866; and fortification, $2,965,939.

MOVING PICTURE FINANCE

There are eight big concerns in Europe who manufacture the moving picture films, and they supply the larger part of the world, says the Wall Street Journal. The black film is likely to be superseded by the two-color film, and that in time by the three-color, which is now a little in use in Europe, but is being held back in this country until the local parts can be so provided that an opera may be given, with the stage presented in three colors and Caruso and Melba heard in their famous parts with mechanical acoustics. Few people realize that from $250,000 to $350,000 may be invested in making a first picture film. Quo Vadis, it is said, cost $280,000. Then it was manifold into 400 copies of 8,000 feet each and sold at 25 cents a foot, or $800,000. A moving picture is good without translation in every language and has just as good a market in South America and Australia as in France and Germany.

To put the drama of "Atlantis" into moving pictures the makers chartered a steamer of 12,000 tons and sent it to Iceland with a crew and a company of 400 to produce the picture at a cost of $225,000.

To put Forbes-Robertson as Hamlet on the film cost at least ten times what it ever cost to stage any Hamlet that was ever presented. The makers thereof paid $75,000 for the use of a castle and costumed about 400 people therein, making the manufacturing cost $250,000, but they sold 3,000,000 feet of that film for 25 cents a foot. It cost $236,000 to make the "Tiger Hunt," which likewise went from the manufacturers at 25 cents a foot for the film.

QUESTION OF OCEAN FREIGHTS

Chairman Drayton, of Railway Commission, Will Make Report—Rates on Timber

Mr. H. L. Drayton, chairman of the board of Railway Commissioners for Canada, has returned to Ottawa from England, where he went for the purpose of conferring with the British authorities to see if means could be devised to exercise some control over the rates of ocean carriage. Mr. Drayton has nothing to say on his mission until after his report is made to the Dominion Government.

What the Lumbermen Say.

In connection with this matter the secretary of the Canadian Lumbermen's Association, Ottawa, writes to urge the case of the timber trade against the shipping companies. After referring to the fact that the price of timber has been rising of late, he says:—

"We venture to state that the profits timber dealers are making to-day are less than ever before. True, the productive labor put upon such a commodity as wood, tracing it all the way along from the felling of the tree in other lands, has had to be more highly paid in recent years, but this would account for but a portion only of the increase in cost to the ultimate consumer. Where, then, must we look for the balance of the increase? Let us examine the non-productive labor put upon this commodity. Take, for instance, the question of transportation. Railway rates have undoubtedly advanced in recent years, but as the railways are subject to the jurisdiction of Governmental control, no very serious criticism is to be offered on this score. We must admit that our goods rates are based on actual competition. The connecting link, therefore, between the above-mentioned is the ocean boat.

Increase in Ocean Rates.

"During the last three years ocean rates have jumped up tremendously, as the following comparisons for the years 1910 and 1913 on timber alone will show:—

Montreal to	Increase in 1913 over 1910.
Liverpool	54 per cent.
London	50 per cent.
Manchester	50 per cent.
Glasgow	50 per cent.
Avonmouth	41 per cent.
Newcastle-on-Tyne	33⅓ per cent.
Hartlepool	40 per cent.
Leith	25 per cent.
Dublin } Red Pine	47 per cent.
Belfast } Yellow Pine	43 per cent.
Sunderland	37 per cent.
Aberdeen	26 per cent.
Dundee	41 per cent.
Hull	19 per cent.

"It will be noted that the heaviest increases occur to ports between which the largest shipments are made. There is absolutely no control over ocean rates. The owners may demand whatever rates they wish, and, by a pooling of business, which undoubtedly exists, the ultimate consumer has, in the last analysis, to pay this exorbitant toll."

He concludes by calling upon the British Board of Trade to step in, presumably in conjunction with the Dominion Government, to find and apply a remedy for this state of affairs, which he considers consists in "immediate control of ocean rates and of the entire operation of ocean-going craft."

British Government's Attitude.

The general view in England seems to be that the British authorities will move very cautiously in the matter. This view is expressed by the London Financial Times as follows:—"We fancy the Board of Trade will confine its action in this matter to exercising the functions of an advisory body. Interference with private enterprise is a matter fraught with many difficulties and dangers and a policy that it would take a great deal of persuasion to make any British government adopt. But we live in a world of change, and it will be interesting to note the course of Mr. Drayton's negotiations."

◆

The grain storage elevator capacity of Fort William and Port Arthur has now reached 41,935,000 bushels, and ranks second among the cities of the world as a grain storing centre, exceeded only by Chicago, Ill., with elevator capacity of 45,360,000 bushels. With the additional elevators now under construction and others projected at the Canadian head of the lakes, it will only be a matter of twelve or eighteen months before Fort William and Port Arthur will have the distinction of being the largest elevator storage centre in the world.

MAPLE SYRUP AND SUGAR

They Are Not as Free From Deception as Sweetness Might Indicate, Thinks Chief Analyst

While Canada is eating what it is given, Mr. A. McGill, chief analyst at Ottawa, is keeping a watchful eye upon food adulteration. His inspectors have been investigating the sale of maple syrup and maple sugar. They now report upon 128 samples sold as maple syrup during the period, December, 1912, to April, 1913. Of this number 86 samples are found to be genuine, in the sense that they meet standards for the article as legalized by order-in-council. One sample was lost through breakage in transit, and one sample was purchased by mistake. This sample was plainly labelled as "Compound," and should not have been accepted by the inspector.

Many Samples Adulterated.

Three samples are judged as doubtful: the analytical numbers nearly meet the legal requirements; but their character, considered in relation to each other, is such as to justify doubt of genuineness. Thirty-seven samples are adulterated, as failing to meet legal requirements for maple syrup. In several cases vendors have acknowledged that they sold artificial maple syrup, claiming unintentional oversight.

In many other instances the vendor claims to have acted in good faith, believing the article offered to be genuine maple syrup, having been purchased by him as such. Careful examination of the label, or of the form of warranty furnished by the manufacturer would have led him to see his mistake; and yet one cannot but surmise that, in some cases, the careful wording of these labels or guarantees shows a desire on the part of the manufacturer to conceal the real nature of his goods.

While it is conceded that a mixture of maple syrup with cane sugar syrup may be a very desirable and entirely wholesome article, it is due to the producer of the genuine article that we require all mixtures of maple syrup with cane sugar syrup, or other wholesome diluent, to be plainly labelled in such a way that the purchaser shall be made fully aware of the nature of the article supplied to him, says Mr. McGill.

Maple Sugar and Compounds.

The chief analyst also reports on eighty-three samples purchased by his inspectors as maple sugar in December and January last. Forty-seven samples appear to be genuine, as judged by the standards, legalized under order-in-council. The remaining thirty-six samples must be regarded as adulterated, or at least as doubtful. Two samples Mr. McGill has judged as doubtful, on account of the analytical numbers coming very near the minima required by the standards; but the last named has since been acknowledged to be compound.

Many of the vendors have written the chief analyst since the collection was made, conceding that they knew the article offered as maple sugar to be a compound, and saying either that they sold it as such, or that they assumed the purchaser to be aware of the character of the article offered. The inspectors' invoices and reports show all samples to have been received in answer to a demand for maple sugar.

Several samples are called by the manufacturers maple cream sugar, and are invoiced as such to the retailer, who, however, sells them as maple sugar. A glance at the results of analysis of these samples show that they contain no more water than hard sugar, and cannot be regarded in any sense as creams. Nor do they contain milk fat. The introduction of the word "cream" into the name cannot, therefore, be considered as justified.

Attempt to Deceive Purchaser.

There is a substance to be found on the market, commonly known as "maple cream." This is a soft sugar of somewhat the consistence of cream, and is an intermediate product between maple syrup and maple sugar. The article offered as "maple cream sugar" in no way resembles it, and must be held to be a sugar. If the word "cream" has any meaning at all in this connection, it can only be intended to call attention to the superiority of the article, as cream is superior to milk. Regarded in this light, it can only be held as an attempt to deceive the purchaser, thinks Mr. McGill. Another manufacturer claims that his product is not sold as maple sugar, but as M.S. cakes. The same judgment must be passed upon this article.

A mixture of ordinary sugar with maple sugar is a very palatable article, and no ground for complaint can be found for its appearance on the market. But it should be, and must be, plainly declared to be a mixture, or otherwise described in such a way as to prevent deception of buyers.

◆

Pending the reorganization of the Canada Iron Corporation arrangements are being made to continue the various plants in operation.

AUGUST BANK STATEMENT AND CROP MOVEMENT

Shipment of the Western Crop is ahead of Last Year's—Municipal Loans Reduced—Current and Call Loans Increased

---

*Including loans to municipalities.

The above are the principal changes in the statement of the chartered banks during August. Generally speaking they indicate little change in the general financial position so far as the banks are a factor. The principal change is a gain of $6,663,503 in notes in circulation, and an increase of about $10,000,000 in total deposits. Loans to municipalities, an interesting account at present, were reduced during the month by approximately $2,000,000. Current and call loans abroad show small increases, while savings deposits, current and call loans in Canada exhibit declines.

Canadian Loans for a Year.

The following table shows the trend of the Canadian loans accounts for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1912—August	$852,045,624	$75,194,735
September	859,341,193	72,205,261
October	879,676,655	73,959,866
November	874,721,593	70,668,521
December	881,331,981	70,655,661
1913—January	874,705,616	71,376,510
February	882,112,726	71,286,799
March	890,513,446	70,731,030
April	898,964,181	69,757,912
May	898,959,650	69,982,540
June	899,260,009	68,642,377
July	901,550,453	67,991,255
August	899,132,894	67,233,983

Current loans in Canada, which represent, broadly speaking, business credit, were 5.5 per cent. greater last month than a year ago. Municipal loans were included in this account last year and have been added to the August figures so that a proper comparison can be made. Current loans have not fallen below $852,000,000 during the past thirteen months and once, in July last, they exceeded $900,000,000. During August, this account was decreased by 0.2 per cent. Call loans in Canada were about the same in August as in July, but compared with the figures of August, 1912, they show a decline of 1.5 per cent.

Loans Record of Four Years.

The following table shows the expansion of loans at home and abroad, during the past four years:—

August.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1909	$543,154,663	$30,661,437	$56,680,172	$120,659,509
1910	657,813,770	38,609,568	60,427,996	100,447,288
1911	734,683,962	33,689,196	65,106,110	101,713,820
1912	852,045,624	37,846,222	75,194,735	114,847,864
1913	857,822,613	46,339,928	67,233,983	90,041,292

Domestic current loans have increased remarkably during the past few years, having appreciated by more than $300,000,000 in that period. Current loans abroad are $16,000,000 greater than they were four years ago. Call loans in Canada have grown by about $11,000,000 in the same time, but call loans abroad have declined since 1909 by $30,000,000. These figures seem to show that the banks have attended well to the growing demands for legitimate credit.

New York authorities anticipate that there will be further gold shipments from that city to Canada to bring the aggregate up to about $4,000,000 or $5,000,000 on this movement. That would leave about $3,000,000 still to be taken. One explanation of the exports from New York is that they represent a triangular arrangement with London on account of shipments of Canadian wheat in bond largely from United States ports and remittance of the proceeds of Canadian loans placed in London. The demand from exporters until about six weeks ago was for United States wheat, but since then Manitoba wheat has been under-selling the United States product.

The following table shows the course of domestic deposits accounts for the past thirteen months:

	On demand.	After notice.
1912—August	$360,575,425	$643,663,590
September	374,368,917	640,536,652
October	383,814,572	640,097,928
November	376,829,372	635,810,703
December	379,777,219	632,641,346
1913—January	354,518,964	635,000,056
February	349,661,830	630,467,518
March	357,756,659	630,434,708
April	365,340,002	631,160,280
May	364,159,642	630,755,608
June	362,769,928	622,928,969
July	356,585,196	621,347,388
August	358,321,925	619,032,847

Demand deposits are a little less than $2,000,000 greater than in July, 1913, but this account shows a decrease of about the same amount, or 3.4 per cent. compared with August, 1912. After notice deposits were 3.8 per cent. smaller in August than a year ago, and also showed a slight decline compared with the figures of a month ago. These two deposits accounts in August last totalled $977,000,000.

Four Years' Deposits Record.

The deposits record for the past four years is given in the following table compiled by *The Monetary Times*:—

August.	On demand.	After notice.	Total.
1909	$228,397,679	$472,591,818	$700,989,497
1910	256,613,172	545,357,452	801,970,624
1911	311,111,668	575,740,956	886,852,624
1912	360,575,425	643,663,596	1,004,239,021
1913	358,321,925	619,032,847	977,354,772

Total deposits are still $23,000,000 short of $1,000,000,000, which amount, and more, was recorded on several occasions during 1912. A year ago total deposits were $1,004,000,000. Both demand and after notice deposits have exhibited substantial increases during the past four years.

There was a gain of more than $10,000,000 in deposits elsewhere than in Canada. One explanation given for this is the fact that payment of the fourth instalment on the new Canadian Pacific Railway stock fell due during the month.

Municipal loans were reduced during August by about $2,000,000, and the prospects are for further reductions during coming months. These loans are fairly well divided among the various banks, eleven of the banks having loaned over $1,000,000 in this way.

The Sovereign Bank's figures still appear in the statement, although entries are made under only a few columns. This bank has a deposit of $27,320 with the Minister of Finance for the security of note circulation. It holds $1,000,000 of "Railway and other bonds, debentures and stocks." Its total assets are $4,502,535, has notes in circulation of $26,080, and total liabilities of $3,688,830. It will be remembered that a company, International Assets Limited, was formed some time ago to acquire the assets of this bank. Many knotty problems in connection with the bank's affairs have been solved during the past year or so, and the bank will probably be thrown into liquidation in the near future.

Movement of Crop.

Notes in circulation increased during August by $6,000,000. This is the first sign of financing the crop movement. The gain in this account is about $1,000,000 greater than during August, 1912, which is probably due to the fact that the movement of the western crops is much earlier than it was last year. The paid-up capital of the banks is about $3,000,000 larger than a year ago, but circulation is more than $4,000,000 in excess.

T. C. BOVILLE,

Deputy Minister of Finance

NEW INCORPORATIONS.

Large Power Company—Total Number of Companies is Fifty-nine

New incorporations number fifty-nine, the head offices of these companies are located in four provinces. The total capitalization amounts to $12,675,500. The largest companies being as follows:—

Ottawa Car Manufacturing Company, Limited, Ottawa	$3,000,000
Upper St. Lawrence Power Company, Limited, Toronto	3,000,000
Dominion Reduction Company, Limited, Cobalt	2,000,000
Co-Operative Brick Company, Limited, Tillsonburg	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	Number of companies.	Capitalization.
British Columbia	9	$ 900,000
Manitoba	1	100,000
Ontario	27	9,270,000
Quebec	22	2,405,500
Total	59	$12,675,500

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

New Westminster, B.C.—McAllister's, Limited, $250,000.

Penticton, B.C.—H. & K. Cold Store and Trading Company, Limited, $100,000.

Simcoe, Ont.—The Lea's Company, Limited, $40,000. W J. Sutton, L. Sutton, S. B. Sutton.

St. Mary's Ont.—Maxwells Limited, $400,000. Sir George Gibbons, G. S. Gibbons, A. Pelton.

LAKE SUPERIOR CORPORATION

This week the annual meeting of the Lake Superior Corporation was held at Camden, New Jersey. In the absence of Mr. T. J. Drummond, president of the corporation, Mr. Walter K. Whigham was elected chairman, he reported that Mr. Drummond had been ill, for several months past, and on that account he had now tendered his resignation as a director.

The chairman stated that during the year the corporation had lost through death the services and counsel of Mr. Herbert M. Price, of Quebec. He also stated that Mr. J. Tennall Lea, of Philadelphia, who for many years had been vice-president of the corporation, had expressed a wish to be relieved of his duties.

The following were elected directors:—Messrs. W. K. Whigham, London; Frederick McOwen, Philadelphia; Herbert Coppell, John T. Terry, Jos. S. Dale, New York; W. E. Stavert, D. U. Newton, Montreal; Thomas Gibson, Toronto; J. Frater Taylor; and W. C. Franz, Sault Ste. Marie, Ont.; and A. H. Chitty and James Hawson, of Sault Ste. Marie, Ontario.

At the meeting of directors following the stockholders meeting, these officers were elected:—Mr. W. K. Whigham, chairman; Mr. J. Frater Taylor, president; Messrs. Herbert Coppell and W. C. Franz, vice-presidents; Mr. Thomas Gibson, secretary; Mr. Alex. Taylor, assistant secretary; Mr. A. H. Chitty, treasurer.

Plans are being passed for a new building to be erected by the National Trust Company in Montreal on the site now occupied by the trust company on St. James Street, adjoining the Royal Bank Building.

DIVIDENDS AND NOTICES

SHAWINIGAN WATER AND POWER COMPANY.

Notice is hereby given that a quarterly dividend of one and one-half per cent. (1½ per cent.) has been declared on the common capital stock of this company, payable October 20th, to shareholders of record, October 7th.

The transfer books of the Company will be closed from the 7th to the 14th of October, both days inclusive.

By order of the Board,

A. A. MACDONALD,
Assistant Secretary-Treasurer.

One of the most valuable lessons a father can give his son is to teach him the value of a dollar. Most fathers are over-indulgent with their boys in money matters, and by a too generous allowance of pocket money encourage them to form extravagant habits that are the source of endless trouble and worry when the boys become young men.—From Mackintosh's Investment News, published weekly by J. C. Mackintosh & Company, investment bankers, Halifax, St. John, Montreal, Fredericton and New Glasgow.

Financial Post estimates Canadian dividend payments in October, November and December, 1913, as follows: Steam railroads, $15,463,956; industrial corporations, $6,455,498; Government and municipal debentures, $3,810,274; chartered banks, $3,234,254; mines, $2,883,005; Canadian electrics, $2,308,883; light and power, $1,320,325; loan and trust (on stock only), $886,701; telegraph telephone and cable, $721,250; insurance, $216,250; navigation, $200,000. Total, $37,500,396. On securities listed on Canadian exchanges of companies operating abroad, $6,345,526.

LEGAL NOTICES

UPPER ST. LAWRENCE POWER COMPANY, LIMITED

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 19th day of September, 1913, incorporating James Steller Lovell, accountant; William Bain, bookkeeper, and Robert Gowans, John Joseph Dashwood and Joseph Ellis, solicitors' clerks, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz:—(a) To purchase, lease or acquire lands and interests therein and water powers, water rights and privileges and to utilize the dams to generate power, electrical or other energy and to use the same in connection with its business and to transmit the same, and sell, lease or dispose of lands or interests therein or power and to enter into working arrangements with other companies, persons, firms or corporations for the use thereof and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell, transmit, distribute and dispose of electricity, gas or power, light, heat and power; provided always that the rights and privileges hereby conferred upon the company to generate, transmit, sell and dispose of electrical energy for light, heat and power when exercised outside of the property of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (b) To construct, maintain, alter, make, work and operate on the property of the company, and for the purposes of the company, or on property controlled by the company, reservoirs, dams, canals, flumes, race and other ways, water powers, aqueducts, wells, roads, piers, wharfs, buildings, shops, stamping mills and other works and machinery, plant and electrical and other appliances of every description; (c) To subscribe for, purchase or otherwise acquire and hold either as principal or agent and absolutely as owner or by way of collateral security or otherwise, and to sell, exchange, transfer, assign, guarantee or underwrite or otherwise deal in or dispose of the bonds or debentures, stocks, shares or other securities of any electric light or power company or corporation; (d) To assist in the organization, development or management of any corporation or company and to raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise, any electric light or power company or corporation in the capital stock of which the company holds shares, or with which it may have business relations; and to act as employee, agent or manager of any such corporation and to carry on the business thereof and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (e) To acquire by purchase or otherwise and hold lands, water lots, waterfalls, water privileges or concessions and powers and rights and interests therein, and to build upon, develop, irrigate, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell or otherwise deal with or dispose of the same; (f) To construct, execute, own and carry on all descriptions of works which may be necessary or useful for the purposes of the company; (g) To issue and allot as fully paid-up shares of the company hereby incorporated in payment or part payment of any property, movable or immovable, property rights, lease, business, franchise, undertaking, powers, privileges, license, concession, stock, bonds and debentures or other property rights which it may lawfully acquire by virtue of the powers hereby granted, or to pay for same or any part thereof in bonds or debentures of this company; (h) To draw, make, accept, endorse and execute promissory notes, bills of exchange, warrants and other negotiable or transferable instruments; (i) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (j) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on, or any business similar thereto, or possessed of property suitable for the purposes of this company's business, and to issue in payment or part payment for any property, rights or privileges acquired by the company, or for any guarantees of the company's bonds, or for services rendered, shares of the company's capital stock, whether subscribed for or not, as fully paid and non-assessable, or the company's bonds; (k) From time to time to apply for, purchase or acquire by assignment, transfer or otherwise, and to exercise, carry out and enjoy any statute, ordinance, order, license, power, authority, franchise, concession, right or privilege which any government or authorities, supreme, municipal or local, or any corporation or other public body may be empowered to enact, make or grant, and to pay for, aid in and contribute towards carrying the same into effect, and to appropriate any of the company's stock, bonds and assets to defray the necessary costs, charges and expenses thereof; (l) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept service for and on behalf of this company of any process or suit; (m) To lease, sell or otherwise dispose of the property and assets of the company, or any part thereof, for such consideration as the company may deem fit, including shares, debentures or securities of any company; (n) To amalgamate with any other company having objects similar to those of this company; (o) To distribute among the shareholders of the company in kind any property of the company, and in particular any shares, debentures or securities belonging to the company, or which the company may have power to dispose of; (p) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Upper St. Lawrence Power Company, Limited," with a capital stock of three million dollars, divided into 30,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 23rd day of September, 1913.

THOMAS MULVEY,
Under-Secretary of State.

13-2

Dated at Toronto this 29th day of September, 1913.

BLAKE, LASH, ANGLIN & CASSELS,
Solicitors for Upper St. Lawrence Power Company, Limited.

ARCTIC GOLD EXPLORATION SYNDICATE, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 4th day of September, 1913, incorporating Charles Vane, of the Town of Grimsby, in the Province of Ontario, financial agent, George Patrick Reid, broker, James Hilton Hoffman, solicitor, Nugent Talbot Marquetti, accountant, and Alfred Ernest Wills, medical doctor, of the City of Toronto, in the said Province of Ontario, for the following purposes, viz.:—(a) To explore and prospect the territories known as Labrador, Ungava, Keewatin, Hudson's Bay, Baffin's Land and other Arctic regions for gold, coal and other minerals; (b) To trade in furs, fish, ivory, oil, whalebone and other Arctic products; (c) To establish posts at different points for trading purposes; (d) To acquire by purchase, lease, license, exchange or in any other way and to hold, develop, work, maintain and manage mines, mining rights, mining claims, quarries, deposits and properties of all kinds, and minerals, metals, ores and stone of all kinds, and to deal in, sell, lease, exchange or dispose of the same, or any part or interest therein, in any way whatsoever, and to carry on mining and quarrying operations of every kind; (e) To dig for, refine, reduce, smelt, manufacture and prepare for use by any means or process whatsoever, minerals, metals, ores and stone of every kind, whether belonging to the company or not, and to deal in, sell and dispose of minerals, metals, ores and stone of every kind and all products or any part thereof; (f) To acquire by purchase, lease, license, exchange or in any other way and to hold, manage and use any real property from time to time necessary or convenient for the carrying on of the operations of the company, and to sell, lease, alienate, convey, exchange and deal with in any way from time to time the whole or any portion thereof or any interest therein; (g) To acquire by purchase, lease, license, exchange or in any other way and to build, construct, improve, maintain, work, manage, carry out or control any roads and ways and tramways, branches and sidings on lands owned or controlled by the company, bridges, reservoirs, watercourses, wharves, docks, mills, furnaces, manufactories, warehouses, shops, stores, houses, engines, machinery and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests or operations, and to contribute to, subsidize or otherwise assist or take part in the building, construction, improvement, maintenance, working, management, carrying out or control of any part thereof; (h) To acquire by purchase, lease, license, exchange or in any other way and to build, charter, maintain, work, manage and operate vessels of all kinds for the transportation of minerals, metals, ores and stone and all products thereof and machinery, stores and articles of all kinds, and to contribute to, subsidize or otherwise assist or take part in the building, chartering, maintenance, working, management and operating of such vessels; (i) To equip, maintain, repair, acquire by purchase, exchange, lease, hire, charter, manage, own and control or otherwise deal with all kinds of steamships and other vessels, storehouses, warehouses, docks and wharves; (j) To build, lease, acquire and manage hotels, boarding houses, stores, shops, apartment houses and other establishments in connection with the business of the company and lease or sell the same; (k) To buy, sell and deal in furs, fish, ivory, oil, whalebone and in other goods, wares and merchandise, and to acquire, build, maintain, own and operate factories, shops and stores for that purpose; (l) To acquire, build, alter, hold, lease and manage houses and buildings necessary or convenient for the use of persons employed by the company and the family of such persons; (m) To carry on any other business which may seem to the company capable of being conveniently carried on in connection with its business, or calculated directly or indirectly to enhance the value of or render profitable any of the company's properties or rights; (n) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose which may seem directly or indirectly calculated to benefit this company; (o) To purchase, take on lease or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, and in particular any machinery, plant or stock-in-trade; (p) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (q) To sell, lease, exchange or dispose of the undertaking of the company, or any part thereof, for such consideration as the company may think fit, and in particular for shares, bonds, debentures or securities of any other company having objects altogether or in part similar to those of the company; (r) To sell, improve, manage, develop, exchange, lease, dispose of, distribute in specie or otherwise deal with all or any part of the properties, rights and assets of the company; (s) To do all and any of the above things as principals, agents, contractors, trustees or otherwise, and either alone or in conjunction with others; (t) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Arctic Gold Exploration Syndicate, Limited," with a capital stock of one hundred and five thousand dollars, divided into 105,000 shares of one dollar each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 9th day of September, 1913.

THOMAS MULVEY,
Under-Secretary of State.

11-2

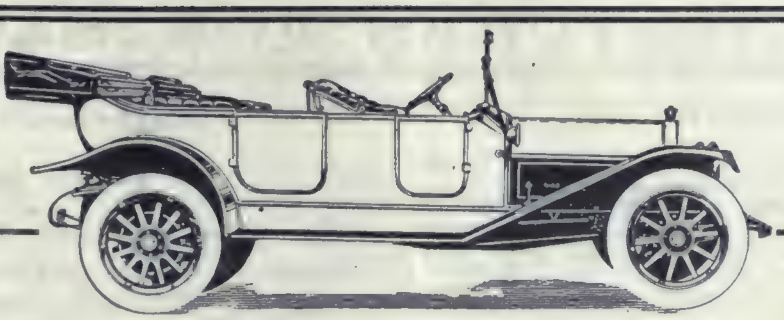
H. Welch; parliamentary, Mr. J. Hanbury; reception, Mr. J. W. Curran; commercial intelligence, Mr. H. Davidson; technical education, Mr. F. L. Leighton; press and advertising, Mr. G. McKenzie.



TIMES CHANGE

Canadian Car in Line with World's Best

Ten years ago the best cars came from Europe. Five years ago United States shared the honor. To-day, no car, here or abroad, excels the Canadian-built

RUSSELL-KNIGHT

The Russell-Knight motor embodies all the experience and practice of Knight engine builders. All the knowledge gained by their engineers in building Knight type motors—all that Charles Y. Knight (the inventor) could contribute—went to perfect the Russell-Knight Engine.

Added to this motor is a chassis, every detail of which has been proven by 12 months' test.

—a body low-hung, clean-lined and trimmed in royal taste.

—"Comfort-Equipment," like our exclusive tonneau heating system; 12-inch deep Turkish type cushions; auxiliary windshield for the tonneau passengers and extra seats that are seats, not stools.

—"Convenience Equipment," such as electric starting and lighting; left side drive with centre control; engine driven pump for tire inflation—in fact, every feature of luxury or utility your taste could demand.

To buy any car without seeing the Russell-Knight—without experiencing the immeasurable power of its wonderful engine or the enjoyment of its luxurious appointment—is to jeopardize your investment in your car.

Russell-Knight 1914 Chassis and Standard Bodies are as follows:

Russell-Knight, 4-cylinder "28"		**Russell-Knight 6-cylinder "42"**	
Roadster Model	**$3,200**	**7-Passenger Touring Car**	**$5,000**
5-Passenger Touring Car	**$3,250**	**5-Passenger Phaeton**	**$5,000**

Both chassis are built with Landaulet and Limousine bodies at proportionate prices. Catalogue on request. All quotations F.O.B. West Toronto
